*Mackay Radio*

NR 64

18 MARCH 1941

From: Kita.

To: Foreign Minister, Tokio.

When the two Honganji Missionaries: Azakawato Mitanihira (?) Home address: Shimane Kin, Oti Gun, Kawatomuna (correction Kawatomura) and Okamoto Taiyu, home address: Tokio, Suginami Ku, Kamlogikubo (?) #730 request passports from there Tohawaii (from Washington ?) If there is no objection after an examination of their records, please expedite the forwarding of the passports. Both men are coming to fill vacancies.

NR 66

21 MARCH 1941

From: Kita.

To: Foreign Minister, Tokio.

(by code in mail to Washington).

\* \* \* According to despatches from Auckland and Sydney the light cruisers Brooklyn and Savannah, the destroyers Case, Shaw, Cummins, Tucker, arrived at Auckland on the 17th; and the heavy cruisers Chicago, Portland and the destroyer Clark, Cassin, Cunningham, Downs, Reid arrived at Sydney—both groups on a friendly visit x The first group departed from Auckland on the 20th and may return to Pearl Harbor x It is reported that the second group will also go to Brisbane x Today's newspapers report that the above fleet sailed under sealed orders and that although they entered Pago Pago on the 9th and departed there on the 11th, that the final destination was not known by "outsiders" (gaihu) until they arrived. The maintenance of secrecy on this trip was a great success it was reported.

*Mackay Radio*

NR 72

27 MARCH 1941

From: Kita.

To: Foreign Minister, Tokio.

\* \* \* Monimura reported for duty on the 27th (Correction Morimura).

*Mackay Radio*

No. 76

29 MARCH 1941.

From: Kita.

To: Foreign Minister, Tokyo.

Holcomb has not arrived in the past ten days. Furthermore as the Harrison (steamship) will not return to our country the subject person is the one who is going direct to Manila.

*Mackay Radio*

NR 77

29 MARCH 1941

From: Kita.

To: Foreign Minister, Tokio.

Re passports for sailors on Japanese ships calling at the port of Honolulu and other US ports . . .

R. C. A.

NR 78

1 APRIL 1941

From: Kita.

To: Foreign Minister, Tokio.

Ref #29 of 7 March

With respect to the request of the client (Irainin) although I realize that . . . is unreasonable, please forward by mail on the Yawata Maru which departs from Yokohama on the 10th of April X I appreciate your special efforts.

R. C. A.

3 APRIL 1941

81

From: Kita.

To: Foreign Minister, Tokio, Manila Consulate.

Holland's foreign minister, his wife, and the colonial minister (Takumu Gaimuken Daijin) arrived here from San Francisco on the 2nd via Clipper and departed for Batavia via Manila on the 3rd X Local newspapers stated that this inspection of the Nel at this time is noteworthy.

R. C. A.

. 5 APRIL 1941

NR 82

From: Kita.

To: Foreign Minister, Tokio.

Re charges against the owner of the confiscated fishing boats . . .

NR 84

APRIL ? 1941

From: Kita.

To: Foreign Minister.

Later seizure proceeding have been instituted against the other eighteen of the nineteen ships mentioned in my previous dispatch X After considerable deliberation a court judgment was obtained under which the 1st of the ships was confiscated by the US Government X Even tho it was to be put up at auction, judging from examples on the mainland, by the time the price is so reduced by sale at auction, the owner gets nothing X Furthermore the parties concerned get quite a blow from the customs as a result of this seizure X Already steps are being taken to claim loss from a standpoint of damage to the boats, and in one case authority has been granted for a release from bond X Later on such steps will be taken in all cases.

R. C. A.

19 APRIL 1941

NR 94

From: Kita.

To: Consul, San Fran.

Radio industry employee (?) Fukuda departed here the 18th for your city X Because of his position please use your influence in getting him through customs.

NR 96

21 APRIL 1941

From: Kita.

To: Gaimudaijin, Tokio.

President Roosevelt's eldest son, Captain (USMC) James Roosevelt together with Major General Thomas arrived here on the 20th via Clipper and departed for Manila on the 21st X The local newspapers said that both men said that any statement as to destination or mission must first come from Washington X Perhaps is Chungking.

R. C. A.

26 APRIL 1941

101

From: Kita.

To: Consul General, San Fran.

JULY 30 1941

From: Kita

To: Koshi Washington  
Foreign Minister Tokyo

Since the enforcement of the law freezing Japanese credits in America has been anticipated for a long, at this office and through the Japanese language newspapers all the residents were warned of the effects upon them in case it was put into force, and even with the enforcement of the law on the 26th the residents did not show any particular disquietude. The methods of application of the law were announced and since the actual restrictions on the residents businesses, remittance to Japan, and importation of Japanese goods were considered quite lenient, they were accepted calmly. The remittances to Japan in anticipation of the freezing order and also the hoarding of U. S. currency has amounted to a considerable sum. Furthermore the United States authorities here have emphasized that although in the midsts of the worst anti-American circumstances the residents have nothing to fear so long as they obey U. S. laws.

29 SEPT. 1941.

No. 256  
From: Kita  
To: Koshi Washington  
Ryoji San Francisco  
Foreign Minister Tokyo

Two of the seven fishing boats reported released according to stipulations were sold on the 26th at prices comparable to their appraised values to the Hawaii Canning Company which has a very close connection with the boats, and court proceedings were dispensed with.

In connection with the above, the former owners, at the beginning as in my telegrams, must pay to the court out of the selling price 20% of the appraised value (\$2,110 for one boat and \$1,017 for the other) and also court costs (\$178.86 for one and \$185.80 for the other).

It is expected that the same procedure will be followed in the cases of the other five boats. However, the above being a civil case, a decision is expected, but criminal procedure still remains, but this also is expected to be disposed of with leniency.

No. 316

From: Kita

To: Koshi Washington

Foreign Minister Tokyo

Secretary of War Stimson on the third pointed out to Congress that the aliens in Hawaii amount to one-tenth of the total population and emphasizing the danger of strikes and sabotage he demanded that in case of the existence of an emergency on an attack, the President should be granted the right to declare martial law in Hawaii and also Porto Rico. According to information from Washington on the 4th, Delegate King issued a protesting statement to the effect that the above was an insult to the loyalty and patriotism of the (local) Government and people. The territorial Governor also reported that since the power to declare martial law was already vested in the Governor of the Territory there was no necessity for such legislation. In short, the recent Army proposal was to permit the President to directly order the local military commander to put martial law into effect.

*Radiogram R. C. A.*

No. 368.

6 DEC. 1941.

From: Kita.

To: F. M. Tokyo.

Referring to last paragraph of your No. 123.

1. The Army ordered several hundred balloons for training at Camp Davis NC on the American mainland. They considered (at that time) the practicability of their employment in the defense of Hawaii and Panama. Investigation of the vicinity of Pearl Harbor reveals no locations selected for their use or any preparations for constructing moorings. No evidence of training or personnel preparations were seen. It is concluded that their installation would be difficult. Even if they were actually provided they would interfere with operations at nearby Hickam Field, Ewa Field and Ford Island. The whole matter seems to have been dropped.

2. Am continuing in detail the investigation of the non-use of nets for torpedo defense of battleships and will report further.

#### EXHIBIT 3

These are work sheets for use in decoding messages based on the Japanese "Telegraphic Code Type 'O'."

There are three groups of coding on page one, the last group continuing on page two. The decode of the last group when translated into English is as follows:

(Strictly Confidential)

Of late in Japan the demand for American dollar currency has increased. In view of this, when mei jin (the English equivalent of this is master or expert) return to Japan, please arrange so that they will, as far as possible, not bring back money orders but bring with them paper currency in as large amounts as possible.

There are also two radiogram blanks containing 16 and 12 vertical groups respectively of 19 letters which resemble the above-described work sheets.

These work sheets are also similar to the photostatic copies of work sheets found at the Consulate and forwarded to the Bureau by letter dated February 27, 1942.

#### EXHIBIT 4

The following is the special method for using "WA" and "O" (or "WO") code:

##### 1. Special method for using the "WA" code.

This method is to be used for strictly secret telegrams and, similar to the method of use in the past, is an instrument for transposing letters. The following five ways are the methods for using this instrument:

(a) Based on two separate key words such as *kanda*, *kudan* with five letters as a unit, we transpose letters alternately. The words shall be composed of five letters of the "alphabet" with one index taken from *c*, *g*, and *o* and placed as the second and the fourth letters with the same vowel (including *v*) picked at random placed as the first, third, and the fifth letters. For instance, *icici*, *agaga*, *uouou*. (Thereonafter where the index is made up of five letters (?) of the "alphabet" is the same in all of the special methods for using "WA" and

"O" (or "WO") codes. Furthermore, since in the index of the special method for using the "WA" code where one vowel picked at random is repeated in the first, third, and the fifth letters is common to all, this will not be indicated severally.

\*(*kanda, kudan* are crossed out with red pencil and in the margin directly overhead is written "revised 6-1, (a) *AKASAKA*")

(b) As in (a), we transpose letters alternately based on two separate key words such as *sanso, suisso* having five letters as a unit. As index, we place either *z, j, or x* as the second and the fourth letters. For instance, *isisi, ejje, oxoxo*.

\*(*sanso, suisso* are crossed out with red pencil and in the margin directly overhead is written "SEKITAN") 6243715

(c) Based on three separate key words such as *Tokyo, Kyoto, Osaka* with five letters as a unit, we transpose letters alternately. As index we place *t* and *d* as second and fourth letters. For instance, *atata, ududu*.

\**Tokyo, Kyoto, Osaka* crossed out. Inserted in margin is "FUKUOKA." 2637541

(d) We base the transposition of the key word, *Otohime* with seven letters as a unit. As index we use either *b, v, or p*.

\**Otohime* crossed out and *AKISAME* 1547243 inserted in margin.

(e) We transpose letters alternately based on two separate key words such as *Kumagai, Naozane* with seven letters as a unit. As index we use either *m* or *n* as the second and fourth letters. For instance, *imim, enene*.

2. Special method for using "O" (or "WA") code. This method of use is being established to supplement the SPECIAL METHOD OF USE OF "WA" CODE, and is the same as (1) when it comes to being based on transposition of letters. However, (c) shall be limited to usage only when communicating in regard to telegraphic code.

(a) Transposition shall be based on the key word, *x Tagonoura*, having nine letters as a unit. In the case of index of SPECIAL METHOD OF USE OF "O" CODE, it is the opposite to that of "WA" code. The same uniform consonant shall be placed as the first, third, and fifth letters, and the same vowel picked at random shall be placed as the second and fourth letters. As the first, third, and fifth letters of the index for (a) either *l* or *r* shall be used. For instance, *lolol, rurur*.

*x* means this was suspended after 7-15.

(b) Transposition shall be based on the key word, *x Odanobunaga*, having eleven letters as a unit. Either *t* or *d* shall be used as first, third, and fifth letters of this index. For instance, *totot, didid*.

*x* means this was suspended after 7-15.

(c) Based on key word, *Hanayoridango*, having thir *x* teen letters as unit. Either *h* or *f* shall be used first, third, and fifth letters of the index. For instance, *hahah*.

\**Hanayoridango* is crossed out and following inserted: SOKOKUNOTAMENI

(d) Based on key word, *Kinokuniyabunzaomon*, having nineteen letters as unit. As index, either *k* or *g* is used as first, third, and fifth letters.

(Annotation) When based on this SPECIAL METHOD OF USE, the index of the ordinary method shall absolutely not be attached to either "WA" code or "O" (or "WO") code.

\*The following word is inserted in the margin:

K I N O K U N I Y A B U N Z | A E M O N  
7 5 10 14 8 16 11 6 18 13 17 12 19 2 4 9 15 13

3. Method or arrangement of end of cryptograms (code ?). The following methods should be expressly used in arranging the ends of both SPECIAL METHOD OF USE OF "WA" CODE and SPECIAL METHOD OF USE OF "O" (or "WO") CODE.

(a) When transposing based on five letters as a unit, if fillers are necessary for the end words, after using fillers, (on fillers refer to (c)) arrange the five letters of the end word(s) according to day telegram is dispatched in the following manner:

|                    |       |
|--------------------|-------|
| (A) day with 1, 6  | 54321 |
| (B) day with 2, 7  | 43215 |
| (C) day with 3, 8  | 32154 |
| (D) day with 4, 9  | 21543 |
| (E) day with 5, 10 | 15432 |

(b) When transporting with seven or more letters as unit:

(A) When prescribed transposition ends exactly at the end of the cryptograms:

(1) When this ends at the end of one word (five letters), the method in (a) is not necessary.

(2) When this ends in the middle of one word, fillers shall be used to make it into five letters, and the arrangement should be according to the method in (a). Therefore, a portion of the end word shall have twofold transposition.

(B) When at the end of the cryptogram(s) there originates an incomplete number which falls short of filling up the unit:

(1) When the end of the portion with completed transposition comes exactly at the end of one word, an incomplete number will result. In regard to the portion which has incomplete transposition, five letters each shall be arranged according to the method in (a). (When fillers are necessary, use them in the last word.)

(2) When that portion with completed transposition ends in the middle of a word, five letters each shall be arranged according to (a) excepting (in ?) that end portion with transposition completed but not attaining one word (five letters) and that portion which has incomplete transposition. (In other words, the end portion with transposition completed shall be transposed twice. Furthermore, in case of necessity for the use of fillers, using them in the last word is same as in the case of (a).)

\*This paragraph is unclear even in the original text.—Translator.

(c) For fillers in this SPECIAL METHOD OF USE, the fillers prescribed in the code book(s) are not used at all. Appropriate letters which do not make sense should be selected and used. However, in cases where two or more fillers are necessary, be sure to mix and use vowels and consonants. Moreover, be careful not to repeat the same letter or place it one after another, or use them over and over again, or arrange them in "alphabet" order.

(d) The last word (not the last word in the text of the telegram) of a cryptogram which is arranged in the foregoing manner should always be placed at the beginning of the cryptogram (not at the beginning of the text of the telegram). In other words, place the last word of the cryptogram next to the index. (This can be done easily if at the time of dispatching a telegram, a space for one word is left vacant next to the index and after wording of the cryptogram which begins directly after the space is completed the vacant space is filled.)

4. Telegrams based on this method shall all be handled as strictly confidential. Consequently, the word "STRICTLY CONFIDENTIAL" which in the past was inserted at the beginning of the cryptogram or at the end shall be omitted from this method of usage.

\*In the right hand corner of first page is inscribed the date "1939."

To: Consul-General MIZUSAWA

Re: RECORDING OF CERTIFICATES OF CUSTODY, CATALOGUES OF TRANSFER OF DOCUMENTS, CATALOGUES OF MANUSCRIPTS DESTROYED BY BURNING.

Code type: (AN)-YU-GO-#5

In the past the names of codes and numbers on telegraphic codes, certificates of custody of documents, catalogues of transfer of documents, and catalogues of manuscripts destroyed by burning, have been written as is and transmitted. Since this is very unsatisfactory from the standpoint of protection of the codes when such official messages are opened and detected, hereafter you should revise the method for recording certificates of custody of documents, catalogues of transfer of documents, and catalogues of manuscripts destroyed by burning and also the method for recording official messages pertaining to the foregoing as designated below.

| <i>Code Type</i> | <i>Name of country</i> |
|------------------|------------------------|
| I (as in JIM)    | BRITAIN                |

New custodian: Kyichi Gunji, Consul-General

Japanese Consulate General at Honolulu

To: the AIDE-DE-CAMP

Navy Ministry

**Remarks**

1. The scribbling at the upper right hand corner of the page reads, "four copies".

2. The last work in the title, 1939, is changed with ink to 1940, and this date is the one inserted in the translation.

3. Also in the title, the words "presently in possession" are crossed out and changed to "transfer of" which term is used in the translation.

4. The date at the end of the record, namely 12-31-39, is crossed out and changed to read 3-13-40, and this is inserted in the translation.

**EXHIBIT 22.***Record of transfer of secret books for year 1939*

Re: SUBMISSION OF RECORD OF SECRET BOOKS FOR YEAR 1940 PRESENTLY IN POSSESSION and also RECORD OF TRANSFER OF SAME

2 copies of RECORD OF SECRET BOOKS FOR THE YEAR 1940 PRESENTLY IN POSSESSION and 4 copies of RECORD OF TRANSFER OF SAME as follows, and we hope you will dispose of the matter at your own discretion.

1. 2 copies of RECORD OF SECRET BOOKS FOR YEAR 1940 IN POSSESSION
2. 2 copies of RECORD OF TRANSFER OF SECRET BOOKS 3-13-40
3. 2 copies of RECORD OF TRANSFER OF SECRET BOOKS 9-11-40

**EXHIBIT 32**

Date: 12-2-41

From: Foreign Minister Togo

To: Consul General Kita

Re: Burning of code books.

Code type: (AN)-GO-2445

(Strictly confidential)

Be careful so that outsiders will not find out (?) and immediately take the following steps:

1. Leave one each of code type O (or WO) and RYAKU (type L) and burn all telegraphic codes (including code books used in common by the three Ministries and code books connected with the Navy).
2. Simultaneous with the burning, telegraph the one word, HARUNA.
3. Burn all secret documents containing records of incoming and outgoing telegrams.
4. After taking precautions so that no outside suspicion will not fall, dispose of all secret documents in the same manner.

Since the foregoing measures are in preparation for and in consideration of an emergency, keep this matter to your Consulate alone, and we hope that you will hereafter carry out your duties with calmness and care.

This letter bears the seal of NAGAO KITA and the name OKUDA (the Vice-Consul OTOJIRO OKUDA).

(NOTE): Register of messages transmitted reflects that message #359 is in "re burning of codes".

**EXHIBIT 33**

The following translation was prepared by the Office of Naval Intelligence, Honolulu

19 November, 1941

From: Consul General Muto

To: /not stated/

Subject: Overseas broadcasts in the event of international crisis involving Japan

Order #297 (Memorize)

Foreign Minister Order No. 2253 (19—). Code for chief of consulate/legation, &c.

As a result of pressure of international situation when we may reach the most critical condition at any moment—in such circumstances, because it is a time when telegrams between Japan and opposing countries will be stopped

when an international crisis is near, in our overseas radio broadcasts directed to all points in the middle and at the end of Japanese language news a weather report will be made:

1. If concerning America-Japanese relations: "Kigashi no kaze, ame".
2. If concerning Japan-Russian relations: "Kita no kaze, kumori".
3. If concerning Japan-English relations (including invasion of Thailand, Singapore, Malay, N.E.I., Eastern India): "Nishi no kaze, hare".

By repeating these (phrases) as shown above, it is desired that you make suitable disposition of books and codes.

It is desired that you handle this with the greatest secrecy. It is desired that you, according to this information /pass this news along immediately/?.

## EXHIBIT 34

11-2-41

From: Foreign Minister

To: Consul General Kita

RE: Disposition of ANGO (type of code). Code type L (AN)—Urgent—  
#118 Handler (handling?) of code of head of Consulate

In reference to your telegram, #232, the instructions of the transmitted telegram GO-#2353 do not mean that the ANGO (type of code) should be burned immediately. The point of the broadcast of this matter is that when the worst is about to come about the opposing nation is expected to suspend communication by means of coded telegrams and this (broadcast) is aimed at informing the diplomatic establishment in that nation about this situation without recourse to telegrams. Regardless of what the actual situation is at the place you are stationed, do not dispose of the ANGO unqualifiedly. As far as the real situation permits, preserve it to the very last.

NOTE: The following are inserted in the margin on page 1:

1. Seal of Consul General KITA.
2. Signature of Vice-Consul OKUDA.
3. The number 827 in the upper left margin.

## EXHIBIT 35

[1]

Date: 11-27-41

From: Consul General Muto at San Francisco

To: Consul General Kita

Re: Method of communication (on matters) pertaining to the situation.

Code Type: (AN)-GO-307 4-1

Telegram from the Minister to this Consulate #GO-2400 (4-1) 27th, P. M.

Very urgent

Handler of Kanoho Fugo (code of head of establishment):

At a time when the situation is tense, we are going to use IMMEI DEMPO (telegrams in which names are mentioned, which names are to have certain meanings) in the following manner as method of communication to cope with the critical situation. We hope you will understand.

Since we shall use the names on the left column and compose an appropriate ordinary telegraphic message (plain wording) in order to telegraph contents on the column at the right, we hope that there will be no mistakes in operation (of the code).

Illustration:

"Japanese and Russian troops clashed." This message will be dated the 15th and will read as follows: "Secretaries HIZIKATA and KUBOTA have been ordered to service at your Consulate STOP"

Telegrams in the future which will be based on this method shall always have the word, STOP, inserted at the end of the telegraphic wording so as to distinguish them from the rest of the telegrams. (Consequently, the last word will not be used in other telegrams.)

[2] Date: 11-27-41 P. M.

## EXHIBIT 36

THE FOLLOWING TRANSLATION WAS PREPARED BY THE OFFICE OF NAVAL  
INTELLIGENCE, HONOLULU

158 16 -36

To: CONSUL GENERAL MUTO, SAN FRANCISCO

From: CONSUL GENERAL KITA, HONOLULU

Matters relating to ( ) telegram indicators (authenticators).  
(memorize, : confidential?)

*Paraphrase:*

Instruction by mail #148.

Telegram #383 from the Ambassador.

Telegram #1586 from the Minister (of Foreign Affairs?)

In the future, on The Telegrams originated by this Department, the indicator *Kongo* should be placed in front of the beginning number of *urgent* telegrams, and the indicator *Hyuga* in front of the beginning number of routine (ordinary) telegrams. At the end, in *urgent* Telegrams, use the indicator *Takao* and for ordinary Telegrams use *Atago* at the end.

/Can't decipher all the last line, but it may be/—

Circular telegram should be like Ordinary reports (information).

## EXHIBIT 37

*September 20, 1941.*

From Consul-General Muto at San Francisco.

To Consul-General Kita

(Subject) Matter concerning revision of handling urgent wire.

"AN" (designation used for a certain class of wire—probably cryptograph)

GO #209

Wire order #2040 from the Minister (20th, P. M.)

(strictly secret)

Although there are reasons for sending outgoing wire GO-#1767, recently the number of outgoing and incoming wires have finally decreased. For instance, today's incoming wires have reached a point where it was possible to make a general interpretation. Consequently, henceforth, when attaching "urgent" or "very urgent", give consideration to its content and its urgency. In case very urgent action or reply wire is necessary due to misuse of an urgent report (telegram?), care should be taken so as not to cause important error in its disposition. In this connection, also with the idea of economizing the telegraphic fees in mind, following revision in the handling of urgent and very urgent wires has been made and it has been decided to put it into practice from October 1. Hence, please follow out the above.

## NOTE

1. Emergency wire. (Japanese word used is KINKYU, giving sense of emergency) Matter that requires immediate disposition in spite of the fact that it is late in the night (the word "urgent" should be written on the wire draft). The word KINKU (urgent) should be written at the very beginning of the text.

2. Very urgent wire. (Japanese word used is SHIKYU, giving sense not as urgent as KINKYU). In case a matter is received late in the night and could be taken care of early the next morning.

The word DAIQU (very urgent) should be written at the head of the text.

3. Urgent wire (Japanese word used is SHIKYU, giving a sense that it should be taken care of as soon as possible. In other words, it is urgent, but its urgency is not as strong as when the word KINKYU, mentioned in Note 1 is used.)

Matter that should be disposed of according to priority without regard to the order of the prefix.

The word SIKYU (urgent) should be written at the head of the text.

Please notify immediately with special wire as informed.

The above letter bears the seal of NAGAO KITA, the Consul-General and the name of OKUDA (OTAJIRO OKUDA, the vice-Consul).

## EXHIBIT 38

April 26, 1941. Out.  
May 8, 1941. In.

From: Consul NAKAUCHI at Los Angeles.  
To: Consul-General KITA.  
(Subject)

Concerning attendance of representatives of the National Christian Council of Japan at the special meeting of the Federal Council of Churches in America. "AN" (designation for a certain class of wire). (code Type) YU-GO #23.

To: The Minister, Number 53 (26th, P. M.)

Regarding your message "25"

The meeting ended as scheduled and the gist of it is as follows:

1. The main subjects of discussion were: the question of uniting the Christian churches of Japan; the Shinto temple question in Korea; and the question of improving the America-Japan relations.

2. Furthermore, a change was made to extend the meeting about a month and dividing the group into four branches, such matters as concrete plan of improving America-Japan relations which are now confronting them, the religious questions relating to the United States and Japan, and the measures that should be taken by the churches as churches will be studied by a conference of mixed group consisting of the Japanese and Americans.

3. A joint communique will be issued by this Council within a few days.

4. A consultation will be held at New York on May 13 and the last meeting will be held in Chicago for 3 days, starting from May 29.

Furthermore, the party, with the exception of KAGAWA, is scheduled to leave for Japan on June 5.

Above has been sent by "AN" (certain type of wire) to the Ambassador in America and other offices in America.

The above letter bears the seal of NAGAO KITA, Consul General and the name OKUDA (OTOJIRO OKUDA, Vice-Consul).

## EXHIBIT 39

Translator's note: The red stamp is KITA's seal. ODUDA.

JUNE 9, 1941. Out.  
JUNE 19, 1941. In.

From: Consul NAKAUCHI of Los Angeles  
To: Consul-General KITA

(Subject) Matter concerning strike by employees of North American Aircraft Plant :a--

"RYAKU" (designation used for a certain class of wire—probably code) #33.

To: Minister. #92 (9th, P. M.)

Regarding the outgoing wire #67.

(JORD—probably means information A)

Later developments of the strike is as follows:

1. At the big meeting (general meeting) held in the afternoon on the 8th by the employees, FRANKENSTEIN who was sent by the AUW headquarters read of MURRAY, CIO president, THOMAS, UAW president, and PERKINS, Secretary of Labor, to return to work and urged to quit the strike, but he was forced to get down from the platform in the midst of his speech and the employees decided to continue the strike.

2. Against this measure, the head of the air corps in the western division, Lt. Colonel BRANSHAW, receiving an order from Washington, declared that "By virtue of the authority of the President and by order of the Secretary of War, the Army will take over the said plant and its business." Simultaneously, leading 3,500 armed soldiers, aided by 500 policemen equipped with tear-gas broke up the picket lines and declared that the plant will be reopened immediately under the Government control.

Special wire was sent to the Ambassador in American and code wires were sent to other offices.

Re: STRIKE BY EMPLOYEES OF "NORTH AMERICAN" AIRCRAFT COMPANY.

Code Type: (RYAKU)-YU-GO-#32

To the Minister #87 (the 6th, P.M.)

(Report A)

Concerning the threatened strike for higher wages (raising of minimum wages from 50¢ to 75¢ or a uniform increase of 10¢ in wages) by 9,000 employees of the local "North American" Aircraft Company who are also members of the "United" Automobile Workers' Union of the CIO, negotiations have been going on through the good offices of the National Defense Mediation Board in Washington for the past two months. However, since the board is believed to be working in league with the company and deliberately postponing settlement, the strike was started early on the morning of the 5th with a "picket" line posted, and work by all employees numbering 12,000 has been stopped. Because of this, the Army Air Corps at "March Field" has taken out 8 completed B-25 bombers (5 more planes were taken out on the 6th) and 21 AF6A training planes. The local AFL intends to wire the Office of Production Management that the majority of the majority of the workers are being victimized by the radical element of the CIO. (Concerning the relation between the AFL and the CIO, refer to CONFIDENTIAL—#454 dated 5-10.)

The company at present, putting those of the United States and Britain together, has orders for warplanes amounting to \$200,000,000 and produces monthly 225 planes, and is said to manufacture 25% of the total production of planes in the United States.

This report has been wired to the Ambassador and has been sent by coded telegrams to the various diplomatic establishments in the United States.

(Note: In the margin is inserted the number, 263, and also the seal of Consul General KITA and the signature of Vice-Consul OKUDA.)

## 478 CONGRESSIONAL INVESTIGATION PEARL HARBOR ATTACK

Pages 6, 7

Dispatched: 6-11-41

Received: 6-23-41

From: Consul NAKAUCHI at Los Angeles

To: Consul-General KITA

Re: STRIKE BY EMPLOYEES OF "NORTH AMERICAN" AIRCRAFT COMPANY.

Code type (RYAKU)-YU-GO-%34

To the Minister #95. (11th; P. M.)

Reference: Outgoing telegram #92  
(Report A)

The Military took over the factory and the strike ended on the night of the 10th. From the 10th to the 11th the major portion of the employees returned to their work and began day and night production. During the strike there was a decrease in production of about forty planes. Armed troops guarded the inner and outer premises of the factory, and not only did they give personal protection to the workers, but also it is reported that three of the strike leaders have been fired and seven others are being held.

Details will be reported by mail.

The Ambassador is in receipt of this relayed telegram and the various diplomatic establishments have been notified by coded messages.

### EXHIBIT 41

The head of the office—KITA's seal. Person in Charge—OKUDA.

Written—July 5, 1941.

To: San Francisco

To: Los Angeles

From: Consul-General KITA.

Subject—Investigation of the assets of the Japanese in America.

"AN" (designation used for a certain type of wire) Order #12.

Regarding order #599, strictly secret to America, from the Minister, in view of the times there are reasons which make investigation of this matter by this office within its jurisdiction considerably difficult and delicate. So, please send a return wire informing this office as to how the matter is being handled in your office.

This wire is addressed to San Francisco and Los Angeles.

### EXHIBIT 42

Head of Office—KITA's seal. Person in Charge—OKUDA.

Written—May 12, 1941.

To: Consul ITO at New Orleans.

From: Consul-General KITA

Subject—Mourning for Representative YAMAJI's death.

"HEI" (designation used for a certain class of wire—probably ordinary wire) #2.

To: Representative SHIMIZU, as follows:

We sincerely express our condolence over the death of Representative YAMAJI.

### EXHIBIT 43

The writing in red pencil reads:

MATTER PERTAINING TO CENSUS REGISTRATION AND ANNOUNCEMENT OF SAME.

1. Courtesy to gathering (Greeting to assembly).
2. In accordance with orders of the Japanese Government . . . . .
3. All came according to official orders; thank them for their assistance and cooperation.
4. Personally thank all for their friendship (the consular staff and their families.)
5. Not to visit each island.
6. Have self-confidence that Japan has been right in her acts.
  - a. In the Far-Eastern problem leading up to the present situation.
  - b. In the origin of the Chinese Incident.

c. Against present attitude of the United States towards Japan.  
 7. Actual abilities (power). (Words erased read: Power of Japan.)

8. "Rieki Daiho" (meaning now known) Represent interests (of Japan?).

Note: (by D.C.) Ricki daihyo refers to the representation of Japanese interests here after the breakoff of relations with the United States. It developed later that Sweden took over the representation of Japanese interests in the islands while Spain assumed this function in the rest of the United States.)

9. Request take custody of Consulate.

10. United States understanding. (Probably "with understanding of the U. S." meant.)

11. Emergency committee.

12. United Japanese Association, Chamber of Commerce and Industry (Japanese?).

13. Census registration.

14. Method of making remittances to Japanese residents of Hawaii in Japan.

15. Development of perseverance and independence (sympathy towards first and second generation Japanese.)

a. In comparison with Japanese residents of China.

b. Avoid unnecessary friction.

16. Do not blacken the Japanese name (would lower the position of the Japanese.)

17. Thank all officials and the public.

18. Pray for health.

19. Families in Japan will be protected.

20. Instructions to consular staff.

21. Announcement of census registration.

## CLAUSEN INVESTIGATION EXHIBIT No. 5

*Investigation by Lt. Colonel Henry C. Clausen, JAGD, for the Secretary of War, supplementary to proceedings of the Army Pearl Harbor Board*

The following documents were obtained from the District Intelligence Office, 14th Naval District, Honolulu.

a. Five secret photostats (one positive and one negative) of decoded cablegrams from the Japanese Consul General, Honolulu, to Tokyo. Dates and numbers of cablegrams in date order: 363, 3 December 1941; 364, 4 December 1941; 365, 4 December 1941; 221, 5 December 1941; 368, 6 December 1941; and 369, 6 December 1941.

b. One secret photostat of copies of four cablegrams all dated 27 November 1941 to the following addresses: Shagro, San Francisco; Dr. Holmes, 45 Young Hotel, Honolulu; Growsumida, Honolulu; and Shokin, Honolulu.

c. One secret photostat of copies of four cablegrams all dated 25 November 1941 to the following addresses: Rev. Hiro Higuchi, Waipahu Community Church, Waipahu, Oahu, T. H.; American Consul, Papeete; Y. Watanabe, Box 511, Walluku, Maui, T. H.; and Shokin, Honolulu.

d. One secret photostat of copy of coded and decoded cablegram dated 19 November 1941 addressed to Inosuke Hachiyae.

e. Four confidential 14ND, NNI-119 reports on the Japanese Consulate, Honolulu—Espionage Activities, dated: 9 February 1942, 14 February 1942, 15 June 1942, and 15 February 1943.

f. One photostat (Positive and Negative) of each of pages 1, 3 and 5 of a copy of a broadcast from Station JZI (9535 Kc), dated 8 December 1941, Japanese time.

g. An Analysis of the Japanese Espionage Problem in the Hawaiian Islands prepared by Counter Intelligence Section, District Intelligence Office, 14ND, dated 20 April 1943.

h. Memorandum for the Files, dated 3 December 1941, prepared by Lt. (jg) T. W. Joyce.

h1-h35. Various evaluations and related paper from 14ND, Honolulu.

6 DEC. 41

# 368

From: KIta

To: F. M. Tokyo

Referring to last paragraph of your No. 123

1. The Army ordered several hundred balloons for training at Camp Davis NC on the American mainland. They considered (at that time) the practicability of their employment in the defense of Hawaii and Panama. Investigation of the vicinity of Pearl Harbor reveals no locations selected for their use or any preparations for constructing moorings. No evidence of training or personnel preparations were seen. It is concluded that their installation would be difficult. Even if they were actually provided they would interfere with operations at nearby Hickman Field, Ewa Field and Ford Island. The whole matter seems to have been dropped.

2. Am continuing in detail the investigation of the non-use of nets for torpedo defense of battleships and will report further.

INVESTIGATION REPORTS

Confidential

Subject: JAPANESE CONSULATE, HONOLULU—Espionage Activities.

Report made at: Honolulu, T. H., 14th Naval District. Date: 9 Feb. 1942.

Report made by: Lt. George P. Kimball, USNR, and Lt. (jg) W. B. Stephenson, USNR.

Period covered: 5 Dec., 1941-9 Feb., 1942. Status of Case: Pending in 14ND.

Origin of Case: Receipt by DIO-14ND of various encrypted messages sent by Japanese Consul General, Honolulu, to Foreign Office, Tokyo, and Japanese Ambassador, Washington.

Character of Investigation: Espionage.

Enclosures: and References: (See first page of details.)

14ND (3)

Copy to: ONI (5)  
CinCPac (1)  
Com 14 (1)  
FBI-Hon (2)  
MID-HD (2)

Source File No.: 14ND #54A. ONI File No.:

Synopsis: On 3 December, 1941, the Japanese Consul General, Honolulu, transmitted by encrypted despatch to Tokyo a system of signalling by lights, cloths, fires, and radio (presumably to communicate with Japanese ships at sea, near the Hawaiian Islands), which signals would be used to announce the departure of U. S. Naval units from Pearl Harbor. The system was conceived, and submitted to the Consulate, by Otto KUEHN, a German subject and ex-officer of the German Navy. Evidence indicates all observation and reporting of ship dispositions and movements at Pearl Harbor was done by Consulate attaches or contacts (including, in at least one instance, KUEHN).

Other than suspicious lights (not conforming to the signal system) seen at night on the island of Maui, subsequent to 7 December, 1941, no evidence has been found that KUEHN'S signal system ever was employed.

The decoded body of the despatch of 3 December gave the sender's name as FUJII and the addressee as Chief of Third Section, Naval General Staff. Efforts to identify FUJII have so far been unavailing.

KUEHN, who has been in custodial detention since 8 December, 1941 will be charged with espionage and be tried by the Military Commission.

Deductions: Japanese naval espionage in Honolulu prior to 7 December, 1941, was carried on by Consulate attaches and contacts, among whom was Otto KUEHN, a German subject.

Enclosures:

- (A) Table Showing Number of Battleships, Heavy Cruisers, Light Cruisers, Aircraft Carriers, Submarines, Destroyers, and Destroyer-Type Vessels in Pearl Harbor, at 0800 and 1800, 22-30 November, 1941.
  - (B) Table of Number and Movement of Ships in Pearl Harbor, by Types, at Various Times between 0600 and 1800, 28 November, 1941.
1. On the morning of 5 December, 1941, a thoroughly reliable confidential informant furnished the District Intelligence Officer with copies of certain commercial communications sent and received by Japanese Consul General Nagao KITA, of Honolulu, during the period, 1-4 December, 1941. These messages were despatch traffic between Tokyo and Honolulu and Washington and Honolulu, that is, between Consul General KITA and Ambassador Kichisaburo NOMURA, in Washington, and Foreign Minister Shigenori TOGO, in Tokyo.

2. Preliminary evaluation of the importance of the messages was impossible to make, inasmuch as they were in code or cipher. They were, however, the first of such messages ever made available to this office, and for that reason deemed very important.

[2] 3. Efforts to determine the meaning of such messages were commenced immediately, but this task was not completed until the morning of 11 December. When the meaning of the messages was determined, the District Intelligence Officer, acting upon orders from Rear Admiral C. C. Bloch, USN, Commandant, Fourteenth Naval District, immediately conferred with Lieutenant Colonel George W. Bicknell, assistant chief of staff for G-2, Hawaiian Department, in charge of the Army Contact Office, Honolulu, and Mr. Robert L. Shivers, special agent in charge, Honolulu field office, Federal Bureau of Investigation, with regard thereto. (Meanwhile, arrangements to secure copies of other commercial radiograms and cablegrams to and from the Japanese Consulate, Honolulu, were effected.)

4. The following message, despatched by Consul General KITA to Foreign Minister TOGO, on 3 December, 1941, was the basis of subsequent extensive investigation by the three intelligence agencies:

From: Kita

To: Foreign Minister, Tokyo  
(Secret Military Message No. —)

(By Chief of Consulate's Code)

To: Chief of Third Section, Naval General Staff.

From: Fujii

Re Signals I Wish to Simplify Communications as follows:

(1) Code (following 3 section 8 line table) Battle Force, including Scouting Force, are about to put to sea—

1. Several Aircraft Carriers plan to put to sea.
2. All Battle Force has sailed first to third dates inclusive.
3. Several Aircraft Carriers have sailed first to third.
4. All Aircraft Carriers have sailed first to third.
5. All Battle Force has sailed fourth to sixth dates inclusive.
6. Several aircraft carriers have sailed fourth to sixth.
7. All aircraft carriers have sailed fourth to sixth.
- 8.

[3]

(2) Signal

1. Light in Lanikai Beach House at night—one light from 8 PM to 9 PM indicates "1", from 9 PM to 10 PM indicates "2". The below signals until midnight, in order, indicate "3" and "4". Two lights, according to the time, indicate "5", "6", "7", "8".

When not in accordance with (lights) above one full automobile headlight and one half light indicate "1", "2", "3", "4". Two full lights indicate "5", "6", "7", "8".

2. On the Lanikai coast during daytime from 8 AM until noon every hour one piece linen cloth (sheet) indicates "1", "2", "3", "4". Two pieces linen cloth indicate "5", "6", "7", "8".

3. In Lanikai Bay during daytime in front of harbor (offing) a star boat with one star on sail indicates "1", "2", "3", "4", a star and "III" indicates "5", "6", "7", "8".

4. Light in dormer window of Kalama House from 7 PM to 1 AM every hour indicates "3", "4", "5", "6", "7", "8".

5. "KGMB want ads" advertisements 9:45 AM—

(a) A Chinese rug, etc., for sale—apply P. O. Box 1476, indicates "3" or "6".

(b) A complete chicken farm, etc., apply as above, indicates "4" or "7".

(c) Beauty operator wanted—same—indicates "5" or "8".

In the event that in accordance with one of three items written above from Oahu a signal or radio message is impossible or Maui Island at a point located between the lower road six miles north of Kula Sanitarium and Haleakala Road which can be watch from the sea to the southwest and southeast of Maui, until the receipt of the signal "EXEX" this (the following) will be repeated for several days: A small fire on the high peak—7 PM to 8 PM indicates "3" or "6"; 8 PM to 9 PM indicates "4" or "7"; 9 PM to 10 PM indicates "5" or "8".

[4] 5. At the aforementioned conference of representatives of the three intelligence agencies, the following preliminary evaluation of the message of 3

December was made:

1. That no one named FUJII, was connected with the Japanese Consulate, Honolulu; but, the FUJII might be a code name or word employed by the Consulate or by some member of its staff, or by some person reporting to the Japanese Navy Ministry through the Consulate.

2. That the "Lanikai beach house" referred to was not readily identifiable, there being many beach houses at Lanikai, Oahu.

3. That the "dormer window of Kalama house" probably referred to a window of this type in the home of Otto KUEHN, a Class "A" German suspect, of Kalama, Oahu, who was put in custodial detention on 8 December, 1941.

4. That the method of signalling set up in the above despatch may have been used prior to the Japanese attack on Oahu, 7 December, and thereafter still might be used, to indicate the movements of United States fleet units from Pearl Harbor.

In an attempt to determine whether the signals referred to in the despatch of 3 December were used prior to the attack, and to detect any further use of such signals, the three intelligence agencies assumed the following tasks:

1. The Federal Bureau of Investigation, Honolulu, was to send two or more agents to Kalama, Oahu, to stay there and gather all possible pertinent information regarding signalling from "dormer window of Kalama house". (The Federal Bureau of Investigation at that time had a pending investigation on Otto KUEHN and members of his family.)

2. The Military Intelligence Division was to maintain a watch at Kalama and Lanikai for a display of lights, display of cloths, or star boats with the indicated markings.

[5] 3. The District Intelligence Office was to send two or more agents to Lanikai, Oahu, to stay there and gather all pertinent information regarding signalling from a "Lanikai beach House"; and, in addition, to conduct an appropriate investigation in the vicinity of Kula Sanitarium and Haleakala, island of Maui.

6. In execution of part of its agreed task, this office sent Agents Joseph P. McCarthy, Fred H. Paoa, and Albert K. Kai to Lanikai on the afternoon of 11 December. On the following morning, an officer messenger flew to Walluku, Maui, with full instructions for Lieutenant (jg) Morris Adelson, USNR, Branch Intelligence Officer, Zone III, Fourteenth Naval District, to investigate the case there.

7. At Lanikai, the agents of this office early determined that of the more than seventy houses and cottages fronting on the ocean, only two had clothes lines on the premises that could be used for displaying the arranged signals, and that one of the two houses having a clothes line so usable was owned by Otto KUEHN, whose Kalama home with the dormer window already has been mentioned. Under a pretext, Agents McCarthy, Paoa, and Kai interviewed all available residents of the Lanikai area who lived on lots adjacent to the beach. It was determined that Otto KUEHN had no connection with the residents of the Lanikai beach house he owns, other than as their landlord. All star boats in the Lanikai area were found beached, and it was determined that none of them answered the description of the sailboat mentioned in the despatch of 3 December.

8. Upon the return of the agents of this office from Lanikai on 19 December, the following memorandum was submitted to the District Intelligence Officer by Agent McCarthy:

"In compliance with instructions, Agents Paoa, Kai and the writer proceeded to Lanikai on December 11, 1941, and remained until the evening of December 19.

"Over this period of time a complete and thorough canvass was made of all residences on the beach at Lanikai and all others adjacent thereto that might possibly have been used by anyone sending the type [6] of signals reported. It was immediately learned that Otto KUEHN owns a house on the beach at Lanikai, this being the fifth house from the junction of Lanikai and Kailua. It was determined that this house is occupied by Lieutenants Chapman and Stuppy and their wives. Lieutenants Chapman and Stuppy are attached to Schofield Hospital.

"Mrs. Stuppy, when interviewed, advised that they had occupied Kuehn's house for a month and left there to take another house in Lanikai on December 15. Mrs. Stuppy stated that during her residence there she did not have any communication with Kuehn's family nor did any members of this family put in their appearance at Lanikai to her knowledge.

"All of the people interviewed during the course of this investigation reported that they observed no signals nor any activity that appeared to be suspicious or could be interpreted as signaling. This statement is made with the exception of the information received from Mrs. R. C. Waldron whose house is the second house from the Kailua junction, who reported that at 6:45 A. M. on the morning of December 7, 1941, a Japanese, carrying a fishing pole, was observed running on the beach towards Kailua. Shortly after he left, a red flare was seen to have been sent from the vicinity of the beach near the Waldron residence. Mr. and Mrs. Waldron were unable to describe the Japanese referred to or furnish any additional information concerning his identity.

"The inquiries made generally among the people residing in Lanikai, over the period of this investigation, were confined primarily to suspicious activity on the part of anyone for the period from December 1 to 7, 1941. The inquiries related generally to the possible signaling with flares or lights at night time and the presence of sail boats off the beach during the day time. Over this period, and for the three weeks preceding December 1, the waters off Lanikai were too rough for sailing and it was generally stated by the persons interviewed, most of whom are boat enthusiasts, that no star boats or other types of sailing vessels were seen near this beach over this period. [7] It was pointed out by many of the residents that, had a sail boat of any description appeared in this rough weather, these residents, being interested in sailing vessels, would have remarked upon the presence of a boat off shore in this type of weather and would have remembered the presence of this boat and probably could have recalled the name of the owner.

"Because of the nature of the other signals reported that could have been used in daylight hours questions, it was felt, could not be particularly asked concerning these signals without endangering the source of the information. However, in traveling about the vicinity of Lanikai, over this period, all residences were examined carefully for the purpose of attempting to determine from what residence the other day time signals might have been given. The Kuehn residence could have been used for all signals described except for the signalling with automobiles headlights. A residence owned and occupied since Thanksgiving by Judson Roblee, which is back from the beach about 300 yards on a hillside, could have been used as a location from which to give all of the signals described. Mr. Roblee is the manager of the Edward R. Bacon Company. Inquiry generally concerning the Roblees resulted in the information that they are a very reputable family and should be held above suspicion in this case. Mr. Roblee is well known to Lieutenant (jg) G. P. Kimball of this office.

"During the course of this investigation, the agents had access to, and the use of, the home of Mr. Arthur Powlison. This house is set on a cliff extending over the Lanikai road and from which can be had a view of all of Lanikai.

"During the period of time consumed by this investigation, a watch was kept for signals and for other suspicious activity from this vantage point without results. During the interviews, generally, those persons interviewed, who were found to be reputable, were advised to be on the alert for suspicious activity in this vicinity and requested to report any information considered worthy of further attention to this office."

[8] 9. In a general report of activities on the island of Maui, dated 9 December, 1941 (which report, due to poor mail service following the outbreak of war, did not reach this office until 13 December), Lieutenant Adelson told of the following pertinent incident:

"Only one incident of a number of reports received, indicated suspected espionage activities. The following is a resume of the reported incident.

"Mr. Earl Kraft reported that on 8 December, 1941, at about 2045, while he was spending the night at the Kula Sanatorium, visiting Dr. Sanders, he was telephoned from the hospital to investigate the cause of frequent flashing of a light in the vicinity of the water tank, while a total blackout was in progress. Mr. Kraft proceeded to the vicinity of the water tank, and upon his arrival the person flashing the light disappeared in the bushes. At the approximate time this took place a report was also received that flashes of light were coming from a room in the hospital in the Kula Sanatorium occupied by Shigeo FURUKAWA, who is subject of a recent confidential investigation by the DIO and this office. It will be noted that HAMADA and MATSUDA who visited FURUKAWA recently at Kula (DIO-Z/3-#3), have already been picked up here as enemy aliens. Colonel Lyman and Major Cruckshank, of Maui Headquarters, have been advised of the incident and have also been given all information available here, in regard to

**FURUKAWA.** This matter was referred to them for appropriate action. Following our report to Army authorities this day, **FURUKAWA** subsequently has made an attempt to commit suicide by drinking an excess amount of Listerine. While **FURUKAWA** is in the isolation ward, because of his attempted suicide, no military orders have been issued to place him in custody, as an enemy alien." This report was considered very significant because of the fact that an investigation of **Shigeo FURUKAWA** was begun by this office shortly before the outbreak of war because of the latter's possible connection with Lieutenant Commander **Sadatomo OKADA, IJN**, among whose effects was found, in the summer of [9] 1941, **FURUKAWA's** name. (References (d) and (f)).

10. On 20 December, by officer messenger, the District Intelligence Officer received from Lieutenant **Adelson** the following report, dated 19 December, regarding investigation of the **Haleakala** and **Kula Sanitarium** region:

"Every night since 12 December, 1941, this area has been under surveillance from nightfall to past midnight—actual observation of the area being conducted personally with the assistance of **Lt. Hansen, H. E. Anderson (Fish and Game Warden)**, a member of Fleet Reserve, and Police Officers **Albert Wong, Louis Fernandez** and **Chas. Ledward**.

"In addition the **VJ3 Squadron** and the **Maui Range** is keeping the designated point and its area under surveillance from their tower stations and are keeping this office advised.

"On the night of 14 December 1941, the reporting officer in Company with **Mr. Anderson** from their observation post noted the following lights and fire which were interpreted as signals:

"At 8:25 p. m. a strong blue light was seen on and off every few seconds in the **PUUNENE** area. In answer, a strong blue light was seen on and off in the **MALAAEA BAY** vicinity. Both lights went off and a definite fire signal was observed on the Island of **Kahoolawe**. This fire lasted 3 minutes.

At 8:40 p. m. the light at **Puunene** came on again and in response the light at **Malaaea Bay** came on again. Both then went out.

"Police Officers **Wong** and **Ledward** also observed the above but placed the fire in the channel between **Kahoolawe** and **Lanal** instead of on **Kahoolawe**.

"**Col. Lyman** has been kept advised and particular stress laid on the **Kahoolawe** fire signal seen.

"**Kahoolawe** as far as is known is uninhabited. On an average of once a week a sampan—"Maise C", owned by one of the **Baldwins** and captained by an [10] alien Japanese (**Y. Yamauchi**) has made a trip to the island—where **Baldwin** keeps some horses. Since hostilities with Japan, **Mr. Baldwin** has requested **Col. Lyman's** permission to send the "Maise C" to **Kahoolawe**. **Col. Lyman** advised **Mr. Baldwin** that he would permit the trip to be made under armed guard. In view of the fire signal angle, **Col. Lyman** will notify this office if and when the "Maise C" is ready to go and we will make a search of the boat and also arrange for a thorough search of the island.

"Numerous reports on lights and signals from various points on the island have been received by Police, Provisional Police, Army, and Navy. This has added to confusion as many of these reports when checked were found to have been carelessly put on or to be made by patrol cars.

"However, there is one such report of interest: On the night of 11 December, 1941, (one day prior to receipt of reference (a) /referring to the District Intelligence Officer's letter of 11 December directing Lieutenant **Adelson** to investigate this case on **Maui**), Provisional Police patrolling the **Kula** area investigated a report of light signals coming from a point almost the same as the one we have the information on. Upon investigation by Provisional Police, the person signalling was scared away and heard to scurry through the shrubbery. On 10 December, 1941, Provisional Police had received a similar report but could not locate anyone at the point. There is a strong possibility that this incident may have been connected with the information we have, and if such is the case, our suspect has been scared away or else using another point."

11. On 18 January, 1942, the District Intelligence Officer received a further report regarding **FURUKAWA**, from Lieutenant **Adelson**, which is quoted, in part:

"... Miss **Marie Dupont**, a ward girl, who observed the light was interviewed.

[11] "Miss **Dupont** stated that at about 2130 on the night of 18 December, 1941, she saw flashes of light in the subject's room, 401-B. The subject was sole occupant of the room. At about the same time she also observed a strong light

flashing in the vicinity of the water tank on the Kula Sanitorium grounds. Subject's room faces the mountain and is in line of vision with the water tank. A check was made of the subject's room and matches were found. Subject was questioned by Miss Dupont about the matches and he stated that he had lit them to see what the time was. Subject does not smoke. Miss Dupont did not actually see subject light any matches."

12. Meanwhile, Lieutenant Adelson was instructed to investigate fully the activities of Shigeo FURUKAWA, since the latter's hospitalization at Kula Sanitarium. Lieutenant Adelson's findings will be set forth in a separate report being prepared on FURUKAWA.

13. On 30 December, this office received information that Morima MARUYAMA, who lives at Kailua, Oahu, T. H. (in an area between Kalama and Lanikai, but very proximate to the latter), was of doubtful loyalty and lived in a house high on a hill from where signalling to a ship at sea might be facilitated. After advising the other investigative agencies, the District Intelligence Officer, on 30 December, sent Agent Kai to Kailua with instructions to investigate MARUYAMA to determine whether signals had been seen emanating from his house, and also to investigate the portion of Kailua immediately contiguous to Lanikai.

14. On 2 January, 1942, Agent Kai returned from Kailua and reported, as to MARUYAMA, that "while this Subject's home is strategically situated and could have been used as a location from which to send signals, or as an observation point, no evidence has been secured to indicate any subversive activity on the part of Subject or to indicate that he would engage in such activities." Agent Kai also reported that no evidence was found to indicate that any other person in the area covered (about twenty houses) had engaged in any signalling to ships at sea.

15. It was learned from a highly confidential source that the full name of the sender of the Consulate's aforementioned message of 3 December probably is Ichio Fujii.

[12] 16. Confidential Informant J-1, who has been familiar with most of the contacts of the Consulate over a period of several years past, advised that the only FUJII known by him to have been close to the Consulate was Junichi FUJII, a prominent merchant. (It should be noted that the latter sailed from Honolulu for Japan aboard the TAIYO MARU on 5 November, 1941.) Former clerks of the Consulate who were interviewed by representatives of the three intelligence agencies confirmed this fact.

17. The records of the Bureau of Immigration and Naturalization, at Honolulu, were checked and reveal that on 6 June, 1925, one Ichio FUJII arrived at Honolulu, from Japan, aboard the TAIYO MARU. At a hearing of a special board of inquiry held at Honolulu, 12 June, 1925, it was found that FUJII was born at Moliili, Honolulu, T. H., on 1 May, 1908. FUJII stated that he was taken to Japan at the age of seven by his parents, who remained there. FUJII stated that he was a farm laborer. No further record of this Ichio FUJII was found in the immigration records, nor has any clue to his present whereabouts been discovered.

18. Appropriate examination of available indexes and directories with reference to the surname FUJII (or HUZII) and possible variants, FUJIE and FUJI, was made, with negative results. However, investigation of this phase of the case is continuing.

19. On 1 January, 1942, interrogation of certain of the clerks formerly employed at the Japanese Consulate was commenced by representatives of the three investigative agencies: Special Agent F. G. Tillman, Federal Bureau of Investigation; Captain Frank O. Blake, Military Intelligence Division; and, Lieutenant George P. Kimball, District Intelligence Office.

20. These Consulate clerks, who are American citizens of Japanese ancestry, all informed the agents that they considered themselves separated from employment at the Consulate on 7 December, 1941, and did not report for work on Monday, 8 December, 1941. However, none of them had submitted a letter of resignation or otherwise given notice to the Consulate.

[13] 21. The names of the clerks interrogated are as follows:

Miss Kimie DOUE  
Takaichi SAKAI  
Katsukichi MURAOKA  
Richard Masayuki KOTOSHIRODO  
Kanaye SAHARA  
Kiyoshi SHIGEFUJI

22. Miss DOUE, formerly employed as receptionist and typist at the Consulate, was the first clerical employee interrogated. Details concerning her personal history are set forth in reference (i) and will not be repeated herein. In her position as receptionist, Miss DOUE had a better opportunity to observe visitors to the Consulate than any of the other clerical employees. She appeared to be slightly above the average in intelligence for a Japanese girl of her class, and impressed the agents as being entirely frank and cooperative in answering questions.

23. It was developed in the course of the interrogation of Miss DOUE that Tadasu MORIMURA, one of the secretaries of the Consulate, who had arrived from Japan on 27 March, 1941, for the ostensible purpose of taking charge of the expatriation work at the Consulate, did little or nothing in connection with that work after the first few days following his arrival in Honolulu. Instead, MORIMURA was assigned a desk in the same office with Vice Consul Otojiro OKUDA, where the nature of his work was unknown to Miss DOUE. The expatriation work was done in a different office of the Consulate, and was under the supervision of Kyonosuke YUGE, another secretary. Most of the clerical details of this work were handled by Takaichi SAKAI, one of the clerks above mentioned.

24. Miss DOUE stated that MORIMURA often came to work at about 1100, two hours after the opening of the Consulate, and seldom was at his desk in the afternoon. There was a week in October or November, 1941, when he did not come to work at all. Miss DOUE often saw MORIMURA leave the Consulate in a taxi during office hours between 1000 and 1100 and would not see him again the same day. The staff of the Consulate usually called the proprietor of the Royal Taxi Stand, located at 6 South Vinyard Street, Honolulu (telephone 8299), and it was this stand that MORIMURA customarily called. On other occasions, Miss DOUE saw MORIMURA leave the Consulate during [14] business hours with Richard Masayuki KOTOSHIRODO, one of the aforementioned clerks. Sometimes they would drive away in KOTOSHIRODO's car, and at other times they would use the above mentioned taxi. On several occasions, neither of them came back for the rest of the day.

25. According to Miss DOUE, MORIMURA had a large map of Oahu which he used to spread out on his desk and work on from time to time. Miss DOUE stated that she had seen Japanese characters written in pencil on the map. She had no dealings with MORIMURA other than to deliver mail to his desk.

26. Takaichi SAKAI, whose personal history is set forth in reference (g), also was interrogated on 1 January, 1942. He corroborated what Miss DOUE said about MORIMURA's lack of connection with expatriation matters and his frequent departures from the Consulate during business hours.

27. It was learned from Kanaye SAHARA, whose personal history is set forth in reference (h), that MORIMURA had one finger, either the middle or third, cut off at the first joint. However, SAHARA could not remember which hand it was. SAHARA also corroborated what Miss DOUE had said concerning MORIMURA's departures from the Consulate during business hours, accompanied by KOTOSHIRODO, who often wore an aloha (sport) shirt. On those occasions, they would be gone for the rest of the day. SAHARA stated that he suspected that they went to "important places", and upon being asked what he meant by that, said, "military places". On being asked why he thought they were going to such places, SAHARA said that it was because of the strained relations between the United States and Japan, and also because MORIMURA and KOTOSHIRODO would not make any mention around the Consulate as to where they had been on their trips. SAHARA stated that KOTOSHIRODO had a 1937 Ford sedan which he and MORIMURA often used.

28. SAHARA further stated that he did not know much about MORIMURA's background because he was not listed in the Japanese Foreign Office publication containing the names and biographical data of diplomatic and consular officials. He stated that MORIMURA is 27 or 28 years of age, and if he is a regular member of the consular service, he would have been listed, as he could not have just recently been graduated from college. SAHARA believed that the other three secretaries of the Consulate, Kyonosuke YUGE, Samon TSUKIKAWA, and Kokichi SEKI, were listed in this publication.

[15] 29. SAHARA also informed the agents that MORIMURA and KOTOSHIRODO were on good terms, as SAHARA sometimes saw them joking together as they came into, or left, the office. Asked if he thought this was not strange, in view of the recognized social distinction between secretaries and clerks at the Consulate, SAHARA attempted to explain it by the fact that both were about the same age and seemed to enjoy each other's company.

30. KOTOSHIRODO was interrogated on 3 and 4 January, 1942, and on 9 January, 1942. His personal history is set forth in reference (j), while details of his activities with MORIMURA will be discussed in a subsequent report. In substance this information is that MORIMURA, often accompanied by KOTOSHIRODO, sometimes in a taxi driven by John Yoshie MIKAMI, subject of reference (k), proprietor of the Royal Taxi Stand, and sometimes in KOTOSHIRODO's car, made frequent trips for the purpose of making observations of military installations and operations. In addition to the trips made with MORIMURA, KOTOSHIRODO made a number of trips for the same purpose, by himself and with MIKAMI, at the direction of MORIMURA. The names and addresses of certain Japanese contacted by MORIMURA were obtained from KOTOSHIRODO, and the joint investigation of these leads also will be covered by a separate report. Signed statements concerning his activities were obtained from KOTOSHIRODO on 4 and 9 January, 1942.

31. From all the clerks interviewed an effort was made to obtain the names of frequent visitors to the Consulate, particularly those who saw the Consul General and the Vice Consul in private. Seven or eight prominent Japanese business and professional men, who have been in custodial detention since 7 December, 1941, were named, including the local managers of the Yokohama Specie and Sumitomo Banks and the Nippon Yusen Kaisha (N. Y. K. Line). According to Miss DOUE, those men would go directly into the office of the Consul General, who often would summon the Vice Consul for a conference. None of the clerks had any idea of the nature of the conversations between these men and the consular officials.

32. Asked if any persons, other than the prominent Japanese referred to above, visited the Consulate on what appeared to be other than routine business, Miss DOUE stated that a man whose nationality she did not know, came and went several times from the Consulate during November, 1941. This man she described as a "haole" (Hawaiian for "white person") [16] and looked somewhat Jewish. Miss DOUE did not know his name. Sometimes this man, the Consul General, and the Vice Consul were locked in the Consul General's private office. The last visit of this man remembered by Miss DOUE was about the end of November, 1941. The man referred to usually came in the morning and sometimes Miss DOUE would see him only when he left the Consulate.

33. On 31 December, 1941, the day before the investigation of the former consular clerks was commenced, Otto KUEHN was brought from detention quarters at the U. S. Immigration Station, Honolulu, to the headquarters of the Federal Bureau of Investigation for questioning by Special Agents J. Sterling Adams and George E. Allen. The interrogation of KUEHN, not having been completed on 31 December, was resumed the following day. While Miss DOUE was being questioned as described above, KUEHN also was under interrogation in a nearby room.

34. When Miss DOUE gave the information mentioned above concerning the unidentified white man who had visited the Consulate during the month of November, Special Agent in Charge R. L. Shivers of the Federal Bureau of Investigation was advised. On the theory that this person might have been KUEHN, Miss DOUE was told by Mr. Shivers that he wanted her to observe a certain person and state afterwards if she had ever seen this person before. Miss DOUE was taken to a stenographer's room and placed at a desk. KUEHN was brought to the door of this room and was engaged in conversation. Miss DOUE immediately recognized KUEHN and placed a sheet of carbon paper over her face so that she could not be recognized by him.

35. After KUEHN was taken back to the room where he was being questioned, Miss DOUE was brought back to the room where her interrogation was being conducted. She was thereupon asked whether she had ever seen the person who had just been shown to her. She answered immediately and with assurance that this was the "haole" she had previously mentioned as having come to the Consulate several times during November. Asked how she knew it was the same man, she stated that she knew by the shape of his head and by his Jewish appearance. Miss DOUE stated that she had seen this man leave the Consulate but had never seen him get into any automobile. However, she stated that on days when he came to the Consulate a tan-colored roadster was seen parked in front of the building. Miss DOUE stated that she thought his visits were peculiar and that she thought he was a "spy".

[17] 36. A short biographical sketch of KUEHN, based upon written statements obtained from him on 1 and 3 January, 1942, by Special Agents Adams and Allen, is submitted for information:

37. KUEHN was born in Berlin, Germany, on 25 December, 1895. In April, 1913, he enlisted as a cadet in the German Navy, serving as a midshipman until captured by the British in January, 1915, and remaining a prisoner of war until December, 1918. In 1920, he married his present wife. From the close of the World War until 1927, KUEHN was employed in various occupations. In 1927, he entered the coffee business and continued in it until 1935, when he came to the United States. However, during the period 1928-1930, he was in the secret police of the German Navy. In 1930, he and his stepson Leopold KUEHN, who was born 6 July, 1911, joined the National Socialist (Nazi) party, but KUEHN claims not to have been active in the party until 1932, when he was considered for a position high in the Gestapo under Heinrich HIMMLER, but which position was given to Reinhold HEYDRICH. Thereafter, KUEHN was twice jailed in Germany, but was released, he says, through the efforts of his wife.

38. In 1935, KUEHN decided to go to Japan to study the Japanese language, and passed through the mainland United States and Honolulu enroute to Japan. In 1936, KUEHN and his family returned to Honolulu where they established permanent residence and subsequently KUEHN returned to Japan for three months' further language study. Upon his return to Honolulu in September, 1936, KUEHN continued the study of the Japanese language. In Honolulu, he engaged in the steel furniture manufacturing business. Friedel KUEHN operated a beauty shop at Kailua and the KUEHNs have owned two homes at Kalama and one at Lanikai. KUEHN's furniture business failed in 1938, his wife's beauty shop brought in only about \$80.00 a month, and they were forced to sell the Kalama home and mortgage the other two residences, one of which usually was rented.

39. From time to time, KUEHN has received considerable sums of money from European sources. He claimed that this money came from the estate of his father and from the liquidation of the coffee business which he had owned. Friedel KUEHN also received money from inherited property in Germany. According to KUEHN, great difficulties were encountered in getting this money out of Germany. Certain of the transfers were said to have been made through a friend in Japan, a Doctor HOMBERG, who is connected with a German steel firm, ROESCHLING STEEL WORKS in Tokyo, who assertedly purchased the [18] German holdings of Friedel KUEHN for \$40,000.00. Part of this consideration was transported in cash by Mrs. KUEHN from Japan to Honolulu in 1940. KUEHN said the amount so received was \$6,000.00, but his wife, who was questioned later, said it was \$9,000.00. In September, 1940, a payment of \$10,000.00 was received from Dr. HOMBERG and was delivered by one KAI, purser of the SS KAMAKURA MARU, an N. Y. K. liner.

40. The following additional information was obtained from KUEHN and is contained in his written statements made on 1 and 3 January, 1942:

41. In July, 1941, after the "freeze order", KUEHN contacted Vice Consul OKUDA at the Japanese Consulate and requested him to send a message to Dr. HOMBERG through a Baron KYOGOKU in Japan, whom KUEHN claims previously to have met on a trip to Japan. According to KUEHN, the message to HOMBERG was in a prearranged private code and the substance of it was a request to send the balance of the \$40,000.00 due Mrs. KUEHN as soon as possible. When OKUDA was hesitant about sending the message, KUEHN informed him that he was acting for the Japanese Government and had an important message for KYOGOKU, a Government official in Tokyo. KUEHN told OKUDA that it was imperative that he receive the money before 29 October, 1941, because of the Treasury Department's foreign funds regulations, and he intentionally gave OKUDA the impression that the money was to come from KYOGOKU as compensation for services rendered the Japanese Government. OKUDA finally agreed to send the message.

42. In his statement of 1 January, 1942, KUEHN had said that he first contacted the Consulate early in November, 1941, to request assistance in sending money to his stepson, Leopold, in Germany, and was informed that the Vice Consul would take the matter up with the Yokohama Specie Bank. However, in his statement of 3 January, 1942, he gave the version above set forth about the message to Dr. HOMBERG in Japan. But, in both versions, KUEHN admitted having made several visits to the Japanese Consulate in November, 1941, and stated that he called in the mornings.

43. It was developed that on his second or third visit, either KUEHN or Consul General KITA suggested that KUEHN could be of assistance in obtaining information concerning United States fleet movements. KUEHN agreed to do what he could, and on or about 28 November, 1941, he drove to the vicinity of Pearl Harbor, where he said he saw very few [19] ships in the harbor. Later, according to KUEHN, he informed the Consulate that there were seven battleships, six cruisers, two aircraft carriers, twenty destroyers and twenty-seven submarines, "or some similar figure in Hawaiian waters." The information which KUEHN stated he furnished the Consulate, as set forth above, can be compared with the figures set forth in enclosures (A) and (B), which were prepared by this office (for the Federal Bureau of Investigation) from data furnished by the Captain of the Yard, Navy Yard, Pearl Harbor. As to the figures admittedly reported by KUEHN, he said "these figures were purely fictitious, as far as I knew."

44. Subsequent to the visit during which information relative to fleet movements was first discussed, the following occurred, as described in KUEHN's statement of 1 January, 1942:

"At that time I made suggestions to them stating that I had a short-wave transmitter and could send messages for them if they so desired and I also outlined a system of signalling that could be used in order to furnish information relative to the types of ships in Pearl Harbor and those that had left. This system of signalling contained fifteen sets of signals. These signals were to have been given by a light in my home at Lanikai or Kalama which could have been seen out at sea by a submarine, as follows: One light between 6 and 7 meant battle fleet in harbor; one light between 7 and 8 meant scouting force in harbor; one light between 8 and 9 meant aircraft carriers in harbor; one light between 9 and 10 meant battle fleet prepared to leave; one light between 10 and 11 meant scouting force prepared to leave; one light between 11 and 12 meant aircraft carriers prepared to leave; one light between 12 and 1 meant battle fleet left between one and two days ago; one light between 1 and 2 meant scouting force left one to two days ago; two lights between 6 and 7 p. m. meant aircraft carriers left one to two days ago; two lights between 7 and 8 p. m. meant battle fleet left three to four days ago; two lights between 8 and 9 p. m. meant scouting force left three to four days ago; two lights between 9 and 10 p. m. meant aircraft carriers left three to four days ago; two lights between 10 and 11 p. m. meant battle fleet left five to six days ago; two lights between 11 and 12 midnight meant scouting force left five to six days ago; two lights between 12 midnight and 1 a. m. meant aircraft carriers left five to six days ago.

[20] "This same set of signals could have been sent by means of linen on the clothes line at my Lanikai home, one sheet between 6 and 7 a. m. in daylight meaning battle fleet in harbor; one sheet between 7 and 8 a. m. meaning scouting force in harbor; one sheet between 8 and 9 a. m. meaning aircraft carriers in harbor; one sheet between 9 and 10 a. m. meaning battle fleet prepared to leave; one sheet between 10 and 11 a. m. meaning scouting force prepared to leave; one sheet between 11 a. m. and 12 noon meaning aircraft carriers prepared to leave; one sheet between 12 noon and 1 p. m. meaning battle fleet left one to two days ago; one sheet between 1 p. m. and 2 p. m. meaning scouting force left one to two days ago; two sheets on line between 6 a. m. and 7 a. m. meaning aircraft carriers left one to two days ago; two sheets on line between 7 a. m. and 8 a. m. meaning battle fleet left three to four days ago; two sheets on line between 8 a. m. and 9 a. m. meaning scouting force left three to four days ago; two sheets on line between 9 a. m. and 10 a. m. meaning aircraft carriers left three to four days ago; two sheets on line between 10 a. m. and 11 a. m. meaning battle fleet left five to six days ago; two sheets on line between 11 a. m. and 12 noon meaning scouting force left five to six days ago; two sheets on line between 12 noon and 1 p. m. meaning aircraft carriers left five to six days ago.

"They told me at the time that this system of communication was too complicated and it would be necessary for me to simplify it. I went home. One or two days prior to the time I submitted this first set of signals I had ridden by Pearl Harbor and there were very few boats in the harbor at that time. About three days later I went back to the Consulate with a simplified system of signalling, on what I think was December 2, 1941. This set of signals con-

tained only eight combinations, as follows: No. 1 meaning battle fleet prepared to leave; No. 2 meaning scouting force prepared to leave; No. 3 meaning battle fleet left one to three days ago; No. 4 meaning scouting force left one to three days ago; No. 5 [21] meaning aircraft carriers left one to three days ago; No. 6 meaning battle fleet left four to six days ago; No. 7 meaning scouting force left four to six days ago; No. 8 meaning aircraft carriers left four to six days ago. These signals were to be given as follows from my Lanikai home: One light between 7 and 8 p. m. meaning No. 1; one light between 8 and 9 meaning No. 2; one light between 9 and 10 p. m. meaning No. 3; one light between 10 and 11 p. m. meaning No. 4; two lights between 7 and 8 p. m. meaning No. 5; two lights between 8 and 9 p. m. meaning No. 6, etc. These lights were to have been from a window or automobile lights. The same system could have been used with one piece of linen hung on the line at Lanikai between 8 and 9 a. m., meaning No. 1, one between 9 and 10 a. m. meaning No. 2; one between 10 and 11 a. m. meaning No. 3; one between 11 a. m. and 12 noon meaning No. 4; two pieces between 8 and 9 a. m. meaning No. 5; two pieces between 9 and 10 a. m. meaning No. 6, and so forth. It was also arranged that a light in the skylight at my Kalama home between 7 and 8 p. m. would mean No. 1; one between 8 and 9 p. m. would mean No. 2; one between 9 and 10 p. m. would mean No. 3 and 6; one between 10 and 11 p. m. would mean No. 4 and 7; one between 11 and 12 p. m. (midnight) would mean Nos. 5 and 8.

"It was also arranged that this same system of signalling could have been used with a star boat just off the mouth of Lanikai Beach between certain hours, a star on the sail or a star and a number on the sail meaning corresponding signals as those previously given, according to the time the boat was in that position. I do not recall the exact combinations that were to have been used to indicate each signal.

"It was also arranged that on the KGMB Want-Ads program in the morning the signal could be effected to indicate numbers 3 and 6 if a Chinese rug was advertised for sale, Nos. 4 and 7 if a beauty parlor operator was advertised for; and a third type of advertisement which I do not recall would indicate numbers 5 and 8. It was also arranged that if it was impossible to give this system of signals, [22] a garbage fire on Maui in a certain locality between certain hours would indicate the above number signals, such as a fire between the hours of 9 and 10 p. m. would mean signals 3 and 6, and so forth. In mentioning this latter plan I had in mind a locality previously described to me by a friend, CARL BASLER, where a number of vacant lots are located. I determined the exact locality of this area by reference to a map of Maui which showed the names of the two roads which border that locality and which names were mentioned in my recommended plan as bordering the area wherein the fire signals were to be effected.

"It was also arranged that this same set of signals could be given by short wave radio and arrangements were made that if the Consulate desired to contact me they could do so by sending me a postcard signed "JIMMIE", to my Box No. 1476 at Honolulu.

"This simplified set of signals was taken to the Consulate in an envelope by me about 8:30 in the morning. At the time I went to the Consulate I was accompanied by my wife, FRIEDEL, and while she remained in the car I went to the door and handed the envelope containing this set of signals and another envelope containing \$500.00, which was to be sent to my son LEOPOLD in Germany, to the Vice Consul whose name I do not recall. I had no conversation with him at this time but went back to my car and drove on into Honolulu.

"I might point out that the plan outlined by me above and that submitted to the Japanese Consulate are probably not identical in every detail with those actually submitted, although the plans outlined above are basically the same as those submitted. Differences will probably appear in connection with the hours stated for the signals to be given.

\* \* \* \* \*

"Following the submission of these latter plans to the Consulate I have had no further contact with any representatives of the Consulate to date, neither have I received any correspondence or telephone messages from such representatives. Apparently [23] no effort was made by the Consulate to carry either of the proposed plans into effect through me.

"I have never been to the Island of Maui nor have I ever seen the island nor purchased any property there. I never had a short-wave transmitter, and my Lanikai Beach house is rented to Army people. I might state that CARL BASLER had no knowledge of my plans submitted to the Japanese Consulate. As a matter of fact I have not seen him or his wife since they departed from Honolulu about September, 1941. Further, I have had no correspondence with them except for one letter received from Mrs. BASLER about October, 1941. I rented my Lanikai residence on November 1, 1941, to two couples, one an Army doctor, age about 30 and the other an employee with the Engineers, about the same age, both of whom had been transferred from Schofield Barracks to Kaneohe. I cannot recall the names of these individuals at the present time."

45. In the same statement, KUEHN said that following the arrival of the TATUTA MARU in Honolulu in October, 1941, a Japanese attached to that vessel called at his residence and delivered a package enclosed in cardboard containing \$14,000.00 in \$100.00 bills. The person who made this delivery stated to KUEHN that the package came from Dr. HOMBERG in Japan. But, in his statement of 3 January, 1942, KUEHN described the receipt of the money as follows:

"I did not contact the Consulate again nor did I receive any post card until one afternoon in the very end of October, just after the first Japanese boat came to Honolulu, a young Japanese man came to my home in Kalama and he told my son that he wanted to see me. I was in the back working in my garden. My son came and advised me he was there and I went around. He very brusquely asked me if I was OTTO KUEHN and I said "Yes," and he said, "I have something for you from Dr. HOMBERG," so I took him back to my little garden house where he gave me a package and a letter and I asked him if he had any other information for me and he said no. I opened the letter first and in the letter was a sheet of paper written in English asking if I had a short-wave transmitter and if I would be willing [24] to make a test at a certain stated time which was on a night several nights later, on a certain wave length. This letter was typewritten and had no name on it. He gave me a sheet of paper and an envelope and I wrote on the sheet of paper that I was unable to make the test. I was quite nervous and put it in the envelope and gave it to him. I asked him if he knew what was in the package and he said no. I asked him if he wanted a receipt for the package and he said no, and he then left and I opened the package and counted the money. There were \$14,000.00 in the package, mostly in new \$100.00 bills, some \$20.00 bills. I think that this was a contact KYOGOKU was trying to make with me through this letter. As soon as he left I tore up the sheet of paper asking me to make this radio test and burned it up."

46. It was learned from KOTOSHIRODO that some time in October, 1941, he had been requested by Vice Consul OKUDA to drive MORIMURA and himself to Kailua. At the corner of Kuulei Road and Maluniu Avenue, Kailua, KOTOSHIRODO said that OKUDA directed him to stop the car, which he did, and there MORIMURA got out of the car and commenced walking along Maluniu Avenue in a northwesterly direction. OKUDA directed KOTOSHIRODO to drive several blocks along Kuulei Road and to stop at the corner of Kuulei Road and Kalaheo Avenue. They waited there thirty or forty minutes before MORIMURA reappeared, walking along Kalaheo Avenue from the direction in which he had disappeared. (It is noted that the places where MORIMURA alighted and later rejoined OKUDA and KOTOSHIRODO are approximately one-half mile from the Kalama residence of Otto KUEHN.) On 4 January, 1942, KOTOSHIRODO directed Special Agent Tillman and Lieutenant Kimball to the places above mentioned, and identified the places.

47. Eberhard KUEHN, age 15, stepson of Otto KUEHN, was interviewed by Special Agents Adams and Allen, and stated to them that an unidentified Japanese had come to see his father between 1600 and 1630 on a Saturday afternoon, on either 18 October or 25 October, 1941. The description he gave of this person is substantially similar to that of MORIMURA. Later, a photograph of MORIMURA was shown to Eberhard KUEHN, who stated that it was very similar to the Japanese who called to see his father in October, and that he believed that it was very likely the same person, but he could not say positively. The same [25] photograph also was shown to Otto KUEHN, who stated that it was quite similar to the Japanese who had delivered the money to him; that he is positive he has

seen the person represented in the photograph before, and believed it probably was on the occasion when the money was delivered. However, KUEHN still contended that he was of the belief that the man who had come to see him had been sent by Dr. HOMBERG, and that a Japanese steamer was in port in Honolulu on the day in question. (It should be noted here that the only Japanese liner in port around the time in question was the TATUTA MARU, which arrived in Honolulu from the Orient on 23 October, 1941, and departed for San Francisco the following day.

48. At no time has KUEHN implicated anyone outside the Consulate, other than himself and the Japanese who delivered the \$14,000.00 to him, in any of the activities above described. Thus far, no evidence has been developed that anyone, other than persons connected with the Consulate, have acted in conjunction with KUEHN.

49. In the plan of the system of signals submitted by KUEHN to the Consulate, as described in KUEHN's statement of 1 January, 1942, and set forth in the despatch sent by Consul General KITA to Foreign Minister TOGO on 3 December, 1941, part of the signals consisted of "KGMB want ads". KGMB are the call letters of the broadcasting station in Honolulu owned and operated by the Hawaiian Broadcasting Company, Limited. The despatch designated the advertisements to be: (a) for the sale of a Chinese rug; (b) for the sale of a complete chicken farm; and, (c) for a beauty operator wanted. Investigation by the Federal Bureau of Investigation has failed to disclose any record of radio advertisements on any KGMB program of the type described, between 24 November and 8 December, 1941. However, it was found that Post Office Box 1476, referred to in the message of 3 December, referred to KUEHN's box at the Honolulu postoffice.

50. Of the original \$14,000.00 cash received by KUEHN, \$5,000.00 in new \$100.00 Federal Reserve Bank of New York notes was found on the person of Mrs. KUEHN, after she was taken into custody on 8 December, 1941. It also was discovered that Mrs. KUEHN had given \$2,000.00, in similar denominations, to her daughter, Mrs. J. Carson MOORE (nee Ruth Kuehn). This money also was recovered by special agents of the Federal Bureau of Investigation. These funds are being traced from their source, the Federal Reserve Bank of New York, to determine [26] the persons or agencies through whom they were transmitted to Honolulu. It has been established by the Federal Bureau of Investigation that these notes were not obtained from, nor cleared through, Honolulu banks.

51. Otto KUEHN and his wife are the subjects of reference (a), being named therein as "Mr. and Mrs. KOEHN". Reference (b) states that KUEHN and his wife had (before 21 April, 1939) been under observation by the District Intelligence Office for a number of months, and that KUEHN was strongly suspected of being an espionage agent for either Japan or Germany, or both.

52. Otto KUEHN was carried on the Fourteenth Naval District records (July, 1940) as a class "A" Nazi suspect. See reference (c). The following information appeared on the suspect card:

(Occupation)

"KUEHN, Otto Kailua, Oahu None at present  
Formerly (1918) officer in Germany Navy; cultivates acquaintances among officers in U. S. Navy; at one time received considerable sums of money from European source; frequent trips to Japan; Mrs. KUEHN recently (May, 1940) returned from Japan and reportedly brought back a considerable sum of money with her; has failed in business but owns considerable real estate."

53. The name of Mrs. KUEHN was added to the Fourteenth Naval District Nazi list, as a class "A" suspect, on 31 May, 1941, as shown by reference (e), the pertinent portion of which reads as follows:

"KUEHN, Friedel—Kailua, Oahu. Wife of Otto KUEHN, suspected of being a German agent. Friedel KUEHN is known to be pro-Nazi. Mr. and Mrs. KUEHN are suspected of being 'Mr. and Mrs. Friedel' who are reported as contacts of the local Japanese consulate."

54. The names of "Mr. and Mrs. Friedel" were furnished to the District Intelligence Officer in July, 1940, by a reliable confidential informant who stated that the Friedels had approached the Honolulu Japanese Consulate with the request that certain information of theirs be transmitted to the Japanese Navy. The same confidential informant reported [27] that the consul-general requested the Foreign Office to advise concerning the reliability of the Friedels, and that the Foreign Office replied stating that the Friedels could not be placed, but that any information they furnished should be received and forwarded with an indication that it came from the Friedels. The message further advised that the Japanese Navy was prepared to compensate the Friedels for any information they furnished according to its value.

55. All of the information received from this confidential informant concerning "Mr. and Mrs. Friedel" was transmitted to the Honolulu Field Office of the Federal Bureau of Investigation. An investigation conducted by that agency failed to disclose any "Mr. and Mrs. Friedel" who in any way fitted the meager description furnished by the informant. It was concluded, however, that Otto and Friedel KUEHN might be "Mr. and Mrs. Friedel", but no evidence was obtained prior to the present investigation, indicating that either of the KUEHNS had contacted the Japanese Consulate.

56. The evidence obtained in the investigation, which is set forth in substance in this report, has been given by the Federal Bureau of Investigation to Angus M. Taylor, Jr., United States Attorney for the District of Hawaii, who has prepared charges and specifications charging Otto KUEHN with violation of Sections 34, 31, and 32 of Title 50, U. S. Code. These charges and specifications will be preferred by Captain Eugene V. Slattery, Assistant Judge Advocate General, Hawaiian Department, who will act as trial judge advocate in the prosecution of the case before the Military Commission.

57. Charge No. 1 is based on Section 34 of Title 50, and avers that KUEHN conspired with Consul General KITA and Vice Consul OKUDA on or about 20 November, 1941, to unlawfully communicate, in violation of Section 31, information to the Japanese Government concerning the movements and positions of the United States Fleet, by means of a system of signals prepared by KUEHN, and that in the furtherance of the conspiracy, certain overt acts were committed by KUEHN. These acts include obtaining by visual observation on or about 28 November, 1941, figures as to the number of naval vessels in Pearl Harbor and furnishing the same to the consular officials; and preparing and submitting to the same officials on or about 2 December, 1941, the plan for the system of signals previously described, which plan was transmitted by Consul General KITA to the Japanese Government on or about 3 December, 1941.

[28] 58. Charge No. 2 is based on an alleged violation of Section 31, Title 50, and specifies that KUEHN, on or about 28 November, 1941, for the purpose of obtaining information respecting the national defense, and with intent and reason to believe that the information to be obtained was to be used to the injury of the United States or to the advantage of a foreign nation, namely, Japan, unlawfully obtained information concerning the disposition of United States naval vessels in Pearl Harbor.

59. Charge No. 3 is based on an alleged violation of Section 32 of Title 50, and specifies that on or about 2 December, 1941, KUEHN unlawfully transmitted the information he had obtained concerning naval vessels to the Japanese Government, through the Consulate.

60. No evidence has thus far been discovered by any of the three investigative agencies which have handled the various phases of this case which would establish as a fact that any attempt was made, either before or after 7 December, 1941, to put into actual operation the system of signals prepared by KUEHN for the Consul General and submitted by the latter to Tokyo. However, efforts still are being made to obtain such evidence, if it exists, and to determine what other person or persons, if any, may have been implicated in such activities.

61. (Other messages despatched by the Consul General, both in the period, 1-4 December, 1941, and at other times, as the same have been received by this office and have been resolved into plain language, will be discussed in a report supplementary to this one, and bearing the same subject title.)

Pending—14ND.

6 February, 1942.

Enclosure (A): Table showing numbers of battleships, heavy cruisers, light cruisers, aircraft carriers, submarines, destroyers, and destroyer-type vessels in Pearl Harbor, at 0800 and 1800, 22-30 November, 1941.

| Date       | Time | Types of ships |     |     |     |     |     |     |      |     |
|------------|------|----------------|-----|-----|-----|-----|-----|-----|------|-----|
|            |      | BBs            | CAs | CLs | CVs | SSs | DDs | DMs | AVDs | (#) |
| 11/22----- | 0800 | 3              | 6   | 1   | 1   | 4   | 21  | 8   | 2    | 31  |

UNITED STATES NAVAL INTELLIGENCE SERVICE  
INVESTIGATION REPORT

## Confidential

Subject: JAPANESE CONSULATE, HONOLULU—Espionage Activities.  
 Report made at: Honolulu, T. H., 14th Naval District Date: 14 FEB., 1942.  
 Report made by: Lieutenant (jg) W. B. Stephenson, USNR.  
 Period covered: 5 Dec., 1941 to 14 Feb., 1942. Status of Case: Pending.

Summary of Case:  
 Receipt of DIO-14ND of various encrypted messages sent by Japanese Consul General, Honolulu, to Foreign Office, Tokyo, and Japanese Ambassador, Washington.

Character of Investigation: Espionage.

Closures: (A) Copies of miscellaneous despatches from Japanese Consul General, Honolulu, to Tokyo and to other Consuls, concerning military and naval contacts.

Copy to:

ONI (5)  
 CinCPac (1)  
 COM14 (1)  
 FBI-Hon (2)  
 MID-H (2)  
 14ND (3)

Source File No.: 14ND #54A

Synopsis: During the period 3-6 December, 1941, the Japanese Consul General, Honolulu, reported to Tokyo, by despatch, the entry and departure of Naval vessels at Pearl Harbor. There is no evidence at hand to show reporting of such by despatch prior to 3 December, nor has any message been found which reached the Consulate so to report starting on 3 December. Messages further reported in detail as to the numbers of Naval vessels in Pearl Harbor on 5 and 6 December, 1941. Reports were accurate as to the number of warships and aircraft carriers, not so accurate as to cruisers, and very inaccurate as to destroyers.

## 500 CONGRESSIONAL INVESTIGATION PEARL HARBOR ATTACK

Percentage of error in reporting indicates reports probably were based on data gathered by untrained observers stationed at some distance outside the Navy Yard. There is no evidence to indicate that anyone inside the Navy Yard was engaged in this espionage activity.

The despatch of 1248, 6 December, indicated knowledge that anti-torpedo nets were not being used to protect battleships moored in Pearl Harbor.

Deductions: Despatches of 3-6 December, 1941, while relatively inaccurate in many details, apprised Japan of the number of battleships in Pearl Harbor, absence of aircraft carriers therefrom, and the non-use of anti-torpedo nets to protect battleships in the harbor.

Approved:

I. H. MAYFIELD,  
Captain, U. S. Navy,  
District Intelligence Officer.

Subject: JAPANESE CONSULATE, HONOLULU—Espionage Activities

References: (a) 14ND Investigation Report, same subject 2-9-42.

(b) 14ND Investigation Report, Subject RICHARD MASAYUKI KOTOSHIRODO, 2-8-42.

(c) 14ND Investigation Report, Subject JOHN YOSHIE MIKAMI, 2-6-42.

1. This report is a continuation of, and an enlargement upon, reference (a). It is concerned chiefly with (a) the substance of certain naval intelligence transmitted by despatch from the Japanese Consul General, Honolulu, to Tokyo, and (b) the accuracy of the data transmitted.

2. Copies of some, but not all, of the encrypted despatches of the Japanese Consulate, Honolulu, dating back to March, 1941, were made available to the District Intelligence Office and to the Honolulu field office of the Federal Bureau of Investigation by reliable confidential informants. Only such of those communications that refer to military or naval subjects will be discussed in this report. As stated in reference (a), copies of the despatches hereinafter discussed were received by the District Intelligence Officer, from a highly confidential source, on 5 December, 1941, but were in code or cipher and could not be evaluated immediately. The plain meaning of the despatches was not learned until 11 December, 1941.

3. For the sake of clarity, it is stated at the outset that evidence gathered to date indicates that intelligence concerning United States vessels in Pearl Harbor, and their entry and departure therefrom, was gained by the simple expedient of observing ships in the harbor from points of vantage outside the Navy Yard. From reference (a), it appears that such fact-gathering was directed either by Vice Consul Otojiro OKUDA or Tadasi MORIMURA, a secretary at the Consulate; that MORIMURA personally made many trips to the vicinity of Pearl Harbor, with Richard Masayuki KOTOSHIRODO, a Consulate clerk, subject of reference (b), and with John Yoshie MIKAMI, a trusted taxi driver, subject of reference (c), who is at present in custodial detention; that MORIMURA personally did most of the known observing of Pearl Harbor, and contacting observers who lived in that vicinity; and, that Otto KUEHN, prominently mentioned in reference (a), who admitted making up a signal system for the Consulate to use to convey information (presumably to Japanese ships off the shores of the Hawaiian Islands), at least once visited the Pearl Harbor [2] area for the purpose of determining the number of ships there and reporting his findings to the Consulate. The *modus operandi* of MORIMURA and other Consulate observers and contacts will be set forth in detail in a report to follow.

4. On 3 December, 1941, Consul General Nagao KITA sent the following despatch to the Foreign Office, Tokyo:

WYOMING and two seaplane-tenders departed third.

(It should be noted that the messages consistently refer to the WYOMING, where obviously the UTAH was intended.) An examination of copies of the Navy Yard, Pearl Harbor, entry and departure log for 22 November to 7 December, 1941 (hereinafter referred to as "operational data"), shows the above despatch to have been wholly in error. The UTAH cleared Pearl Harbor on 1 December, at 1208, and did not return until 1555, 5 December. The seaplane

tenders CURTISS and THORNTON also left Pearl Harbor on 1 December, clearing at 1628 and 1712, respectively, and also returned to the harbor on 5 December, entering at 1408 and 1410, respectively. The operational data further reveals that no battleships cleared the harbor on 3 December (so there was no departure of a vessel that might reasonably have been mistaken for the UTAH), and that no seaplane tenders left Pearl Harbor that day.

5. On 4 December, at 1857, the following despatch was sent to Foreign Minister TOGO by the local Consulate:

USS HONOLULU arrived 1300/4th.

From the operational data aforementioned, it was determined that the USS HONOLULU entered Pearl Harbor at 1131, and secured at berth B-21 at 1300, on 28 November, 1941. She did not move from that berth before the Japanese attack of 7 December. Furthermore, no cruisers of the HONOLULU type either entered or cleared the harbor on 4 December. The only cruiser movements at Pearl Harbor during the period 1-6 December, 1941, were the departure of the CHICAGO, PORTLAND, ASTORIA, INDIANAPOLIS, and MINNEAPOLIS, between 0718, 5 December, and the arrival of the DETROIT, at 0947, 5 December.

6. Obviously in response to a request from Tokyo for the same (which request has not yet been found in the traffic to the Consulate), the following message was sent by [3] Consul General KITA at 1804 on 5 December:

The three battleships mentioned in your X239 of Friday morning, the fifth, entered port. They expect to depart port on the eighth. On the same day the LEXINGTON and five heavy cruisers departed. The following warships were anchored on the afternoon of the fifth: 8 battleships; 3 light cruisers; 16 destroyers. Coming in were 4 cruisers of the Honolulu type and 2 destroyers.

The first sentence of the message evidently refers to Battleship Division One (ARIZONA, NEVADA, and OKLAHOMA), which entered Pearl Harbor between 0856 and 0931, 5 December. The District Intelligence Officer has been informed by the Fleet Intelligence Officer that Battleship Division One was NOT scheduled to sail on 8 December, 1941, as reported in the second sentence of the despatch to Tokyo.

7. The foregoing message, in its third sentence, correctly set forth the facts. The LEXINGTON cleared Pearl Harbor at 0810, 5 December, in company with the five heavy cruisers before mentioned, which cleared between 0718 and 0735, the same morning.

8. After the arrival of Battleship Division One on the morning of 5 December, and up until the time of the Japanese air attack on 7 December, there were eight battleships moored in Pearl Harbor: PENNSYLVANIA, CALIFORNIA, MARYLAND, TENNESSEE, WEST VIRGINIA, ARIZONA, NEVADA, and OKLAHOMA. The information reported to Tokyo on 5 December in this regard was, therefore, correct.

9. The statement in the foregoing message, that there were (only) three light cruisers in the harbor on the afternoon of 5 December reported only half of the vessels of that type in Pearl Harbor, which were the HONOLULU, HELENA, ST. LOUIS, PHOENIX, RALEIGH, and DETROIT. In addition to light cruisers, the heavy cruisers NEW ORLEANS and SAN FRANCISCO were in the harbor all that afternoon, but were not reported in the despatch.

10. As shown by the operational data, at 0800 on 5 December, 1941, there were twenty-one destroyers in Pearl Harbor. Six more arrived, and none departed, before 1200 the same day, making a total of twenty-seven moored (or underway in the harbor, proceeding to moorings) at noon. [4] One destroyer cleared the harbor at 1539, but re-entered at 1612. Therefore, at all times on the afternoon of 5 December, there were at least twenty-six destroyers in Pearl Harbor.

11. Assuming that the Consulate's observer or observers might not have been able to distinguish between destroyers (including DLs) and ex-destroyers now used as mine-layers, mine sweepers, or seaplane tenders, the following facts as to all destroyer-type ships are presented: At 0800, on 5 December, 1941, there were twenty-eight destroyers and destroyer-type vessels moored in Pearl Harbor. Between 0800 and 1200, the same day, six DDs, four DMs, and two DMSs entered, and there were no departures of those types, bringing to forty the total of destroyers and ex-destroyers in the harbor at 1200. Subsequent departures, between 1200 and 1800, varied the number of such vessels in the harbor between a minimum of forty and a maximum of forty-three.

12. The last sentence of the above message of 5 December, to the effect that four cruisers of the HONOLULU class and two destroyers were coming in that after-

noon, is not supported by the facts. On the afternoon on 5 December, the four HONOLULU class cruisers already named were in the harbor, and had been there since 28 November, 1941. No cruisers of that class did come in, or were coming in, on the afternoon mentioned. Furthermore, after the arrival of the DETROIT on the morning of 5 December, there were no further arrivals of cruisers of any class until after the Japanese attack. As to destroyers, four destroyer-type vessels entered the harbor on 5 December, at 1310, 1408, 1431, and at 1612.

13. On 6 December, 1941, Consul General KITA received the following despatch from Foreign Minister TOGO, which is inserted here merely as a matter of interest:

Please inform us immediately of any rumors of the movements of warships after the fourth.

There has not yet been found in the Consulate traffic any indication as to when the Consulate received orders to report by despatch on United States fleet movements. It is noted from the data at hand that such reporting by despatch was not indulged in prior to 3 December, 1941.

14. At 1801 on 6 December, 1941, the Consulate [5] placed the following message for transmission to Tokyo and Washington:

On the evening of the fifth the Battleship Wyoming and one sweeper entered port. Ships moored on the sixth are as follows: 9 battleships; 3 light cruisers; 17 destroyers; 3 mine sweepers. Ships in dock: 4 light cruisers; 3 destroyers. (CA and CV all —) PS—CV cannot be found in the fleet.

The first sentence of the foregoing message is supported by the following facts: The UTAH (again mistakenly referred to as the WYOMING) entered Pearl Harbor at 1555 on 5 December, preceded by the SUNNADIN at 1530.

15. As to the number of battleships in Pearl Harbor on 6 December, the following are the true facts: If the UTAH be counted as a battleship (as it should be in this situation, where the Consul consistently referred to it as the WYOMING), there were nine battleships in the harbor, as reported.

16. Cruisers in the harbor at that time were two heavy cruisers, the NEW ORLEANS and SAN FRANCISCO, and six light cruisers, the HONOLULU, HELENA, ST. LOUIS, PHOENIX, RALEIGH, and DETROIT.

17. In this message, as in that of 5 December regarding the number of vessels in Pearl Harbor, there is a considerable variance between the number of destroyers reported to be in the harbor, and the number actually there. As of 0600, 6 December, there were twenty-seven destroyers moored in Pearl Harbor. Two more destroyers entered at 1115 and 1132, respectively, one cleared at 1300, and there were no further destroyer movements that day. Therefore, a total of twenty-nine destroyers were in Pearl Harbor from and after 1300 on 6 December, as compared with a total of nineteen reported in the despatch quoted above. In addition, there were other destroyer-type craft present in the harbor that day—four high-speed mine sweepers (DMSs), eight minelayers (DMs), and three seaplane tenders (AVDs)—which to the untrained observer might have appeared also to be destroyers.

18. As noted in the preceding paragraph, there were four mine sweepers in Pearl Harbor all day on 6 December. In addition, the BOGGS (DMS) entered at 0830, cleared at 0920, [6] entered again at 1540, and cleared again at 1625. This is to be compared with the reported three mine sweepers in the harbor.

19. It is believed that the report to Tokyo of 6 December, where the terms "moored" and "in dock" were used, meant to differentiate between ships at moorings and those berthed at docks (and not to distinguish between ships in drydock and those not in drydock). From Navy Yard operational data, it was determined that only eight battleships (counting the UTAH as such) were at moorings on that afternoon. The ninth battleship, the PENNSYLVANIA, was in Drydock #1. As to cruisers, it is noted that three light cruisers were moored, as reported in the despatch, while three other light cruisers and the two heavy cruisers were at docks. The approximate data as to destroyers was: nineteen at moorings, five at docks, and three in drydocks.

20. The postscript to the above despatch is thought to mean not that there were no aircraft carriers in the fleet, but that there were none in the portion of the fleet at Pearl Harbor at the time of last observation. Such was the fact, the last carrier, the LEXINGTON, having sailed on 5 December.

21. Another despatch of 6 December, delivered for transmission to Tokyo at 1248, which called for by a previous message from Tokyo (which also has not yet been found in the Consulate traffic):

Referring to last paragraph of your No. 123:

1. The Army ordered several hundred balloons for training at Camp Davis, N. C., on the American mainland. They considered (at that time) the practicability of their employment in the defense of Hawaii and Panama. Investigation of the vicinity of Pearl Harbor reveals no locations selected for their use or any preparations for construction moorings. No evidence of training or personnel preparations were seen. It is concluded that their installation would be difficult. Even if they were actually provided they would interfere with operations at nearby Hickam Field, Ewa Field, and Ford Island. The whole matter seems to have been dropped.

2. Am continuing in detail the investigation of the non-use of nets for torpedo defense of battleships and will report further.

[7] Information as to the accuracy of the first paragraph of the above despatch is not readily available to this office and, because that portion of the message is not relevant to the general subject-matter of this report, no further comment thereon is offered.

22. The second paragraph of the message above suggests the following facts which, however, it has been impossible so far to verify: (a) That the local Consulate (and through it, Tokyo) knew that anti-torpedo nets were not being used to protect battleships in Pearl Harbor; and (b) that a prior report on the subject had been made by the Consul General to Tokyo, or that the above despatch was called for by a request from Tokyo (which, however, has not yet been found in the Consulate traffic), or both.

23. That the Japanese Consulate was interested in reporting not only the movements of United States Naval vessels, but also those of American merchantmen and British men o'war, is shown by the two despatches immediately following.

24. At 1718, 3 December, 1941, Consul General KITA despatched the following message to Tokyo, information copy to Japanese Consul, San Francisco:

Urgent report. Military naval transport (name unknown) departed for the mainland on second. Lurline arrived from San Francisco on third.

The part of the message relating to the arrival of the Matson liner LURLINE is correct. However, there is no record of any military or naval transport having left either Honolulu harbor or Pearl Harbor on 2 December, 1941.

25. The Japanese Consulate on the evening of 4 December, 1941, placed the following message for transmission to Tokyo:

On the afternoon of the third a British man of war entered Honolulu and departed early on the fourth, about 1100 tons; one stack; and had a four-inch gun fore and aft. Immediately after entering port the crew went ashore and were receiving mail at the British Consulate.

[8] Reference was made to the PRINCE ROBERT, a converted Canadian merchantman, which arrived at Honolulu harbor on 3 December, at 1240, and departed at 1220 on 4 December. The registered gross tonnage of the PRINCE ROBERT, as a merchantman, was 6,892. Mr. Harry L. DAWSON, Vice Consul for Great Britain, advised that the PRINCE ROBERT has two stacks, but could give no figures as to her offensive armament. There is nothing of record in the Fourteenth Naval District regarding the vessel's armament or number of stacks. That part of the despatch reporting that the PRINCE ROBERT's crew went ashore and received mail at the British Consulate is correct.

26. The quality of reporting done by the Consulate to Tokyo on 3-6 December, 1941, is considered to have been poor, noticeably in the following particulars:

A. Complete inaccuracy of the despatch of 3 December regarding departure of the WYOMING and two seaplane tenders. (See paragraph 4, above.)

B. Erroneous reference to the UTAH as the WYOMING. (Paragraphs 4, 14.)

C. Complete inaccuracy of the message regarding arrival of the HONOLULU. (Paragraph 5.)

D. Failure entirely to report heavy cruisers (Paragraphs 6, 14), and reporting only half the light cruisers (Paragraphs 6, 9).

E. Reporting that four cruisers of the HONOLULU class were coming in on 5 December, whereas none arrived. (Paragraph 6.)

F. Large percentage of error in reporting number of destroyers. (Paragraphs 6, 10, 11, 14, 17.)

G. Failure to report that the PENNSYLVANIA was in drydock and not at moorings. (Paragraph 14.)

27. Upon the basis of the foregoing, including references (a), (b), and (c), it is concluded that:

A. There definitely were several observers who reported Pearl Harbor ship movements to the Consulate. This is proved by the admissions of KOTO SHIRODO and MIKAMI, in references (b) and (c), respectively, and by other evidence to be discussed more fully in the next report.

B. The observers were relatively untrained, with the possible exception of MORIMURA, who may be a naval officer. (To date, the evidence fails [9] to show which observers made the accurate reports, and which made the erroneous reports.)

C. Observing was done from a considerable distance. This is concluded chiefly from the fact that the demilitarized UTAH was mistaken for the WYOMING (whereas the latest issue of Jane's *Fighting Ships*, readily available in Honolulu clearly shows the WYOMING to have guns in her turrets and the UTAH not to have them), and from the fact that all battleships were reported on 6 December to have been at moorings, whereas the PENNSYLVANIA was in drydock.

D. Confidential data as to Naval operations was not compromised. This is concluded from the fact that, in general, the data transmitted to Tokyo was surprisingly inaccurate.

28. Other than the despatches above reported, none of a seasonable nature have been found which bear directly on fleet movements. Certain messages, reporting (from newspaper sources, in most instances) such facts as the arrival of an American "goodwill squadron" in Australia and New Zealand, Admiral H. E. Kimmel's trip to and return from Washington, and the passage through Honolulu of personnel and supplies destined for the Burma Road have been collected and are appended hereto in enclosure (A).

Pending

14 FEBRUARY 1942.

ENCLOSURE (A): Copies of miscellaneous despatches from Japanese Consul General, Honolulu, to Tokyo and to other Consuls, concerning military and naval subjects.

21 MARCH, 1941

(To Tokyo; by code mail to Washington)

According to despatches from Auckland and Sydney the light cruisers Brooklyn and Savannah, the destroyers Case, Shaw, Cummings, Tucker arrived at Auckland on the 17th; and the heavy cruisers Chicago, Portland, and the destroyers Clark, Cassin, Conyngham, Downs, Reid arrived at Sydney—both groups on a friendly visit. The first group departed from Auckland on the 20th and may return to Pearl Harbor. It is reported that the second group will also go to Brisbane. Today's newspapers report that the above fleet sailed under sealed orders and that although they entered Pago Pago on the 9th and departed there on the 11th that the final destination was not known by "outsiders" until they arrived. The maintenance of secrecy on this trip was a great success, it was reported.

29 APRIL, 1941

(To Tokyo)

The American Army Transport Washington with 2,500 troops and 24,300 tons of military supplies departed New York the 11th and arrived here early the morning of the 26th [2] via Panama and San Francisco. After unloading 2,000 troops, 12 student pilots, and military stores, 500 troops were embarked and she departed the 27th. It is believed this ship will be employed in transporting troops and evacuating Americans from the Far East.

14 MAY, 1941

(To Tokyo)

With respect to message No. 10 of January 8th for the purpose of reenforcing the local airforce 21 B-17 bombers, under command of Lieutenant General Emmons departed San Francisco at 1559 the 13th flying in formation and arrived Hickman Field at 0658 the 14th.

7 JUNE, 1941

(To Tokyo; by code mail to San Francisco, Los Angeles, Seattle)

the fourth received word from Washington that Admiral Kimmel started negotiations with the Secretary of the Navy. No extraordinary significance to attach to his visit.

According to an announcement by Navy Department officials Admiral Kimmel sought plans for sending units [3] of the fleet back to the mainland creation of personnel for short periods. The periods and names of vessels were not announced.

Synopsis: Questioning of former employees of Japanese Consulate, Honolulu indicates that Tadasi MORIMURA, Consulate secretary who came to Honolulu in March 1941, was the chief collector of facts for the Consulate concerning the movements of U. S. Navy vessels in and out of Pearl Harbor.

MORIMURA's coming to Hawaii was accompanied with publicity that he would attend to expatriation matters at Consulate, which work he did not do. His work at the Consulate was done in privacy of Vice Consul OKUDA's office. He involved poring over a map of Oahu, but the exact nature of his work is not known. MORIMURA went to his office at hours of his choice. He spent much time away from the office, visiting strategic points on Oahu, such as Pearl City peninsula and Alea Heights (both commanding a view of Pearl Harbor), Haleiwa beach (a potential landing place), Kaneohe Bay (across from the Naval Air Station), and made flying trips to the islands of Maui and Hawaii. On drives around Oahu, he often took with him KOTOSHIRODO, Consulate clerk, and

MI, regular taxi driver for Consulate, but sometimes sent KOTOSHIRODO to count ships in Pearl Harbor, which they last did on December 5, 1941. MORIMURA contacted many persons who have since been interned. Actions: Naval information reported to Tokyo by despatches analyzed in (b) was chiefly gathered by, or under the direction of, MORIMURA. Moved:

I. H. MAYFIELD,  
Captain, U. S. Navy,  
District Intelligence Officer.

report has been prepared to supplement references (a) and (b), and to state, insofar as is known to this office, the means by which the Japanese Consulate General, Honolulu, gathered information relative to ship movements. Paragraphs 23, 24, and 25 of reference (a), it was stated that, when interrogated, Miss Kimie DOUE, former receptionist and typist at the Consulate, subject of reference (c), stated that Tadasu MORIMURA, one of the secretaries of the Consulate, had arrived from Japan on March 27, 1941, for the sole purpose of taking charge of the expatriation work at the Consulate, but did little or nothing in connection with that work after the first few days following his arrival in Honolulu. Instead, MORIMURA was assigned to a desk in the same office with Vice Consul Otojiro OKUDA, and the nature of his work was unknown to Miss DOUE. MORIMURA often came to work about two hours after the opening of the Consulate, and was seldom at his desk in the afternoon. Miss DOUE stated that there was a week during October or November, 1941, when MORIMURA did not come to work at all. Miss DOUE saw MORIMURA leave the Consulate in a taxi between 1000 and 1100, and could not see him again the same day. The [2] staff of the Consulate called the proprietor of the ROYAL TAXI STAND, located at 6 South Street, Honolulu, (telephone 3299), and it was this stand that MORIMURA customarily called. (The proprietor of this taxi stand, John Yoshie MI, subject of reference (i), has been interned.) On other occasions, Miss DOUE saw MORIMURA leave the Consulate during business hours with Masayuki KOTOSHIRODO, subject of reference (f), one of the Consulate clerks. Sometimes they would drive away in KOTOSHIRODO's car, and sometimes they would use the above mentioned taxi. On several occasions, MORIMURA and KOTOSHIRODO would come back for the rest of the day.

According to Miss DOUE, MORIMURA had a large map of the Island of Hawaii which he used to spread out on his desk and work on from time to time.

Miss DOUE stated that she had seen Japanese characters written in pencil on the map. She had no dealings with MORIMURA other than to deliver mail to his desk.

3. Takaichi SAKAI, a Consulate clerk, subject of reference (d), when interrogated, corroborated Miss DOUE's statements about MORIMURA's failure to concern himself with expatriation matters and his frequent departure from the Consulate during business hours.

4. Another Consulate clerk, Kanaye SAHARA, subject of reference (e), also was interrogated. SAHARA stated that MORIMURA had one finger, either the middle or the third, cut off at the first joint, but could not remember which hand was without a finger. SAHARA also corroborated what Miss DOUE had said concerning MORIMURA's departures from the Consulate during business hours with KOTOSHIRODO, adding the KOTOSHIRODO often wore an aloha (sport) shirt. On these occasions, they would be gone for the rest of the day.

5. SAHARA stated that he suspected that they were going to "important places", and, upon being asked what he meant by that, said "military places." On being asked why he thought they were going to such places, SAHARA said it was because of the strained relations between the United States and Japan, and because neither MORIMURA nor KOTOSHIRODO would make any mention of where they had gone when they returned to the Consulate. SAHARA added that KOTOSHIRODO had a 1937 Ford sedan which he often used on these trips.

6. SAHARA further stated that he did not know much about MORIMURA's background because he was not listed in the Japanese Foreign Office publication containing the names and biographical data on diplomatic and consular officials. He stated that MORIMURA is 27 or 28 years old, and if [3] he is a regular member of the consular service, he should have been listed, as he could not at his age be a recent college graduate. (MORIMURA is said to have told Sakae TNAKA, a Consulate maid, that he was graduated from Hedai University.)

7. SAHARA added that he believed that MORIMURA and KOTOSHIRODO were on good terms, as SAHARA sometimes saw them joking together as they entered or departed from the office. When asked if he thought this was not strange in view of the recognized social distinction between secretaries and clerks at the Consulate, SAHARA made the explanation that both were about the same age and seemed to enjoy one another's company.

8. In light of these revelations, KOTOSHIRODO was interviewed, and his personal history is set forth in reference (f). (It should be noted that none of the Consulate clerks were interrogated until after they had severed their connections with the Japanese Government.)

9. KOTOSHIRODO stated that his duties at the Consulate were to receive and open local and Japanese mail, and to handle out-going mail. He usually logged in letters from the Foreign Office, Japan, but these letters were actually opened by Kokichi SEKI, one of the secretaries. KOTOSHIRODO stated that he wrote down the date of receipt and the number of each item from the Foreign Office, which was addressed to the Consul-General, but he did not see the actual letters, as those usually came in inner envelopes. SEKI would take this mail in to Vice Consul OKUDA, and from there it would go into the Consul's office. Each letter had a receipt inside the first envelope which was signed and returned to the Foreign Office. Routine letters would come back to SEKI from the Vice Consul, and either SEKI or KOTOSHIRODO would enter the subject of each letter and its date in a record book.

10. SEKI's predecessor at this job was Mitsugi IKETANI, who returned to Japan late in 1940. (It was recently learned that while he was in Hawaii, IKETANI was head of the JAPANESE RED CROSS.)

11. Mail from the Foreign Office, according to KOTOSHIRODO, was of two types—that which pertained to the business of the Honolulu Consulate only, and letters addressed to all Consulates. The former type would carry consecutive numbers. Ordinary mail consisted of domestic matters such as births, deaths, marriages, expatriation, divorce, and adoption. This type of mail, and the circular letters addressed to all Consulates, would arrive by post, and would be picked up at the Consulate's post office box by the chauffeur, or would be delivered by a regular mail carrier. Other mail would arrive by diplomatic courier. This would be opened in the telegraph [4] (or, coding) room by Samon TSUKIKAWA, another Consulate secretary. The couriers would carry the mail in a suitcase, and upon arrival, would go straight into the telegraph room accompanied by the Consul, Vice Consul, and SEKI. KOTOSHIRODO did not remember the same courier ever coming twice, and he added that one would not necessarily arrive every time an N. Y. K. liner called at Honolulu.

KOTOSHIRODO stated that letters received from local sources were not in at the Consulate. Only those received from the Foreign Office, other Consulates, and those of especial importance were logged. Most of the mail came from consular agents, and consisted of letters or routine reports. Office supplies for the Consulate were purchased by SEKI, who also acted as insurer. KOTOSHIRODO's desk was in SEKI's office, so he was familiar with the purchasing. Most office supplies were purchased from the Honolulu Book Company, and the remainder from the Hakubundo Book Store. KOTOSHIRODO stated that the persons usually contacted at the HAKUBUNDO BOOK STORE were Tomoaki NAKAMURA or Minoru FUJUIWARA, the manager. NAKAMURA was familiar with everyone in the Consulate. Confidential Informant J-1 (rating "A") had previously informed this office that NAKAMURA was one of the most frequent visitors at the Consulate, and although there was evidence that he had purpose other than that of selling office supplies, it was felt that he treated everyone in the Consulate, from the Consul General down, with insolent camaraderie and general disrespect that was unusual—one might say unique—coming from a member of the local Japanese community. NAKAMURA made frequent trips to all parts of the Island of Oahu in the course of his business, but when interviewed, denied that he had ever supplied information of a nature whatsoever to the Consulate. NAKAMURA has been interned. Upon his interrogation, KOTOSHIRODO was led to the matter of his relations with MORIMURA, a subject which he approached warily, and not very frankly, as will be demonstrated. He stated that MORIMURA arrived at the Consulate in March, 1941. A week later, KOTOSHIRODO drove the new car over Tantalus, a residential district on the heights overlooking Honolulu. KOTOSHIRODO admitted that he drove MORIMURA out to Waipahu, a station town about a mile equidistant from the northern shores of the Pearl Harbor Loch and the West Loch of Pearl Harbor. MORIMURA was anxious to visit a tea house called the SHIOYU, which was off the highway to the left of the high school, and which was noted for its balloon fish soup. KOTOSHIRODO had been there before. The Consulate chauffeur, Ichitaro OZAKI, advised that it was impossible to get service there without prior reservation. MORIMURA insisted. However, at the intersection KOTOSHIRODO said, "I will not go," and MORIMURA agreed, so they turned around. Following their dismissal, KOTOSHIRODO [5] displayed a reluctance to remember further trips with MORIMURA outside of town, but was finally persuaded to recall trips to the islands of Maui and Hawaii.

KOTOSHIRODO stated that he was asked to go to Maui by Vice Consul A. KOTOSHIRODO and MORIMURA left John Rodgers Airport, Honolulu, at 8:00 a. m. on the morning of May 5, 1941, and arrived at the Maui airport an hour later. They immediately hired a cab and a driver. The driver was a second-generation Japanese who could not converse very well with MORIMURA. MORIMURA spoke little English and had difficulty understanding the local *Nisei* brand of Japanese. However, they utilized the services of this driver for the two days they were on Maui. From the airport, they proceeded to the TOMOEDA HOTEL, a Japanese hotel located in Kahului, the east coast of Maui. KOTOSHIRODO said that this hotel was run by a Japanese with "no eye" (elaborated to mean that he couldn't see from it). MORIMURA talked to the owner of the hotel about a Japanese poem, but never introduced the subject. (The TOMOEDA HOTEL was operated by one Itsuo HAMADA. A letter from the Honolulu field office of the Federal Bureau of Investigation, dated March 10, 1941, described HAMADA as having a left eye that was either blind or made of glass. HAMADA was a consular agent, and was also an editor for the Nippu Jiji, a Honolulu bilingual (Japanese-English) daily newspaper. HAMADA is now in custody.)

It is interesting to note that HAMADA was a frequent contact of Shigeo KAWA, the activities of whom were reported in paragraphs 9, 10, 11, and 12 of reference (a). Letters from HAMADA to FURUKAWA at Kula Sanatorium, Maui, were found in FURUKAWA's possession, and it is known that HAMADA visited FURUKAWA, at Kula, a number of times. It was also recalled that the two men phoned each other on occasions. One of HAMADA's letters was a forceful plea that FURUKAWA dismiss the notion of suicide from his mind. FURUKAWA, as was shown in reference (a), made two attempts at suicide following the outbreak of hostilities. Another letter talked of Japanese poetry, FURUKAWA being a poet of some small reputation. Before leaving Kula Sanatorium, FURUKAWA was advertising manager for the Nippu Jiji, of which HAMADA was the Kahului representative.

17. KOTOSHIRODO stated that he and MORIMURA stayed at HAMADA hotel for two hours. They rested and had breakfast, but did not stay because the hotel looked too dirty. After they left HAMADA, they drove to the Grand Hotel in Wailuku, Maui, not a Japanese hotel. They registered here, and then drove to Lahaina, on the west coast of Maui. Ships of the United States Fleet when visiting Maui, anchor off Lahaina Roads. They stopped at a fountain shop for a while, then drove back to Wailuku. From here they drove to Spreckelsville, a few miles from Wailuku. There KOTOSHIRODO went to a [redacted] Japanese school and met Tetsunosuke SONE. Consul General KITA had requested KOTOSHIRODO to give a package to the person to whom it was addressed, a female. KOTOSHIRODO thought the package contained a gift of some sort. He gave the package to SONE, because the woman to whom it was addressed was supposed to be one of SONE's former pupils. A report from the Honolulu field office of the Federal Bureau of Investigation, dated April 11, 1942, states that SONE was the principal of the Japanese language school at Spreckelsville, had served as a Japanese consular agent for 30 years, and had served as a private in the Japanese army for two years. SONE was taken into custody on January 5, 1942, and on January 21, 1942, the Internee Hearing Board at Wailuku, Maui, recommended that SONE be paroled. While KOTOSHIRODO was presenting the package to SONE, MORIMURA stayed in the car. After leaving the school, they saw a pineapple cannery, and then returned to the hotel in Wailuku about 4:00 p. m. After dinner they took a walk, saw a swimming meet, and about 9:00 p. m. dropped down to the fairgrounds where there was dancing. They bought tickets and went inside, but did not dance. They returned to the hotel about 11:00 p. m.

18. The following day, KOTOSHIRODO and MORIMURA visited Iao Valley located in Maui's northern range of mountains, back of Wailuku. Then they drove up the summit of Mount Haleakala, a dormant volcano rising 10,000 feet above sea level which is located in the southern half of Maui. They remained at the top about 20 minutes, and on their return from the summit, passed Ku Sanatorium. KOTOSHIRODO stated that they merely drove up to the sanatorium, got out of the car, and surveyed the building. KOTOSHIRODO admitted taking a photograph of the building which he still has in his album. He insisted that he did not give the print or the negative to MORIMURA, or to anyone else at the Consulate. In the afternoon they drove to the Makawao district, in central Maui, and arrived at the airport about 3:30 p. m. Their plane took off at 4:00 p. m. and they arrived in Honolulu about 5:00 p. m. (The fact of MORIMURA's interest in the Kula region should be read in connection with the information reported in paragraphs 4, 9, 10, and 11 of reference (a).)

19. The second trip, according to KOTOSHIRODO, was made October 13-14, 1941. Again, Vice Consul OKUDA requested that KOTOSHIRODO accompany MORIMURA. They went to Hilo, Island of Hawaii, by plane, arriving in Hilo about 10:00 a. m. on the 13th. They hired a taxi driver, using him during the entire visit. His name was NARIKAWA, employed by the ABC TAXI COMPANY (probably Shigeo NARIKAWA, 1014 Kamehameha Avenue, Hilo). MORIMURA and KOTOSHIRODO registered at the Naniloa Hotel, operated by the Inter-Island Steam Navigation Company, Limited, and were assigned Room 8. After lunch on October 13th, they drove up to Kilauea Volcano, and spent the entire afternoon around the craters. They visited the VOLCANO PHOTO STUDIO, and purchased photographs of the volcano in eruption and of the *lehua* flower. The [redacted] proprietor of the VOLCANO PHOTO STUDIO was then Kenzo MAEHARA, subject of reference (j), who has been placed in custodial detention, principally for his association with officers of Japanese naval and other public vessels which used to call at Hilo.) On October 14th, MORIMURA and KOTOSHIRODO drove to the Kona district (west side of Hawaii), via Kilauea Volcano, stopping for lunch at the SHIRAKAWA HOTEL, at Waiohinu. (Of Kayato SHIRAKAWA, alien Japanese, proprietor of the hotel bearing his surname, this office has no derogatory information. At Kona, they stayed at the KONA HOTEL, at Holualoa, but according to KOTOSHIRODO they did not talk to anyone there. (Jentaro INABA, alien Japanese, proprietor of the KONA HOTEL (has no adverse record in the files of this office.) On the evening of the 14th, MORIMURA and KOTOSHIRODO went to a motion picture show at Kainaliu, about seven miles from Holualoa.

20. Certain facts about the trip to Kona are of interest. Although there are a number of Japanese hotels in Hilo, MORIMURA and KOTOSHIRODO preferred

at the Naniloa, which is a new hotel catering to the tourist trade. It is the most expensive hotel in Hilo. The trip from Hilo to Kona can be made in about one-half to four hours by automobile. However, a leisurely trip must be made, inasmuch as Waiohine is only a little more than half way between Hilo and Kona. At Kona there is a hotel comparable to the Naniloa, the Kona Inn, operated by Inter-Island Steam Navigation Company, Limited, and catering to tourists. In Kona, however, they preferred to stay at a Japanese hotel.

On October 15th, they departed from Kona and drove to Kawaihae to take the shipping. Kawaihae is the port for the immense Parker Ranch, and the smaller ranches in the neighborhood. From here they proceeded to Kapaau, in the Kohala district, and lunched at the NAMBU HOTEL. Here they talked to an old man, whose name KOTOSHIRODO could not remember. The old man told them about the birth and childhood of Kamehameha (probably Kamehameha I, 1758-1819), first king of Hawaii.) Directories show the proprietor of this hotel to be one Yoshio HORI. They had lunch at one o'clock and, stopping only at Kilauea Falls, returned to Hilo, arriving there about dark. That night, after they went to the Hananoya Tea House where they met two Japanese men, the chauffeur went along with them. They returned to the hotel about 11:00 p. m.

The following day, October 16th, they went to see the County Fair at the Hilo School and Intermediate School Building. Later they saw Rainbow Falls, the Country Club golf course, Puumale Home (county hospital for tubercular patients), and then went to eat Japanese food at the Tokiwatei. They returned to Hilo about 2:00 p. m. That evening they again visited the Hananoya Tea House, but left at 11:00 p. m.

23. On October 17th, they checked out of the hotel and went directly to the airport, taking the 10:00 a. m. plane for Honolulu. They arrived in Honolulu at 11:45 a. m.

KOTOSHIRODO insisted that the two tea house girls, the driver and the man at the NAMBU HOTEL at Kapaau were the only persons they contacted during the whole trip. KOTOSHIRODO stated that, on both trips, he handled money and was given to him at the Consulate before they left. On the Maui trip he was given \$110,000, and on the Hawaii trip, \$300.00. On the latter trip they were given \$5.00 at tea houses, while the driver cost them \$55.00.

KOTOSHIRODO admitted taking a number of trips to various points in Hawaii with MORIMURA. In the early part of April, 1941, about two weeks after MORIMURA's arrival, MORIMURA asked KOTOSHIRODO to take him to the Kaneohe district. They drove over the Nuuanu Pali and turned onto the Kaneohe road which runs along Kaneohe Bay (across from Kaneohe Air Station). They followed this road until they reached the Kailua beach area. They got out of the car, and took a stroll in the park on the ocean side pavilion. In the car again, they drove past the cattle farm and the Kailua beach, and then turned left on the road running to the Waimanalo district. They stopped near the old wharf on Waimanalo beach. They walked over to the wharf where several people were fishing. After about ten minutes, they got into the car and returned to Honolulu, arriving at the Consulate about 4:00 p. m. In July or August, 1941, KOTOSHIRODO and MORIMURA again made a trip to the Kaneohe district. This time they went in MIKAMI's taxi. Again they drove along the Kokokahi road along Kaneohe Bay, and at one point MORIMURA asked MIKAMI to slow down. Further, along the road they stopped at a roadside stand and purchased two watermelons. This stand was near a pine grove (KOTOSHIRODO evidently mistook ironwood trees for pines), on the mauka (towards the mountains) side of the road. They drove on to Kailua Tavern where MIKAMI had breakfast, while MORIMURA and KOTOSHIRODO each had a can of beer. They were served by a waitress of Portuguese ancestry. After about twenty minutes they returned to the Consulate via the Nuuanu Pali road.

On a Japanese holiday in April, the Yasukuni Shrine Extraordinary Ceremony when the Consulate was closed, MIKAMI drove KOTOSHIRODO and MORIMURA to Waianae, on the west coast of Oahu. They drove out beyond Waianae to Makua Cave, where the road ends. They departed from town about 10:00 a. m. the morning and returned about two, having lunched at a Chinese store in Waianae. KOTOSHIRODO admitted making three trips to Haleiwa, on the west coast of the island, with MORIMURA. The first trip was made in the latter part of April. They stopped at Haleiwa beach, near a ballground, for about ten minutes. Then they returned to Honolulu. Both the trip to, and the trip from, Haleiwa were made via Wahiawa. The second trip oc-

curred some time in May; the third in July. On neither trip did they get out of the car. KOTOSHIRODO remembered stopping at the *mauka-ewa* (towards the mountain—towards Ewa plantation) corner of the Pearl City intersection for a while, but he could not remember whether MORIMURA talked with anyone on those occasions. (It should be noted that the Waianae and Haleiwa beaches are considered important as the places on Oahu where enemy troops might first attempt landings.)

27. Early in the summer of 1941, MIKAMI drove MORIMURA and KOTOSHIRODO up on Aiea Heights, which overlooks Pearl Harbor. No one got out of the car, and KOTOSHIRODO was uncertain whether or not MORIMURA used binoculars. After a few minutes they drove down the hill again. In November they again drove to Aiea Heights. This time they drove in KOTOSHIRODO's car, and they were there about ten o'clock in the morning. MORIMURA directed them to visit a house just off the road, and stated that the person whom he was visiting was a Mrs. MATSUO. He asked KOTOSHIRODO to enter the house, too, so KOTOSHIRODO followed. MORIMURA introduced himself to her, and asked her about the condition of the Japanese school and the Japanese people in that district. Mrs. MATSUO hesitated, and refused to give a definite answer, stating that there were other people in the district who knew more about such matters. She offered to introduce him to other persons, but MORIMURA said that would not be necessary. MORIMURA talked with her for about 20 minutes. Afterwards they drove directly back to the Consulate.

28. Special Agent F. G. Tillman of the Federal Bureau of Investigation, Honolulu, and Lieutenant G. P. Kimball, USNR, of this office, questioned Mrs. MATSUO concerning MORIMURA's visit. Mrs. MATSUO is a *nisei* whose husband, now deceased, was a Japanese consular agent during his lifetime. She remembered the visit of MORIMURA and KOTOSHIRODO, although she did not remember their names, and she did not know that they had come from the Consulate. She stated that MORIMURA asked her how the Japanese were being treated. She answered that the Japanese on the plantation (Honolulu Plantation) were being well treated. MORIMURA then asked if they weren't "suspected". Mrs. MATSUO stated that she told him that Americans of Japanese ancestry were not suspected if they were loyal Americans. After they had gone, Mrs. MATSUO wondered if they were agents of the United States. The interrogating agent concluded that MORIMURA was looking for a case of disaffection in Mrs. MATSUO, but found her to be barren soil. From Mrs. MATSUO's house an excellent view can be had of the usual battleship moorings in East Loch.

29. During July or August, KOTOSHIRODO and MORIMURA drove to the top of Punchbowl about 8:30 a. m. (Punchbowl is a small, extinct crater which overlooks downtown Honolulu.) According to KOTOSHIRODO, they merely looked at the view and drove down again.

[10] 30. All the foregoing information has not been presented precisely as KOTOSHIRODO first told it. Much of it was drawn from KOTOSHIRODO only after several hours of questioning and prompting. Later he was taken to various areas on Oahu where he pointed out the exact spots he had visited with MORIMURA and MIKAMI. Later he typed out and signed a statement of what he had said. The information which KOTOSHIRODO gave has been rearranged in this report to indicate the various areas which he and MORIMURA visited.

31. KOTOSHIRODO finally admitted that he had made about thirty trips to the Pearl City peninsula and vicinity with MORIMURA. Sometimes they were in MIKAMI's taxi, sometimes in KOTOSHIRODO's car. On the peninsula proper they visited the Pan-American Airways landing, and also the soda water stand belonging to Teisaku ETO, subject of references (g) and (h). However, they did not always visit these two places. ETO is an alien about 67 years old. His soft drink stand is adjacent to the Pearl City Navy landing, and from this spot, one may obtain an excellent view of Pearl Harbor.

32. About two days after his arrival, in March, 1941, MORIMURA hired a taxi and went around the Island of Oahu, alone. About a week after his arrival, SEKI accompanied MORIMURA to the Pan-American Airways clippings landing at Pearl City. (KOTOSHIRODO stated that he heard this from SEKI.) About a week later, MORIMURA insisted that KOTOSHIRODO drive him to the peninsula in KOTOSHIRODO's car. They got out of the car and bought soft drinks at ETO's stand. MORIMURA talked to the ETOS, both the old man and his wife, about their business. He asked them how long they had been situated in this spot. KOTOSHIRODO did not know whether MORIMURA had a previous introduction to the ETOS, or had merely struck up a

stance. KOTOSHIRODO said that he heard SEKI and MORIMURA of ETO. They thought him a very common fellow, and thought it amusing that an alien Japanese was permitted to operate his business so close to a base.

Another Consulate contact in the Pearl City area was a young Japanese who worked at a store on the mauka (towards the mountains) side of the highway at the junction of Kamehameha Highway and Pearl City Road. MORIMURA would talk to this Japanese while KOTOSHIRODO played the pinball games. KOTOSHIRODO stated that they visited this place at least six months a month, and sometimes MORIMURA would go there alone. The last time KOTOSHIRODO stopped at this store with MORIMURA was in September, 1941. When KOTOSHIRODO was taken to the Pearl City junction, he identified the PEARL SERVICE STATION as the place MORIMURA had spoken to the young Japanese. However, KOTOSHIRODO has been unable to identify any employee of the PEARL SERVICE STATION or any other person thereat or person to whom MORIMURA had spoken. This service station was owned and operated by one Nakajiro KURASHIGE.

34. KOTOSHIRODO stated that in the middle of April, 1941, all the Consulate staff members, together with their wives and children, went on a picnic at the home of Sam WOODS at Lanikai Beach, Oahu. The party went to their destination in four taxis and the official Consulate car. On the way to WOODS residence, they travelled on the Kalanianaʻole Highway around the Head. They started out about 9:30 a. m. and arrived about 10:30 a. m. They lunched in the yard, and afterwards played soft ball. They were served fruit juice from nuts picked by an old Japanese man. Also present were a young married Hawaiian couple. At about 3:00 p. m. they left for home, returning to Honolulu via the Nuuanu Pali. They reached the Consulate shortly before 6 p. m. It was originally believed that one SAKURADA, yard man for Sam WOODS, had arranged this party. However, investigation indicated that SAKURADA had nothing to do with the affair. MIKAMI, the taxi driver, apparently arranged the outing. MIKAMI had chauffeured for the WOODS on occasions, and also had connections on the windward side of Oahu, where Lanikai is located, with a Mrs. BECKLEY, who arranged luaus (Hawaiian feasts). MIKAMI sometimes would transport the food prepared by Mrs. BECKLEY to its destination. MIKAMI was well acquainted with Mrs. Mary FREITAS, housekeeper for the WOODS. The WOODS were away on the mainland, and MIKAMI arranged the picnic through Mrs. FREITAS.

KOTOSHIRODO also was questioned concerning the existence of maps of the Hawaiian Islands in the Japanese Consulate. He stated that MORIMURA had a large map of the island of Oahu on his desk, which he saw both MORIMURA and the Vice Consul study at times. KOTOSHIRODO denied that any marks were made on the map, or that any Japanese writing appeared thereon. He was shown a Geological Survey map of Oahu (1928 edition), and he believed that this was identical to the map which MORIMURA had in his office. KOTOSHIRODO stated that he had seen MORIMURA working on a map of the Pacific Islands with a compass and protractor.

In light of the evidence that MIKAMI was a conspicuous member of the KOTOSHIRODO-MORIMURA expeditions, MIKAMI was interrogated on January 14, 1942, by Agent Tillman, Lieutenant Kimball, and Captain F. O. Blake of the Military Intelligence Division, Hawaiian Department. MIKAMI stated that he drove persons from the Consulate to golf, to parties, downtown for shopping, to take the children to school, and to Waikiki for swimming. He added that while driving the Consul's car, he paid bills and did other errands. He had been doing this for the past six or seven years. MIKAMI was extremely reluctant to answer questions, but eventually considerable information was obtained. He admitted driving MORIMURA along the Kokokahi Road, where the offices were obtained of the Kaneohe Naval Air Station. He said that several times MORIMURA had instructed him to drive slowly so that a better view of the island could be obtained. At one spot they stopped for at least three or four minutes. MIKAMI believed that [12] MORIMURA had binoculars with him, but was unable to say whether MORIMURA had used them or not. KOTOSHIRODO was along with them the second trip only. MIKAMI stated that on one occasion he had driven MORIMURA to Haleiwa, via the windward side of the island, where they stopped at "Sato's restaurant" in Haleiwa. ("Sato's restaurant" has been identified as the SEAVIEW INN, owned by Ikuzo SATO, subject of reference 12). It is known that on many around-the-island automobile trips of visiting

Japanese naval officers, a stop was made at the SEAVIEW INN, usually to eat lunch. While such stops might be accounted for by the fact that the SEAVIEW INN is the logical half-way point at which to stop for lunch on such trips, it should be noted that the restaurant is located in plain view of Haleiwa beach which is considered one of the places on Oahu where enemy troops might attempt a landing.) MIKAMI went on to state that he had driven MORIMURA to Wahiawa on two occasions. On one of these trips they attempted to enter Schofield Barracks, but the sentry at the gate refused them permission to enter because MIKAMI's taxi did not have proper identification plates. He also stated that on one occasion, he drove Tomoaki NAKAMURA, of the HAKUBUNDO BOOK STORE (see paragraph 13, above), and someone from the Consulate, to Waipahu. They saw someone there, but MIKAMI could not remember who it was.) (Where question separately, NAKAMURA vigorously denied that he ever made such a trip.) MIKAMI also confirmed the trip to Waianae mentioned by KOTOSHIRODO.

37. MIKAMI admitted taking MORIMURA to Pearl City many times, and also admitted having stopped at ETO's stand at the end of the Pearl City peninsula. However, he claimed that he did not know ETO's name. He stated that sometimes he saw an old man, and sometimes he saw an old woman. He remembered hearing the old man say the fleet had just come in, or the fleet had just gone out, and that his business prospered when the fleet was in, but fared otherwise when the fleet was out. MIKAMI often played the pinball machines while MORIMURA conversed with ETO. When taken out to ETO's stand, MIKAMI pointed out a large pile of lumber on the east side of the boat landing. He stated that this occupied a spot to which he and MORIMURA once walked in order to obtain a better view of the Naval Air Station on Ford Island.

38. One day, according to MIKAMI, he drove MORIMURA up the Waimanalo Road. The agents proceeded along this road with MIKAMI almost two miles to a point where MIKAMI said he, with MORIMURA, had turned around. At this particular point, and in the same general vicinity, there are no houses. The view of Pearl Harbor, where the agents turned around, is not good, which probably accounts for the fact that MORIMURA visited this place only once.

39. The agents also drove MIKAMI to Honouliuli. Here MIKAMI indicated a Japanese store, opposite a Standard Oil installation, at which he stated MORIMURA had asked directions. He stated that he had driven MORIMURA [13] to Honouliuli only once. Leaving the location of the Standard Oil installation, MIKAMI directed the agents along a dirt road to the main highway, which he stated he had followed back to Honolulu. It was noted that this same highway, if followed in the opposite direction, would lead to Fort Weaver and the West Loch Naval Ammunition Depot docks. However, MIKAMI denied that he had ever driven MORIMURA in that direction.

40. At Alea, MIKAMI directed the agents up the road to Alea Heights to a point just below the residence of Mr. Chester Clarke, where an excellent view of Pearl Harbor is obtained. This was the same spot to which the agents had previously been directed by KOTOSHIRODO. MIKAMI stated that he had taken MORIMURA to this spot on two or three occasions, and on at least one occasion MORIMURA had gotten out of the car and stood about three minutes observing Pearl Harbor.

41. MIKAMI stated that on December 5, 1941, he again drove MORIMURA to the vicinity of Pearl Harbor, proceeding along the old road through Fort Shafter and past Red Hill, and returning by the new Kamehameha Highway. MIKAMI stated that he saw two battleships at anchor between 1000 and 1030. Other ships led by a battleship, were coming into the harbor at that time, but he could not say how many battleships were in the line. However, he remembered that the ship behind the battleship in the lead was almost as large, and the other ships were strung out behind. MIKAMI denied returning to Pearl Harbor that afternoon. (In paragraphs 6 and 8 of reference (b) it is noted that prior to the arrival of the ARIZONA, NEVADA, and OKLAHOMA at Pearl Harbor on December 7, 1941, there were five battleships already moored. The ARIZONA, NEVADA, and OKLAHOMA, inbound, passed the outer channel buoys of Pearl Harbor between 0856 and 0931, that date, mooring before 1100.)

42. MIKAMI also stated that KOTOSHIRODO began to accompany MORIMURA to ETO's stand about the second or third trip that MORIMURA and MIKAMI made to Pearl Harbor. He added that he had taken KOTOSHIRODO to Pearl City without MORIMURA about four or five times. MIKAMI was asked if, when he took KOTOSHIRODO alone, the latter had ever said anything about his mission. MIKAMI replied that KOTOSHIRODO might have talked about

When pressed further, MIKAMI's memory failed him, and he would say that the purpose of KOTOSHIRODO's trips appeared to be a desire to see the naval base.

In light of the above statement, KOTOSHIRODO was again interrogated. He admitted that he had been to Pearl Harbor in MIKAMI's taxi about four times at MORIMURA, the last time in the latter part of November, 1941. He received instructions to make this trip from MORIMURA, who would tell him to go to Pearl Harbor and find out if there had been any [14] change in the number of ships in Pearl Harbor. However, KOTOSHIRODO stated that he did not consult with MIKAMI concerning his mission. On this trip, as well as on certain other occasions when KOTOSHIRODO had gone to Pearl Harbor unaccompanied by MORIMURA, he stated that the latter made a sketch of the harbor showing the approximate locations of the usual ship, cruiser, and carrier moorings. Not much emphasis was placed on the location or presence of destroyers in the harbor. On the last trip KOTOSHIRODO went to the end of the peninsula, turned around without talking to anyone, and returned to the Consulate about 1000. He went to the end of the Ford City peninsula to see exactly what type of carrier was berthed at Ford Island, for he could see from the highway that there was a carrier at the mooring on the west side of Ford Island. However, he went to the end of the peninsula pursuant to instructions from MORIMURA to "go all the way around."

KOTOSHIRODO also admitted that he had gone to Pearl Harbor in his taxi, alone, four or five times to check on the number of ships in the harbor. This was also done at the direction of MORIMURA. These trips, and the ones he made with MIKAMI without MORIMURA, were during the period from July to November, 1941. The last trip he made with MIKAMI alone was on November 28, 1941. The last trip he made with MORIMURA was later in the same month. KOTOSHIRODO denied that he had been to Pearl Harbor at any time in December. However, he stated that he once heard SEKI say that MORIMURA was going out to Pearl Harbor almost every day, and was spending a great deal of money on taxi fares. KOTOSHIRODO stated that the Consulate paid all of his gasoline expenses, and bought some of his oil. The greasing and oil bills he paid himself.

On several occasions MORIMURA showed KOTOSHIRODO *Jane's Fighting Ships*. One of the things he remembers that MORIMURA pointed out was that certain American battleships could be distinguished by their masts, and MORIMURA had used the word "yagura" /literally, "turret"/ to describe the masts on certain battleships.

KOTOSHIRODO stated that when MORIMURA first came to the Consulate, he and Vice Consul OKUDA used to go out together. However, as far as he knows, the time that he took MORIMURA and OKUDA to Kailua, as described in paragraph 46 of reference (a), is the only time they ever contacted anyone outside of the Consulate.

KOTOSHIRODO stated that MORIMURA seemed to know Shigeo SHIGENAGA, proprietor of the VENICE CAFE, Honolulu. MORIMURA took KOTOSHIRODO there one time when Special Envoy KURUSU was on his way to England and was detained at Midway Island. KOTOSHIRODO stated that MORIMURA had talked to some of the waitresses at the VENICE CAFE, and told him to know them. (The [15] VENICE CAFE drew the largest part of its trade from Naval enlisted personnel. SHIGENAGA, the proprietor, is an American about 40 years old. His home, when searched, revealed a quantity of Japanese literature strongly nationalistic in tenor. Also discovered were photographs of high Japanese naval officers who visited Honolulu in 1939, as well as a photograph of a Japanese Army officer. SHIGENAGA has made several trips to Japan. In October, 1939, he invited Commander John P. Dix, USN, of the USS Patrol, to visit Admiral Yorio SAWAMOTO aboard H. I. J. M. S. IWATE, a ship of a Japanese naval training squadron then visiting Honolulu. Commander Dix accepted, and SHIGENAGA made all arrangements through the Japanese Consulate. Commander Dix commented on the ease with which SHIGENAGA arranged the visit, and on the fact that SHIGENAGA treated all the Japanese officers present, from the Admiral on down, as equals. SHIGENAGA even interned for the duration of the war.)

On February 9, 1942, Special Agent Tillman, Captain Frank O. Blake, of the Military Intelligence Division, Hawaiian Department, and Lieutenant Kimball interrogated Kimika ASAKURA, who was employed as a maid at the Consul's residence from June 16, 1941, to February 9, 1942. Miss ASAKURA is a naturalized citizen who was born at Alea, Oahu, on May 18, 1923. Miss ASAKURA

stated that a man named FUJITA, first name unknown to her, came to her home on or about June 13, 1941, and asked if she would like to work at the Consulate. She had never seen FUJITA before, but she believed that he knew her father. She believed that FUJITA was a flower raiser and lived in Pauoa Valley, Honolulu. He drove her to the Consulate on the same day. There she talked to Ichitaro OZAKI, the Consulate chauffeur, and later, to Kokichi SEKI, who engaged her services. Miss ASAKURA's duties at the Consulate were to clean the Consul General's living quarters, wait on table, and do his laundry. The Consul General lived upstairs in a building which is on the *makai* (towards the sea) side of the office building. Miss ASAKURA lived downstairs, sharing a room with Clara Yoshie KIKKAWA, who was the maid for the house in which MORIMURA lived.

48. Miss ASAKURA's predecessor at the Consul General's residence was a girl named Sakae TANAKA. Miss ASAKURA stated that Sakae TANAKA had been rather intimate with MORIMURA, according to gossip she had heard from Miss KIKKAWA, and the cook and his wife. Miss TANAKA left the Consul's employ because she had a quarrel with the cook.

49. Consul General KITA's most frequent social visitor was MORIMURA. MORIMURA would drop over to visit KITA in the evenings several times a month. Sometimes SEKI would drop in, and she would hear him talking about treasury matters, money and business, with KITA. She stated that she had never heard MORIMURA discuss business matters with KITA.

[16] 50. The *mauka* (towards the mountains) residence in the Consulate residence in the Consulate grounds was occupied by Vice Consul OKUDA and his family. SEKI lived upstairs in the office building. MORIMURA occupied one of the residences facing on Kuakini Street, while Kyonosuke YUGE, another secretary, occupied the other residence on that street. OZAKI, the chauffeur, and his wife, lived above the garage.

51. Miss ASAKURA stated that on December 7, 1941, she called the Consul General about 8:30 a. m. and informed him that breakfast was served. KITA was in bed when he was called. Later he came down and ate his breakfast. Miss ASAKURA did not see KITA having breakfast as the usual way of serving that meal was to set it on the table in the dining room where he could help himself. She was busy with her work and did not see anyone come from the office building to call KITA. Neither did the telephone ring. Later in the morning, reporters came to the residence and asked for KITA. When the maid could not find him at the residence, she suggested to the reporters that he might be at his office. Thereafter, Miss ASAKURA remained at the Consulate and assisted in serving members of the staff, who were all living in the office building. She stated that her services as an interpreter were frequently used by the detectives who were placed on guard duty at the Consulate from and after the morning of December 7th.

52. On February 11, 1942, the agents interrogated Miss Yoshio KIKKAWA. Miss KIKKAWA stated that she had obtained her position at the Consulate through Toyoki FUJITA, who lived next door to the KIKKAWAS and raised flowers. At the Consulate, Miss KIKKAWA did housework for MORIMURA. Miss KIKKAWA stated that MORIMURA occupied a house on the Consulate grounds facing Kuakini Street. She confirmed the fact that she shared quarters in the Consul General's house with Miss ASAKURA. Miss KIKKAWA stated that MORIMURA usually got up at nine o'clock in the morning, had breakfast at nine-thirty, and went over to the Consulate office building about ten o'clock. He lunched about twelve, spending about an hour, and returned from the office about three. After that, MORIMURA sometimes played baseball in the grounds with other members of the staff and the clerks. Other times he read, listened to the radio, or went out with friends.

53. Sometimes, however, according to Miss KIKKAWA, MORIMURA would get up about seven in the morning. Often he would leave the Consulate about three in the afternoon with KOTOSHIRODO, and would be gone for several hours, not returning until about seven in the evening. On two occasions, KOTOSHIRODO stayed and had drinks and dinner with MORIMURA. She stated that Samon TSUKIKAWA, another Consulate secretary, once came to see MORIMURA after dinner. Sakae TANAKA, a former maid at the Consulate, came to see MORIMURA several [17] times in the evening after she had left the Consulate. Girls from the Shunchoro Tea House came to MORIMURA's house several times in the evenings, and remained two or three hours. On eight or nine occasions, after attending tea house parties, MORIMURA slept until noon. Each morning, MORIMURA had to be awakened. In September, 1941, MORIMURA went on quite a drunk. When he awoke, about noon, he was still drunk, and he

considerable commotion. Miss KIKKAWA went to the Consulate office and informed SEKI, who came over and induced MORIMURA to go back and sleep off his drunken condition. Upstairs, MORIMURA had a study, this was a wooden desk which he kept locked. On several occasions, Miss KAWA saw letters written by MORIMURA, but the characters were too difficult for her to read, she said. She once saw a letter written by MORIMURA at a tea house. This letter she could read; it was a love letter written to a girl named Tomoyoko. (Special Agent Tillman and Lieutenant Kimball interviewed "Tomoyoko", a *geisha*. She admitted her association with MORIMURA, and told of a golf game she and another *geisha* once played with MORIMURA and Katsuichiro TAKAGISHI, an espionage suspect who left Honolulu for Japan on the Taiyo Maru, November 5, 1941.)

On December 7, 1941, Miss KIKKAWA, according to her statement to the Consul, left the Consulate about 11:30 a.m. She had set breakfast on the table for MORIMURA about 8:30 a.m. There was a slip of paper on the table directing her to put breakfast on the table and then go home. MORIMURA usually left messages on Saturday nights. There was nothing noticeably different in his activities just prior to December 7th, she said. Miss KIKKAWA specifically stated that she did not like MORIMURA, that he was "awful" and "tasty things." MORIMURA told Miss KIKKAWA that he had lost the tip of his finger "on account of love". (It has been noted from several sources that MORIMURA's fingers, either the middle or third finger, was cut off at the first knuckle. However, the various observers have been uncertain which finger was mutilated.) Miss KIKKAWA stated that MORIMURA was quite friendly with Lawrence K. NAKATSUKA, a reporter for the Honolulu Star-Bulletin. Occasionally, NAKATSUKA used to telephone MORIMURA, and on occasions that she knew of, they went to a tea house together.

Also on February 11, 1942, Miss Sakae TANAKA was interviewed by the Consul. She stated that she lived in Upper Pauoa Valley, Honolulu, with her husband, Yokichi TANAKA, a vegetable farmer. She was born in Honolulu on February 28, 1924, and worked at the Consulate from March 13 to June 12, 1941. She did housework in the Consul's residence. Miss TANAKA stated that she retained her job at the Consulate through FUJITA and in her own words, "he kept me in there to work." She left the Consulate because of a quarrel with FUJITA, who had recently come from Japan, as to who had left the icebox open. Miss TANAKA denied having had any intimate relations with MORIMURA.

[18] stated that she once had asked him about his finger, but he refused to tell her anything about it. She often went to the house where MORIMURA lived, to see Miss KIKKAWA, who worked there. MORIMURA always made sure that he could not, and would not, let her go into his study room.

One Sunday, MORIMURA took both Miss TANAKA and Miss KIKKAWA to Kaneohe, where they went out in the glass-bottom boat. This was while MORIMURA was still employed at the Consulate. They drove over with MORIMURA in his taxi, and MIKAMI joined them in the glass-bottom boat. After the trip, they went to Kailua and had lunch on the beach, returning to Honolulu via Koko Head. While on the boat, MORIMURA asked MIKAMI questions about Coconut Island, in Kaneohe Bay, but Miss TANAKA could not answer any other questions about the bay which MORIMURA asked. While they were there, they drove by Dr. Iga MORI's country place and stopped and looked at it.

However, Dr. MORI was not there, so they did not go into the house. Dr. MORI is an "elder statesman" of the Japanese community of Honolulu, and has been an advisor to the Consulate. He was taken into custody following the outbreak of hostilities, but due to his advanced age and enfeebled condition, he was eventually released. Later, Miss TANAKA stated that prior to going to Kaneohe district, they had driven up Aiea Heights in MIKAMI's taxi.

Robert Orion Glover, Cy (AA) USNR, of the office of the Cable and Radio Division, Honolulu, has reported that he was fairly well acquainted with MORIMURA, having met him through his membership in the DAI NIPPON BUTOKU Club. Glover has been training in Japanese military arts under the direction of Henry OKAZAKI at the NIKKO RESTORATION SANATORIUM, Honolulu, since 1934, and has conducted classes himself since 1937. A *kendo* (fencing) group, of which Glover was a member, began meeting in the summer of 1941. Glover, George HAMAMOTO of Maui, who was a member of this group, declared that the group needed more help with its study. For this purpose, HAMAMOTO induced MORIMURA to the group, in October, 1941. Glover first met MORIMURA in mid-October, and he was told that MORIMURA was a member of the

Japanese Consulate staff, that he had come from Japan only three months before, and that he was an accomplished *kendo* man. In his *kendo* matches and instructing, MORIMURA disapproved of the local style of fencing which, as described by Glover, consists of short, rapid thrusts without much power. MORIMURA stressed the superiority of the heavy chop stroke, stating that the latter had proved best in the China "Incident." Glover said that MORIMURA did not speak English very well, although he was an attentive listener, and appeared to understand the language. MORIMURA showed particular interest in the *haoles* (whites) in the *kendo* class, and asked them many questions as to who they were, where they were educated, where they worked, and similar questions. Besides Glover, there were two other whites in the class, Ted Fielding, Y2c USNR, and Harold Schnack, a [19] junior draftsman, Navy Yard, Pearl Harbor. MORIMURA once invited Glover and Fielding to join him in one of his wild parties, but the invitation was not accepted.

58. According to Glover, MORIMURA was known to travel a great deal, around Oahu and between the islands. MORIMURA once remarked to Glover that he was interested in Maui, that he had been over there and liked it very much. MORIMURA also went fishing a great deal, shore-casting and spear-fishing with a glass box. It was not clearly established whether MORIMURA ever went deep-sea fishing on sampans.

59. Alice ABE, a waitress at the SUNCHORO TEA HOUSE, Honolulu, whose professional name is "Sadako", also was interviewed by the investigators. She stated that MORIMURA and Ryuichi MORIBE, subject of reference (k), once held a private party at that tea house, with only those two men present. It is not known what was discussed at that meeting. (MORIBE, who has been interned, is a prominent alien businessman in the Japanese community of Honolulu. He admitted, among other things, attending a dinner with Consul General KITA, Vice Consul OKUDA, and other prominent local Japanese who were close to the Consulate.)

60. A number of undeveloped leads concerning the Consulate and persons who had contacts with it are still under investigation by the local intelligence agencies, and new leads are from time to time uncovered in the investigation of seemingly unrelated cases of individuals being considered for internment. The same will be developed in further reports under the general title of this case, or under individual case titles, as may be appropriate.

INVESTIGATION REPORT

Fourteenth Naval District

Subject: Japanese Consulate, Honolulu—Espionage Activities

Report made at: 14ND—Honolulu, T. H.

Date: Feb. 15, 1943

Report made by: Lt. (jg) W. B. Stephenson, USNR, Ens. Don Woodrum, USNR.

Period covered: June 15, 1942—Feb. 10, 1943 Status of Case: PENDING—14ND

Origin of Case: Investigation of espionage activities of the Japanese Consulate, Honolulu

Character of Investigation: Espionage

Enclosures: (A) Copy of signed statement of Richard Masayuki KOTOSHI-RODO, dated Oct. 1, 1942, entitled "Trip to Kauai". (Photostat to ONI; copies to others.)

*Synopsis.*—Former clerks and employees of the Japanese Consulate were interviewed and various investigative leads developed therefrom followed.

ew of all known Consulate espionage activity indicates that the Consulate concerned only in "legal" espionage; that is, that which could be discovered observation (in a broad sense) without entering any restricted area. Interest displayed in U. S. Fleet movements, airports, harbors, Army camps, and any instruction by the Army or Navy. Interest also was shown in power plant mail. Richard Masayuki KOTOSHIRODO's trip to Kauai in July, 1941, to information for the Consulate, is discussed herein. Trips taken by Secre-adasi MORIMURA and KOTOSHIRODO appear to have been made for survey purposes. There is no evidence that either of these individuals shed contacts on Kauai, Maui, or Hawaii. However, there is evidence ice Consul OKUDA maintained a personal espionage agent on Maui. r information indicates that the Consulate was granted an allowance for n Intelligence", and was using paid Korean informants to keep close con-th Korean nationalist movements.

[2] 1. This report is a continuation and an expansion of the material set forth in references (a), (b), and (c). During September and October, 1941, all former employees of the Japanese Consulate, Honolulu, who were still available were reinterviewed in the process of a joint investigation conducted by the Army Contact Office (MID), Honolulu; the Federal Bureau of Investigation, Honolulu; and the District Intelligence Office. In addition, a number of other individuals who were in a position to supply information concerning the espionage activities of the Consulate were interviewed.

2. The following officers and agents were present at various times during the interrogations which were conducted at the Army Contact Office, Honolulu:

**Military Intelligence Division:**

Captain Frank O. Blake

Special Agent William T. Hiraoka

**Federal Bureau of Investigation, Honolulu**

Special Agent J. Harold Hughes

Special Employee Larry S. Chiwa

**District Intelligence Office**

Lieutenant G. P. Kimball

Lieutenant (jg) W. B. Stephenson

Ensign Don Woodrum

3. The following individuals were interviewed at the Army Contact Office: representatives of the three agencies:

Richard Masayuki KOTOSHIRODO—Formerly employed as a clerk at the Japanese Consulate, Honolulu, subject of reference (d).

Joan Kimie KOTOSHIRODO—Wife of Richard Masayuki KOTOSHIRODO.

Takaichi SAKAI—Formerly employed as a clerk at the Japanese Consulate, subject of reference (e).

Katsukichi MURAOKA—Formerly employed as a clerk at the Japanese Consulate, subject of reference (f).

[3] Kanaye SAHARA—Formerly employed as a clerk at the Japanese Consulate, subject of reference (g).

Yasumasa MURATA—A clerk at the Japanese Consulate until 1938.

Miss Kimie DOUE—Formerly employed as a receptionist at the Japanese Consulate; subject of reference (w).

John Yoshiye MIKAMI—Regular taxi driver for the Consulate, subject of reference (h).

Albert Shulchi HAYASHI—Occasional taxi driver for the Consulate.

Koreshige KUDO—Occasional taxi driver for the Consulate.

Shotaro NIYA, alias Shigetaro MATSUO—Regular taxi driver for Kenji KIMURA, manager of the Honolulu office of the N. Y. K. line. He is the subject of reference (i).

ICHITARO OZAKI—Consulate chauffeur.

Jitsuei TAKAMIYA—Taxi driver for KOTOSHIRODO and Tadasi MORIMURA, a Consulate secretary, on the occasion of their visit to the Island of Maui.

4. The following individuals were interviewed by agents of the Military Intelligence Division alone:

[4] Shingo NARIKAWA—Taxi driver for KOTOSHIRODO and MORIMURA on the occasion of their trip to the Island of Hawaii.

George Masayoshi KAWAMOTO—Relative of KOTOSHIRODO who was visited by KOTOSHIRODO during his stay on the Island of Hawaii.

Toshimasa MINATOYA—Taxi driver for KOTOSHIRODO and his wife on the occasion of their visit to the Island of Kauai.

Namiko FUKUSHIMA—Recipient of a present from Consul General KITAHARA, which was delivered by MORIMURA and KOTOSHIRODO to Tetsunosuke SONE, a *toritsuginin* at Puunene, Maui.

Mrs. Tetsunosuke SONE—Wife of Tetsunosuke SONE, interviewed in lieu of her husband, who is now interned on the mainland.

5. The following individual was interviewed by an agent of the Federal Bureau of Investigation:

Noah Kwang Won CHO—A Korean Christian minister who rendered various services to the Japanese Consulate on Korean matters. CHO is the subject of reference (j).

6. The following individual was interviewed by officers of the District Intelligence Office:

Lawrence NAKATSUKA—Reporter employed by the Honolulu Star Bulletin who covered the Japanese Consulate as one of his regular assignments.

## TRIPS MADE TO VARIOUS PARTS OF OAHU

*Pearl Harbor Area*

The information set forth in this report concerning the various trips made MORIMURA and KOTOSHIRODO is intended only to supplement the information thereon already set forth in reference (c). KOTOSHIRODO amplifies certain phases of these trips, but he did not contradict his former story on a few minor points.

KOTOSHIRODO stated that he made his first trip from the Consulate to the vicinity of Pearl Harbor about January, 1941, when he was asked by Vice Consul Otojiro OKUDA to drive Kokichi SEKI, one of the Consulate secretaries, to Pearl City and Alea. KOTOSHIRODO admitted that the purpose of these trips was to determine the number and types of ships in Pearl Harbor, to keep the Consul General informed of the movements of United States vessels. KOTOSHIRODO further stated that to the best of his knowledge, personnel of the Consulate had begun making these trips either in December, 1940, or in January, 1941. (It should be noted here that there is no evidence that any agent of the Consulate ever entered the Navy Yard, Pearl Harbor, without official invitation.)

To the best of KOTOSHIRODO's recollection, it was early in 1941, probably in January, that he overheard OKUDA tell SEKI that they (OKUDA and SEKI) should start "motoring around." KOTOSHIRODO also remembered seeing heavy Kyonosuke YUGE, another secretary, say, about the same time, that all Consulate secretaries should start making Sunday "excursions" to "public places" such as radio station KGU, the Hawaiian Pineapple Company, and the Navy Yard. KOTOSHIRODO stated that prior to January, 1941, he had never seen any evidence of any secretary's making trips away from the Consulate as he and MORIMURA subsequently did.

For the first few months, SEKI acted as observer. KOTOSHIRODO remembered having "heard" that SEKI had attended a naval academy in Japan at some time, but had been forced to withdraw before graduation because of his poor health. However, SEKI was interested in, and had considerable knowledge of, naval matters. KOTOSHIRODO stated that he and SEKI made a number of trips to Pearl Harbor together.

When Tadasi MORIMURA first arrived in March, 1941, SEKI and MORIMURA went to observe the ships in Pearl Harbor together. Occasionally KOTOSHIRODO went along with them. He stated that both secretaries knew how to identify various types of warships, and they would explain various identifying characteristics to KOTOSHIRODO.

KOTOSHIRODO stated that in 1941 someone from the Consulate would go out to look at the ships in Pearl Harbor about twice a week. However, SEKI and MORIMURA have been of the opinion that observations should be made more frequently.

13. KOTOSHIRODO stated that he made his first trip alone to observe ships at Pearl Harbor in August, 1941. He claimed not to have stopped anywhere on this particular trip, but to have counted what ships he could see while driving at 25 miles per hour on Kamehameha Highway, just outside the Navy Yard boundaries. Whenever he went to Pearl Harbor, whether alone or with MORIMURA or SEKI, KOTOSHIRODO always was asked to state how many ships he had counted. On some occasions he was told to count only the number of destroyers, while SEKI or MORIMURA would count the other types of ships.

KOTOSHIRODO was asked whether he knew the usual berths and moorings of the various types of warships in Pearl Harbor. He stated, correctly, that battleships berthed on the Honolulu side of Ford Island; that cruisers berthed on the side of Ford Island nearest the Pearl City landing; that destroyers and cruisers moored in East Loch, off Waiau. He further stated that MORIMURA had pointed out a vantage spot on the Kamehameha Highway between Alea and Makalapa where the best view of the Submarine Base could be obtained. KOTOSHIRODO stated that he did not know what a torpedo was, and he added that he had never heard MORIMURA discuss the subject.

KOTOSHIRODO remembered conversations with MORIMURA in which the latter had stressed the strategic importance of the Alea and Pearl City areas for purposes of observation. MORIMURA had attempted to locate a friend in Alea, presumably to develop her as an informant, and had asked KOTOSHIRODO if he had any close friends in Alea or Pearl City "who could

be trusted". KOTOSHIRODO was unable to say whether MORIMURA had succeeded in this plan.

16. MORIMURA told KOTOSHIRODO that occasionally he would board a jitney bus in Honolulu and head for some destination beyond Pearl Harbor. He would get off at Alea and walk around a bit. On one occasion, according to his story, MORIMURA got off the jitney at Alea and walked back along the Kamehameha Highway, finally coming to a Navy Yard gate. KOTOSHIRODO was unable to state whether this was the Submarine Base gate or the main gate; however, the former seems more likely. At the gate, MORIMURA inquired about getting employment in the Navy yard. The sentry referred him to an office downtown. MORIMURA also told KOTOSHIRODO that he "roamed around" Alea.

17. KOTOSHIRODO stated that he and SEKI had been driven to Pearl Harbor on a number of occasions by John Yoshiye MIKAMI, the usual Consulate taxi driver. However, MIKAMI, when interviewed, denied ever having driven SEKI on any of the observation trips, although he admitted driving KOTOSHIRODO and MORIMURA on numerous occasions.

#### *Kaneohe Bay Area*

18. About one month after MORIMURA arrived in Honolulu, KOTOSHIRODO drove him (in KOTOSHIRODO's car) over the Nuuanu Pali, thence around the Kokokahi Road. They drove slowly and looked across the bay toward the Kaneohe Naval [7] Air Station. At the Kailua Beach Pavilion, they parked for about five minutes, but did not get out of the car. After leaving Kailua they drove through Kailua town, without stopping, and proceeded along the highway to Honolulu via Waimanalo. They stopped at Waimanalo beach, near the old pier. This time they got out of the car and walked out on the pier. However, they talked to no one. MORIMURA told KOTOSHIRODO that he could not see Bellows Field (Army) from the pier. They stayed here for five or ten minutes, and then returned to Honolulu by way of Koko Head. They made no other stops. KOTOSHIRODO cannot remember having heard MORIMURA make any comment about the Naval Radio Station at Wailupe.

19. Shortly after their trip to Maui (early in May, 1941), MORIMURA and KOTOSHIRODO, this time driven by MIKAMI, again went over the Nuuanu Pali. As they approached Kaneohe town, they turned onto the Kokokahi Road, and drove to the Kalama Road. While on the Kokokahi Road they had MIKAMI drive slowly. KOTOSHIRODO believes that MORIMURA had field glasses with him on this trip, but he was unable to remember whether MORIMURA had used them. However, he did remember MORIMURA's observing that all the hangars at the air station appeared to have been completed. MORIMURA had no camera with him. (KOTOSHIRODO could not remember seeing MORIMURA with a camera on any occasion.) On the Kalama Road, they stopped at a watermelon stand on the side of the road away from the beach. Then they proceeded to the Kailua Tavern, where MIKAMI ate breakfast, and KOTOSHIRODO and MORIMURA each drank a can of beer. They talked to no one but the waitress at the tavern. From there they returned to Honolulu via the Nuuanu Pali highway. The whole trip lasted about two and a half hours. KOTOSHIRODO believed that the purpose of this trip was to observe Kaneohe Naval Air Station.

20. Paragraph 34 of reference (c) describes a picnic held by the Consulate at the home of Sam WOODS, at Lanikai Beach, Oahu, about the middle of April, 1941. Ichitaro OZAKI, regularly employed chauffeur for the Consulate, recalled two such picnics, an earlier one having taken place in 1940, while OKUDA was Acting Consul General. On this occasion, the entire Consulate staff attended. They drove over the Nuuanu Pali, and then OKUDA ordered OZAKI to drive to Lanikai by way of Kaneohe (a considerable detour). They parked at Kaneohe and everyone in the party went sightseeing in a glass-bottomed boat in Kaneohe Bay. Then they drove to Lanikai by way of the Kokokahi Road. On the occasion of the second picnic, described in reference (c), they made no such detour, but proceeded directly to the WOODS home.

21. KOTOSHIRODO was asked to describe again the trip to Kailua which was detailed in paragraph 46 of reference (a). This trip was made in the latter part of October, 1941. (KOTOSHIRODO was unable to remember, however, if this trip was made prior to the arrival of, during the visit of, or after the departure of, the TATUTA MARU, Japanese evacuation ship which was in port October 23-24, 1941.) OKUDA accompanied MORIMURA and KOTOSHIRODO

the latter's car. This was the only trip on which OKUDA accompanied the two, and OKUDA appeared to be very nervous. KOTOSHIRODO was given no explanation of the reason for this trip, nor was he told where to go when he left the Consulate. OKUDA merely instructed him to "just go on driving". They proceeded over the Nuuanu Pali and went directly to Kailua. When they reached the Kailua Tavern, OKUDA directed KOTOSHIRODO to drive straight ahead, toward the ocean, past the tavern to the second intersection. There KOTOSHIRODO was directed to stop the car and MORIMURA got out. Then OKUDA and KOTOSHIRODO drove down the road almost to the junction of the Kalama Road, where OKUDA told KOTOSHIRODO to stop the car and wait for MORIMURA, who was to be in about 15 minutes.

KOTOSHIRODO stated that while driving from Honolulu he had glanced in the rear-view mirror and noticed that OKUDA had a money bag folded in a manner as to indicate that there might be a stack of currency in it. When MORIMURA left the car he wore white trousers and an aloha (sport) shirt. He wore no coat, and his shirt was hanging outside his trousers. He had a knife in his hands. KOTOSHIRODO did not know where MORIMURA went. When the latter failed to return in 15 minutes, KOTOSHIRODO suggested that he return and look for him, but OKUDA said they were to wait instead. After the absence of about 30 minutes, MORIMURA returned. His appearance was the same as it was when he left, except he was carrying a tree branch with him. When he got into the car, MORIMURA told OKUDA, "It's all okay", or something of the sort, according to KOTOSHIRODO's stated recollection.

John Yoshiye MIKAMI, when interrogated, stated that he had driven MORIMURA over to Windward Oahu some five or six times. KOTOSHIRODO was along on some of these occasions; at other times, MORIMURA was alone. On all occasions he was directed to drive slowly along the Kokokahi Road, which affords an excellent view of the Kaneohe Naval Air Station.

According to the statement made by Ichitaro OZAKI, chauffeur for the Consulate, the Consul General's official car was never used for exploring the island. This car was driven only 17,000 miles during the four years it was used by the Consul General. It was used primarily by the Consul General himself, or by MIKAMI when he drove around town on errands. The only time it was used for a trip to Windward Oahu was on those occasions when the Consul General escorted a visiting dignitary on a sightseeing tour of the island. The itinerary for these trips was to follow the coast around Koko Head and through Waimanalo, and return to Honolulu via the Nuuanu Pali.

#### *Other Parts of Oahu*

The reinterrogation of KOTOSHIRODO and MIKAMI added little information concerning trips to other portions of Oahu, it being largely a repetition of the information set forth in paragraph 26 of reference (c). However, some miscellaneous items are of interest.

KOTOSHIRODO remembered having heard MORIMURA say that he had made a trip around the island only a day or so after his arrival (March 27, 1941). KOTOSHIRODO believed that MIKAMI had driven MORIMURA on this occasion. KOTOSHIRODO denied ever having made a complete circuit of the island with MORIMURA.

27. KOTOSHIRODO also remembered hearing MORIMURA speak of an overnight on some Oahu beach, but MORIMURA had added no details, the time and circumstances under which MORIMURA had done this were known to KOTOSHIRODO.

MORIMURA also told KOTOSHIRODO of meeting a "nice girl" at Haleiwa. Apparently she was a Japanese language school teacher, but MORIMURA did not reveal her name.

KOTOSHIRODO stated that he and MORIMURA had made only one trip to the Haleiwa region. On that occasion they went directly to Haleiwa Park, to the beach, where they stopped the car near a concrete wall. They did not get out of the car, but sat there for five or ten minutes. MORIMURA mentioned that it was a good swimming beach, but did not talk about the reef or any other subject of possible military interest. At the time, KOTOSHIRODO had no idea why MORIMURA made this trip to Haleiwa.

KOTOSHIRODO recalled two trips to Waianae. On the first occasion, they were driven by MIKAMI, and drove to the end of the road, Makua Cave.

On the second occasion, KOTOSHIRODO and MORIMURA drove in the former's car, and they went as far as Nanakuli Beach.

31. KOTOSHIRODO stated that they had never driven the road between Waiialua and Kaena Point.

32. KOTOSHIRODO could remember no significant discussions with MORIMURA concerning military objectives on Oahu. Beaches as potential landing spots for invasion forces were never discussed, he said. Hickam Field and the Kaneohe Naval Air Station were discussed only in a cursory fashion. Other airfields on Oahu were never mentioned. MORIMURA once estimated the air strength on Oahu to be no more than 500 planes. (That this figure was fairly accurate is reflected in the Navy Department's communique of December 5, 1942, which revealed that there were 475 Army and Navy planes on Oahu on the morning of December 7, 1941.)

#### TRIPS TO OTHER ISLANDS

##### *Kauai*

33. During the course of the reinterrogation, KOTOSHIRODO admitted that he had made a trip to the Island of Kauai for the Consulate during July, 1941. KOTOSHIRODO had not mentioned this trip on the original interrogation. He and his wife made this trip together; they were not accompanied by any other representative of the Consulate.

34. Originally, MORIMURA had been scheduled to make the trip to Kauai with KOTOSHIRODO, and the latter had been so informed by OKUDA about 10 days prior to the prospective date of departure. However, a disagreement arose among [10] OKUDA, MORIMURA, and SEKI. SEKI, who had made none of the trips to the outside islands, wished to make this trip himself, and because of this, friction developed between SEKI and MORIMURA. To settle the argument, OKUDA decreed that neither should go. Instead, he told KOTOSHIRODO to take Mrs. KOTOSHIRODO along as a "front".

35. Two days before he left, KOTOSHIRODO conferred for about an hour with OKUDA in the latter's office, and received the following instructions:

(a) OKUDA showed KOTOSHIRODO a rough sketch of the Barking Sands Airport, said by OKUDA to have been taken from a newspaper, and instructed KOTOSHIRODO to note any activity there;

(b) OKUDA also showed KOTOSHIRODO a photograph of Nawilawili port, taken about 1939, and instructed the latter to note any changes;

(c) OKUDA stated that he had heard a story (KOTOSHIRODO could not remember the source) that the United States Navy was planning to make some use of Hanalei Bay, and KOTOSHIRODO was instructed to note evidence, if any, of Naval activity there;

(d) KOTOSHIRODO was instructed to note what use was being made of the airport in the old race track at Lihue, and to further note any expansion activity there;

(e) He was further instructed to take a look at the power plant in Wainiha Valley (the only power plant on the Island of Kauai). The Vice Consul showed KOTOSHIRODO a map of Kauai, in English, which showed the location of the power plant, and had transmission lines printed in red. (It is believed that this map was a United States Geological Survey map, edition of 1912.)

OKUDA impressed upon KOTOSHIRODO that the primary rule to be obeyed was caution. He was to tell no one that he was from the Consulate. He was to make no inquiries about the things he was sent to observe. He was to contact no friends or relatives. He was to obtain only such information as he could see with his own eyes. Before he left, both SEKI and MORIMURA told him to treat the trip as a vacation and have some fun.

36. KOTOSHIRODO and his wife departed for Kauai by airplane on Saturday morning, July 12, 1941. (This has been verified by an inspection of the records of the Inter-Island Airways, Ltd.) Mr. and Mrs. KOTOSHIRODO left their home at 0715 and were driven to the airport in MIKAMI's taxi. At John Rodgers Airport, KOTOSHIRODO learned that he would be unable to return to Honolulu on [11] Sunday afternoon, July 13th, as he had planned, so he decided to return the following morning. He then directed MIKAMI to meet the Monday morning plane. The plane for Kauai departed from Honolulu at 0800 and arrived at Port Allen airport about 0900, on July 12th.

37. A number of taxis were waiting for fares at the Port Allen field when KOTOSHIRODO's plane arrived. However, there was only one Japanese driver,

KOTOSHIRODO approached him. The driver has been identified as Toshi-MINATOYA. OKUDA had warned KOTOSHIRODO that he should use Japanese drivers when "sightseeing". KOTOSHIRODO told MINATOYA he and his wife were sightseeing on Kauai and wanted to see both sides of the island. They agreed on a price. (KOTOSHIRODO stated that he agreed to pay \$25.00. MINATOYA, when interviewed, stated that the price was \$20.00. Records of the Nawiliwili Transportation Company, MINATOYA's employer, indicate that the latter figure was the correct one.)

From the airport, they drove directly to Waimea Canyon, getting out at the tourists' observation point for 10 or 15 minutes. Then they drove further up the road until they reached Kokee. At MINATOYA's suggestion, they turned back here. They returned to the Waimea Hotel, where MINATOYA and KOTOSHIRODO and his wife made mutual introductions and lunched together. However, KOTOSHIRODO did not tell MINATOYA that he was from the Consulate.

They left the Waimea Hotel about 1400 and drove to the Barking Sands. MINATOYA had postponed this trip until the afternoon because of MINATOYA's information that the Army held bombing practice there in the morning. MINATOYA mentioned that there was a new airport at Barking Sands. They drove as far as a large sand hill, where KOTOSHIRODO and his wife got out of the car and walked to the top of a dune. They saw only sand, sea, and *keawe* (algaroba).

They remained at Barking Sands for about 15 minutes, and then departed in the direction of Lihue about 1530. Enroute to Lihue they stopped at the Lighthouse for five or ten minutes, and the Ancient Hawaiian Battleground. These spots are well known points of tourist interest. They arrived at Lihue about 1730. They registered at the Lihue Hotel under their proper names, and dismissed MINATOYA with instructions to pick them up again the following morning. However, after KOTOSHIRODO and his wife had eaten dinner at the Lihue Hotel, they decided to go to a movie, so they called MINATOYA to drive with them. All three went to the Lihue Theater, KOTOSHIRODO paying for the tickets.

One of the passengers on the plane on which the KOTOSHIRODOS flew from Honolulu was Isuke HORIKAWA, subject of reference (k). HORIKAWA, who was taken into custody in April, 1942, was suspect because he was the owner of the Pensacola Hotel in Honolulu, a suspected Japanese espionage center prior to the war. HORIKAWA was the head cook at the Lihue Hotel, and was one of the wealthiest Japanese on the Island of Kauai. He was identified with a number of pro-Japanese activities on that island prior to the war. KOTOSHIRODO was questioned very closely regarding HORIKAWA's presence on the plane, but KOTOSHIRODO maintained that this was pure coincidence. He stated that when he met HORIKAWA later at the Lihue Hotel, they merely exchanged greetings as having been fellow travelers earlier that day. KOTOSHIRODO also remembered HORIKAWA from having seen him at the Japanese Consulate on two occasions.

On Sunday morning, July 13th KOTOSHIRODO and his wife ate breakfast at the hotel. At the suggestion of MINATOYA, they had the hotel pack them a picnic lunch, and they left the hotel about 0900 and drove around the east coast of Kauai. They went first to Wailua Falls, then to a grass shack at a *heiau* (ancient Hawaiian religious site). They visited a number of tourist spots, and finally arrived at Hanalei about noon. They ate their picnic lunch at the Hanalei Park pavilion, while KOTOSHIRODO observed the bay. He noted only that the water in Hanalei Bay was shallow and very calm, and that there was no sign of any construction work going on. About 1245, they drove to Haena where they visited both the wet cave and the dry cave, tourist attractions.

From Haena, they drove up Wainiha Valley to a point near the power plant. They turned the car around and parked about 50 or 100 yards below the power plant, and got out of the car to pick guavas. KOTOSHIRODO noted that the power plant was small, and had two lead-in water pipes, each about three feet in diameter. He also noted that the pipes were directly alongside the road, and that the plant was unfenced.

On the return journey, they stopped at Kilauea lighthouse, which is off the main highway, and went up into the lighthouse with the keeper. KOTOSHIRODO believed that he had signed his name in the lighthouse log.

From Kilauea, they drove directly to Nawiliwili harbor as far as the wharf where Inter-Island Steam Navigation Company steamers docked. He saw at the wharf that there had been no new construction since the picture in OKUDA's possession had been taken (1939), so they left immediately. He did note, however, that Standard Oil Company gasoline tanks were there.

45. From Nawiliwili they drove back to the hotel, arriving about 1630. They dismissed MINATOYA. That night they walked to the nearby Aloha Theater and saw a movie.

46. During the course of the afternoon, when they passed the Lihue airport twice, KOTOSHIRODO noted that the only signs of military activity there were some Army tents pitched in camp.

47. The following morning, July 14th, MINATOYA came to the hotel about 0800. The KOTOSHIRODOS checked out of the hotel about 0830, and MINATOYA drove them to the Hanapepe airport. Their plane departed for Honolulu about 0930, and arrived in Honolulu about 1000. MIKAMI was waiting for them, and drove them home. KOTOSHIRODO then drove his wife to her dressmaking shop, and he went back to the Consulate.

[13] 48. At the Consulate, OKUDA and MORIMURA had a two-hour conference with KOTOSHIRODO, and took notes while questioning the clerk. KOTOSHIRODO detailed the general lack of activity on Kauai, and MORIMURA finally remarked, "There isn't anything big going on it seems". SEKI was not present at this conference. He merely asked KOTOSHIRODO later if he had had a good time, but also commented that it was "waste time" just to "look from the road for things that were meant to be hidden".

49. On October 1, 1942, KOTOSHIRODO personally typed and signed a statement regarding his Kauai trip. A photostatic copy of his statement is herewith forwarded to the Office of Naval Intelligence as enclosure (A). Mimeographed facsimile copies thereof are provided for the other dissemines.

50. Toshimasa MINATOYA was interviewed on three occasions by a representative of the Military Intelligence Division, Hawaiian Department, and his story substantiates that given by KOTOSHIRODO. Records of the Lihue Hotel and the Nawiliwili Transportation Company, MINATOYA's employer, also bear this out. There is no evidence of prior arrangement between KOTOSHIRODO and MINATOYA. MINATOYA remembered KOTOSHIRODO's having had a camera on this trip. The pictures taken by KOTOSHIRODO on this trip were examined by the interrogating officers and agents, and all proved to be either innocuous scenic views or pictures of Mrs. KOTOSHIRODO. KOTOSHIRODO stated that the only map he took with him on the trip was an ordinary tourist cartograph, which were available at many places throughout the Territory. He made no markings on this map, nor did he make any notes concerning his observations.

51. Prior to his departure, KOTOSHIRODO was given about \$100.00 for his expenses by SEKI, out of which he claims he returned about \$7.00 or \$9.00. However, he stated that his expenses were: \$50.00 for the air fare, \$20.00 for the hotel bill, and \$25.00 for the taxi. (As already mentioned, this last figure actually was \$35.00.)

#### *Maui*

52. KOTOSHIRODO, upon request, again detailed the trip he and MORIMURA made to the Island of Maui in May, 1941. These details were substantially the same as those set forth in paragraphs 15-18 of reference (c). The only change is that it was reported in reference (c) that KOTOSHIRODO and MORIMURA visited a pineapple cannery while on Maui; whereas KOTOSHIRODO stated on re-interview that they had passed a couple of pineapple canneries, but had not visited either.

53. Prior to their departure for Maui, OKUDA showed KOTOSHIRODO a map of that island. However, he did not tell KOTOSHIRODO what to look for, that is, what military objectives. OKUDA told MORIMURA, who later told KOTOSHIRODO, that the important places to be looked at were:

- [14] (a) Puunene Air Field (Navy);  
 (b) Kahului Harbor;  
 (c) Lahaina Bay;  
 (d) National Guard Camp.

54. MORIMURA and KOTOSHIRODO visited Lahaina, a fleet anchorage off Maui, on the first day of their visit. However, they saw no ships there. Later that day they drove to Kahului on the other side of the island, passing Maalaea Airport, since abandoned, on the way. They drove out on a pier at Kahului. MORIMURA asked the driver whether Navy ships came into Kahului, and was told that destroyers and submarines occasionally paid that harbor a visit. MORIMURA commented on the fact that the water at Kahului was rough compared to that of Lahaina.

55. Sometime during their first day on Maui, MORIMURA discussed making a trip to the Hana region with their taxi driver. (This trip is long, and necessitates traveling over bad roads.) MORIMURA also asked if there were an air field there. The driver told them there was a field, but he thought that the road was too rough and too long for them to make the trip during the limited time MORIMURA and KOTOSHIRODO planned to be on Maui.

56. On the following day they drove to the top of Haleakala, and then to Kula Sanitarium. They got out of the car near the buildings. KOTOSHIRODO took a picture; MORIMURA commented on being able to see the ocean both on the Wailuku side and the Lahaina side of Puunene Valley. They stayed at Kula about 10 minutes, seeing no one. In the afternoon they drove to the National Guard Camp at Waihee, about ten minutes out of Wailuku; however, they saw no troops. They drove along the coast a little farther, and then turned back and drove to the Puunene Aripport where they boarded a plane for Honolulu about 1500.

57. Investigation indicated that the taxi driver on this trip was Kenneth Jitsuei TAKAMIYA, a Hawaiian-born *Nisei*, 26 years old, who was expatriated from his Japanese citizenship in 1934. He made only one trip to Japan, that being when he was five years old, and for a stay of only six months. TAKAMIYA, when interviewed, substantially confirmed KOTOSHIRODO's description of the trip around Maui. There was no evidence brought forth which would indicate that TAKAMIYA had any prior knowledge of the visit of the two men from the Consulate. Apparently the only two contacts made on Maui were with Itsuo HAMADA, as set forth in paragraphs 15-16 in reference (c), and with Tetsunosuke SONE, as set forth in paragraph 17 of reference (c).

58. Although the contact with Itsuo HAMADA was in itself highly suspicious, nothing has been brought forth which would indicate that this contact was anything more than a casual coincidence. However, investigation by representatives of the Military Intelligence Division on Maui have added some details concerning the contact made with Tetsunosuke SONE. KOTOSHIRODO stated that they had visited SONE, who was a *toritsuginin* and principal of the Japanese language [15] school at Spreckelsville, and had delivered to him a package sent by Nagao KITA, the Japanese Consul General. This package was to be given to a Japanese woman (whose name KOTOSHIRODO could not recall) who lived at Spreckelsville. Investigation indicated that the woman in question was Miss Namiko FUKUSHIMA. Miss FUKUSHIMA, when interviewed, stated that she had gone to school in Japan from August, 1937 to May, 1938, and during that period she had become very well acquainted with a Yosuko ISHII, daughter of a Consul General ISHII, said to be a prominent member of the Japanese consular corps. After her return to Hawaii in 1938, Miss FUKUSHIMA maintained a personal correspondence with Miss ISHII. Apparently Miss ISHII had requested KITA to take a present to Miss FUKUSHIMA prior to KITA's coming to Honolulu as Consul General in March, 1941. The present, which Miss FUKUSHIMA produced for the interviewing agent, was a Japanese doll and a battledore. She stated that the package had been delivered to her by SONE.

59. A check of hotel registers, and an interview with Mrs. Itsuo HAMADA, failed to produce any evidence which would contradict KOTOSHIRODO's story.

60. Neither MORIMURA nor KOTOSHIRODO carried binoculars on their trip to Maui. The only map they had was an ordinary tourist map, and the only mark that MORIMURA made on this map was a small check along the coastline just below Lahaina. MORIMURA reportedly made this check to indicate that the Lahaina coast was extremely rugged, and thus, presumably, unsuitable for landings. Neither MORIMURA nor KOTOSHIRODO made any written notes. OKUDA talked only to MORIMURA about the trip. Later MORIMURA observed to KOTOSHIRODO that "there wasn't much going on" on Maui. KOTOSHIRODO took a camera along, but made no effort to photograph the places they regarded as "important". The camera was used merely to add to their pose as tourists. KOTOSHIRODO stated that the Maui trip had cost between \$115.00 and \$130.00.

61. According to KOTOSHIRODO, one outgrowth of the Maui trip was the confirmation of a belief held by MORIMURA that OKUDA had a personal agent collecting information for the Consulate on Maui. MORIMURA had expressed this opinion on a number of occasions, although SEKI disagreed with him. SEKI said that such a person would have to be paid well, and OKUDA did not have the funds with which to pay such an agent. (SEKI was Consulate treasurer, and presumably would know of such expenditures, unless OKUDA had a secret per-

sonal fund at his disposal.) MORIMURA stated that OKUDA expected him to tell OKUDA every secret, but the Vice Consul was not so "open-hearted" with MORIMURA, especially about the secret of Maui coverage. Since OKUDA and MORIMURA worked so closely together, it irked MORIMURA that OKUDA would not tell him of the Maui agent. The incident that confirmed MORIMURA's suspicions about Maui coverage occurred a few days after their return from the island: Vice Consul OKUDA asked MORIMURA whether he had seen any mooring buoys at Lahaina Roads. MORIMURA said that he had seen none, but OKUDA contradicted him and said that there *were* some buoys there. MORIMURA then went to KOTOSHIRODO and asked the same question of the clerk, but KOTOSHIRODO could not remember any buoys there either. MORIMURA concluded that OKUDA's personal agent had supplied the contrary information.

[16] 62. Possibly supporting MORIMURA's theory are these facts concerning the Maui trip: MORIMURA conducted that mission very laxly. He did not visit Hana to see for himself the airport facilities allegedly there. He traveled no farther north on the leeward coast than Mala Wharf. On the windward coast he omitted more than half the road running north from Wailuku. He did nothing to observe the Puunene Naval Air Station field other than pass it going to and coming from the plane. On Hawaii and Kauai, almost every foot of highway along the coastline was traversed. It is believed that OKUDA's contact on Maui may have been Unji HIRAYAMA, a priest of the Homba Hongwanji who resided at Lahaina, and who was taken into custody on December 7, 1941. It is known that HIRAYAMA, who is the subject of reference (1), was requested on at least one occasion (June, 1940) to keep the Consulate informed of any movements of the United States Fleet at Lahaina, and it is believed that he complied with this request.

#### *Hawaii*

63. KOTOSHIRODO was asked to discuss again the trip he and MORIMURA made to the Island of Hawaii in October, 1941. KOTOSHIRODO stated the facts of the trip substantially as they are set forth in paragraphs 19-24 of reference (c). The details KOTOSHIRODO added in his later version principally concerned the various drinking parties in which they indulged while on Hawaii.

64. Before they left Honolulu on the trip to Hawaii, MORIMURA told KOTOSHIRODO that he wanted to see:

- (a) Hilo harbor;
- (b) Kilauea. (Speculating on the reason for their desire to see Kilauea it should be noted that there was a Hawaii National Guard camp there prior to the war, and also there was some talk of building a new airport in the lava flats);
- (c) South Point, where a new airport was actually in the process of construction;
- (d) Kohala, where there is an Inter-Island Airways landing field at Upolu.

65. In their trip around the island, they passed the Kilauea Volcano, and MORIMURA asked about the military camp there. They drove down the road toward South Point until they came to a sign "Kapu—Military Reservation". They made no effort to enter the reservation, but instead turned the car around and returned to the main highway. They could see nothing of interest from outside the gate.

66. They stopped at the Kona Hotel that night on the suggestion of the driver. The next day they included Upolu in their itinerary, but they only [17] paused there for a few minutes. They did not get out of the car. While in the Kohala district they also inspected Kawaihae, the landing from which cattle are swum out to the Inter-Island steamers.

67. On the fourth day of their visit they drove all around the city of Hilo, seeing Rainbow Falls, Hilo Hospital, the waterfront, Hilo Country Club, and Puumale Home (for the tubercular).

68. KOTOSHIRODO stated that he and MORIMURA were not sent to contact anyone on the Island of Hawaii; on the contrary, they were strictly enjoined not to do so. However, KOTOSHIRODO made one exception, and made a personal call on his wife's cousin, Mrs. George KAWAMOTO. He brought her candy, and she was greatly surprised to see him. KOTOSHIRODO told her that he was staying at the Naniloa Hotel, but he stayed only a few minutes. However, after he had returned to the hotel, and was drinking in the bar with MORIMURA, George KAWAMOTO came in to see KOTOSHIRODO, having been told by his wife of KOTOSHIRODO's visit. KOTOSHIRODO introduced him to MORI-

A. They had a drink at the bar, and then KAWAMOTO invited them to Ilo Theater. They saw the show, and then KAWAMOTO went home.

A representative of the Military Intelligence Division, Hawaiian Department, contacted George KAWAMOTO regarding his relationship with KOTOSHIRODO. KAWAMOTO stated that his wife was a cousin of KOTOSHIRODO's and he gave an account of a visit made to Hawaii by KOTOSHIRODO's wife in 1940. Apparently this trip was merely a vacation. However, there is nothing in the Military Intelligence Division report to indicate that KAWAMOTO was interrogated concerning the trip taken by KOTOSHIRODO from MORIMURA to Hawaii.

Representatives of the Military Intelligence Division on Hawaii also interviewed Shingo NARIKAWA, who was taxi driver for MORIMURA and KOTOSHIRODO while they were on Hawaii. Although interrogated at length, NARIKAWA could remember nothing which was at variance with the story given by KOTOSHIRODO.

#### TADASI MORIMURA

From the information that has been collected from the Consular clerks and other persons close to the Consulate, it is apparent that MORIMURA was something of a mystery man. All agreed that he had special privileges. He was frequently drunk, often had women in his quarters overnight, came to work late if at all, as he pleased, insulted the Consul General on occasions, and generally conducted himself as if he were beyond penalty. This naturally caused comment among the Consulate secretaries and clerks.

Some of the secretaries and clerks believed that MORIMURA was an officer in the Imperial Japanese Navy. According to KOTOSHIRODO, however, MORIMURA denied this. SEKI said that he knew how Japanese naval officers behaved, and that MORIMURA definitely did not conduct himself as an officer.

73. It was publicly announced MORIMURA's arrival that he had been sent to Honolulu to assist in expatriation matters. Takaichi SAKAI, senior clerk at the Consulate, who had been handling the routine of expatriation matters for a number of years, stated that MORIMURA had made a pretense of working with the work for only the first three or four weeks he was here, but had none of it personally, and appeared to know nothing about the work. John Yoshiye MIKAMI, who, although uneducated, has given himself an informal self education in naval matters, had little regard for MORIMURA, and sarcastically stated that the secretary lacked the sharp eye and the smart gait of a Japanese military or naval officer.

KOTOSHIRODO stated that MORIMURA was an eighth rank secretary in the Japanese consular service. This is the lowest rank, a first rank secretary being the highest. KOTOSHIRODO remembered having heard YUGE and Samon NARIKAWA, the Consular Secretary in charge of the code room, remark that eighth rank secretaries were usually sent to the least desirable posts in the consular service. The desirability of posts was said to vary according to climate. The least desirable posts were in China. Honolulu, on the other hand, was considered one of the best posts in the Japanese consular service. It was usually given to men with many years of faithful service, and it was unusual for a secretary of the eighth rank to have his initial assignment in Hawaii. MORIMURA believed this to be MORIMURA's first assignment abroad, since his name, at the date of his arrival here, had not yet appeared in the consular roster of the Japanese Foreign Office. Because of this, they assumed that he was recently transferred to the foreign service, and had served only an indoctrination period in Japan before coming to Honolulu.

KOTOSHIRODO stated that MORIMURA never talked about his past life or of the time he spent in grammar school. However, on one occasion, MORIMURA did refer to Chinese coolies pulling barges on the Yangtze river. He called them the lowest people on earth. This remark led KOTOSHIRODO to believe that MORIMURA had lived in, or had at least visited, China.

Ichitaro OZAKI, chauffeur for the Consulate, supplied one version of MORIMURA's background. He stated that on one occasion he had overheard a conversation between SEKI and YUGE regarding MORIMURA. They had remarked that MORIMURA was the only child of a wealthy family of Ehime-ken, Japan. His father died when he was rather young, leaving him in comfortable circumstances, inasmuch as the family owned considerable property.

Prior to his arrival in Hawaii, MORIMURA had been working in the Consular Office in Tokyo, possibly for as long a period as three years, although

it was more likely that he had been there for only two years. On one occasion he had been discharged from the Foreign Office for excessive drinking, but his mother had written to a prominent official about the matter, and through this connection had been able to have MORIMURA reinstated.

78. Whatever his background, MORIMURA was not popular with the rest of the Consulate staff. This was probably due to his youth, his favored position [19] and the advantage he took of this position. KOTOSHIRODO admitted that SEKI greatly resented MORIMURA. SEKI had done the work of gathering data about ships in Pearl Harbor until MORIMURA came, but then had been relieved of these duties. SEKI openly exhibited professional jealousy, often telling KOTOSHIRODO that MORIMURA did not know what he was doing. The change in plans for the Kauai trip was cited as an example of this dissension. As KOTOSHIRODO put it during one of the interviews, both SEKI and MORIMURA were trying to gain all the credit for the information-gathering work. Further information about MORIMURA's background is to be found on pages 10 and 11 of reference (u).

79. KOTOSHIRODO stated that shortly after MORIMURA's arrival, the new secretary made a point of "making friends" around town. KOTOSHIRODO stated that MORIMURA spent a lot of time at the offices of the Japanese newspapers, particularly the Nippu Jiji. KOTOSHIRODO admitted that MORIMURA had many friends at the Nippu Jiji, but until questioned at length showed no great willingness to "remember" who they were. Finally he admitted that of all the men at the Nippu Jiji, Shigeo FURUKAWA, the advertising manager, was best known to MORIMURA. The significance of this fact is indicated by the information contained in paragraphs 9-11 of reference (a). Paragraph 10 of reference (c) should also be noted in this regard. KOTOSHIRODO stated that FURUKAWA was an excellent Japanese poet. (Other information corroborates this statement.) KOTOSHIRODO was then asked if he would explain the common interest between MORIMURA and FURUKAWA. It was pointed out that FURUKAWA was about 55 years of age, a poet, a family man and a business man, whereas MORIMURA was only about 29, was not a poet, and preferred to spend his leisure in drinking and playing with the *geishas*. KOTOSHIRODO stated in answer to this that they often played *go* (Japanese checkers) together at the Nippu Jiji. KOTOSHIRODO stated that MORIMURA also knew Zenichi KAWAZOE, subject of reference (m), who covered the Consulate "beat" for the Nippu Jiji. Other Nippu Jiji personnel whom MORIMURA knew were Shoichi ASAMI, the city editor, and Katsuichi KAWAMOTO, the business manager. All these men have been interned.

80. KOTOSHIRODO stated that FURUKAWA came to the Consulate very rarely. He remembered FURUKAWA's coming there only when he brought Nippu Jiji representatives from the outside islands to introduce them to the Consul General.

81. KOTOSHIRODO stated that another close associate of MORIMURA was Katsuichiro TAKAGISHI, chief chemist of the Honolulu Sake Brewery. TAKAGISHI was the subject of an intensive investigation by this office prior to his departure for Japan aboard the *Taiyo Maru* on November 5, 1941. TAKAGISHI is the son-in-law of an Admiral HYAKUTAKE of the Imperial Japanese Navy. (There are two admirals of this name, brothers, in the Japanese Navy; this office has been unable to determine which admiral is the father of TAKAGISHI's wife.) TAKAGISHI was a frequent visitor of the Japanese Consulate and often played golf with Consul General KITA, Vice Consul OKUDA, and Tsunetaro HARADA, manager of the Pensacola Hotel, where TAKAGISHI resided. KOTOSHIRODO stated that he often thought that the friendship between MORIMURA and TAKAGISHI was "funny", because TAKAGISHI loved golf much and MORIMURA did [20] not play the game. However, KOTOSHIRODO admitted that MORIMURA and TAKAGISHI used to "chase women" together. It was never established that TAKAGISHI actually was engaged in espionage for Japan, although a mass of circumstantial evidence points to the conclusion that he was so engaged.

#### SEKI AND MORIMURA DISCUSS ESPIONAGE

82. On many occasions KOTOSHIRODO was present at discussions between MORIMURA and SEKI. On other occasions, they would discuss things with him individually. It should be remembered that KOTOSHIRODO worked as SEKI's assistant while he was inside the office, although he was MORIMURA's assistant

ecting information outside the office. Because of this situation, KOTO-  
ODO was in close contact with both men.

MORIMURA told KOTOSHIRODO that the Japanese consulates all over  
world were supposed to gather all the information they could without doing  
l things". (This point is considerably amplified in reference (u).) MORI-  
also told KOTOSHIRODO that an outside system, which was separate  
part from the Consulate, and which worked directly on orders from Tokyo,  
ed such information as it was necessary to obtain by "illegal" means. This  
include, for example, the practice of buying secrets. MORIMURA ob-  
that such an outside system would not report through the Consulate, nor  
the Consulate contact the outside system. In all probability, the Consulate  
know nothing of this outside system, he said.

MORIMURA once asked SEKI if there were any Japanese espionage agents  
ing those outside the Consulate) in the Territory of Hawaii. SEKI replied  
e did not know. MORIMURA observed that he did not know what the  
were, but that there must be such a system. However, he did not know  
anner in which such an outside system would operate.

KOTOSHIRODO heard MORIMURA and SEKI discuss espionage coverage  
occasion. SEKI stated that it was necessary for the Consulate to have a  
man" on each island. However, MORIMURA was of the opinion that this  
ement would be difficult to meet, since the average Japanese in the Terri-  
f Hawaii lacked the technical knowledge necessary in the work. MORI-  
and SEKI agreed that because of the large number of Japanese in the  
population, Hawaii should be "the easiest place" to carry on espionage.  
er, they believed this advantage to be lost, because the local Japanese were  
only educated to do this work. MORIMURA was very outspoken on this  
claiming that the *toritsuginin* (the so-called local consular agents) were  
d for the work, and that most Japanese in Hawaii was "just trash" and  
ciently educated. He remarked that the Japanese had come to Hawaii  
rers and were therefore uneducated, where the Japanese on the Mainland  
United States were much better educated.

KOTOSHIRODO heard MORIMURA say that throughout the world then  
all nations "use other kind of people" (i. e., non-nationals of the country  
ving [21] them) as espionage agents. MORIMURA believed that  
sometimes used non-Japanese espionage agents (although KOTOSHIRODO  
heard him say whether such agents were operating in Hawaii). MORI-  
once said in KOTOSHIRODO's presence that he had "heard in Tokyo" that  
had long had a British naval officer acting as an espionage agent in China.  
her this Britisher was working for Japan only against China, or against  
hina and Britain, or only against Britain, was not stated). MORIMURA  
ld that this officer had been so employed "for years". However, he com-  
d on the fact that non-Japanese agents were expensive. He said that the  
me such agents submitted information, they submitted a lot of it, but after  
e law of diminishing returns began to operate, and eventually the employer  
pay the same price for mere dribbles. He also stated that it was safer and  
stly to use Japanese agents in espionage work. However, more valuable  
ation could be obtained by non-Japanese, although at a greater cost to

KOTOSHIRODO was asked whether he thought the extra-Consulate es-  
e system to which MORIMURA referred might be operating in Hawaii  
present time, and sending information from Hawaii to Japan. KOTOSHI-  
expressed surprise that such an operation was considered possible, saying,  
can?" The only pertinent fact he could recall in this connection was that  
MURA once remarked that it would be impossible to use short-wave radio  
tting information out of Hawaii after war started because of "a device"  
mericans had which enabled them to ascertain the exact location of a radio  
mitter. KOTOSHIRODO knew what short-wave radio was, and knew of  
Tokyo broadcasts, but professed complete ignorance about amateur radio  
s. He stated that he had never heard anyone at the Consulate talk about  
bject, nor had he and MORIMURA ever stopped to see anyone in town  
operated an amateur short-wave radio station.

KOTOSHIRODO stated that on another occasion MORIMURA remarked  
KI that Hawaii would be a fine place from which to watch a Japanese-  
can war. Either SEKI or MORIMURA observed that there would be no  
or a spy to communicate from Hawaii to Japan by radio, referring to  
sk of discovery by radio detection equipment.

89. Apparently one of the "legal" methods of collecting information indulged in by the Consulate was the close scrutiny of daily newspapers. Yasumasu MURATA, a clerk at the Consulate until 1938, stated that the local newspapers were clipped daily. He added that the Vice Consul always had charge of this work. The Vice Consul usually would mark such items as he desired and pass them on to MURATA, who would do the actual clipping. Usually two—occasionally three—clippings were secured of each item. One copy was sent to Japan and one retained at the Consulate. KOTOSHIRODO stated that he used to receive the first edition of the Honolulu Star Bulletin for the Consulate at his home, because the first edition was not delivered to the zone in which the Consulate was located. KOTOSHIRODO's home, two blocks away, was near enough to be included in the delivery zone. Apparently the Consulate wanted to keep close watch on all editions of the paper. Many of the Consulate despatches (reviewed after the outbreak of war) merely contained synopses of press stories.

[22]

## SECURITY MEASURES

90. KOTOSHIRODO said that he was taught at the Consulate that the first rule in "information collecting" was "no get caught". He was told never to get out of his way to get information. Even if he could not see his desired objective from the highway, he was not to ask questions about it, nor leave the highway to view it. If ever he and MORIMURA were stopped by the authorities and questioned, KOTOSHIRODO was to explain that they were merely "sightseeing". KOTOSHIRODO was to do the necessary talking, because of MORIMURA's poor command of English.

91. He was told never to take pictures of "important places". Although he took a camera to Kauai and Maui, this was merely a "prop" to carry out their pose as sightseers. KOTOSHIRODO expressly denied ever having taken pictures of air fields, harbors, power plants, or other conceivable military objectives. His snapshots were only of the usual scenic places, he said.

92. MORIMURA occasionally carried field glasses on his trips to various parts of Oahu. He never carried them to the outside islands. Even on Oahu he was extremely careful in their use. The field glasses used were bought early in 1941 at SEKI's insistence. Prior to that time, there had been no field glasses at the Consulate. To divert suspicion, the glasses were bought for the Consulate by Toro NISHIKAWA (now interned), an employee of the Nippu Ji ji. (NISHIKAWA handled certain commercial printing orders from the Consulate.)

93. KOTOSHIRODO could recall no instance in which MORIMURA had made written notes of their observations prior to their returning to the Consulate after "sightseeing". KOTOSHIRODO likewise denied ever making any notes himself. Instead, he said that his practice was to report verbally what he had seen to MORIMURA or OKUDA, who would make notes, at the Consulate, of KOTOSHIRODO's reported observations.

94. KOTOSHIRODO stated that neither he nor MORIMURA ever carried maps which might attract suspicion. On such occasions as they did use maps, they carried cartographs published by the Hawaii Tourist Bureau, and the only occasion upon which notations were made thereon was on the trip to Maui, see paragraph 60, above. However, in earlier interviews, as reported in paragraph 42 of reference (c), KOTOSHIRODO stated that on trips he made alone to the Pearl Harbor region, he had marked the positions of various warships on rough maps drawn by MORIMURA. (Note might be made here of KOTOSHIRODO's extraordinary powers of perception and memory for details of events which happened months, or years, before. Many of his statements were otherwise known to be true, tending to make KOTOSHIRODO's statements and admissions generally reliable.)

95. KOTOSHIRODO said that when he was first employed at the Consulate (1935), he was told by Vice Consul YAMASAKI that he was not to talk about Consulate business to strangers. When KOTOSHIRODO first began to make trips to Pearl Harbor, SEKI warned him not to mention these trips to his wife.

[23]

## CHRISTMAS PRESENTS GIVEN BY THE CONSULATE

96. Takaichi SAKAI stated that every year the Consulate gave Christmas presents to a number of United States Customs inspectors. He stated that he personally delivered gifts to the homes of Customs Inspectors Carl F. EIFLER, George W. SPENCE, Andrew A. BUTA, and John OLIVIERA. These gifts usually consisted of merchandise orders of \$20.00 to \$30.00 drawn on M. McInerney, Ltd. or the Liberty House, both large Honolulu retail stores.

97. The Honolulu harbor master, James L. FRIEL, and his assistant, Frank J. UNTERMANN, received similar Christmas presents, according to SAKAI.

98. Another recipient was Ernest M. HIRAKAWA, an alien Japanese, foreman of the registry section of the United States Post Office, Honolulu. Comment has been made on HIRAKAWA in reference (t).

99. Ichitaro OZAKI, regular chauffeur for the Consulate, confirmed the fact that he drove SAKAI around to deliver Christmas presents. Although he was unable to recall all the persons to whom presents had been delivered, he did remember that SPENCE and FRIEL were among the recipients. KOTOSHI-RODO also remembered that Christmas presents were given to a number of persons.

#### MIKAMI'S NAVAL KNOWLEDGE

100. The interrogating officers and agents were surprised at John Yoshiye MIKAMI's knowledge of naval matters. MIKAMI is so poorly educated that he speaks both pidgin Japanese and pidgin English. He has been a taxi driver for the greater part of his life. He was detained on January 6, 1942, and since that time has been incarcerated on Sand Island, Honolulu, with other internees.

101. During the course of the interrogation (September 28, 1942), it became apparent that even while interned MIKAMI had been able to keep familiar with current movements of the United States Fleet in and out of Pearl Harbor. MIKAMI stated that only a week before a new battleship that he had never seen before, and a carrier that was either the LEXINGTON or the SARATOGA, had arrived at Pearl Harbor. (The SOUTH DAKOTA and the SARATOGA actually had arrived.)

102. He stated that in July, 1942, a large body of United States ships had left Pearl Harbor—for Australia, he presumed. He stated that these ships had recently returned. He then commented on the large number of destroyer movements.

103. MIKAMI commented upon seeing "the same old battleships" return to Pearl Harbor in August (true), and also upon a new carrier he had never seen before which entered Pearl Harbor on the same day. This latter was the WASP, on her first trip to Honolulu. (The Fleet Intelligence Office, Pacific Fleet, was seasonably [24] informed of the knowledge that MIKAMI, an internee, was able to see concerning current ship movements, from the internment camp on Sand Island.)

104. MIKAMI conversed intelligently about naval subjects in general. He mentioned "anti-torpedo nets", knew their purpose, and stated he had never seen them in use on his trips to Pearl Harbor before the war. He also mentioned "anti-airplane balloons" which he thought were impractical for use around Pearl Harbor because they would give away the exact location of the objective. MIKAMI also discussed the "balance of naval power" theory, and expressed the opinion that the United States-Japanese war began 30 years ago when a naval race between the two powers was started. He also expressed the opinion that the United States would beat Japan only when she had beaten the Japanese Navy.

105. MIKAMI was asked how he had acquired such a broad knowledge of naval subjects. He said that he had been reading American magazines for about three years, naming *Our Navy*, *Life*, and the *Naval Institute Proceedings*. He said he received copies of the latter publication when the Consul threw its old copies away. He stated that he did not read Japanese naval magazines because "they tell big lies". However, whether MIKAMI actually gained his excellent (though perhaps superficial) knowledge of naval subjects by reading magazines in a language in which he is extremely deficient, or by some other means, remains a matter of conjecture.

#### KOREAN CONTACTS

106. All the Consulate clerks agreed that the Japanese Foreign Office made a point of keeping stationed in Hawaii one secretary who could speak Korean. There were two reasons for this practice: First, to handle various Korean matters which were a legitimate concern of the Consulate; second, to use the Honolulu Consulate as a "listening post" regarding various Korean nationalist movements. The Japanese apparently regarded Honolulu as an excellent place for keeping in touch with existing or incipient Korean political developments.

107. Takaichi SAKAI, former senior clerk at the Consulate, who was employed there from 1927 until the outbreak of war, recalled that during his time secretaries Takeo KASHIMURA, Gishiro MASUO, Tadaaki IIZUKA, and Kyonosuko

YUGE had spoken Korean and had handled Korean affairs at the Consulate (For some reason SAKAI "forget" to mention YUGE, the most recent of the secretaries, until it was brought to his attention at a subsequent interview. All the other clerks were familiar with YUGE's Korean duties, they having been instructed to refer all Korean callers to YUGE as a matter of office routine.)

108. All the clerks employed at the Consulate prior to 1937 remembered having seen Kilsoo HAAN at the Consulate on a number of occasions. HAAN is the subject of a number of reports by this office, the most recent of which is reference (n). Yasumasa MURATA, who was employed at the Consulate until 1937, stated that he once heard from Tsuko KUROKAWA, who was senior clerk at the Consulate at the time, that the Consulate had been paying money to HAAN.

[25] 109. From a confidential, but reliable source, the Honolulu office of the Federal Bureau of Investigation subsequently received the original in Japanese, of various papers evidencing the interest of the Japanese Consulate General, Honolulu, in Korean matters. Translations of these papers are set forth in reference (o). One source indicates that up to 1925, the Consulate was allowed \$100.00 a month for its Korean Intelligence Fund. From 1926 to 1934, the Consulate appears to have operated on an accumulated surplus in this fund. Following that time, the Foreign Office appears to have made special allocations from time to time, as needed. A summary of these translations indicates that the following Korean informants received payment from the Japanese Consulate:

*Kwang Won Cho*

110. This individual is a Korean priest, mentioned as being a frequent visitor of the Consulate by the various clerks. He is more commonly known by the name, Father Noah CHO. The translations indicate that he received a payment of \$37.00 on May 19, 1934, and a payment of \$20.00 on August 6, 1934. He is the subject of a Registration Act case by the Honolulu office of the Federal Bureau of Investigation, a report of which is noted as reference (j), the synopsis of which follows:

"Subject /CHO/ born October 21, 1897 in Korea; came to Hawaii in 1923 as Episcopal missionary and has since been associated with St. Luke's Korean Mission, Honolulu. He became priest at the St. Luke's Mission in 1931; however his entire family, including mother, father, wife and five children presently residing in Korea, have never been in the United States. Confidential source reveals Subject paid \$37.00 in May, 1934, and \$20.00 in August, 1934, by Japanese Consulate, Honolulu, for informant's services. Signed statement obtained in which Subject admits contact with Consulate, beginning in 1932, and beginning about September, 1939, and extending to April 1, 1941. He admits having performed work for the Consulate relating to Korean activities; further, that during the latter period approximately \$200 was paid him by the Consulate for his services which included obtaining and translation of two Korean newspapers. Subject claims to have performed services for the Japanese Consulate and threat to bring harm to his family in Korea; however, his acceptance of remuneration makes this claim appear questionable. Subject denied receipt of any payments in 1934."

111. A check of the files of this office reveals the additional information that the Reverend CHO returned from a trip to Japan aboard the ASAMA MARU on August 20, 1940. It is of possible significance that a fellow passenger aboard the ASAMA MARU was Sanjia ABE, subject of reference (p), former Territorial senator, now interned, who was returning from a trip to Japan during which he conferred with Foreign Minister Yosuke MATSUOKA, and also made an overseas broadcast to Hawaii in which he praised Japan's war effort in China. Other passengers on the same ship were Clifford Kikujiro KOND, subject of reference (q), now in custody; Katsuzo SATO, subject of reference (r), now in custody; and Kenju OHTOMO, subject [26] of reference (s). OHTOMO, executive secretary of the Young Men's Buddhist Association, Honolulu, and whose repatriation has been requested by the Japanese government, has been classified on numerous occasions by this office as dangerous to internal security. Ten other of Reverend CHO's fellow passengers are now in custody, and another two, although still at large, have been classified as dangerous by this office. Although it may have been pure chance that these persons traveled on the same ship, the coincidence is being set forth for what it may be worth.

*Doo Ok Chung*

112. Translation of these papers indicated that CHUNG received \$80.00 on May 22, 1933. A review of the files of this office indicates that he is a 54-year-old alien, a tailor by trade, and operates a concession at the Honolulu Army and Navy Y. M. C. A. CHUNG appears to be extremely active in Kilssoo HAAN's SINO-KOREAN PEOPLE'S LEAGUE. A letter from Dr. Soon HYUN, formerly chairman of the League in Honolulu, to HAAN, dated June 22, 1942, described CHUNG as one of "the cornerstones of our League".

113. Investigation by the Federal Bureau of Investigation indicated that CHUNG was born in Korea in 1889, came to Hawaii in 1903. He has three sons serving in the United States Army. Another son, four daughters, his wife, and his mother all reside in the United States. He has been active in Korean political circles since 1915, when he joined the KOREAN NATIONAL ASSOCIATION. He withdrew from this and aided in forming the KOREAN INDEPENDENCE LEAGUE, becoming the second president of the latter organization. The KOREAN INDEPENDENCE LEAGUE have been comparatively inactive since 1929, and eventually he joined the SINO-KOREAN PEOPLE'S LEAGUE. He denied, with seeming sincerity, his ever having had contact with, or accepting money from, the local Japanese Consulate, but there appears to be no other individual in Hawaii of a similar name.

*Won Sam Kim*

114. The translation indicated that this individual received the following payments:

|                         |         |
|-------------------------|---------|
| September 10, 1935..... | \$20.00 |
| May 28, 1934.....       | 15.00   |
| July 24, 1934.....      | 25.00   |
| September 10, 1934..... | 30.00   |
| May 31, 1933.....       | 20.00   |
| April 13, 1933.....     | 10.00   |
| May 2, 1933.....        | 10.00   |
| June 6, 1933.....       | 10.00   |
| March 29, 1937.....     | 18.00   |

Investigation by the Federal Bureau of Investigation revealed that KIM was born in Korea in 1879, came to Hawaii in the early 1900s, and was a carpenter by trade. [27] In 1919 he had become a member of the KOREAN INDEPENDENCE LEAGUE. He died on March 14, 1939, in Honolulu, and his widow denied all knowledge of his past activities or relations with the Japanese Consulate.

*Sang Ho Lee (Yee)*

115. LEE was paid \$100.00 on March 31, 1932, and \$20.00 on August 19, 1933. Directories of that period indicate that an individual of this name was with the Nahm Choon Furnished Rooms, 339 North Beretania Street, Honolulu. Later directories do not include the name. However, the latest directory lists a Mrs. Sang Ho LEE, 1355 Miller Street, Honolulu.

116. Investigation by the Federal Bureau of Investigation revealed that LEE was born in Korea on November 5, 1879, and first arrived in the United States on February 3, 1905, under the name YE CHONG KUL. He visited China from July, 1922, to May, 1923. He departed from Honolulu bound for Korea on February 16, 1934, and has not re-entered the United States.

*Ok Nam Shin*

117. The translation indicates that this individual received \$50.00 on March 31, 1932, and \$3.40 on June 9, 1933. Investigation by the Federal Bureau of Investigation revealed that SHIN, a groceryman, was born in Korea in 1901, came to Honolulu in 1920, and returned to Korea in 1933. He returned to Honolulu in 1938, but went back to Korea shortly thereafter, and has never returned.

*Kylsoo Haan*

118. The following is a list of payments received by this individual, who usually referred to as KILSOO HAAN:

|                      |          |
|----------------------|----------|
| May 25, 1936.....    | \$60. 00 |
| August 15, 1936..... | 40. 00   |
| August 25, 1936..... | 10. 00   |

*Chin Ho Tough*

119. On May 22, 1933, TOUGH received the sum of \$80.00 from the Consulate TOUGH (he is known by all the combinations of the above three names) has been the object of suspicion for a considerable period. He entered the Territory in 1931 as a Buddhist priest, but apparently has never practiced his profession. He was educated in Japan. For a while he worked at various military posts as a tailor, and later went into business for himself on the Island of Molokai. He has been very active on the UNITED KOREAN COMMITTEE. When interrogated, TOUGH stated that he had visited the Consulate on only one occasion, that being upon his arrival in 1931 when it was necessary to have his passport stamped.

[28]

## OTHER CONSULATE CONTACTS

*Ensei (Enjo) Kobayashi*

120. On March 15, 1932, KOBAYASHI received \$8.00 from the Consulate. An alien, aged 54, he was a priest of the Jodo sect (Buddhist), a Japanese language school principal, and a *toritsuginin* at Hawi, Kohala, Hawaii, T. H. He was taken into custody on December 7, 1941, and subsequently was interned at Camp Livingston, Louisiana, and apparently is planning for repatriation to Japan.

*Katsuchi Miho*

121. MIHO received the sum of \$27.00 from the Japanese Consulate on March 15, 1932. MIHO is a 59-year-old alien. Prior to the war he operated the MIHO HOTEL at Kahului, Maui, T. H., and was a *toritsuginin* for that district. He was taken into custody on December 7, 1941, and is reported to be interned at Fort Sill, Oklahoma.

*Minoru Murakami*

122. MURAKAMI received the sum of \$10.00 from the Consulate on March 15, 1932. MURAKAMI, a Japanese alien, formerly employed as a representative for the Nippu Jiji (Honolulu bilingual newspaper), has a long record of pro-Japanese activities and statements. He was taken into custody on December 7, 1941, and is reported to be now interned at Camp Livingston, Louisiana. Apparently he desires to repatriate to Japan.

*Masao Sogawa*

123. On January 6, 1932, SOGAWA received the sum of \$50.00. He was editor and publisher of the Hawaii Shimpo, a Japanese weekly newspaper published in Honolulu until the outbreak of war. This paper was considered highly pro-Japanese in its sentiments. SOGAWA was taken into custody on December 7, 1941, and is reported to be now interned at Camp Forrest, Tennessee.

*Wade Warren Thayer*

124. On August 21, 1935, THAYER reportedly received the sum of \$40.00 from the Japanese Consulate. For years, THAYER was attorney for the Japanese Consulate, and was so registered with the Secretary of State. It is not known why this lone entry was found among the expenses of the Korean Intelligence Fund, inasmuch as it is believed that THAYER undoubtedly had some permanent financial arrangements with the Consulate with regard to his legal services.

[29]

## THE CONSULATE PREPARES FOR WAR

125. Takaichi SAKAI stated that in the summer of 1941 the Consulate began to burn old documents. All the clerks helped in this work, and about the same time, the clerks were paid bonuses each month. The clerks were told not to talk about the fact that documents were being burned almost daily in the back yard of the Consulate. SAKAI could recall no such burning of papers shortly before the war started, although he did observe that the number of visitors to the Consulate from the N. Y. K. Line and from the Yokohama Specie Bank increased greatly in the last two weeks of peace. These visitors sometimes carried handbags with them.

126. Miss Kimie DOUE, former receptionist at the Consulate, remembered that about the middle of November, 1941, two Yokohama Specie Bank officials came to the Consulate and went into Consul General KITA's room, where they stayed for about an hour. One of these men was Nihei MIYAMOTO, sub-manager of the bank. KITA was not present, and the two men were alone in the room. They asked for a typewriter. Miss DOUE believed that MIYAMOTO and his companion wrote a telegram which they sent under the name of the Consulate. She stated that they had probably done their own coding. She added that, to her knowledge, Torataro ONODA, of the Sumitomo Bank, had never done this.

127. Ichitaro OZAKI, chauffeur for the Consulate, recalled that in June, 1941, the two yardmen of the Consulate had burned a large number of official appearing books. OZAKI was able to set the month because it was just before his departure for Japan. He was in Japan from June to November, 1941. OZAKI explained that the Consulate was not supposed to keep material longer than 10 years, and every year they accumulated material to burn. OZAKI stated that he helped carry these books from the Vice Consul's office to the yardmen, who would burn them. He estimated that more than 100 publications were thus burned in 1941. The two yardmen who did this burning, Saburo SUMIDA and Rokuro FUKUSHIMA, were repatriated to Japan in 1942 with the Consulate staff. OZAKI stated that he was in Japan when the United States freeze order against Japanese assets went into effect, but he heard that the Consulate burned a considerable amount of material at that time.

128. OZAKI stated that it was his belief that telegrams received from Japan were burned as soon as they were received, or at least within a week. He stated that in the code room of the Consulate was a small brazier, and when papers were burned in this room, he would sometimes notice smoke coming out of the window. He believed that he had seen more smoke coming out of this room after he had returned from Japan (on the last ship, November 1, 1941) than he had prior to his departure. He believed that code room material was burned about once a week. The code room was always cleaned by Saburo SUMIDA. Samon TSUKIKAWA, Consulate secretary in charge of coding, was always present during this operation.

129. On December 6, 1941, at about 1500, the two yardmen went into the coding room of the Consulate and removed a wheelbarrow full of papers and other [30] material. These they burned in a pit in the yard. OZAKI said that he put out this fire about 1900, just before darkness fell. He noted that everything had been burned. OZAKI said that yard rubbish was being burned all the time, so he was unable to state how often code room material was burned. The incident of December 6th was the only time he actually saw them remove the material from the code room.

130. OZAKI stated that the Consul and Vice Consul had an engagement to play golf with Tsunetaro HARADA on the morning of December 7, 1941. He remembered that MIKAMI's taxi had actually called at the Consulate for the two officials, but by that time guards had been placed around the Consulate. MIKAMI requested the guards to inform OKUDA of his arrival, which they did. However, OKUDA sent back a message that MIKAMI was not to wait because he, OKUDA, probably would be unable to play golf that day.

131. OZAKI expressed his conviction, based on observations made prior to and subsequent to December 7, 1941, that Consul General KITA had no foreknowledge of the Pearl Harbor attack. However, he insisted that the Consul General had received a telegram from Washington at 0700 on the morning of December 7th. (This was a radiogram from Tokyo, reporting that Japanese-American and Japanese-British relations were strained.) Immediately upon its receipt, KITA had

called TSUKIKAWA, who lived at the Kyoraku Kan Hotel, two blocks from the Consulate grounds, and insisted that the latter come to the Consulate immediately to decode this message. OZAKI stated that he heard of this incident from SEKI about a week or two after the attack. OZAKI stated that TSUKIKAWA was at the Consulate at the time of the attack.

132. OZAKI stated that the Consulate staff members were burning papers when the police arrived on the morning of December 7th. He remembered seeing smoke come out of the code room window. After the Consulate staff was repatriated (February, 1942), he went into the code room to clean it. All he saw was a big tub filled with ashes.

133. KOTOSHIRODO stated that he first heard the noise (of battle) about 0900 on the morning of December 7, 1941, so he walked to the Consulate to find out what all the commotion was about. KITA, OKUDA, SEKI, and TSUKIKAWA were all there, and appeared to be worried. MORIMURA dropped in a little later with his hair tousled, clothes wrinkled, and in short sleeves. KOTOSHIRODO heard him remark that it was a "noisy morning". MORIMURA wanted to go up on the heights and see what was going on, but KITA would not allow him to leave the Consulate. KOTOSHIRODO left the Consulate about 1000.

#### CONSULATE DOMESTICS

134. As was reported in paragraphs 47 and 52 of reference (c), three of the domestics at the Consulate secured their positions through one Toyoki FUJITA, a flower grower. FUJITA was interviewed to determine his connection with the [31] Consulate. FUJITA stated that among other retail florist shops to which he sold his blossoms, was the SERVICE FLORIST, operated by one Tetsuo SHINAGAWA. SHINAGAWA supplied the Consulate with flowers. He secured this account because he is a brother-in-law of Ichitaro OZAKI, Consulate chauffeur, who apparently ordered flowers purchased by the Consulate. FUJITA first met OZAKI when he delivered some plants to the Consulate. On one occasion OZAKI asked FUJITA if the latter knew of a girl who would like to cook at the Consulate. FUJITA secured the services of Yoshie KIKKAWA. (Results of an interview with Miss KIKKAWA are set forth in paragraph 52-53 of reference (c).) Because FUJITA was once successful in securing a domestic, OZAKI asked him for assistance in securing help on two other occasions. FUJITA was able to send to the Consulate Sakae TANAKA, whose interview is set forth in paragraph 55-56 of reference (c), and Kimika ASAKURA, paragraphs 47-51 of reference (c).

#### JAPANESE NAVY TANKERS

135. Takaichi SAKAI stated that when Japanese naval tankers called at Honolulu, their captain would call at the Consulate and talk for an hour or more with the Consul General or the Vice Consul. Sometimes the captains would leave the Consulate carrying envelopes they did not bring with them. One Ishichi MATSUDA, now in custody, the owner of a grocery store at the old Aala Market, often visited these vessels. He was noted on numerous occasions by representatives of this office to have carried a mail bag onto the boat. SAKAI explained that MATSUDA would pick up mail being held at the post office pending the arrival of the tankers, and carry it aboard. Presumably this was a labor of love. SAKAI recalled hearing that Japanese navy men sometimes left the tankers here, then sailed aboard a tanker calling at Honolulu at a future date. However, SAKAI could not recall where he had heard this. He further disclaimed all knowledge of what these officers did while in port, or of where they lived while here. (In connection with this topic, see reference (v), paragraphs 42-43.)

#### TORITSUGININ

136. Takaichi SAKAI stated that the term *soryojikan toritsuginin* was not accurately translated as "consular agents". He believed the more correct translation to be "Consulate General 'go-between' men". He remembered Vice Consul OKUDA's once expressing the opinion that the *toritsuginin* were not agents of the Japanese government within the meaning of the United States statute requiring such agents to register with the State Department.

137. It should be remembered that the status of the *toritsuginin* was never clarified by judicial decision. They were "agents" of the Consulate only in a very loose sense of the term. They rarely received remuneration from the Con-

and their duties apparently were merely routine. Actual military age on the part of a *toritsuginin* has been proven to the satisfaction of office only in one case, that of Unji HIRAYAMA, subject of reference (1). [32] espionage has been indicated in a number of other cases. However, the basic motive in placing all *toritsuginin* in custody immediately after the attack of December 7th was the fact that, as a class, they were ex-pro-Japanese, and there is evidence to indicate that they were chosen *toritsuginin* on the basis of their loyalty to Japan. There is scarcely one who has not engaged in a number of pro-Japanese activities in addition to his duties as *toritsuginin*.

ending—14ND.

#### TRIP TO KAUAI

One day in the early part of July, 1941, Morimura told me that he and I will be on a trip to Kauai in the near future. Sometime after that Seki told me that he wants to see the island by himself. So it seemed to me then that both of them would like to go so much to take a trip. I don't really know how the situation was between them. After several days (few days before we left) Morimura suddenly told me that he is not going and said that I will be sent. After hearing that from Morimura, I asked Seki what has happened. And Seki said that they (Morimura and Seki) had some kind of misunderstandings. I told Seki why he himself doesn't go since I was told he wanted to go so much. But Seki said that he is not going and told me to take my wife with me. He told me to go and have a vacation. And then Okuda called me to his desk and told me to go to work with my wife and also told me to see Seki about the money. Seki gave me \$100, and the following day I went down to the airway company office to buy tickets. The day before we left Okuda called me at his desk and gave me the following instructions. (1) See the things that could be seen from the island. (2) Not to talk to anyone. (3) He said that he knew the air field at the Barking Sand is going on. He told me to see that if it could be seen from outside. (4) See the Lihue airport if there is any improvements. (5) See Hanalei bay if anything is being done. He said he saw in a newspaper that the U.S. Navy is planning to use the bay for small boat base. (5) He showed me a geological survey map of Kauai and told me to see the Wainiha power plant. He said that it is the source of power used on Kauai. (6) He showed me a map of Port Allen and Nawiliwili harbors. He told me to see any change in the area. He told me to take the usual sightseeing schedule and see what I can see. I called up Nikami on the phone and told him to take us to the airport the next morning.

The next morning (I believe it was Saturday in the middle part of July) my wife and I went to the airport in Mikami's car. We left the airport at about 8 a. m. We reached Hanapepe airport at about 9 a. m. I noticed Horikawa was one of the passengers of the same plane. After we reached the Hanapepe airport I happened to see Minatoya (I didn't know him then) and hired him to show us around the island. He said the auto fare will be \$25. Then we started out immediately for the Kokee. I asked him if we can see the Barking Sand. He said we cannot see it in the morning because the Army usually practice bombing there. We went up to the place where tourists usually see the canyon. We got out of the car and stayed there for about 15 minutes, and continued our drive to Kokee and went as far as the place where there were some residences. Since Minatoya said there isn't anything more to see further up we turned back and came back to Waimea. Minatoya suggested to have our lunch at the Waimea Hotel so we went in and all three of us sat at one table. He then introduced himself and said he was working for some transportation company. He talked about his having a brother who is a doctor in Honolulu. We, my wife and I, introduced ourselves but I didn't say I was from the consulate. Soon after lunch we left the hotel and started for the Barking Sand. We didn't stop at anywhere on the island. [3] We reached the Barking Sand. We got off the car then walked up the sand hill and tried if the sand really barks. I took a picture of my wife and I looked from the sand hill if there was any work going on for the air force but I couldn't see anything at all. Only things I saw were sandy beach and palm trees. After staying there about 20 minutes and started back the same way to Lihue. On the way back to Lihue, we passed through Kukulolono park and stopped at the Lawai beach to see the Spouting Horn. And then we rode to

Koloa beach where we got off the car and walked around the sandy beach seeing many human skeletons. After staying there about 20 minutes we rode to Lihue without stopping anywhere. It was about 5 p. m. when we reached the Lihue hotel. We registered there and shown to our room. We had our dinner at the dining hall. After dinner my wife and I thought of going to see some movie so we called up Minatoya on the phone and asked him to take us. He came soon after and we went to the Lihue theatre. We three sat together. I remember the title of the picture was "Strawberry Blonde". After show Minatoya took us back to the hotel. We stayed in our room until we retired. There was some kind of party at the hotel that nite. The following morning Minatoya came to the hotel at about 8 a. m. After breakfast I happened to see Horikawa in the kitchen so I went in just to say hello. I introduced myself and my wife. All he said to us was that "You were on the same plane yesterday morning. Are you on a sight seeing trip?" Minatoya put the lunch in the car and we started out at about 9 a. m. We went to see the Wailua fall. We didn't go near to the fall but just saw it far from the hill. Then we went to see [4] the Grass shack where we got off the car and saw some old Hawaiian mats, drum and sandals. From there we went to see the Slipery fall. We got off the car and walked down to the fall. After staying there about 15 minutes we started to Hanalei direction. We didn't stop anywhere before reaching Hanalei where we had our lunch. We ate our lunch in the pavilion. I didn't see anything been done at the bay. After staying there about 45 minutes we started to Haena. On the way I asked the driver if we can see the power plant and he suggested of seeing it on the way back. We went way back we went up the Wainiha valley and went as far as the power plant was. I expected to see something large but All I saw were two pipes running down and one small power house building. Without stopping the car we just turned back from there and stopped about 1/2 mile down on the same road and picked up some mountain apples. After staying there about 15 minutes we started back and didn't stop anywhere before we reached Kilauea lighthouse. Minatoya suggested of seeing the lighthouse since it is the largest one in the world. The watchman of the lighthouse came and showed us in to the lighthouse. We climbed the stairs and saw the large lens. I remember we signed our names on the visitors' signature book. From there started back and didn't stop anywhere before reaching Lihue. On the way to Lihue we went down to Nawiliwili harbor. We didn't get off the car. Minatoya said pointing one office building that was his company office. We reached Lihue hotel at about 5 p. m. After dinner at the hotel my wife and I thought of going to see [5] Japanese movie and walked to the theatre. I don't remember the name of the theatre, it was very near to the hotel. It happened that night was the bank night at the theatre. After seeing the show we went back to the hotel and retired soon. The following morning Minatoya came at about 8 a. m. we checked out the hotel at about 8:30 a. m. I remember I paid \$20.00 to the hotel. We went straight to the Hanapepe airport. We left the Hanapepe airport at about 9:30 a. m. and reached Rogers airport at about 10 a. m. Mikami met us there and took us home. I took my wife to her shop and went to the consulate. Seki, Morimura and Okuda asked me how was the trip. They asked me if I enjoyed. I said it was fine but I couldn't see much. Seki said it's natural that I didn't see much. He said many things couldn't be seen from the highways. Then Okuda called me at his desk and asked me to tell him what I have seen. I told him I didn't see anything at the barking sand. I told him it was so quiet and I even never seen a plane flying. I told him there wasn't anything at the Hanalei bay. All I noticed was the sea was calm and it was a large bay. He asked me how was the reef of the bay but I said I couldn't see any reefs. I told him there were two pipes running down the mountain at the power plant and Wainiha and one building. He asked me anything more so I said none. I told him there wasn't anything new at the Nawiliwili harbor and Port Allen harbor. I told him at the Lihue airport I didn't see anything but some army tents. I didn't tell him that I talked to Horikawa. Morimura never asked me anything about the trip. [6] When I talked with Okuda Morimura was there too. Morimura just said "There isn't anything big going on it seems".

On the trip I brought along one tourist map. I didn't bring any letter or note to anybody and I didn't bring back anything from anyone to the consulate.

Oct. 1, 1942.

## Station JZI Program

12/8/41 (Japan Time)

Frequency 9535 Kilocycles

Our army and navy entering in a state of war with England and America on the 8th, an Imperial declaration of war against England and America was announced. Our army and navy, hence, has entered in a state of war with England and America. In regard to this, the Imperial army and navy headquarters at 6 am on the 8th announced that our army and navy entered a state of war with England and America in the Western Pacific at dawn today. At the same time, the brilliant achievements of our armed forces, too, were announced by the Imperial Army and Navy headquarters, as follows: (1) Our Imperial Navy at dawn today, the 8th made a death-defying raid upon the Hawaiian Islands and air strength in the Hawaiian area. (2) Our Imperial Navy at dawn today sank the British gunboat . . . . . (sounded like *Blackburn*) and captured the American gunboat . . . . . (sounded like *Nice*) at Shanghai. (3) Our Imperial Navy at dawn today raided Singapore and achieved great results. (4) Our Imperial Navy at dawn today bombed enemy military establishments at Davao, Wake and Guam. (5) Our Imperial Army, entering into a state of war at dawn today, attacked Hongkong. (6) Our Imperial Army, cooperating closely with our Imperial Navy, undertook a landing operation in Malaya at dawn today and is obtaining great results. Furthermore, according to a Domei dispatch from the front, our Imperial air force at eight this morning carried out its first raid on Hongkong and returned safely back to their base. Immediately afterwards, a second raid reportedly was carried out.

On the 8th, a Domei dispatch from Honolulu reported that our naval air force raided the Hawaiian Islands at 7 am Hawaiian time, which is 3:05 am Japan time.

According to an announcement made by the White House, the casualty inflicted by our air force's raid was very great and the oil storage tanks on Guam, which are presently being besieged by our Imperial Navy, are throwing up large quantities of smoke.

The British gunboat was sunk and an American gunboat was captured. This was announced by the Imperial headquarters, but according to the announcement made by the headquarters of our fleet in China waters at 9 am today, the Commander-in-Chief of the fleet in the China waters sent his staff officers to the British Gunboat *Picadelli* (phonetic) and the American Gunboat *Blackburn* (phonetic), respectively, immediately after our country entered in a state of war at 5:40 am and requested them to surrender for the peace and order of the world. Since the British gunboat refused to surrender, we were compelled to sink it. The American gunboat was captured with . . . . . We read the announcement

to respond to your will. On behalf of the government and the Army and Navy, we, Hideki and Shigetaro, your subjects, respectfully make this request. December 8, 1941.

(Signed) HIDEKI TOJO,  
Minister of War.  
SHIGETARO SHINADA,  
Minister of Navy.

Our Army and Navy has started a war against England and America in the Western Pacific at dawn today, our Government at 7 am today held an emergency session of the cabinet at the premier's residence. Outside of Foreign Minister Togo, all the cabinet ministers were present. Firstly, Minister of Navy Shinada reported the developments of war against England and America and on this report, the course to be taken by the government was decided, upon Premier Tojo called on the Emperor and reported the decision. According to a Domei dispatch from Washington, Foreign Minister Togo replied by order Envoys Kurusu and Nomura to call on Secretary of State Hull at 10 P. M. on the 7th, 3:30 A. M. of the 8th Japan time, and present our government's official reply to the American note of the 26th. At the same time, Foreign Minister Togo invited American Ambassador to Japan, Grew, to his residence at 7:30 A. M. today and handed him an official note similar to the one handed to Secretary of State Hull. Immediately afterwards at 7:45 am he invited British Ambassador to Japan, Craigie and explained to him the content of this reply.

Immediately after our loyal Army and Navy had entered a state of war with England and America at dawn today, it was decided to break off diplomatic relations with both countries and enter a state of war. Consequently, our government at 11:45 A. M. today declared war against England and America. At the same time, an order for the convocation of a two days special session of the Diet on the 15th was issued. At the emergency session urgent bills of appropriations and other nature will be presented and, at the same time, the government's policy to cope with the unprecedented emergency is expected to be explained by Premier Tojo and other ministers.

(Here a weather forecast was made as far as I can recollect, no such weather forecast has ever been made before. His exact words were "Allow me to especially make a weather forecast at this time, 'West wind, clear'." Since these broadcasts are also heard by the Japanese Navy, it may be some sort of code.

At 8:30 A. M. today, our government made the Foreign Ministry announce the results of the Japanese-American negotiation and the Japanese-American notes. The announcement made clear the real facts of the effort exerted by our government till the very last minute to preserve the peace of the Pacific. Japan's note to America was an official reply to America's note of the 26th and notified the fact no settlement can be expected even if the negotiation were to be continued. It actually was a final notice

[5] Pacific has been brought about by America and England. It should be definitely stated at this time that President Roosevelt and Premier Churchill has undertaken the Pacific war without consideration of the war's havoc on humanity as one of their program for the domination of the world. In the course of the four and a half years of the China incident, each and every Japanese has shed tears of indignation against England and America's wicked hostile attitude but has remained patient for the sake of the peace of the Pacific as well as the world. This patience, today has reached its limit. The time has come to rise unitedly and risk the fate of the nation for the cause of righteousness.

At dawn today, December 8, the announcement of the Imperial Army and Navy headquarters to the effect that our Imperial Army and Navy will enter a state of war against American and British forces in the Western Pacific at dawn today was made public throughout our country through the radios and newspaper. Every one throughout the country has now further strengthened their determination that the inevitable has at last come and instantaneously, our peace loving idea has been transformed into a determination to punish the evil and cut off the sinister hands of the outrageously wicked England and America. Today, the sky over Japan was clear and devoid of even a speck of cloud and under this blue sky, which seemed to be congratulating the promising future of Japan, who has risen to fight for the establishment of a new order of East Asia as well as of the world just like the brilliant rays of the sun, our excellent air forces, as an indication of our strong air defense, is flying about everywhere. When I received this report that war on the Pacific had broken out, I hurried to my \* \* \* and on my way, I saw reflected upon the passers-by as well as those working, a hereto unseen expression of seriousness. Then with the issuing of the Imperial decree declaring war at 11:45 A. M., the nation's determination to march forward and support the emperor's will gushed forth. No long afterwards, Premier Tojo's confident determination of our country was announced over the radio, and, at the same time, the achievements of our Navy which is carrying on operations against American and British forces from Malaya to Honolulu with an overflowing amount of power as though the Pacific were too small, were reported throughout the nation. Hence, the confidence and spirit to rise against England and America and to secure Asia as the haven of the Asiatic race through the establishment of a new order of the world has been made to flare up within the heart of the people.

The next is a Domei despatch of the 8th from Stockholm, which states that according to a Reuter's despatch of the 7th from Washington, official sources in Washington believe that Germany will declare war against America in the next 24 hours.

At this time, let me again make a weather forecast "West wind, clear." (Repeated this forecast.)

Now, let us broadcast to you the talk of Major General Yoshizumi.

# AN ANALYSIS OF THE JAPANESE ESPIONAGE PROBLEM IN THE HAWAIIAN ISLANDS

PREPARED BY THE COUNTER INTELLIGENCE SECTION, DISTRICT INTELLIGENCE OFFICE,  
FOURTEENTH NAVAL DISTRICT

April 20, 1943

## FOREWORD

The Counter Intelligence Section (Op-16-B-7) of the Office of Naval Intelligence, which is charged with counter-espionage responsibility in the Naval Service, recently promulgated a new operating plan, from which the following is extracted:

"In accordance with the new concepts of intelligence and counter intelligence, the Counter Intelligence Section *actively* seeks primary data and no longer *passively* waits for it to be received.

"This aggressive method of operation permits the Navy to detect and combat espionage, sabotage, and other subversive activities directed against its war effort *before the fact*, rather than merely to establish an historical record of facts after the damage is done." (#)

One of the functions of the Counter Intelligence Section is to "delineate patterns of subversive thought and activity." (#) This is likewise a function of the Counter Intelligence Section (B-7) of the District Intelligence Office, Fourteenth Naval District, which section has prepared the within analysis.

This analysis is intended to present facts and considered opinions pertaining to Japanese espionage in Hawaii and the correlative counter-espionage measures, both before and during this war. In formulating the analysis, deficiencies in existing counter-espionage methods and measures have been noted, and suggestions for the alteration or supplementation of existing methods and measures have been made.

No attempt has been made to analyze the related topics of sabotage and counter-sabotage. This analysis has been confined simply to espionage and counter-espionage, with only the necessary incidental introduction of other intelligence subjects.

Attention is invited to Appendix "A", which sets forth references to much of the source material pertaining to facts and opinions included in this analysis, and which particularly shows the sources of all quotations set forth herein.

A statement or paragraph footnoted to Appendix "A" is indicated by the symbol "(#)" at the end of the documented portion.

Particular places on the Island of Oahu which are mentioned in the analysis can be seen with reference to one another by consulting the map attached as Appendix "B".

The within analysis perhaps will be revised at a later date to include relevant facts hereafter discovered. Criticisms and suggestions are therefore especially requested.

I. H. MAYFIELD,  
Captain, U. S. Navy,  
District Intelligence Officer.

## TABLE OF CONTENTS

|                                                                                                      | Paragraph |
|------------------------------------------------------------------------------------------------------|-----------|
| I—Introduction                                                                                       | 1-        |
| II—Factors required in the operation of a wartime espionage system                                   | 6- 1      |
| (A) Security                                                                                         | 9- 1      |
| (B) Mobility                                                                                         | 11- 1     |
| (C) Flexibility                                                                                      | 11- 1     |
| (D) Simplicity                                                                                       | 11- 1     |
| (E) Deception                                                                                        | 11- 1     |
| III—Functions of an espionage system                                                                 | 15- 8     |
| (A) Collection of information                                                                        | 16- 3     |
| (1) Observation                                                                                      | 17- 2     |
| (2) "Loose talk" and rumors                                                                          | 22- 2     |
| (3) "Pumping"                                                                                        | 22- 2     |
| (4) "Inside" information                                                                             | 25- 2     |
| (5) "Planted" agents                                                                                 | 27- 2     |
| (6) Overt criminal action                                                                            | 29- 3     |
| (B) Evaluation of information                                                                        | 31- 3     |
| (C) Communication of information to the effective enemy destination                                  | 35- 8     |
| (1) General considerations                                                                           | 35- 4     |
| (2) Shore-to-ship contact                                                                            | 42- 5     |
| (a) Blinker-tube signalling                                                                          | 43- 4     |
| (b) Personal contact                                                                                 | 50- 5     |
| (c) Sonic devices                                                                                    | 50- 5     |
| (d) Water caches                                                                                     | 50- 5     |
| (e) Land caches                                                                                      | 55- 5     |
| (3) Radio                                                                                            | 57- 6     |
| (4) Commercial radio station transmissions                                                           | 66- 6     |
| (5) Trans-Pacific and inter-island telephone; radiograms                                             | 70- 7     |
| (6) Cablegrams                                                                                       | 73- 7     |
| (7) Air mail; ordinary mail; parcel post; cargo; railway express                                     | 76- 7     |
| (8) Courier                                                                                          | 78- 7     |
| (9) Carrier pigeon                                                                                   | 81-10     |
| IV—Japanese espionage activity in Hawaii prior to the war                                            | 81- 8     |
| (A) Type of information collected                                                                    | 81- 8     |
| (B) Personnel                                                                                        | 87- 9     |
| (C) Operational methods                                                                              | 95-10     |
| (1) Collection of information                                                                        | 95- 9     |
| (2) Evaluation of information                                                                        | 100-10    |
| (3) Transmission of information to Japan                                                             | 104-10    |
| V—Present Japanese espionage activity in Hawaii                                                      | 107-15    |
| (A) Introductory                                                                                     | 107-11    |
| (1) Evidence of enemy espionage                                                                      | 107-10    |
| (2) Espionage activity as affected by the state of diplomacy                                         | 109-11    |
| (B) Personnel                                                                                        | 114-12    |
| (1) Selection of personnel prior to the war                                                          | 114-11    |
| (2) Type of personnel used                                                                           | 118-12    |
| (C) Operations                                                                                       | 125-15    |
| (1) Functional units of the espionage organization                                                   | 125-14    |
| (a) Directive unit                                                                                   | 126-12    |
| (b) Collection unit                                                                                  | 128-13    |
| (c) Evaluation unit                                                                                  | 133-13    |
| (d) Communication unit                                                                               | 136-14    |
| (2) Use of a business firm as a "front"                                                              | 142-14    |
| (3) Finances of the espionage organization                                                           | 147-15    |
| (4) Instructions from Japan in wartime                                                               | 151-15    |
| VI—Counter-espionage measures in Hawaii                                                              | 154-21    |
| (A) "Counter-espionage" defined and distinguished                                                    | 154-15    |
| (B) Various approaches to the espionage problem                                                      | 159-17    |
| (1) Introductory                                                                                     | 159-16    |
| (2) The "Suspect" Approach                                                                           | 163-16    |
| (3) The "Functional" Approach                                                                        | 170-17    |
| (C) Responsible agencies                                                                             | 174-19    |
| (1) Military Intelligence Division                                                                   | 175-17    |
| (2) Federal Bureau of Investigation                                                                  | 180-18    |
| (3) District Intelligence Office                                                                     | 184-18    |
| (4) Federal Communications Commission                                                                | 187-18    |
| (5) National Censorship                                                                              | 189-19    |
| (a) Postal Censor, District of Hawaii                                                                | 190-19    |
| (b) Cable & Radio Censor, Honolulu                                                                   | 193-19    |
| (6) Collector of Customs, Honolulu                                                                   | 195-19    |
| (D) Investigation procedure                                                                          | 197-20    |
| (1) Prior to December 7, 1941                                                                        | 197-19    |
| (2) December 7, 1941, to March 27, 1942                                                              | 200-20    |
| (3) Since March 27, 1942                                                                             | 202-20    |
| (E) General considerations                                                                           | 206-22    |
| (1) Intelligence personnel                                                                           | 206-20    |
| (2) Coordination                                                                                     | 206-20    |
| (3) Shoreline coverage                                                                               | 208-21    |
| (4) Travel control                                                                                   | 211-21    |

## S-E-C-R-E-T

AN ANALYSIS OF THE JAPANESE ESPIONAGE PROBLEM  
IN THE HAWAIIAN ISLANDS

## I. INTRODUCTION

This analysis is predicated upon the premise that accurate knowledge of United States naval and military activities in the Hawaiian Islands (and particularly those in and around the Navy Yard, Pearl Harbor) is of inestimable value to Japan. It may not be an overstatement to say that no single place in the world is of greater interest to Japanese naval leaders.

It is assumed that Japan, many years ago having foreseen the possibility of war with the United States, and fully realizing the importance of Pearl Harbor as a naval base, had arranged for an adequate espionage system to operate in Hawaii during wartime.

It is believed that Japan has, over a period of more than 30 years, collected complete information concerning the geography and hydrography of the Hawaiian Islands, and has studied the military and naval necessities arising therefrom. (Paragraph 81.)

At the present time, Japan is assumed to be primarily interested in the offensive, as distinguished from defensive, strength of forces of the United States based in or from Hawaii. The specific matters of interest to the enemy, at this time, are judged to be their present order of importance, are:

Departures and arrivals of Naval task forces and units, and the disposition of Naval units in Pearl Harbor and in other Hawaiian ports and waters.

Status of readiness and repair of Naval units, and specifically, information concerning damage to vessels and estimated time of repairs.

Character and strength of Marine forces in Hawaii, and particularly, movements of Marine forces.

Movements of military aircraft from and to the Hawaiian area.

(e) Movements of merchantmen and troop convoys.

Military and air strength of the Hawaiian Islands, particularly Oahu, and specifically, new airfield construction.

In any event, the matter of primary interest to Japan is the offensive strength and disposition of United States Naval forces in these Islands. If the assumption be correct, it is accurate to state that any Japanese espionage organization now operating in the Hawaiian Islands is primarily concerned with obtaining naval information.

## II. FACTORS REQUIRED IN THE OPERATION OF A WARTIME ESPIONAGE SYSTEM

An espionage system functioning in hostile territory in wartime is of necessity much more carefully set up than its peacetime predecessor. The restrictions imposed in wartime by the creating of new restricted areas, additional limiting of vital installations, the invoking of censorship, and the promulgation of curfew, blackout, and alien control regulations all contribute to the situation. Means of communication with the enemy overseas must be put into operation. Previously untapped sources of information must finally be utilized; agents formerly "uncovered" prior to the war, because of their known proximity to military and naval installations, their alien status, or their contact with known espionage centers or agents, must be discarded.

It is believed that any espionage organization functioning in the Territory of Hawaii in wartime must consider and balance the following factors to produce a workable equation:

(A) *Security*

It is axiomatic that any espionage group in enemy territory must remain undetected to continue proper functioning. It must provide maximum security for its organizational nucleus, sacrificing, if necessary, less important members to preserve the heart and brains of the system. Only the most necessary risks should be taken in gathering information and communicating the same to Japan. The structure of the espionage system should be known to one another only to the extent absolutely necessary, limiting so far as possible the ability of one agent to compromise the whole system. Agents who have no need to know each other should not know each other. In short, a strict echelon system should be maintained. Each agent knowing only the superior to whom he reports and the operative activities he directs.

**(B) Mobility**

9. There must be sufficient mobility of the espionage group to permit the ready collection and transmission of information, as well as to allow the necessary intercourse among agents of the group. This requires that movements of agents be unobtrusive, often necessitating the careful selection of pretexts. It must be anticipated in advance of war that movements in certain vital areas (for example, [4] the Honolulu waterfront) will be restricted in wartime. Hence, plans must be well laid to maintain the espionage organization's normal mobility in such areas.

10. Therefore, the espionage agents must be able to reach without apparent effort all information within public view, and to have other information brought to them by "insiders," as far as is possible. Such mobility obviates the necessity of information-gathering agents having to expose themselves as such.

**(C) Flexibility**

11. Wartime conditions are inherently unstable and unpredictable. The continued functioning of an espionage organization often may depend upon its ability to adapt itself to changing conditions. Proper security measures taken to prevent and detect espionage can be overcome only by a highly adaptable espionage organization—one which is prepared to use Caucasian agents as well as Orientals, women as well as men, and agents "planted" inside vital areas as well as those mingling with the general public outside.

12. It must reasonably have been anticipated by Japan that war with the United States in all probability would cause the Hawaiian Islands to be put under martial law, the exact nature of whose application could hardly have been anticipated. That the enemy, Japan, have a highly adaptable wartime espionage system was therefore particularly required in Hawaii.

**(D) Simplicity**

13. It is a basic requirement that the espionage organization should be as simple as possible. Simplicity makes for security and efficiency in such an organization. Too elaborate an organization is likely to place various portions of the mechanism at the whim of uncontrollable outside factors, as well as increase the likelihood that if one agent is discovered and "talks," the whole system will be exposed.

**(E) Deception**

14. As a means of achieving security, mobility, flexibility, and simplicity in its operations, the espionage organization must employ deception generally, as well as in specific operations. Its agents must, in the main, be [5] able to discharge their duties casually and without apparent illegality. Transfers of money necessary for the running of the organization must not arouse suspicion. The existence of a "front," possibly in the guise of a legitimate business house, is therefore necessary to afford cover to many of the activities of the espionage group. How a business "front" could be utilized will be noted later. (Paragraphs 142-146).

[6]

**III. FUNCTIONS OF AN ESPIONAGE SYSTEM**

15. For the purposes of this analysis, the functions of an espionage system operating in the Hawaiian Islands in wartime are assumed to be:

- (a) Collection of information;
- (b) Evaluation of information;
- (c) Communication of information to the effective enemy destination.

**(A) Collection of information**

16. In the Hawaiian area, information of value to the enemy can be collected by any or all of the following methods, which vary in risk, according to the circumstances indicated:

**(1) Observation**

17. From the Naval standpoint, the most important island of the Hawaiian group is Oahu, and unfortunately the geography of Oahu is such that observation

movements of Naval vessels cannot be prevented. The arrival and departure of ships at Pearl Harbor in the daytime is visible, to anyone interested, from a number of places not in any restricted area and where the presence of an observer would not arouse suspicion. For example, every vessel entering or leaving Pearl Harbor by daylight can readily be seen (and by a trained observer, identified as to type and class) from many buildings in downtown Honolulu. The number and type of ships in Pearl Harbor, whether in drydock, at anchor, or at moorings, can be determined with a high degree of accuracy by observation from the living on, or visiting, Aiea Heights, which overlooks Pearl Harbor. The use of a field glass is required in aid of such observation is but a small obstacle. It is known that employees of the Japanese Consulate General, Honolulu, were designated to observe and report on arrivals and departures of Naval vessels at Pearl Harbor, and the number of vessels there, prior to the outbreak of the war. Much of their observing from Aiea Heights and areas nearer to Pearl Harbor, but at a lower elevation. (#) Likewise, many Japanese naval officers who visited Honolulu in recent years made sightseeing trips to Aiea Heights and the environs of Pearl Harbor. (#) It is also known that [7] at least one of the two-man Japanese submarines that participated in the attack on Oahu, December 7, 1941, had aboard a panoramic photograph of Pearl Harbor, which was found to have been photographed from Aiea Heights—not by an enemy agent, but by a commercial photographer, who sold prints thereof openly in Honolulu. (#)

There are many ways, less direct than those noted above, where acute and intelligent observations will reveal information concerning Fleet dispositions. The number of officers and men on leave in Honolulu often will provide a clue to the number and identity of Fleet units in port. Where officers or men who reside in residences in Honolulu are known to be attached to a given ship, an observer will be able to state with reasonable certainty that if a certain officer or man is in Honolulu, his ship is in port and not at sea.

Thus, unless the observer enters a restricted area without right, or uses electronic or photographic equipment whose use is illegal, his activities in collecting information of naval value by observation alone can easily go wholly undetected.

#### *"Loose talk" and rumors*

No matter how extensive a campaign may be to prevent "loose talk" and "rumor mongering" concerning military and naval subjects, it seems impossible to prevent them entirely. Since much of what passes as rumor often contains elements of truth, the trained enemy agent, referring what he hears to a competent person, can make this a profitable source of information for the enemy. Many examples—for example, the sinking of the aircraft carriers LEXINGTON, YORKTOWN, and WASP, and the impending Battle of Midway—were common gossip in Honolulu before official announcement of the facts.

"Loose talk" is of two types—that which is offered gratuitously, and that which is "pumped" from one having knowledge of the facts. The distinction is important and is especially important in the operation of the espionage organization from the standpoint of risk.

#### *"Pumping"*

This type of information-gathering consists of eliciting facts from the person thereof, by pretext, use of force, or sensuous or intoxicating inducements. The [8] person imposed upon does not consciously and willingly betray his trust, but may be brought to do so by the enemy agent's use of force, flattery, representation, or proffer of food and drink, narcotics, or women. (#)

#### *"Inside" information*

This is the type of information generally bought and paid for by the enemy agent who need not (and generally cannot) obtain the information himself, but commissions someone else to provide him with the information. Unless, however, the espionage organization has developed a source of "inside" information prior to the outbreak of war, it may find it difficult to do thereafter because of the high risk involved in approaching a person with a proposition that he commit espionage in wartime. (#)

There is no evidence that any person in a position of military or naval command in the Hawaiian Islands, either before or during this war, has supplied information to enemy agents. However, history teaches that vigilance against espionage must be maintained.

(5) *"Planted" agents*

27. As distinguished from the traitor already in a place of trust who sells information to the enemy, a "plant" is an agent installed in a place of confidence (usually within a restricted area) who himself gathers all available information of value to the enemy. Less valuable and less likely to be used, but possible, is a person (for example, a domestic) "planted" in the home of any military, naval, or civilian official likely to have considerable knowledge of vital information.

28. Less likely to be found, but not to be dismissed, is the possibility of enemy agents using "planted" mechanical devices for the gathering of important information. Telephone wires over which vital information is transmitted may be "tapped." Microphones may be arranged in conference rooms and offices.

(6) *Overt criminal action*

29. Unable to secure desired information by any of the foregoing methods, the enemy espionage organization may resort to actions more easily detected, and therefore carrying a greater risk. Among the more direct methods would be murder, assault, forgery, burglary, and larceny (to secure [9] writings, maps, charts, and code books) and perjury, impersonation, and trespass (to secure entry to restricted areas). Murder and arson might be indulged in to destroy the evidence of other crimes incident to espionage activity.

30. It is believed, however, that under present conditions in Hawaii, it is unnecessary for the enemy to resort to overt criminal activity to carry out its espionage mission here.

(B) *Evaluation of information*

31. Since, as will be discussed below, the chief obstacle confronting an espionage organization in the Hawaiian Islands in wartime is that of communicating information to Japan, it is desirable that all information collected by enemy agents be evaluated and digested locally as far as possible, so as to provide the shortest possible messages for transmission, whatever the means of communication may be.

32. While before the war broke out the Japanese Consulate General, Honolulu, was able to send lengthy intelligence reports and newspaper articles to Japan in the consular pouch, and was able to send encrypted radiograms and cablegrams without undue limit of length, it is assumed that the transmission of information to Japan is at the present time sufficiently difficult to prohibit the sending by most means of any great volume of information without great risk of detection. (#)

33. Therefore, it is believed necessary that the enemy have a competent evaluator (or evaluation unit) in the Hawaiian Islands, so that all available information can be digested to its important essentials. This presupposes one or more individuals highly intelligent and trained in military and naval subjects.

34. It is also believed likely that the chief evaluator of the espionage organization will be found to be the principal organizer and primary directive force of the group.

(C) *Communication of information to the effective enemy destination*(1) *General considerations*

35. In executing its ultimate function—that of communicating vital information to the enemy—the espionage organization, in all probability, exposes itself to a far greater risk than it does in discharging its other functions.

[10] 36. It is quite possible that more than one means of transmission of information is used. In general, it may be said that the more rapid types of communication involve the most risk, and that the sender will, therefore, use such means only when the value of data transmitted justifies the assumption of the greater risk.

37. "Spot news," such as the departures of a Naval task force, Marine force, bomber squadron, or a convoy, would merit the most speedy means of communication. Such intelligence obviously would lose its value if delayed too long in reaching the effective enemy destination.

38. On the other hand, more "durable" information, such as that concerning new construction (airfields, hangars, and ammunition dumps, for example), relating to conditions of a static and permanent nature, would be of value to the enemy even if delayed months in reaching Japan.

It must also be noted that certain information may be unsuitable for transmission telegraphically, and may have to be transmitted manually. Artifacts such as maps, charts, ordnance, or a bomb sight are of greatest value to the enemy only if received intact.

Certain information, although capable of telegraphic transmission, may be so lengthy as to make anything other than manual transmission impractical and dangerous. Detailed intelligence monographs and stolen code books may be examples.

The problem of transmission of information has been thoroughly considered, chiefly for the reason that it is believed that there is more likelihood of discovering the enemy's espionage organization through its communication facilities than in any other way. The organization exposes itself most openly in exercising its communication function. The possible ways in which it is thought that enemy agents might send information from here so as to directly and immediately reach Japan, are the following:

#### *Shore-to-ship contact*

Under this heading, there are a number of different methods by which communication between an enemy agent in the Hawaiian Islands and enemy submarines off shore can be effected. While there is no conclusive proof that communication has existed during the war or immediately preceding the attack on Pearl Harbor, there are two significant [11] facts which strongly suggest the possibility:

It has been learned since the outbreak of war that the local Consulate had a system for signalling by various means from the islands of Oahu and Maui. This system emphasized visual signalling from the windward coast of Oahu, presumably to submarines. (#)

Since the outbreak of war, enemy submarines have appeared off various points of the Hawaiian Islands, at night and close to shore. Evidence that such craft have appeared close off windward Oahu at various times is strong. However, enemy submarines have not engaged in combat activity in that area, nor could they have effected reconnaissance of United States Fleet units there (since that area is off the regular sea lanes and at the opposite side of Oahu from Pearl Harbor). It therefore appears that with the presence of enemy submarines off windward Oahu should be associated the possibility that they were used to receive communications from, or send them to, enemy agents on shore—likely the former—or to make physical contact with agents on shore. (Paragraphs 47-48.)

#### *Blinker-tube signalling*

The hills rising sharply from the shores of the Hawaiian Islands contain many natural signal positions. These hills are cut by many deep valleys, most of which open almost directly into the sea, rather than into plains lying between main mountain ranges and the sea. A blinker-tube signalling device (easily devised from a flashlight and a cylindrical tube, pipe, or can) operated from the valleys and brought to bear upon a prearranged sea area cannot be detected unless the observer is on an almost direct bearing with the tube.

Since the outbreak of war, local intelligence offices have received many reports concerning suspicious lights, flashes, and flares—some well inland, some on and near the sea, and some off shore. In the many cases investigated, no evidence of signalling to the enemy has been established, but neither have all the reports been satisfactorily explained.

45. The killing of Gichihiro UYENO, a Japanese alien by an Army sentry at Waimanalo (windward Oahu) shortly before midnight, July 25, 1942, is worthy of particular note. UYENO was discovered close to a machine-gun emplacement on the beach. Several times challenged by the sentry, UYENO failed to make himself known and took flight, whereupon the sentry shot him. While attempting to escape, UYENO discarded a flashlight which he had been carrying. Examination of the flashlight indicated that it had once been "blacked out" with colored cellophane, but that the cellophane had been removed. According to available information, UYENO previously had always been in his quarters at a private home (where he was employed as a yard caretaker) by 8:00 o'clock each night, coming out with the Military Governor's curfew for aliens. He was a recluse, but not deranged.

At the time he was first seen near the machine-gun emplacement, UYENO was approximately 400 yards from his quarters, in a place he had no legitimate

reason to be. He was abroad at night in violation of the Military Governor's order, was illegally in the vicinity of military emplacements, was carrying an unblackened flashlight (though unlighted), and failed to heed the sentry's challenges. In those circumstances, it is reasonable to say that UYENO knew he was risking death. The probability is that his mission at the time justified assuming that risk. It is conceivable that UYENO was proceeding to, or returning from, a point of vantage from which signalling would have been, or was accomplished with the use of the undimmed flashlight. In this connection, it is relevant to quote the following entries from the log of the Army Contact Office (M. I. D.), Honolulu, for July 26, 1942:

"0040 Ph. from For'd Echelon (Lt. Porteus): Several 'Radar' plots indicate a strange surface vessel (or surfaced submarine) off Kaneohe Bay

"0045 Ph. from For'd Echelon (Lt. Porteus): Reports that a guard at Bellow Field shot and killed a Japanese man; CO asked to identify him."

The deceased Japanese later was identified as UYENO. The place where he was shot was approximately ten miles, on a straight line, from Kaneohe Bay. (#)

47. It is relevant to observe that during the latter [13] part of July 1942, considerable suspicious offshore activity was noted in the windward Oahu area, near the Naval Air Station, Kaneohe Bay. The following is a recapitulation of events, as related by a highly reliable informant:

On the first appearance in the last week of July, 1942, the Japanese submarine was seen to be sending signals toward the shore by means of blinking lights. The submarine was located at this time near the entrance of Kaneohe Harbor just off the Mokapu peninsula. On its second appearance, probably July 26, 1942, the submarine was fired on by the shore batteries with no effect. On its next appearance, July 27, 1942, it was reported that all shore batteries had fired on the enemy submarine, with at least one shot hitting its mark. The submarine retired to a position behind Moku Manu island. This position rendered safety to the vessel since it is characterized by two cliffs which rise from the water on either side of the channel between the two islands. The submarine's position in this channel rendered it impossible for direct shots to be thrown at it. It was also understood that airplanes took off to drop bombs on the submarine, but because of conditions, were unable to make satisfactory runs.

Coincident with the retiring of the submarine on this latter date, the figure of a man was seen to be swimming in the channel in Kaneohe Bay, emerging from the water close to the old Navy Pier, Kahalun landing, which is near Koolau. A company of soldiers was dispatched to head this individual off, but because of the nature of the terrain, which is characterized by swamps and heavy underbrush, he was able to evade this group. Footprints inspected showed that this man was wearing rubber-soled shoes. (#)

In connection with the foregoing report must be considered the following memorandum, dated July 30, 1942, from the Intelligence Unit, Naval Air Station, Kaneohe Bay:

"For the past several months the U. S. Naval Air Station, Kaneohe Bay, has been menaced by attack from enemy submarines. Numerous radar plots of such submarines have been recorded and our aircraft, destroyers, and coast artillery have been brought into action against enemy [14] submarines as recently as July 27, 1942."

48. More recently, similar enemy activity has been apparent off Kaneohe Bay. On April 15, 1943, the District Intelligence Officer received the following report from the same Intelligence Unit:

"On the night of April 6, 1943, in addition to radar contacts, the station crash boats, in search of survivors from a plane crash in the area outside of Kaneohe Bay, saw an object identified as a submarine conning tower. (There were no such friendly craft in this area at this time.)

"At 1100 on April 10, 1943, planes from the Naval Air Detachment, Naval Air Station, Kaneohe, saw a submarine off Kahuku Point, (later identified as enemy submarine) break surface and shortly, on his approach, submerge. At 2100 that same evening radar contacts were made off Kaneohe Bay, bearing 345°, range 7000 yards. At 2200 the station gun batteries illuminated with star shells and fired upon the conning tower of a submarine, range 7000 yards, bearing 342°, proceeding rapidly to bearing 345° when it submerged.

"On April 11, 1943, a plane was dispatched from this station to search for an enemy submarine observed off the northeast coast of Maui."

Sight, sonic, and radar plots of enemy submarines and unidentified objects windward Oahu (particularly in the area off Waimanalo to Kaneohe Bay) have been recorded during the war. These usually have been at night. These together with the incidents involving UYENO and the unidentified swimmer Kaneohe Bay, cast the highest degree of suspicion upon the windward Oahu.

The coincidence of several such events in the last week of July, 1942, and with particularly active suspected enemy submarine activity at that time makes the situation doubly noteworthy. It is clearly possible that sighting of enemy craft has been, and still is, carried on in that region. Further, the possibility of actual physical contact between enemy submarines and enemy forces on shore is apparent.

#### Personal contact

The waters and beaches of much of the coastal areas [15] of the Hawaiian Islands are such that a reasonably good swimmer can swim from the shore to a submarine, or vice versa. This provides the enemy with a method of receiving written, graphic, pictorial, and oral information from the submarine without the need of putting ashore instructions, equipment, and new personnel for use in an espionage organization.

The landing of Nazi saboteurs on the Atlantic Coast of the United States, the spy in Canada, and the report referred to in paragraph 47, above, illustrate the possibilities of effecting physical contact with shore. (#) With even the slightest ease, enemy agents can be landed or picked up on islands of the Hawaiian Islands other than Oahu.

Before the war, there was speculation as to whether Hawaiian fishing boats (largely manned by alien Japanese) might be making contact with Japanese vessels in or near the Hawaiian area for subversive purposes. Such meetings were never proved. (#) Contacts of local sampans with enemy vessels are still in evidence at present, due to the strict patrolling of all such craft in Hawaiian waters and the limited distance from shore within which they must operate. Furthermore, persons of Japanese ancestry are no longer allowed to fish in boats on the coast.

#### Sonic devices

Sonic equipment for underwater signalling is mentioned as a possible, though not probable, means of communication between enemy agents in small boats in Hawaiian waters and submerged enemy submarines. The latter, of course, carry sonic signalling apparatus as standard equipment.

#### Water caches

The coastal areas of the Hawaiian Islands in some places have shelves off the reefs, the shelves being at relatively shallow depths. This is true to a large extent of the Waimanalo-Kaneohe Bay area and the north shore of Oahu. For many years it has been the practice of local fishermen (many of whom are alien Japanese) to lay fish traps in those waters without buoys or floats attached, later picking them up by dragging or diving. The waters in which this type of fishing has been practiced are in many cases deep enough to permit a submarine to navigate close to shore, where it could recover a cache.

#### (e) Land caches

There are a dozen or more small islands or rocks off windward Oahu, varying in height above the sea from 20 to 360 feet. Several lie parallel to the shore and are long enough to conceal a submarine off shore from the view of observers on shore. Several lie in the Waimanalo-Kaneohe Bay area. Espionage forces from shore could visit such islands or rocks with comparative security and intelligence pouches in prearranged places, such pouches to be later picked up by enemy submarines.

The use of land and water caches as a means of transferring information from the enemy has a singular advantage over many of the other means of communication. Where caches are used, the transmitter can choose the time most appropriate to the performance of his task, and the recipient can act as he wishes. The times of their respective actions need not, and probably would not, be the same.

**(3) Radio**

57. The use of this means of communication would be highly desirable to the enemy espionage organization, from the standpoint of rapidity of communication, but involves a high degree of risk. By radio, information could be sent directly to Japan, or, with less power, to Japanese stations in the Mandated Islands or to enemy surface units or submarines considerably closer to the Hawaiian Islands, for re-transmission.

58. Properly used, however, this method of communication could give the sender a fair degree of security, taking into consideration the following safeguards and operating procedures:

- (a) Transmissions on a given frequency to be of short duration;
- (b) Varying frequencies to be used;
- (c) Use of a mobile transmitter, hidden in a truck or automobile;
- (d) Use of frequency modulation;
- (e) Use of directional transmitting antenna;
- (f) Use of ultra-high frequencies.

[17] 59. In this work, small sets operating only with a key could be used. It is known that Japanese landing forces in the Orient have used portable ultra-high frequency field sets only 8" x 8" x 10" in size. By using the transmitter carefully, changing frequencies rapidly, and employing mobile equipment, a maximum degree of protection against detection could be achieved.

60. Frequency modulation transmissions would be chiefly of value in this work for its freedom from detection by ordinary (that is, amplitude modulation) receivers. Frequency modulation transmission in the higher frequencies is reported to have a service range of about twice the distance from the point of transmission to the horizon. Thus, a transmitter located at an elevation of 500 feet could send to an enemy submarine almost 30 miles away. (#)

61. In conjunction with frequency modulation or other type of transmission, the use of a directional antenna would greatly improve the security of the espionage activity by limiting the area within which monitoring equipment, fixed or mobile, would be able to intercept signals. Directional transmission in the higher frequencies, with their limited service ranges, would be used to best advantage with a fixed rather than mobile transmitter.

62. A strong objection to the use of radio is the unsatisfactory equation between the operator's vulnerability and his importance to the espionage organization. His technical skill would be a great asset, yet during periods of transmission he would be the most exposed member of the organization.

63. Other than an unidentified message intercepted by an Army radio unit on the morning of December 7, 1941 (following the attack on Oahu), which message was partly in German and partly unintelligible, and which reported in a very general way the damage caused by the Japanese attack, there has come to the attention of this office no instance of communication by radio from the Hawaiian Islands to the enemy. (#)

64. However, in line with what should always be the basic operating premise of the counter-espionage agent—to assume the worst and work against it—it must be assumed that the enemy has carried on radio communication from these Islands. On January 10, 1942, the senior FCC representative in Hawaii wrote

[18] "It is generally believed and logical to assume that radio is being used to convey information to the enemy in this area. The fact that no illegal operation has been discovered here to date means that the enemy is clever and that there is inadequate radio coverage. . ." (#)

After specifying the existing monitoring facilities and requesting additional equipment and personnel, the same writer believed that FCC would still be unable to cover the field completely, saying:

" . . . Those recommendations constitute a practical compromise with the requirements for theoretically perfect coverage."

On January 16, 1942, the Director of the Federal Bureau of Investigation wrote

"In regard to present conditions in the Hawaiian Islands, it is apparent that illicit shortwave radio transmissions are being sent from clandestine stations operating in the islands themselves, in communication with mobile units of the Japanese Navy, through which intelligence information is being reported to the enemy. . ." (#)

65. Opinion is divided as to whether the enemy espionage organization would use radio as a frequent and usual means of communication with Japan, or use

in the rarest and most urgent cases. The answer to the question will depend upon the amount of risk apparently involved in such transmission and the suitability of other, less risky means of communication. Fixed and mobile FCC monitoring stations in the Hawaiian Islands maintain a constant watch for suspicious radio signals, and constitute a serious threat to any illicit transmissions. However, it is believed that such monitoring is not, and could not be, effective. Transmissions in the higher frequencies from certain portions of the island of Oahu cannot be received at certain other parts of the island. Emanating from a high-frequency transmitter located in a valley formed by sharply rising mountains usually might only be received within the valley or beyond its flanks, the mountains acting as a shield against lateral transmission. Using a directional antenna with a transmitter so situated, the field of interceptability might further be reduced, eliminating almost entirely the possibility of interception at least the fixed monitoring stations.

#### (4) *Commercial radio station transmissions*

In the Consulate communications plan already referred to (paragraph 42) this type of communication was provided for—a radio advertisement offering to sell a Chinese rug was to mean that several aircraft carriers had left Pearl Harbor; one advertising a complete chicken farm for sale, that all aircraft carriers had sailed; and, one offering to employ a beauty operator, that the whole Japanese force had sailed. If used, these transmissions were to have been sent on Radio KGMB, Honolulu, at about 9:45 o'clock on any morning. No such transmissions were in fact ever placed.

Such a method of code transmission is entirely feasible, although normally there would be a delay of at least a day in reporting information in this manner. Honolulu radio stations generally require that advertising copy be submitted at least the day before it is broadcast. Commercial radio transmissions on KGMB and KGMB, Honolulu, while probably not to be heard at all hours of the day in the Mandated Islands probably could be heard there at night. Day-broadcasts could be heard by Japanese vessels cruising between there and the Hawaiian Islands, and by them be relayed to Japan.

The type of code to be used in conjunction with radio advertising would be simple to conceive and should create no suspicion in the minds of censors or the public, because it would use only words well known to the trade of the advertiser. The use of nouns representing trade names or products would be required in this code, to escape the effects of any ordinary paraphrasing that censors or radio station operators might impose. An internal indicator could be used to differentiate ordinary advertisements from those intended to convey information to the enemy.

While the use of spot ads of the type mentioned in the Consulate communications plan would arouse suspicion at the present time, it should be mentioned that there are a considerable number of commercial firms (some of them owned by Japanese aliens) who regularly advertise over the local commercial radio stations, and have done so since before the war. One of these firms might be a "front" whose radio advertising could be used to transmit code messages.

#### (5) *Trans-Pacific and inter-island radio telephone; radiograms*

These means are grouped together because they each are interceptable by the enemy. There is good evidence that trans-Pacific telephone communications between Hawaii and California can be intercepted in Japan, but whether they are intelligible there depends on whether the Japanese have a suitable inverter ("crambler"). As to all of these means, however, sound counter-espionage practice requires that it be assumed that the Japanese can intercept such communications and render them intelligible.

Where these means are used to transmit information directly to an intercept station, a simple code similar to that which could be used in radio advertising might be appropriate. Here, again, the use of a business house as a "front" would be appropriate for the espionage organization. Examination of trans-Pacific telephone censorship extracts indicates that many such calls are of a business nature, and involve conversations concerning products and brand names.

In addition, these means can be used for the purpose of communicating directly with other Japanese espionage agents, on the Mainland. Their use for this purpose would be essentially the same as the use of commercial cable, air mail, regular mail, and courier, which are discussed below.

**(6) Cablegrams**

73. Assuming the existence of Mainland "post offices" to which intelligence messages might be sent, the use of commercial cable as a means of getting vital information out of the Hawaiian Islands is quite feasible. This practice presupposes the existence of an information relay system, whose task it would be to re-route the information through any of many possible channels to an Axis country or to an Axis agent in a neutral state, for relay to Japan.

74. This method of communication requires only a simple code, perhaps of few as 100 words and numerals, together with code designations for geographical sections on a grid map. If this means of communication were used often, several codes could be used to avoid the possibility of detection through repetition of the same code words.

75. Although the use of cablegram eliminates to some extent the time incident to transmissions by air mail [21] and ordinary mail, there are some obstacles interposed by censorship, inasmuch as the immediate censor might take a fancy to paraphrase a message or suppress it entirely (in which case the sender would not necessarily be notified). However, it is believed that the use of proper codes, especially designed to avoid censorship and the effect of paraphrase, would make this a useful means of communication.

**(7) Air mail; ordinary mail; parcel post; cargo; railway express**

76. These media of transmission have several advantages not possessed by some of those previously discussed: First, the permitting of transmission of bulky reports, in more detailed and more secure code; second, the opportunity for use of secret inks, grids, and other hidden writings; third, the transmission of maps, charts, plans, and other matter that must be represented graphically or pictorially, rather than verbally; and fourth, the transmission of physical objects of intelligence value, and written reports that have been reproduced on microfilm.

77. The great time lag between the happening of an event and the time a report of it reaches the effective enemy designation by one of the above means is the most serious disadvantage here. However, certain durable information (for example, that relating to the location of new airfields, drydocks, ammunition dumps, and especially the estimated dates of completion of construction in progress) would be only slightly diminished in value if so transmitted.

**(8) Courier**

78. The use of agents who are officers or crewmen of commercial airlines or the merchant marine has been suggested. (#) Such means would possess two advantages: First, in allowing the transmission of information by word of mouth and second, the handling of physical objects.

79. However, because of the vagaries of merchant marine sailing these days, an agent on a certain ship could not be expected to call at Honolulu regularly. This would necessitate having couriers on a large number of vessels, requiring the espionage organization to become too large in proportion to the benefits to be gained by the use of couriers. Also, the factor of time required in such transmission is an additional adverse condition. It is much more likely that officers or crewmen of Pan American Airways, whose clippers make fairly regular trips between Hawaii and California, or [22] other commercial airlines, would be sought to act as couriers.

**(9) Carrier pigeon**

80. Simply because it might be used for the carriage of information between islands of the Hawaiian group, this possibility is mentioned. However, it is considered relatively insecure, and perhaps vain, since inter-island mails are not censored and can therefore be used to better advantage than homing pigeons.

**[23] IV. JAPANESE ESPIONAGE ACTIVITY IN HAWAII PRIOR TO THE WAR****(A) Type of information collected**

81. An alien Japanese internee, who claims to have engaged in espionage for Japan in Hawaii 30 years ago, has stated that Japan started its espionage coverage of the Hawaiian Islands shortly after the Russo-Japanese War. (#) Initial study is said to have been made of the geography, topography, and hydrography of the Islands, so that by World War I, Japan had a rather complete compilation of all basic data concerning those subjects.

82. As indicated in Paragraph 19, the Japanese Consulate General, Honolulu, was particularly interested in the movements of United States Naval vessels in and out of Pearl Harbor. There is no evidence that such movements were especially watched and reported by the Consulate prior to the summer of 1940. This probably is accounted for by the fact that until that time the status of relations between the United States and Japan did not demand such reporting and that up to that time Fleet movements were publicized in the press.

83. Of particular importance to the Consulate in 1941 was information concerning new airfields in the Islands. Persons attached to the Consulate travelled to the islands of Kauai, Maui, and Hawaii particularly to look for new airfield construction, while new fields on Oahu were constantly sought. (#) The importance of such information is readily apparent when one considers the attack of December 7, 1941.

84. Arrivals of new air squadrons and troops to strengthen Hawaii's defenses in 1941, and the passing through Honolulu of men and materiel destined for China, also were closely watched and reported by the Consulate to Tokyo. (#)

85. Data concerning beaches, reefs, anchorages, tides and currents, and the like, undoubtedly were gathered chiefly by alien Japanese fishermen who almost exclusively manned Hawaii's sampan fishing fleet. Those beaches most suitable for enemy landing operations were closely studied, both by Consulate personnel and visiting Japanese naval officers on sightseeing trips.

86. The Consulate is also known to have been interested, but to a lesser degree, in the waterfront facilities on the four main islands; and, in the case of Kauai, the electric powerhouse at Wainiha was the object of scrutiny by a member [24] of the Consulate staff sent to the Island of Kauai for that purpose in July, 1941. (#)

#### (B) Personnel

87. Upon the basis of known facts, persons who have engaged in espionage in the Hawaiian Islands for the benefit of Japan may be classified as (a) officials, (b) agents, and (c) volunteers. For instant purposes, Consulate staff members, employees, and *toritsuginin* ("go-betweens," popularly called "consular agents") are denominated officials. Other local residents—the self-appointed spies—are classed as volunteers.

88. It is believed that the Vice Consul, at Honolulu, was *ex officio* responsible for the conduct of espionage operations of the Consulate. Certain Consulate secretaries (alien Japanese) and one local-born clerk (a dual citizen) are known to have collected military and naval information for the Consulate, in each instance reporting their finding to the Vice Consul. In another instance, a consular agent who was a Buddhist priest at Lahaina, Maui, was called upon by the Vice Consul to report the movements of the Fleet at Lahaina Roads, (#) Other consular agents were asked to report economic matters.

89. When interrogated after the outbreak of war, the local-born Consulate clerk above referred to stated that he had heard one Consulate secretary (who also was engaged in espionage in Honolulu) state that it was Japan's policy to maintain two espionage systems in countries abroad—one system run by consulates, and the other separate from the consulates and entirely unknown to them. Whether any such extra-consulate espionage system was active in the Hawaiian Islands is not known. The difference in functions of the two systems was said to be that a consulate would indulge only in such espionage activity as could be carried on without compromising diplomatic and consular relations (such as the gathering of facts from newspapers, viewing ship movements from places of vantage not in any restricted area, and observing airfields and beaches from public highways), whereas an extra-consulate organization would carry on "illegal" espionage (such as trespassing restricted areas and the buying of confidential information).

90. The Consulate undoubtedly had a few paid agents, although in the one outstanding case, it does not appear whether the agent who received pay through the Consulate was receiving the same for services rendered at the direction of [25] the Consulate or of someone in Japan. This agent, Otto KUEHN, an alien German, is known to have received \$14,000.00 through the Consulate in October, 1941, but the money seems to have been transmitted directly from Japan, with the Consulate acting merely as delivery agent. However, subsequent to that time, KUEHN did commit overt acts of espionage and report his work to

the Consulate directly, for which acts he has since been tried by a military commission, found guilty, and sentenced to 50 years' imprisonment. The Consulate is known also to have paid certain other persons who appear to have been chiefly engaged in propaganda work, but who may well have engaged in espionage also. (#)

91. Much information of value to Japan is believed to have been gathered by Japanese espionage agents who came to Hawaii for relatively short periods of time, as non-quota immigrants or in the guise of visitors—in either case, seemingly having no connection with the local Consulate. One case is known of a Japanese agent who, around 1932, stayed in Hawaii for about four months, evidently to perform a specific mission. With the help of a Japanese bookstore owner (who had been naturalized as a United States citizen following his service in the United States Army in World War I), the visiting agent conducted considerable observation of the Island of Oahu and its points of naval and military interest. (#)

92. Espionage agents, or observers, who stayed but a short time in Honolulu were chiefly those military and naval officers of Japan who were passing through Honolulu on commercial or naval vessels. In the cases of visiting Japanese naval training squadrons, the officers invariably made sightseeing trips around Oahu, taking them within full view of Pearl Harbor, certain Army reservations, air fields, and strategic beaches. Lieutenant Commander Sadatomo OKADA, IJN, expelled from the United States in the summer of 1941, is reliably reported to have come ashore here and to have driven with the Japanese Vice Consul to the vicinity of Waiānae, long considered a possible landing beach. (#)

93. It is also believed likely that when Japanese naval oil tankers used to call at Honolulu (up until 1941), tanker personnel occasionally would be left in Honolulu on specific missions, and would take a later vessel back to Japan. Adequate control of the personnel of such vessels was ever effected here. Tallies made by other Government agencies of the number of persons leaving and going aboard such ships here often would show that more persons had gone ashore than had returned before sailing, but the accuracy of these tallies cannot be positively asserted. A Japanese clerk of the Consulate who had been engaged in espionage activities stated, when interrogated, that he once heard that Japanese tankers would sometimes leave some of their personnel in Honolulu, but he could not state the source of his information. (#)

94. In an effort to "make face" with Japan's officialdom, several local Japanese residents (aliens and citizens) have gratuitously, and in some instances voluntarily, engaged in espionage or propaganda activities beneficial to Japan. The Japanese bookstore owner previously referred to was found to have gathered extensive military information (of dubious value, however). He also willingly obliged a visiting Japanese, since found to have been an espionage agent, by driving the latter to points of military importance on the island of Oahu. On other occasions (1936-1941), in response to requests received while visiting Japan, he sent to Japan large quantities of maps, charts, and hydrographic publications on sale in Honolulu. The full volume of what he transmitted is not known, but his effects show that he sent at least 43 ocean charts, 6 air charts, and 51 maps, as well as several publications. (#) Many other local Japanese residents, over a period of 20 years, voluntarily (and in most cases, proudly) volunteered to drive visiting Japanese naval personnel to points of interest on the various islands at which such personnel called. One Japanese alien resident on Alea Heights, whose home has an unsurpassed view of Pearl Harbor, is known to have been visited on occasions by officers of Japanese naval vessels who called at Honolulu prior to the war. (#)

### (C) Operational methods

#### (1) Collection of information

95 From the facts at hand, it must be said that almost all military and naval information known to have been transmitted from Hawaii to Japan, either through the Consulate or agents sent here on special missions, was gathered by the simple expedient of open observation, without trespassing restricted areas. (See Paragraphs 17-21) In this connection it will be remembered that an analysis of the military and naval data found in the effects of Lieutenant Commander Itaru TACHIBANA, IJN, prior to his expulsion from the United States in the summer of 1941, revealed that about 70% of the national defense information was compiled from public reading material. (#)

96. In only a few instances were Consulate observers known to have used binoculars to observe Pearl Harbor and the [27] Naval Air Station, Kaneohe Bay, and even then, not illegally.

97. In the few cases of trespass to Government reservations and defensive sea areas that were investigated before the war, none were investigated beyond the point necessary to secure a conviction for trespass. It was therefore never established that the trespassers were or were not trespassing incident to espionage activity.

98. Accurate maps and charts of the Hawaiian Islands and adjacent waters long were on sale in downtown Honolulu, and available to any purchaser. Tourist maps showed the approximate location of many military and naval installations. (#)

99. Photographs of many strategic places on Oahu were on sale in Honolulu stores—even panoramic views of Pearl Harbor. (See Paragraph 19.) With the exception of the highly suspicious activity of seven Japanese seen photographing from various points on the shore of Kaneohe Bay, looking toward the Naval Air Station, on November 4, 1941, no outstanding cases of suspicious photographing have been noted. (#) The Kaneohe Bay incident is significant, however, because construction work then in progress at the Naval Air Station could not readily be seen from any point close to the station, the same being on a peninsula. Photographs taken from across the bay, however, would have provided excellent information.

### *(2) Evaluation of information*

100. Since nothing is known of the contents of intelligence reports transmitted to Japan by couriers, it cannot be said whether the information therein was evaluated by the Consulate as to its over-all value, or as to reliability only, nor whether information sent through the Consulate was digested before transmission. However, according to former Consulate clerks, where reports were sent by commercial radio or cable, they were always predigested. Where a newspaper was the source of information transmitted by radio or cable, that fact would be stated.

101. It is believed that in general the Vice Consul was responsible for making close initial evaluation of all intelligence transmitted to Japan. While he rarely made observations himself, it was he who questioned the Consulate staff members who were sent to view ships in Pearl Harbor or to observe vital installations on Oahu or the outlying islands. He also seems to have been the person through whom reports from all available sources filtered, and in one specific [28] case he is reported to have told a secretary that the latter's observations on a certain matter were wrong (presumably basing his conclusion on what he considered better evidence from another source). (#)

102. Considerable information transmitted to Japan was clipped from local newspapers, all of which were personally studied and marked for clipping by the Vice Consul. (#)

103. With regard to facts not of a military or naval nature, but affecting the Japanese residents of Hawaii (and possibly Japan's international relations with the United States), these generally were discussed by the Consul General and the Vice Consul, in consultation with prominent alien Japanese residents who acted as advisors to the Consulate.

### *(3) Transmission of information to Japan*

104. While vessels of the N. Y. K. Line were running regularly through Honolulu (until mid-summer, 1941), much of the Consulate correspondence was transmitted to Japan by diplomatic couriers, who made regular trips between Tokyo and the embassy in Washington, and return. The captains of N. Y. K. liners and of Japanese naval oil tankers also carried pouches from the local Consulate to Japan.

105. However, in 1941, a large volume of commercial radio and cable messages was sent to Japan, most of the messages encrypted. (#) These means of communication were particularly necessary in the fall, when only one ship, which left Honolulu on November 5th, went to Japan.

106. Although there were many amateur radio operators of Japanese ancestry in Honolulu who might have been used for the purpose, there is no evidence that any Consulate traffic ever was sent to Japan through them. (#) Commercial communication facilities being open for that purpose, there was no need to jeopardize a potential source of wartime espionage transmission. Neither is there any evidence, nor was there ever any reason to believe, that the Consulate maintained its own radio transmitter for direct communication with Japan.

[29]

## V. PRESENT JAPANESE ESPIONAGE ACTIVITY IN HAWAII

(A) *Introductory*(1) *Evidence of enemy espionage*

107. In the earlier sections of this analysis, there are set forth certain facts tending to show specific instances of enemy espionage activity. Properly functioning counter-espionage organizations must assume the existence of such enemy activity at the present time, for the contrary cannot be proved.

108. It is believed that there have been sufficient unexplained suspicious activities in the past 16 months to warrant the assumption that Japan is carrying on some form of espionage in the Hawaiian Islands. Assuming that the unidentified craft that have been detected at night close off Oahu and Maui since the outbreak of war were Japanese submarines and were in Hawaiian waters primarily on combat or reconnaissance missions, their presence here for either or both of those purposes alone cannot be reconciled with the fact that they have unnecessarily exposed themselves in waters close to shore—particularly in waters outside fruitful combat and reconnaissance areas. It is tactically unsound for submarines to have operated in many of the areas in which the unidentified craft were detected, except if they were there for some other reason—to pick up agents ashore, receive communications from shore, and the like.

(2) *Espionage activity as affected by the state of diplomacy*

109. It should be mentioned, in passing, that espionage activity must be, and in Hawaii has been, affected by the state of diplomatic relations between the United States and Japan. The three usual states of international relations are:

- (a) Period of normal diplomatic relations.
- (b) Period of ruptured diplomatic relations, or non-diplomacy.
- (c) Period of belligerency.

110. In the recent history of United States-Japanese relations, the period of normal diplomatic relations ended on December 7, 1941. During that period espionage in Hawaii was largely handled through the Consulate, which could [30] expeditiously report its intelligence to Japan in encrypted despatches and by commercial cable and radio.

111. It is believed that the Japanese contemplated that a period of ruptured relations would exist before war was started, and appropriately planned a system of communication to be used in that period. Reference has been made to the signalling system of the Consulate. (See Paragraph 42 (a)). This system was designed and submitted to the Consulate by KUEHN, referred to in Paragraph 90. It is not known whether the signalling system was ever used.

112. The third phase in which an espionage system would have to work is the period of war, in which period all Japanese consulates and Japanese (foreign-owned) business houses, which formerly might have collaborated in the gathering and transmission of intelligence to Japan, would be closed.

113. It is believed that, in all likelihood, the espionage organization which would go into action in wartime would not have been operative as such before the war. At least, it would have maintained no connections with the Consulate or leading alien Japanese business houses, for fear of attracting the attention of counter-espionage agencies. The remainder of this analysis will dwell upon what is believed to be a workable pattern of Japanese wartime espionage in Hawaii.

(B) *Personnel*(1) *Selection of personnel prior to the war*

114. The successful operation of an espionage organization in the Hawaiian Islands in wartime implies a considerable amount of forethought and planning. The key personnel of the system must have been in the Islands, prepared to execute their basic orders under such conditions as might develop.

115. Appendix "C" is a schematic diagram setting forth the various functional units of an espionage organization. It will be noted that the organization is divided into the directive, collection, evaluation, and communication units. Presumably the key men in the Islands when war broke out included the heads of each of these units. In discussing the matter of the probable or possible Japanese espionage organization in the Hawaiian Islands, it is not intended that the use of the singular should imply that it is believed that only one such system might exist. The possibility must always be considered, that there are two or more systems, working [31] jointly or separately.

It is not necessary that all personnel ultimately needed in the organization should have been recruited before the war. In many of its functions, the espionage system will use in the most exposed positions persons recruited from any time, either because of their loyalty to Japan or for their love of money or revenge. It is quite possible that in past years the local Japanese Consulate in Hawaii, through its *toritsuginin* (themselves appointed because of their loyalty to Japan), had established lists of loyal Japanese who could be called upon at any time to aid Japan's cause. (Glichiro UYENO, mentioned in Paragraphs 45-46, may have been a loyal Japanese so selected.)

Also presumably available to the wartime espionage organization would be a list of all persons, Japanese and non-Japanese, who might ever have been recruited by the Consulate in any criminal or subversive capacity. This group should include many persons loyal to Japan, or otherwise disaffected. In addition, such persons are likely to be more valuable because of their prior experience.

#### *Use of personnel used*

Opinion is varied concerning the nationality and race of personnel in the espionage system. The operating premise of counter-espionage agents embraces three conceptions of the possible composition of the Japanese espionage organization, namely, that it uses:

Individuals of Japanese ancestry only; or,

Only non-Japanese; or,

A combination of Japanese and non-Japanese.

Consensus of those who have carefully considered the problem is that the possibility of the last is the most likely.

It is reasonable to assume that Japan would have preferred to have built its wartime espionage organization in Hawaii wholly around Japanese of known loyalty to Japan. However, certain considerations might deter the adoption of such a policy:

Upon the outbreak of war, all Japanese in Hawaii immediately would be under the greatest degree of suspicion.

(b) Japan could not foresee the attitude of United States authorities in Hawaii towards resident Japanese, for the excellent reason that no policy regarding control of resident Japanese was formulated until after war began.

Therefore, Japan had no reasonable assurance that *any* person of Japanese ancestry would retain freedom of movement in wartime. Japan might well have assumed that all persons of Japanese ancestry would be denied access to vital information in wartime, that many such persons (possibly all alien males) would be subjected to that stringent curfew, travel control, and communications restrictions which attach to all such persons, and that mass evacuation or relocation measures might be invoked to remove virtually all Japanese from at least the island of Hawaii.

The foregoing facts were so considered by Japan, she would never have built her espionage organization entirely around a nucleus of Japanese.

On the other hand, Japan may have reasoned that the magnitude of the espionage problem in Hawaii, in terms of sheer numbers (160,000 Japanese residents), was such that the United States authorities would have to allow many Japanese to remain at liberty. If this were the reasoning, one might expect to find that the espionage agents include American-born Nisei, probably expatriated, and have negative records of pro-Japanese activities and positive records of Americanism. They might well be informants of the counter-espionage or law enforcement agencies. They could reasonably expect to be among the last to be evacuated or interned. It is therefore pertinent to observe that the Japanese so described are still at large and are able to carry on their appointed tasks.

Variations of the above two extremes are equally possible. For purposes of security, the vital core of the organization might be composed of non-Japanese. To the extent and effectiveness of United States security and counter-espionage measures became more apparent, the espionage leaders would be able to draw on the loyal Japanese personnel to the extent deemed prudent and necessary. Otherwise, the central unit might be under instructions to use no Japanese.

122. On the other hand, the nucleus of the organization may be composed of Japanese, who will make use of non-Japanese as the need and opportunities arise. This group might even have available a non-Japanese whose function would be to assume direction of the espionage organization in the event the members of the original core are immobilized or rendered ineffective by security or counter-espionage measures.

123. The Japanese already have used individuals of other racial groups to collect information. In Hawaii, during the last few weeks of peaceful relations, the Japanese Consulate General requested KUEHN, an alien, to submit a plan for shore-to-ship signalling. The Farnsworth and Thompson cases may also be cited. A former clerk of the local Consulate, when interrogated, told a story given him by one of the Consulate secretaries, that for years Japan had been purchasing information from a British naval officer stationed in China. (#) Reports from Mainland Naval Districts indicate that the Japanese contemplate using disaffected Negroes for espionage work. It is entirely plausible, then, that the Japanese espionage organization may be using Koreans, Chinese, Filipinos, or members of other racial groups represented in the Territory of Hawaii.

124. A clear distinction must be made between the concept of a Japanese espionage organization which employs non-Japanese, and the concept of a German espionage unit operating here for the benefit of Japan. The existence of the latter type of organization, while possible, is deemed doubtful. Germany has little immediate military interest in Hawaii, and lacking that, it is doubted that it would risk the services of trained German agents to aid a not completely trusted Axis partner. If a German espionage unit is functioning in Hawaii, it probably exists merely as an observational check on information which Japan from time to time undoubtedly supplies Germany regarding military and naval operations centering around or emanating from Hawaii. There is the possibility that German and Italian agents might before the war have recruited personnel for the wartime Japanese espionage organization, and it is known that an Italian courier system was operating across the Pacific, through Honolulu, prior to the closing of the local Italian Consulate in July, 1941.

#### (C) Operations

##### (1) Functional units of the espionage organization

125. Reference to Appendix "C" will show that the functional divisions of the espionage organizations are believed to be four: [34]

- (a) Directive unit;
- (b) Collection unit;
- (c) Evaluation unit;
- (d) Communication unit.

The word "unit" is intended to mean functional, rather than personal, unity of operation, although a single person might in some cases be the entire personnel of one or more units. It is intended to stress the functions of the organization rather than the number of personnel.

##### (a) Directive unit

126. This is the person or section of the organization which directs all operations. It is assumed that well in advance of war, the head of this unit receives explicit instructions as to the nature of information to be gathered in Hawaii. In wartime, the relative importance of different types of intelligence, and the manner in which the same should be reported. The directive unit would be responsible for the entire espionage organization, centralize the authority there, and keep the machine functioning.

127. Probably but not necessarily, the head of the directive unit of the organization would also be directly in charge of the evaluation unit.

##### (b) Collection unit

128. The function of this section is to cull from available sources (see Paragraphs 16-30) such information as is known to be of value to Japan. The director of this unit may confine his activity to collection work alone, or may supervise that in addition to other duties. Conceivably, the directive head of the whole organization might personally direct the collection unit.

129. In all probability, the collection unit was partially organized before the war. In order to be able to best utilize certain sources of information in wartime, previous preparation would have been necessary. For example, to enable ready and constant observation of Pearl Harbor, it would be desirable to have a home on Alea Heights occupied by an agent of [35] the espionage organization. (#) Agents could more readily be "planted" in the Navy Yard, Pearl Harbor, and in other vital areas, and disaffected persons could more readily be developed as sources of "inside" information, before the war than thereafter.

130. The prime requisite of an agent operating for the collection unit is that he have access to the information he desires without creating suspicion.

agents can collect information at their normal places of work or abode; must travel to obtain it. For the latter, unobtrusive mobility is a necessity. While much information of value can be learned in the course of a day's activity in the city of Honolulu proper, regular trips around the island of Oahu undoubtedly would be of great value (and perhaps be considered absolutely necessary by the directive unit). Travel around Oahu during daytime is virtually unrestricted, and the trained observer can readily determine the location of many new plane dispersal points, searchlights, radar stations, machinegun emplacements, and landing fields. For example, the airfield at Kūaloa, Oahu, extends across the around-the-island highway, so private vehicles drive across the runway of the field, and planes land across the highway. Automobiles on the highway are required to drive slowly in this area but are not allowed to stop, unless planes are landing or taking off, when automobiles must stop. Normal driving speed, however, affords ample opportunity on two or three trips, to locate most of the camouflaged revetments, estimate the length of the field, and locate wooded areas in which planes are hidden and being overhauled, and where fuel trucks are parked.

It would also seem likely that observers have been placed on the outside of the Hawaiian group (principally Hawaii, Maui, and Kauai), in order to make available to the head of the espionage organization (presumably on Oahu) military and naval information available on those islands. No censorship of information is transmitted between islands is maintained, and travel of civilians (including Japanese) by air is considerable, so that transmission of the information from outside islands would present no great difficulty. It is possible, though probable, that agents on outside islands would communicate their information directly to Japan. More likely still is the possibility that information may be sent from Oahu to outside islands for re-transmission to Japan.

#### (c) Evaluation unit

This section of the organization probably would contain one or more operatives familiar with military and naval matters. In order to discharge its duties, the evaluation unit would have to be cognizant of the basic functions of the organization as to the type of intelligence required to be obtained from the enemy.

This section would evaluate and digest all information of value to the organization, determine what information should be communicated, and probably the method of its communication—subject to the general supervision of the directive unit.

Where coding of messages is required, the same probably would be handled by this section, and not by the communication unit. This would be in keeping with the principle that, insofar as possible, the workings of the organization and the product of its work be known by as few persons within the organization as possible.

#### Communication unit

The function of the communication section is to transmit information from the Hawaiian area to the enemy, utilizing any or all of the means indicated in paragraphs 42-80, subject to the general supervision of the directive unit. The manner of transmission to be employed in each case will vary with the nature and urgency of the information to be sent, presumably the directive unit would determine what means of communication would be used.

A technical communication section is not required for all types of transmission. While the use of short-wave radio would require technicians, the use of other means might require only an expert cryptographer, who might be a member of the directive or evaluation units. However, there are many amateur radio operators in Honolulu (a large number of them Japanese), from whom could be drawn the necessary technicians for short-wave radio work. Many communications might be released in different ways through a business "front." Since it is believed that the espionage organization exposes itself most in communicating information, it is felt that those most exposed agents are those most likely to be securely insulated from the directive center. The organization should be so constructed that the apprehension of a communication would not lead to exposure of the whole system. Following the usual pattern, the [37] agent farthest from the hub would know no more than the agent from whom he receives his instructions (and preferably not even that). Various ways of effecting liaison between agents who do not know each other have been discovered in the past history of espionage and new

ways may be devised by a directive head having a good imagination and a reasonably good knowledge of prevailing counter-espionage measures in a given locality.

139. In the shore-to-ship sub-unit of the communication section (see Appendix "C") men of known loyalty to Japan, but not necessarily possessed of better than average intelligence, could be used to good advantage. These persons might be denominated "action men," whose only function it would be to conduct blinker tube signalling, or to swim or row to a submarine off shore, or to arrange land or sea caches. These persons would know little or nothing of the rest of the organization; they need not be told the meaning of messages they might be directed to transmit, nor the contents of pouches they might deliver.

140. Perhaps Giichiro UYENO, mentioned in Paragraphs 45-46, was an "action man." Immediately before he was killed, his actions were those of a person who might have been proceeding to a point of vantage from which to conduct visual signalling to a submarine off shore. He was a recluse, living in such a manner and at such a place that suspicion was not likely to be attracted by a person calling upon him to give him instructions with regard to signalling. Had he been captured, rather than killed, he likely would not, and perhaps could not have named the person or persons who had given him instructions.

141. Anticipating that all local stocks of radio equipment might be commandeered for military use in the event of war, or that the purchase of suitable transmitting equipment during wartime would arouse suspicion, the organization certainly would be well supplied beforehand with such equipment, as well as with technicians and operators.

### (2) Use of a business firm as a "front"

142. As previously stated, the espionage organization must employ deception to cover many of its activities. Private individuals cannot, without good reason, engage in the ramified work of the espionage organization without soon inviting suspicion. Therefore, a "front" of some kind for the organization, most likely the use of a business firm is required. It is not assumed, however, that the "front" [38] would have to be a business house.

143. A glance at Appendix "C" shows the many activities that the espionage organization may engage in. The use of a business firm in discharging the communication function is stressed in the diagram, although it is obvious that the same "front" could be used also in the collection of information. For example, deliverymen of many Honolulu firms have access to certain restricted areas on Oahu; salesmen and collectors regularly make the around-the-island road trip in dealing with customers; workmen of all types have regular access to the Honolulu waterfront.

144. The heads of the directive or evaluation units, or both, might be managers of the business "front." Among customers patronizing such business houses might be agents of the espionage organization who call there to meet with the chiefs, either to receive instructions or to report information. Deliverymen and salesmen of the firm could in the normal course of their work contact with members of the espionage organization who never visit the business house.

145. An established business house whose volume of business warranted the same would be in a position to use regular commercial radio advertising as a medium for the transmission of intelligence to the enemy; similarly, overseas telephone calls, radiograms, cables, and mail.

146. An important advantage to be found in the use of a suitable business "front" would be the availability to it of large sums of cash, the procurement of which the ordinary individual in Hawaii at the present time would find most difficult.

### (3) Finances of the espionage organization

147. An espionage organization must have available to it at all times large sums of money for a number of purposes, among which may be mentioned:

- (a) Payment of agents' salaries;
- (b) Maintenance of a business "front";
- (c) Purchase of supplies and equipment;
- (d) Purchase of information.

It will be recalled that the eight Nazi saboteurs captured in [39] the United States in 1942 were supplied with currency amounting to more than \$100,000.00 for their operations.

148. Currency control measures instituted in the Territory of Hawaii since the war began could well have seriously affected the enemy espionage organization.

financial structure. First, the Military Governor ordered that all persons in the Hawaiian Islands should turn in to banks all currency in their possession in excess of \$200.00, and that they might thereafter draw no more than \$200.00 cash a month. Corporations and businesses requiring larger sums of cash on hand were given special licenses. Second, the Treasury Department called in all standard United States currency circulating in the Hawaiian Islands and issued new like currency bearing the word "Hawaii" overprinted thereon. The overprinted currency may not be taken from the Islands and is not legal tender elsewhere. Standard United States currency can no longer be used as legal tender in Hawaii, except when presented by United States Navy personnel arriving from outside the Territory.

149. Since it is difficult to smuggle into Hawaii in quantity money which is legal tender here, telegraphic and draft transfer of credits is the only feasible means of supplying the espionage organization with funds from without. These means afford little opportunity for the transfer of large amounts of money without suspicion, because of the close watch kept on all such transfers by censorship authorities. (#)

150. It is possible that the espionage organization might have foreseen that drastic currency control measures would be put into effect in the Hawaiian Islands in wartime, and to have planned accordingly. This could have been done in some measure by the purchase before the war of readily realizable assets, such as high grade securities and readily marketable real estate.

#### (4) *Instructions from Japan in wartime*

151. The general operating instructions of the enemy espionage organization as formulated prior to the war must have specified definite types of data that should be gathered during wartime and the manner of communicating the same to Japan. However, the course the war might take would affect these matters, necessitating new directives to the organization.

152. Code messages over Radio Tokyo are known to have been among the contemplated means of disseminating information to Japanese consulate abroad, just about the time of the outbreak of war. (#) This is still considered a likely means of [40] communicating with agents in Hawaii.

153. For the transmission of detailed instructions, new operating codes, or the introduction of new outside personnel into the organization, physical contact by enemy submarines with Hawaiian shores is feasible.

[41]

### VI. COUNTER-ESPIONAGE MEASURES IN HAWAII

#### (A) *"Counter-Espionage" defined and distinguished*

154. "Counter-espionage" is that intelligence activity which "has as its objective the denial of information to the enemy," and which "includes the supervision, coordination, and active operation of all investigative measures intended to prevent espionage." (#)

155. Counter-espionage does not include the functions of maintaining internal security, preventing sabotage, detecting seditious or other criminal acts, or isolating disaffected persons. However, agencies charged with the latter functions and the counter-espionage agencies must work in close cooperation and maintain a constant exchange of information regarding subversive trends, persons, and groups.

156. As used in this analysis, "internal security" does not refer to the security of the Naval Establishment, but to the internal security of the Hawaiian Islands generally. The maintenance of such internal security is chiefly a problem of population control, and, from the intelligence viewpoint, is simply a matter of isolating from the general public enemy sympathizers and disaffected persons whose future actions may be detrimental to good public morale or injurious to vital installations. (#) The maintenance of the internal security of the Hawaiian Islands, under martial law, is the responsibility of the Military Governor, but the Navy has a fundamental concern in its maintenance:

"The Navy has a vital and paramount interest in maintaining the internal security of these Islands. This interest arises from the fact that, from a military point of view, the sole function of the Islands is to afford the United States an advanced Naval base." (#)

It must be emphasized, however, that the problems of internal security (that is, population control) and espionage (enemy information-gathering activity) are essentially dissimilar, and must be approached from entirely different angles.

157. The District Intelligence Officer has in the past investigated both espionage and internal security cases in the civilian population. Still a third class of cases which now occupies the greatest portion of the investigative efforts of this office is made up of the so-called "Naval security" cases, which concern the loyalty of Naval personnel and employees and other persons having access to Naval ships, stations, and other areas under Naval jurisdiction.

158. The functions of maintaining internal security or Naval security, preventing sabotage, detecting seditious or other criminal acts, and counter-espionage are not unrelated. It often develops that an espionage investigation will uncover persons whose activities or sympathies are inimical to the United States and its internal security, but do not necessarily involve espionage activities. In the respective cases, prompt dissemination of information is required, so that the officials properly charged with responsibility in the premises may pursue their own courses of action. This avoids having counter-espionage agents doing internal security and police work, and of having internal security and police officials working in the counter-espionage field.

#### (B) Various approaches to the espionage problem

##### (1) Introductory

159. Historically, espionage is a military operation, not a crime. The laws of war have always classed espionage as a permitted military practice, at the same time recognizing the right of nations spied upon to punish individual spies for their gathering or communicating of information to an enemy. (#) However, since the adoption of the Espionage Act of 1917 in the United States, where espionage was for the first time in this country defined as a civil (as distinguished from military) crime, there has been a tendency to class espionage as just another, albeit "glamorous," Federal criminal offense.

160. Because of the popular fallacy that espionage is just a crime, there has seemingly developed another popular (and costly) belief that the way to catch spies is to apply proven crime solution methods in counter-espionage work. This has not been wholly beneficial. While the skilled investigator's services are needed in counter-espionage work, his detective viewpoint (that is, crime solution rather than crime prevention) is a seriously diverting influence. By training, his mission has been to solve a crime that has already been committed. For example, the detective's work is half done when he starts, because at least he knows that a crime has been committed, and he need only find the person or persons responsible. Therefore, as a detective, he thinks in terms of starting an investigation only when evidence of a crime is shown him (that is, when he learns of the *corpus delicti*), usually by means of what he calls a "complaint."

161. But, there is seldom a visible *corpus delicti* of espionage. [43] In their very nature, espionage operations are conceived to be imperceptible if possible, and they rarely leave any evidence of their commission: A photograph taken of a warship leaves no tangible trace on the subject photographed; the irresponsible person who divulges confidential information is not warned when his utterances reach enemy ears; a secret code book is not marred by photostatting. The professional detective, however, attempts to adapt himself to this new field by considering the *suspect himself* as the *corpus delicti*. Thus, he opens a case on the basis of a specific or vague complaint, concerning a known or unknown person who "has been acting suspiciously," "spends too much money," "keeps his ear cocked when there is talk about ships at Pearl Harbor," "owns several cameras and does his own developing," and the like. He cannot appreciate the lesson of experience, that spies, unlike criminals, do not commit espionage the sense that ordinary crimes are committed, nor do they generally "act suspiciously" in the presence of the good citizens who generally are the informants in these cases.

162. In the rare instance where an espionage agent gets his desired information by overt criminal action (for example, by stealing classified matter) there is generally a discernible *corpus delicti*. From that point on, sound police investigation methods can be employed with a normal expectation of success in determining who committed the theft. However, counter-espionage is one incidentally interested in "catching the criminal"—it uses the immediate criminal as a guide to other members of the espionage system, with the thought in mind of eventually uncovering the whole network. Then, and only then, should any thought of prosecution (and its necessary, but undesirable, concomitant publicity) be considered. Here, again, the police detective adopted into the

counter-espionage fold is at a disadvantage, for he has been used to looking for newspaper recognition for his successful solving of cases. The disclosure of these /foreign espionage/ services is the main purpose of counter-espionage work and the most difficult problem which confronts the intelligence agent. Law enforcement or police procedures are entirely inapplicable for this work. Experienced counter-espionage agents have long since learned the futility of attacking espionage services by routine methods of investigation which may have proved successful in ordinary crime detection. . . ." (#)

## (2) The "Suspect" Approach

The "suspect" approach in counter-espionage is that which concerns with the investigation of one or more persons suspected of being espionage agents. For purposes of exposition, these suspects may be divided into classes:

- "Logical" suspects
- "Complaint" or "reported" suspects
- "Developed" suspects

The logical suspects are those persons who, because of the very nature of their occupations, are known or assumed to be engaged in espionage of one kind or another. In this class are diplomatic and consular officials, military and naval attaches, and visiting foreign government officials. Investigation of such persons may be made to determine whether in fact they are engaged in espionage, and, if they are, what other persons in contact with them are likewise engaged.

The reported suspects are those who are investigated on the basis of a specific complaint or report alleging that they are suspicious or subversive. (Paragraph 161) Approaching the espionage problem chiefly through the investigation of reported suspects is costly in effort and largely unproductive. It presents the police detective approach to a non-police problem.

Trying to identify the enemy's espionage organization by this approach generally is successful only if the original report is accurate and has been properly evaluated. Unfortunately, the intelligence offices are deluged with complaints, of which proper evaluation can generally only be made after a long investigation. In practically all such cases, the complaints are found to be groundless. In many cases, the allegations made can be neither proved, disproved, nor explained. The fact that a person is engaged in espionage can only be established in most cases only after intensive and discreet surveillance. Usually, surveillance cannot be used in the investigation of every complaint. The "complaint approach" psychology is fatal to effective counter-espionage, because it causes the investigator to depend mainly upon the incidental bits of information supplied by voluntary informants who are mainly untrained. Trained informants, paid or voluntary, are relatively few. Enemy agents are not likely to create suspicions in the minds of untrained [45] informants, and rarely will they leave themselves open to detection by even the best trained informant.

Because complaints are not likely to be received concerning the vital matters which the counter-espionage services should know, those services will continue to remain ignorant of espionage activity as long as they depend upon waiting for complaints before instituting counter-espionage measures of which investigations are but a part. And, as long as counter-espionage agencies continue to function principally on the "complaint basis," they are easy prey for the enemy espionage agents, who will provide diversions in the form of false reports, ("complaints") to the intelligence services, causing the counter-espionage services to waste a great deal of valuable time. Every investigative man-hour expended on a false "lead" is an additional hour of security for the espionage organization. (#)

What we have chosen to call the "developed" suspects are those persons who have been for all practical purposes established as enemy agents, either through investigation, or by chance. The development of a suspect to the point where he becomes a known enemy agent then presents a situation where further counter-espionage measures may be taken along either the suspect or the functional lines, or both.

## The "Functional" Approach

The functional approach in counter-espionage work is that imaginative approach which, utilizing a full knowledge of all known facts concerning the

*modus operandi* of enemy agents and reasonably estimating the objectives of the enemy's espionage, seeks to detect, counter, and neutralize enemy espionage functions. This approach is essentially a screening operation, the purpose of which is to throw both an observational surveillance and a protective cord around places and things it is believed the enemy agents will try to learn about. It is the same in principle as the putting of cheese in traps to attract and catch rats, thereby saving the tremendous effort of seeking out the rodents individually without having a clear idea of where to find them.

171. The difference between the functional approach and the suspect approach can be illustrated in a simple situation: Assume that on the island of Oahu there is a hill that affords the best possible location for visual signalling from shore to ship. Using the functional approach, a surveillance should be placed around the hill to ascertain what persons, if any, visit the locale either to engage in signalling or for no apparent [46] valid reason. When a like suspect is noted in this manner, further investigation along appropriate lines can be made. On the other hand, using the suspect approach in the same situation, the counter-espionage agents would sit in their offices, not thinking of the hill more than anything else, and await reports from informants concerning unusual occurrences or suspicious persons, some of which reports might possibly involve the hill.

172. Constant patrol or observation—the active seeking of information, distinguished from the passive receiving of it—is another manifestation of the functional approach. Thus, the continuous monitoring work of the Federal Communications Commission radio intelligence units in Hawaii is essentially a functional approach to the problem of detecting enemy transmissions. If the FCC monitors were to take action only upon the receipt of specific reports or complaints of suspicious radio activity—the suspect approach—the situation would be patently absurd.

173. It has been asserted that in discharging its communication function, the espionage organization is most vulnerable. Communications, above everything else, should be attacked vigorously and functionally. It is foolhardy to sit back complacently and await reports from informants who believe they have noticed a suspicious transmission, whether by radio, visual signal, or otherwise. Rather, all avenues of possible communication should be under constant observation. Then, if the enemy agent indulges in communication, he must cross the field of observation, thereby risking detection; and, if he does not attempt communication, the ultimate purpose of counter-espionage has been fulfilled, for no information has been transmitted to the enemy.

#### (C) Responsible Agencies

174. The United States Government agencies which before, or during, the present war were, or are, charged in some way with denying information to the enemy in the Hawaiian Islands are:

- (1) (Military Intelligence Division, Hawaiian Department. (MID))
- (2) Federal Bureau of Investigation, Honolulu Field Division. (FBI)
- (3) District Intelligence Office, Fourteenth Naval District. (DIO)
- [47] (4) Federal Communications Commission, Radio Intelligence Division, Radio Security Center (Hawaiian Monitoring Area). (FCC)
- (5) National Censorship:
  - (a) Postal Censor, District of Hawaii.
  - (b) Cable & Radio Censor, Honolulu.
- (6) Collector of Customs, Honolulu.

The functions of each of these agencies is discussed briefly below:

#### (1) Military Intelligence Division

175. The Assistant Chief of Staff, G-2, Hawaiian Department, is in charge both combat intelligence and domestic intelligence staff functions. Active direction of domestic intelligence activities is delegated to an officer designated as the Contact Officer, whose office is in downtown Honolulu, proximate to all other agencies above named.

176. Until the declaration of martial law in Hawaii on December 7, 1941, the MID had no investigative responsibility in counter-espionage matters except cases wherein the subjects were persons in the Army, employed by the Army, having access to Army reservations. (#) However, upon the outbreak of war, the Army Department Commander assumed the Military Governorship of Hawaii.

MID took over active direction of intelligence work affecting the general population.

7. On February 9, 1942, at Washington, the heads of MID, FBI, and ONI signed a new delimitation agreement, wherein it was provided that in areas under martial law the military commander should be responsible for domestic intelligence coverage. As to Hawaii, the new agreement has been interpreted to mean the Department Commander (Military Governor) is the military commander. The Contact Officer, MID, derives his authority from the Military Governor and is solely responsible for such intelligence coverage.

8. The Contact Officer is in close and frequent consultation with the Special Agent in Charge, FBI, and the District Intelligence Officer. He has a subordinate designated as liaison with FCC for radio intelligence work. In lesser degrees, the Contact Officer is in touch with the work [48] of the District Postal Director and the Cable & Radio Censor, Honolulu.

9. Except in cases of espionage "directed solely against" the Navy and for subversive activities occurring within areas under Naval jurisdiction, or involving Naval personnel or employees or Naval contractors' personnel, the Contact Officer is responsible for counter-espionage planning and coverage in the Hawaiian Islands.

#### *Federal Bureau of Investigation*

1. The Special Agent in Charge heads the Honolulu Field Division, FBI. This field division embraces the Hawaiian Islands and not Honolulu alone.

2. Prior to December 7, 1941, FBI had investigative responsibility in all cases of subversive activity (including espionage) involving the general civilian population.

3. In cases of Japanese subjects, FBI and DIO had concurrent authority and responsibility. FBI supervised the formulation of a list of persons considered dangerous and who should be taken into custody in the event of war. Persons on whom the Attorney General of the United States had authorized the issuance of custodial detention warrants were promptly apprehended on December 7 or as soon thereafter as possible by squads of FBI, MID, and DIO agents, local police. Other persons on whom the Attorney General had not issued such warrants were apprehended under the authority of the Military Governor.

4. Even though the pre-war delimitation agreement (among MID, FBI, and DIO) remained in force until February 9, 1942, on the outbreak of war FBI in effect deferred to MID in the matter of counter-espionage responsibility and jurisdiction because the superimposition of martial law on the Hawaiian Islands effected such a radical change of circumstances as to make the then existing delimitation agreement inapplicable to conditions of martial law.

5. Under the present delimitation agreements, FBI has no responsibility for counter-espionage coverage in the Hawaiian Islands, but does cooperate with MID and the DIO in intelligence matters. However, FBI does in fact conduct investigations of possible espionage suspects, seeking to determine whether or not persons have acted as foreign governmental agents without having been properly registered with the Secretary of State. Even though the investigation of such suspects might also be of counter-espionage concern, the delimitation agreements do not make reference thereto.

#### *(3) District Intelligence Office*

1. The District Intelligence Officer is in charge of this organization and is solely responsible to the Commandant, Fourteenth Naval District, and to the Director of Naval Intelligence. The District Intelligence Office is composed of an office in downtown Honolulu, three zone offices on outlying islands, and ten intelligence units operating within Naval stations on Oahu, Maui, and Midway.

2. Prior to December 7, 1941, the DIO had investigative authority in all counter-espionage matters where the subjects were Navy personnel and employees and Naval contractors' employees, and concurrently with FBI, counter-espionage responsibility in cases of Japanese subjects. Upon the outbreak of war, the DIO deferred to MID, when the Contact Officer took over active direction of intelligence matters concerning the general civilian population. The DIO continued its efforts on Naval security cases, assisting MID insofar as possible in local security matters.

3. Under the new delimitation agreement of February 9, 1942, the Military Governor was charged with intelligence coverage, including the coordination of activities of other agencies with MID. Cognizance over strictly Naval cases has been retained by the the DIO, who has also lent all available assistance to

**MID.** Under a local agreement signed by the Military Governor, District Commander, and the Special Agent in Charge, FBI, on March 27, 1942, there was reserved to the DIO authority over "All matters pertaining to espionage, sabotage, directed solely against such naval units or installations or fleet units and all matters pertaining especially to Fleet and Naval Intelligence, both domestic and beyond the Hawaiian area," as well as cases involving personnel of ships operating at territorial and privately-owned piers. (#)

**(4) Federal Communications Commission**

187. The Radio Intelligence Division of FCC maintains a Radio Security Center (Hawaiian Monitoring Area) in downtown Honolulu. This FCC activity maintains close liaison with MID, as well as with Army and Navy communications offices. Other investigative agencies, including the DIO, refer information concerning suspicious radio activity to FCC.

188. The FCC is actually a counter-espionage organization, for its duties include:

[50] (a) Detection of violations of the Espionage Act, as far as it relates to the use of radio for subversive purposes.

(b) Investigation of complaints and/or other information received alleging illegal and subversive radio activity.

(c) Detection of violations of rules and regulations established by the Director of Censorship relating to the operation of radio stations.

(d) Aiding other agencies of the Federal Government and representatives of the Allied Governments having an interest in operation of radio stations and espionage agents throughout the world as well as other related radio intelligence matters. (#)

**(5) National Censorship**

189. Functioning under the Director of Censorship, in Washington, the National Censorship organization has two main divisions in Hawaii, the Postal Censor and the Cable & Radio Censor. The primary mission of wartime censorship is to deny information to the enemy. Because of this, censorship is primarily a counter-espionage function.

**(a) Postal Censor, District of Hawaii**

190. Censorship of the mails leaving the Territory of Hawaii has existed since December 7, 1941. Such censorship is peripheral only, and does not extend to local or interisland postal carriage.

191. MID, FBI, and the DIO maintain close liaison with the Postal Censor who supplies those and other interested offices with comment sheets concerning postal intercepts deemed to have intelligence value.

192. Postal censorship is not operated under the authority of the Military Governor, nor is it affected by any of the delimitation agreements previously referred to.

**(b) Cable & Radio Censor, Honolulu**

193. Censorship of overseas radio-telephone calls, radiograms, and cablegrams was invoked by the District Intelligence Officer on the morning of December 7, 1941. On March 1, 1942, he was relieved of this censorship function by the Cable & Radio Censor, Honolulu, who is responsible directly to the Director of Censorship, Washington.

194. The Cable & Radio Censor, Honolulu, has supervision over only those communications leaving the Hawaiian Islands through commercial facilities. Inter-island radio-telephone and wireless traffic is censored by a representative of the Department Signal Officer, Hawaiian Department.

**(6) Collector of Customs, Honolulu**

195. Inasmuch as certain of his work is concerned with the enforcement of statutes and executive orders whose purpose is to deny information to the enemy, the Collector of Customs must be included as a counter-espionage officer.

196. In this field, the Collector's principal wartime function is to enforce the Trading with the Enemy Act. He has the right to examine any cargo leaving the United States not under government control, and enforces the requirement that export declarations be filed concerning exports. He is responsible for seeing that persons other than accredited United Nations couriers, entering the United States through the Hawaiian Islands, do not carry on their persons or in their effects censorable matter not previously passed by competent authority.

(D) *Investigation procedure*

*Prior to December 7, 1941*

Prior to the outbreak of war, investigations within their respective spheres of authority were made by FBI, MID, and the DIO of Japanese, Italian, and Communist subjects. Whether the investigations were initiated "espionage" or "internal security" cases was of little import, for the manner in which either type of case was handled was generally the same. Cases were opened on the basis of a "complaint" or specific report, alleging that a person was "acting suspiciously," was "pro-Nazi" or "pro-Japanese," served in the Japanese Army, and the like. The investigative process usually would include some or all of the following steps:

Check files of FBI, MID, DIO, Honolulu Police Department, and credit agencies (in most cases).

Check files of Immigration & Naturalization [52] Service or other government agencies (in appropriate cases).

Interview or re-interview original informant.

Interview subject's employer, business associates, and neighbors.

Check bank accounts.

Consult confidential informants.

Surveillance (rarely).

The type of investigation indulged in was well suited for the purposes of internal security, that is, determining whether certain persons in wartime might be likely to be loyal to, or sympathize with the cause of, or give to, nations at war with the United States. It was not suitable for counter-espionage cases.

In a few instances was the espionage problem in Hawaii attacked from a functional standpoint. This was largely, not not entirely, the fault of the possible local agencies. There was a serious shortage of trained personnel available for counter-espionage work. Inadequately staffed, in numbers, was hard put to investigate all prospective custodial detainees. The devoted a majority of its investigative time to investigation of Naval personnel cases, including applicants for the Naval Intelligence Service, and employees of the Navy and Naval contractors. While there was full cooperation between FBI and the DIO, insofar as assisting one another upon request, there was not close coordination of their work in attacking the Japanese espionage system here.

In the several instances of functional approach to the Japanese espionage problem, FBI and the DIO generally worked jointly. Together, they maintained a partial surveillance of the activities of the Japanese Consulate in Honolulu and the Nippon Yusen Kaisha (N. Y. K. Line), utilizing informants on the spot. FBI's investigation of the activities of the Italian Consul, in Honolulu, the DIO assisted, was similarly conducted, with fruitful results. When the Japanese "evacuation liner," the Taiyo Maru, was in Honolulu, November 1-5, 1941, FBI, the DIO, and Customs closely coordinated their efforts in effecting scrutiny of passengers returning to Hawaii from Japan, in interviewing persons leaving for Japan on the liner, and in maintaining a surveillance of the ship and activities on the nearby docks while the Taiyo Maru was in port. In furtherance of [53] the purpose of this investigation, representations were made to the Postmaster General, in Washington, with the result that he ordered that no mail other than second class newspapers, magazines, etc.) be put aboard the Taiyo Maru for cargo to Japan. (#)

*December 7, 1941, to March 27, 1942*

Almost immediately upon the outbreak of war, the Contact Officer, assumed general direction of intelligence work concerning the general Japanese population, with FBI and DIO assisting. In this period, intelligence agencies devoted almost all their time to the handling of internal security cases, pending persons who had been designated for custodial detention, conducting searches and interrogations, and investigating hundreds of specific complaints and rumors concerning alleged subversive activity.

A joint investigation of the past espionage activities of the Japanese Consulate General was instituted by MID, FBI, and the DIO (and still continuing) in the hope of gaining some indication of what Japan's wartime espionage organization in Hawaii might be like and what personnel it might employ. (#) Information gained in this investigation aided the FBI in its

investigation of Otto KUEHN, and established the latter's connection with Consulate. The product of this joint investigation, added to the facts ascertained by the pre-war partial surveillance of the Consulate, illustrates the value of the functional approach to the espionage problem.

(3) *Since March 27, 1942*

202. After the signing of the local delimitation agreement on March 27, 1942, FBI ceased to investigate internal security and espionage cases as such, but continued to make available to MID and the DIO all information in its files thereafter acquired. The DIO also ceased opening its own internal security cases in the general civilian field and opened about 2,000 security cases on persons of Japanese ancestry employed on Naval projects. DIO Zone Offices have continued to conduct internal security investigations when requested to do so by Army S-2 officers in their respective zones, to the extent of available information and personnel.

203. On the islands of Oahu, Hawaii, Maui, and Kauai, preliminary hearing boards, usually of three men (one each from MID, FBI, and DIO), hear nearly all cases where custodial detention of a person is considered. The function of the boards is to supplement investigations by interrogation, and [54] to advise the appropriate Army authority whether a warrant of detention should be issued. From time to time, in Honolulu, special investigating groups of MID, FBI, and DIO personnel are convened to interrogate persons likely to have important information concerning local Japanese subversive activity.

204. On three occasions, special investigating parties, composed of MID, FBI, and DIO representatives, generally totalling about 20 men, have flown to outer islands to aid resident intelligence personnel in conducting internal security investigations in large volume.

205. Cooperation of the three intelligence agencies in internal security work has been excellent. However, there has been virtually no effective work done in the field of counter-espionage. A small number of the cases investigated during this period (and since the war began) are entitled "espionage," but in few there have been anything other than an "internal security" approach to the problem. In nearly every instance, the emphasis has been on the personalities and their utterances, criminal and credit records, and probable nationalistic sympathies. There have been few cases approached in light of the functional bases of counter-espionage.

(E) *GENERAL CONSIDERATIONS*

(1) *Intelligence personnel*

206. Much of the failure to cope with the espionage problem in Hawaii is in the fact that sufficient trained personnel have not been assigned to this area. MID and DIO offices have grown greatly since December 7, 1941, without many additions of much needed trained counter-espionage agents. The number of trained FBI agents in Hawaii has been reduced during the war.

(2) *Coordination*

207. While there exists close coordination in the field of internal security work because the Army has complete responsibility therefor and either conducts its own investigations or requests DIO Zone Offices to conduct such investigations, the same cannot be said of counter-espionage efforts. This is perhaps attributable to problems presented by the local delimitation agreement of March 27, 1942.

(3) *Shoreline coverage*

208. It is believed that no agency has been paying adequate [55] attention to the coasts of the Hawaiian Islands, insofar as domestic intelligence coverage is concerned, nor is there known to be any plan for such coverage.

209. Insofar as this office has been advised, investigations of suspicious activities near or close off shore have been conducted by trained intelligence personnel in but a few cases. In some instances of reported suspicious activity, which activity might indicate that persons on shore were making contact with the enemy, the immediate investigation has been made by Army field personnel (sometimes working under the S-2 officer), but with no follow-up, detailed investigation by trained investigative personnel. (#)

210. The former Coastal Information Section (B-8) of the DIO functioned under the Commander, Hawaiian Sea Frontier, and has been separated from the DIO since before the outbreak of war. What coastal intelligence work it

has been confined to the operational or combat implications of happenings  
ore.

#### *Travel control*

Civilians entering and leaving the Territory of Hawaii have not been  
t to careful scrutiny, interrogation, or search, nor required to identify  
elves. Until only recently, almost any person not under surveillance could  
the Territory without the knowledge of the intelligence or law enforce-  
agencies.

Several months ago, the DIO established the Naval Travel Control Office  
the Commerce and Travel Section (B-5). The Naval Travel Control Office  
ses all persons leaving the Territory by Pan American Airways clippers,  
ing military and naval personnel of the United Nations travelling under  
orders, diplomats in diplomatic status, and United Nations civilian officials  
ng on official business. The function of the processing office is to make sure  
identity of every commercial air traveller, and to apprise interested official  
es of what individuals are leaving the Territory. It is estimated that  
of the persons whose passage has been validated by the Naval Travel Con-  
fice were of more than nominal interest to the intelligence agencies.

It is anticipated that in the near future, the Military Governor of  
i will promulgate a general order establishing a similar travel control  
whose function it will be to process all travellers leaving the Territory  
(save those exempt because of official status), whether passage is taken  
or surface.

In the past, several violations of censorship have been detected in situa-  
where persons leaving the Territory have carried uncensored censorable  
(principally letters) on their persons or in their effects upon going aboard  
sailing from here. In the discovered cases, however, no indication of  
age activity has appeared, the violations involving personal motives  
(#)

That enemy couriers could with ease enter and leave these Islands, carry-  
al information on their persons or in their effects (or, better still, in their  
, is apparent. It is anticipated, however, that when surface as well as  
vellers are processed before leaving, the risks to couriers will be increased.

#### *Lack of coordination among domestic intelligence, combat intelligence, and operations activities*

Before and during this war the flow of information has been almost  
y from the domestic intelligence agencies to combat intelligence and  
ions activities, with little flowing from the latter to domestic intelligence.  
It is true that combat intelligence and operations offices have the primary  
t in operational data and are vitally interested in the security thereof,  
ot true that they have an exclusive interest in all such information. For  
le, the domestic intelligence agencies are, or should be, greatly concerned  
ll information indicating the presence of enemy units (particularly sub-  
s) close off the Hawaiian Islands.

As previously stated, the presence of an enemy submarine close to  
in an area and at a time inappropriate for combat action or reconnais-  
should be assumed to present a situation wherein the enemy is attempting  
ct contact with agents on shore. The responsibility for destroying or  
ng the enemy craft off shore lies with combat activities; the responsibility  
ecting who are the enemy agents on shore lies with domestic intelligence.  
omestic intelligence will not know that there is a specific instance of  
e enemy contact or signalling which it should investigate, unless the pres-  
ent enemy (or unidentified) units off shore is reported to it.

When there are operational movements in the Hawaiian [57] area  
n importance that enemy observers would be likely to report the same to  
emy—such as the facts concerning arrivals and departures of Naval task  
—the counter-espionage agencies should be made cognizant of such move-

Knowing *what* the enemy agents are likely to be interested in provides  
as to *when* enemy communications may be made. The security of oper-  
would not be endangered by providing counter-espionage agencies with  
pe of information, for it would be desired only in cases where an enemy  
on shore could by simple observation learn it himself. It is reasonable  
uch information should be given to the counter-espionage agencies, other-  
ey will have to go to the absurd extreme of stationing their own observers  
in the same manner that enemy agents do the information concerning  
vements.

[58]

## VII. CONCLUSION

219. The criticism implicit in the foregoing analysis is inescapable. It tended to be wholly constructive. The effect of the criticism is not directed against any one intelligence agency any more than any of the others. There has been excellent cooperation among the agencies, coordination of plans and measures to deal with espionage in Hawaii has not been what it could have been.

220. Whereas this analysis is the result of studies made by one of the intelligence agencies, the District Intelligence Office (Counter Intelligence Section) and is believed to be based upon all available pertinent facts, it is felt that if any, progress can be made until the three principal agencies jointly approach the problem discussed herein. It would be highly desirable to have a group of officers and agents—possibly only one or two from each agency, should be the best suited for the task involved—appointed to study the question of espionage in Hawaii. Such a joint study should enable the representatives to make intelligent and comprehensive recommendations for the improvement of counter-espionage technique and procedure in this area.

221. Unless vigorous, astute and coordinated counter-espionage measures are placed in operation in Hawaii, the primary task of Counter-Intelligence—discovery of information to the enemy—will never be performed.

[A-1]

## APPENDIX "A": SOURCE MATERIAL

This appendix has been prepared chiefly for the benefit of readers in the Department of Naval Intelligence, who may wish to pursue further certain topics mentioned in the foregoing analysis. No attempt has been made to supply disseminate this analysis with copies of all reports and other materials referred to below.

Immediately below are listed, as references, a number of investigation reports and other official correspondence which are cited in support of certain portions of the analysis. Following the list of references are explanations or citations of authority, arranged in the numerical order of paragraphs of the analysis.

## DOCUMENTATION BY PARAGRAPHS

word.—All quotations are from reference (b), Pars. 1215-1216 and 1003.  
 19.—Reference (e); Reference (g); Reference (r); Reference (s), pp. 2-5.  
 erence (dd). The panoramic photograph of Pearl Harbor and ships therein  
 taken by E. J. PARISH, Honolulu photographer, about 1937. An almost  
 cal photograph, taken by PARISH in 1938, is contained in the files of this  
 In 1937 or 1938, before offering such photographs for sale to the public,  
 SH called at the District Intelligence Office to obtain official permission  
 e. At that time, PARISH was told that while the Navy objected to the sale  
 h pictures, there was no law prohibiting such publication.  
 24-25.—Reference (o) presents a case in point, illustrating how a Navy  
 d man was first "pumped" for Naval information, then developed as a  
 of "inside" information, for which he was paid in "loans". KIRKEBY's  
 es were committed in 1936-1937, and he was met by Japanese espionage  
 both in San Francisco and in Los Angeles.  
 32.—For examples of the type of information reported by the Consulate  
 an in 1941 by cable and wireless, see reference (d).  
 Par. 42 a/.—The Consulate signalling system referred to is set forth  
 erence (c), Par. 4.  
 s. 45-46.—A preliminary report of the UYENO case, containing only the  
 s of the shooting but nothing concerning UYENO's possible motives, was  
 ed from the Army Contact Office (M. I. D.), Honolulu, shortly after the  
 nt. The investigating agent recommended further investigation, but a  
 of the files of the Army Contact Office on February 15, 1943, revealed no  
 r reports, and at that time a representative of the District Intelligence  
 was informed that the case was closed. UYENO is subject of reference  
 47.—Informant who furnished the information in the two indented para-  
 s is given reliability "A" by this office. His report was not rendered until  
 months after the events reported. A copy of informant's report was for-  
 d to the Army Contact Office, which returned to the District Intelligence  
 the following comment from another Army activity (not naming it):  
 \* \* \* As to a man swimming ashore and the finding of prints in the sand,  
 ere is no record on this \* \* \*  
 "It is very improbable that the events described in this report could have  
 appened without being recorded at this Headquarters."  
 51.—Reference (q) reports the landing and capture of eight Nazi sabo-  
 n the United States, 1942.  
 52.—Investigation by the Army Contact Office (M. I. D.) of former Japa-  
 sampan fishermen in Hawaii has revealed that many of the fishermen  
 d the United States illegally and are extremely pro-Japanese, but has pro-  
 as yet no specific evidence of espionage activity by such fishermen.  
 60.—See article on frequency modulation: "This New FM", *Naval Insti-  
 roceedings*, February, 1942.  
 63.—The suspicious radio message was intercepted as follows:  
 RAUMIG HINDERUST SINDEN ZURCH REMSCHIED REMSCHIE  
 ZAE MERE MSCHIE ID ----- DECK SEDWIG CGER DECK ORENE

**EL ZELME MELZEN HAFNO ANN EDLMANN ISAR ISAR SETZE UM MEUWEG SIEDEN IN GELS**

Source of above information was Combat Intelligence, 14ND, who reported "This transmitted Sunday A. M. /December 7, 1941/. Apparently local station to local station. Received from Army." A very free translation of understandable parts of the message was also submitted by Combat Intelligence:

Extensive areas have been completely razed . . . . Oriental . . . . Edlmann /proper name/ . . . . Set oil and machinery fires one after another in which many were killed.

*Par. 64.*—FCC writer referred to is Mr. Lee R. Dawson, supervisor, Hawaiian Monitoring Area. Quotations are from Mr. Dawson's letter of January 10, 1942, to Chief of National Defense Operations Section, FCC, subject: Additional Secondary Monitoring Units Needed in the Hawaiian Area. (Copies of this letter were indicated for Commandant, Fourteenth Naval District, and Commander, General, Hawaiian Department.)

Quotation of the Director of the FBI, Mr. J. Edgar Hoover, is from his letter of January 16, 1942, to Hon. James Lawrence Fly, chairman of FCC. (Copies of this letter were sent to G-2, War Department, and ONI, Navy Department.)

*Par. 78.*—The Japanese are known to be using couriers among officers and seamen of merchant vessels plying between United States and South American ports: reference (t).

*Par. 81.*—Reference is to Tamotsu MATSUMURA, interned alien Japanese who was at one time a paid informant of this office. Before coming to Hawaii prior to the first World War, MATSUMURA was in the Japanese over-seas colonization service, being a civil secretary to the governor-general of Formosa. He admits having transmitted information of strategic value, concerning Hawaii, to Japan prior to 1914. In recent years, especially 1937-1940, he was a leading propagandist for Japan in Hawaii.

[A-6] *Par. 83.*—This appears from the admissions of Richard Masaharu KOTOSHIRODO, formerly a clerk at the local Consulate, who visited the islands of Maui, Kauai, and Hawaii in 1941 on espionage missions for the Consulate: reference (g).

*Par. 84.*—See enclosure (A) of reference (d).

*Par. 86.*—From KOTOSHIRODO's admissions: reference (g).

*Par. 88.*—Buddhist priest referred to is subject of reference (u).

*Par. 90.*—Propagandists referred to are Frank VON HEILAND and Rev. Junichiro TAJIMA. Paid informants of the Consulate, among them several Koreans, are discussed in reference (g).

*Par. 91.*—Japanese agent who was in Hawaii in 1932 was Rinzo SHIMOMURA mentioned in references (k) and (l), and Japanese bookstore owner was Eiichi Shigeru MATSUSAKA, subject of those reports.

*Par. 92.*—OKADA is the subject of references (m) and (n).

*Par. 93.*—The Consulate clerk referred to is KOTOSHIRODO.

*Par. 94.*—For a detailed description of the information gathered by MATSUSAKA and transmitted to Japan, see enclosures to reference (k).

The alien on Aiea Heights is Shigeichi TAKAFUJI. A report of the activities of personnel of Japanese Naval vessels while visiting Hawaii before the war is contained in reference (dd).

*Par. 95.*—Report concerning information gathered by TACHIBANA is contained in reference (cc).

*Par. 98.*—When KOTOSHIRODO and Consulate Secretary Tadashi MATSUMURA made observation trips to the outside islands of the Hawaiian group in 1941, they carried with them only the innocuous-looking Hawaii Tourist Bureau cartographic maps. According to Consulate clerks interviewed, the maps and charts used by the Vice Consul in his office were standard U. S. Hydrographic Office and Coast & Geodetic Survey publications.

[A-7] *Par. 99.*—The photographing incident was referred immediately to the Honolulu, but no report of FBI's investigation of this case was written. The driver of the car which carried the seven Japanese has not been interned, but is serving a prison term for violation of a general order of the Military Governor regulating the amount of currency an individual may carry on his person.

*Paras. 101-102.*—KOTOSHIRODO related the information reported in the following paragraphs: see reference (g).

*Par. 105.*—See references (c) and (d).

*Par. 106.*—Army Contact Office, Honolulu, for some time past has been investigating all local Japanese known to have operated radio transmitters in Hawaii.

prior to the war. To date, the DIO has not been informed of any operator who has been found to have used his transmitter for subversive purposes.

*Par. 123.*—Consulate clerk referred to is KOTOSHIRODO.

*Par. 129.*—Japanese aliens still live on Ala Hights and on Pearl City Peninsula (which juts into Pearl Harbor to a point only several hundred yards across open water from a carrier berth).

*Par. 149.*—While considerable amounts of "Hawaiian currency" have turned up in Mainland banks, it is believed that such currency could not be purchased from those banks because of prevailing legal restrictions.

*Par. 152.*—First sentence: source secret, but known to ONI. In this connection, it is interesting to note that the Central Executive Committee of the Kuomintang (Overseas Department) is currently using regular short-wave broadcasts from China for the transmission of instructions in code to Kuomintang representatives in the United States. (See Postal Censorship Records No. SF-8391.)

*Par. 154.*—First quoted clause is from reference (b), *Par. 1005*; second is from ONI-T-8-10, Sec. 21203 (2).

*Par. 156.*—The distinction between the maintenance of internal security and the countering of enemy espionage seems to have been kept clearly in mind in a recent War Department publication: War Department Counter Fifth Column Plan (1942 Revision), promulgated November 2, 1942. Therein, the task of countering the Potential Fifth Column is essentially the task referred to in the foregoing Analysis as the maintenance of internal security in Hawaii. While the Counter Fifth Column plan seems not deemed to be applicable to Hawaii (for the Hawaiian Department commander is not on the distribution list), it is significant that the Plan and its study and improvement are the responsibility of the Provost Marshall General, and not of the Military Intelligence Service. This is a clear recognition of the fact that Counter Fifth Column planning is a police, rather than a counter-espionage function.

Quotation is from "A War-Time Problem, THE JAPANESE IN HAWAII, An Analysis", page 1, by Lt. Comdr. C. H. Coggins, MC, USN, District Intelligence Office, Fourteenth Naval District (April, 1942).

*Par. 159.*—"War cannot be waged without all kinds of information about the forces and the intentions of the enemy, and about the character of the country within the zone of military operations. To obtain the necessary information, it has always been considered lawful to employ spies, and also to make use of the treason of enemy soldiers or private enemy subjects, whether they were bribed, or offered the information voluntarily and gratuitously. Article 24 of the Hague Regulations enacted the old customary rule that the employment of methods necessary to obtain information about the enemy and the country is considered allowable. The fact, however, that these methods are lawful on the part of the belligerent who employs them does not protect from punishment such individuals as are engaged in procuring information. Although a belligerent acts lawfully in employing spies and traitors, the other belligerent, who punishes them, likewise acts lawfully . . ." Oppenheim, INTERNATIONAL LAW, (5th ed., 1935), Vol. II, Sec. 159, p. 337.

*Par. 162.*—Quotation is from ONI-T-8-10, Sec. 23201.

*Par. 168.*—While there is no positive evidence of the fact, it appears that several false reports concerning alleged Japanese espionage in Hawaii were given to the U. S. Naval Attache, at Mexico City, in early 1941. Each report contained some important known facts, around which apparently were spun many false statements. While ONI gave the reports very low reliability rating, the reports were of such a serious nature as to require investigation.

*Par. 176.*—Delimitation Agreement of June 5, 1940, entered into by FBI, MID, and ONI, governed the respective spheres of responsibility of the three agencies in Hawaii until the outbreak of war.

*Par. 186.*—Copy of local agreement of March 27, 1942, was sent to ONI as enclosure to DIO-14ND (IHM/w) Conf. Ltd. (Personal) to Rear Admiral T. S. Wilkinson, USN, dated June 20, 1942.

*Par. 188.*—Statement of FCC duties taken *verbatim* from memorandum of E. K. Jett, Chief Engineer, FCC; to all offices of the FCC Radio Intelligence Division, dated June 3, 1942, subject: Jurisdiction of the Radio Intelligence Division.

*Par. 199.*—Reports on Japanese "evacuation liners": see references (h), (i), and (j).

MEMO FOR THE FILES

Reference: Wilkinson Report, 6 October 1941.

During the past 3 years in North China I had considerable official and semi-official contact with various German firms and their representatives in North China. With reference to the Wilkinson Report of the 6th October 1941, the following information is submitted for what it may be worth.

1. The German merchants in occupied China are given very little preference over other foreign (i. e. American, British, etc.) merchants and their business is being interfered with to practically the same extent by the Japanese military except in such cases as the military directly benefits. The German merchants fully realize they are only being *used* to the advantage of the Japanese and the preference they receive is only on sufferance.

2. The average German definitely detests the Japanese military clique and Japanese businessmen in China and much prefer to do business with the Chinese. They consider their future is with China rather than Japan.

3. In March 1941, one (Willhelm?) Dunsing (official Nazi representative in Northern Shantung) the Chefoo manager for Niggeman & Co., had just been freed by the local Japanese Gendarmerie to sell something like 90,000 bags of (U. S. goods) at a considerable loss; remarked to me, "never mind we (men from Germany) are only playing with them for the time being, we will get even, etc. They will be chased from country (China) and put where they belong. It is all planned". Dunsing then pointed to a map of the world on office wall saying, "here is our first step", drew an arc starting from Germany with the arc passing through the center of the Caspian Sea, and ending in the vicinity of Karachi. Dunsing was extremely angry at this time and while talking intermittently cursing the Japanese in general.

4. I had known DUNSING for about four years and am sure that he was sincerely expressing himself. This same sentiment has been expressed to me by other German merchants in China, and particularly by Helmut Lanz, owner and manager of the Shantung Traders Inc. of Chefoo; Rollo Miss of A. H. Anzures, Chefoo (German Consular Agents); Waldemar Balthaser of Krauch & Co., Shanghai, China, representatives of Deutsche Stickstoffhandels-gesellschaft.

NOTES—COMMENTS

Nov. 5th, 1941

I suggest that the number of German advisors and technicians appearing in these reports is somewhat exaggerated. I have met several of them in (

the past year and up to May of present year—and was given the impression Germany is reluctant to send as many as Japan asks for—also they are directors or mechanics supervising installation of German designed arms machinery, etc., and move about from yard to yard.

T. W. JOYCE.

(written in margin:) this info. too old to be of use—if Jap C. G. has fact will be reptd by U. S. Consuls—or friendly Consuls.

NAVY DEPARTMENT,  
OFFICE OF CHIEF OF NAVAL OPERATIONS,  
OFFICE OF NAVAL INTELLIGENCE,  
Washington, October 14, 1941.

A8-4/EF13 Serial No. 0965916

Director of Naval Intelligence

Commandant, Fourteenth Naval District.

Transmission of Correspondence between British Intelligence Agent in Manila (16th Naval District) and District Intelligence Officer, 14th Naval District. (British Secret Agent in Manila—Information received from)

Re: (a) DIO-14 letter IHM/ba, dated August 22, 1941.

OPNAV dispatch 072049, October, 1941.

OPNAV dispatch 061720, August, 1941.

Paragraph 1 of reference (a), the District Intelligence Officer stated that a secret agent in the Far East suggested that an arrangement be effected for correspondence between him and his Honolulu agent could be carried in locked compartments of the Pan-American Airways clipper between Honolulu and Manila, in return for which accommodation, the British agent in the District would furnish the District Intelligence Officer and the Military Intelligence Division with information of particular interest to the United States Navy and Navy as gathered by him or his agents in the Far East.

Reference (b), the Commander in Chief, Asiatic Fleet and the Commandant, Fourteenth Naval District, were authorized to arrange for the transmission of correspondence between accredited British intelligence officers in the District and in the Fourteenth Naval District by locked compartments or locked compartments of the Pan-American Airways service between Honolulu and Manila whenever and other considerations within the discretion of the Commander in Chief, Asiatic Fleet and of the Commandant, Fourteenth Naval District, render the service practicable.

It is to be understood that this service is not to be considered in exchange for information gathered by the British Intelligence in the Far East and sent to the Commandant, Fourteenth Naval District via clipper for transmission to the District Intelligence Officer. Such transmission is decidedly cumbersome, slow and impracticable. Any such information should be transmitted by the British representatives to representatives of the Commander in Chief, Asiatic Fleet, for his review and further transmission at his discretion. The proper British representatives in Washington have been informed of the foregoing and requested to make arrangements accordingly.

As a matter of interest to the Commandant, Fourteenth Naval District, he is advised that the information contained in enclosure (A) with reference (a) was of importance or of particular interest to the Division of Naval Intelligence, but it was too detailed in its nature, too local in its application and too unsuitable for reception.

It is to be noted that reference (b) cancels reference (c).

(Signed) A. G. KIRK.

#### Indo-China—Japanese Moves In

British Secret Agent, Far East, reports receipt of information to the effect that the Japanese Navy intends to construct a submarine base at CAMRANH BAY. Japanese are reported to be taking steps to completely suppress all pro-Chinese elements in Indo-China, and to encourage Annamite independence movement which would be definitely pro-Japanese and anti-French. It is believed that object of Japanese moves is to create internal domestic trouble in Indo-China, thus providing further excuse for expansive Japanese control.

#### China Blockade—Smuggling

British Secret Agent, Far East, reports: On 28 June, 1941, Asaji FASAHARA, Commanding Officer of the Destroyer ACHI (or ASHI) of the Japanese Thirteenth Destroyer Flotilla, was found guilty of having allowed smuggling in his blockade area and was replaced by his second-in-command. The ACHI was patrolling off Hainan Island at the time. Admiral Seiichi SHIMOMI (or HIIMI), Commanding the Japanese South China Fleet, is suspected by his subordinate officers of being financially interested in the South China smuggling racket.

When Chiu-Ting-Wah, puppet magistrate at Chungahan, was assassinated recently in Macao, it was extensively rumored that SHINOMI's personal demand with the Governor of Macao was brought about by the consideration that CH had previously been working hand in glove with SHINOMI in breaking blockade which the latter himself was responsible for maintaining. FBI MID cognizant.

**Hongkong—Prospective disorders,**No. 148  
(Rating "C")

British Secret Agent, Far East, reports that the Japanese are preparing to create strikes, disturbances, and riots when and if Japan breaks with England. Source stated that puppet officials of the Chungshan area and Japanese agents are being permitted to enter Macao with arms, and that it is through this channel a large quantity of illicit arms are being smuggled into Hongkong. An agent in the employ of FURUKAWA, Chief of Japanese Naval Intelligence at Macao, has been recruiting 100,000 refugee street-sleepers to take part in sabotage and

ance activities in Hongkong on the outbreak of hostilities. A large number of these street-sleepers are already receiving financial assistance from the Japanese. The following Chinese are said to be actively engaged in the foregoing activities in the pay of Japan: JOHN LUI, a senior member of the Shanghai Tai Insurance Co. His headquarters are at 19/20 Connaught Road, West, 3rd floor (next to Ping On Hotel) where he operates as the Chun Kin Firm. He fled Shanghai in July 1941 and was said to be planning a trip to Singapore hereafter. CHENG SAI-HOI, son of the Chief Detective of Amoy, is one of the close associates. TAM KWOK-WA has made many visits recently to Hongkong and is said to be employed by the Special Service Department of Japanese Intelligence at Macao, to act as Liaison between Macao and Hongkong. CHAU KONG TING has been in the employ of the Japanese for the past ten years, operating mainly in the Swatow/Amoy sector. He is believed to be residing in Connaught Road, West (number of house unknown.) FBI, MID cognizant.

ese National Policy.

14ND #1442  
Rating "C"

ish Secret Agent, Far East, reports that a competent British observer has  
ered the following report: "When Itagaki was appointed C-in-C, Korea,  
writer took the view that he is a convinced northern expansion, as opposed  
uthern expansion believer; and that his appointment was therefore to be  
reputed as a precaution against the need for big operations in Manchuria,  
a being the first reserve pool for Manchuria. A technically competent ob-  
r in Hongkong now confirms this view and adds that Ushiroku, formerly  
C, South China, now Chief of Staff at Nanking of the Japanese forces in  
a, is of the same persuasion. He may be counted on not to neglect the  
a, therefore, however tempting the easy gains in the south may be at the  
ent. Renewed reports from Shanghai that observers there expect something  
ppen in Thailand, South China, Indo-China, etc., by a certain date, such  
eptember 15th bear all the earmarks of crude Japanese attempts to wage a  
of nerves on the democracies, doubtless at the request of the senior Axis  
ers. The Japanese in the past have often revealed their long term ob-  
ves, but have very seldom talked about their next move and carried it out,  
cy in that respect being a habit with them." FBI-Hon and G2-HD cog-  
it.

*Confidential*

IHM/

AUGUST 22, 1941.

From: The District Intelligence Officer.  
To: Head of Domestic Intelligence Branch, Office of Naval Intelligence.  
Subject: British Secret Agent in Manila; information received from.  
Reference:

- (a) DIO Conf. Ltr. dated 27 June, 1941 on same subject.
- (b) Opnav despatch same subject.

Enclosure: (A) 14ND Cards Nos. 1345-1348, inclusive, and 1351-1355 inclusive.

1. In reference (a), the District Intelligence Officer outlined the proposal of a Mr. Wilkinson, a British Secret Agent in the Far East, that an arrangement be effected whereby correspondence between him and his Honolulu agent, Mr. Harry Dawson, be carried in the special locked compartments of Pan-American Airways clippers flying between Honolulu and Manila, in return for which accommodation Mr. Wilkinson would furnish the District Intelligence Officer and the Military Intelligence Division with information gathered by himself and his aid in the Far East and of particular interest to the United States Army and Navy. It was proposed that the District Intelligence Officers of the Fourteenth and Sixteenth Naval Districts should make the necessary arrangements with Pan-American Airways.

2. Reference (b) stated that the Department could not authorize the above plan at this time because of the status of the matter and the small amount of information submitted. The District Intelligence Officer informed Mr. Dawson of the Department's decision and has declined to forward any further correspondence from Mr. Dawson to Mr. Wilkinson. However, every clipper from the Orient brings confidential mail from Mr. Wilkinson to Mr. Dawson, forwarded by the District Intelligence Officer, Sixteenth Naval District.

3. By despatch from the District Intelligence Officer, Sixteenth Naval District, the Commandant, Fourteenth Naval District, was informed that Mr. Wilkinson was thoroughly reliable and trustworthy. Investigation in Honolulu disclosed that Mr. Wilkinson is the properly accredited branch manager in Manila for The H. Davies & Co., Ltd., and that his wife is a grand- [2] daughter of the original Mr. Theo. H. Davies. This company is one of the five largest corporations in the Territory of Hawaii and, although incorporated as an Hawaiian corporation, the majority of its stock is held by members of the Davies family who are British subjects and live in England.

4. Mr. Harry Dawson, above mentioned, is manager of the steamship department of Theo. H. Davies & Co., Ltd., Honolulu, a British subject, and British vice-consul for Hawaii.

The District Intelligence Officer considers the information received from Wilkinson to be of value and requests authority by despatch to effectuate arrangement proposed by Mr. Wilkinson.

Information so far received by this office from Mr. Wilkinson has been furnished the Director of Naval Intelligence on Fourteenth Naval District dissemination cards Nos. 1240, 1322-1326 (inclusive), 1333, 1334, 1345-1348 (inclusive), 1351-1355 (inclusive). The last nine cards listed are forwarded herewith closure (A).

I. H. MAYFIELD.

Japanese Industrial Management

British Secret Agent, Far East, reports information on above subject, which is stated verbatim: A. *Controller*. Decides all quantities of all materials required for factory under his control. Controls all purchases of tools, machines, etc. even control development and study of prototype. Decides all promotions, wages in personnel, organization of leisure and adjustment of internal disputes. Supervises allotment of salaries, wages, bonuses. His control is complete and decisions are final. B. *Trained Engineers*. All certificated engineers from Imperial Universities of Tokyo, Kyoto, etc., are earmarked for Naval, military aviation factories. Engineers with certificates from private universities (such as Waseda) may work in other defence industries. Factories which are not working for national defense get no certificated engineers. Numbers are carefully fixed, e. g., Ishikawajima is allowed only 3 Imperial University graduates per annum. System extremely unpopular amongst students. C. *Limitation of Salaries*. Imperial University engineers draw total yearly salary and bonus of 1,170 Yen. Graduates from private university get 1,170 Yen annually. Rises begin after five years service and absolute maximum attainable is 2,000 Yen per annum. D. *Artisans*. Average wages are 50 to 65 sen per hour, with exceptionally good hands getting Yen 1.25 to 1.50 per hour with a working of 4 hours, this works out at higher salaries than that of certificated engineers. E. *Workmen*. Workmen are treated with utmost circumspection but in spite of this work is often held up by absence of whole gangs who are shamming sick and have taken a week or fortnight's holiday. F. *Discipline*. No factory personnel may change factory or branch of work without consent from the controller. Management is a matter of utmost delicacy as personnel is excessively sensitive and will accept no supervision. They are also disinclined to accept any responsibility. G. *Naval and Military Friction*. This extends to an astonishing degree, even in the same article is being made for both services. Files of all drawings are to be produced in two different forms for the Army and Navy. All component parts have to have entirely different names for the Army and Navy with

592 CONGRESSIONAL INVESTIGATION PEARL HARBOR ATTACK

the result that double checking and control service has to be established. distinct trial and reception services have to be established. Wastage involved in this duplication is incalculable. FBI-Hen and G-2HD are cognizant.

CLAUSEN INVESTIGATION EXHIBIT No. 6

*Investigation by Lt. Colonel Henry C. Clausen, JAGD, for the Secretary of War  
Supplementary to Proceedings of the Army Pearl Harbor Board*

The following documents comprise reports, numbered by me 1 through 165, from the British Secret Intelligence Service (Colonel Gerald Wilkinson) at Manila to the Navy, the Army and the FBI at Honolulu, and were obtained from their respective files.

They comprise reports during the period from June to December 1941.

*Urgent cable received from Manila night of Dec. 3, 1941*

We have received considerable intelligence confirming following developments in Indo-China:

- A. 1. Accelerated Japanese preparation of air fields and railways.
2. Arrival since Nov. 10 of additional 100,000 repeat 100,000 troops and considerable quantities fighters, medium bombers, tanks and guns (75 mm).
- B. Estimates of specific quantities have already been telegraphed Washington Nov. 21 by American Military Intelligence here.
- C. Our considered opinion concludes that Japan envisages early hostilities with Britain and U. S. Japan does not repeat not intend to attack Russia at present but will act in South.

You may inform Chiefs of American Military and Navy Intelligence Honolulu.

To: Capt. MAYFIELD  
Mr. SHIVERS  
Col. BICKNELL

Following received indirectly from German source, reported to have good connections in Japan.

A. German ambassador Tokio is concentrating:

1. On breaking down democratic tendencies of Court groups and winning over to pro-Axis views the head of the Japanese fleet who are anxious to avoid conflict with America.

2. On destroying the purely Japanese prejudices which have so far prevented the unification of the anti-Soviet, pro-Axis and Right army groups into a united front.

3. Encouraging higher officers of the KWANGTUNG and Korean armies to adopt an independent policy of action in respect to Far Eastern Soviet Army.

B. German ambassador Tokyo has exercised considerable influence over General SENJURO HAYASHI, Admiral SUETSUZU, Admiral RYOSO NAKAMURA, Colonel HASHIMOTO, and among civilians were SEIGO HAKANO, MITSURU TOYAMA, KENSO ADACHI.

C. "Waverers" at present are General ARAKI and General SUGIYAMA.

D. In Korean and Kwantung forces following are known to be influenced by German ambassador: Lt.-General KIMURA, General ITIGAKI, Major-General MITSUNAMI and Lt.-General TAKAHASHI. These are stated to be quietly at work propagating for a move against Soviet forces in far east on basis that Japan cannot enter into negotiations with either America or U. S. S. R. Government resulting in a guarantee of the INVIOABILITY of Soviet Far Eastern frontiers and, as a consequence of this, provide the possibility whereby Soviet High Command could reinforce the West by withdrawing forces from the East.

Capt. MAYFIELD

----- report October 6th.

A. September 17th 9 repeat 9 twin-engined bombers left Kagi for West (destination not known).

B. September 18th 12 repeat 12 bombers, 3 repeat 3 fighters and 3 repeat 3 unidentified aircraft left TAIHOKU for Swatow.

C. TOSHIYEN (TAKAO) 2 repeat 2 seaplane hangars, each 160 repeat 160 by 50 repeat 50 by 45 repeat 45 feet have been erected. Rails run from hangars to sea wall where a crane is used for transfer of aircraft into sea.

D. A trial coastal reconnaissance unit of 50 repeat 50 reconnaissance and fighter aircraft is being organised in Formosa. Base of operation and particulars under investigation.

E. Paratroop training is still being carried out at KOGO and ROKKO.

F. Conscription and military training in Formosa has now reached the figure of 300,000 repeat 300,000, about one third of these are already receiving active training which will last over a period of four repeat four months.

G. A new fortress is under construction at SHOZAN (mountain overlooking Takao harbour). Due to utmost secrecy it is not yet known if guns are yet in position.

H. A small arms factory is being built at KOCHIYE (— degrees 15 north 120 degrees 32 east) where a new wharf and six new warehouses have been completed. This place is becoming an important port and a number of large merchant ships have called here. A new motor road connects with TAICHU.

I. At KAKENPH, four repeat four new wharves have been completed bringing total to six repeat six. Lengths vary from 130 repeat 130 to 250 repeat 250 feet. Total of warehouses (130 by 50 feet) number ten repeat ten.

OCTOBER 18, 1941.

Capt. MAYFIELD

Mr. R. SHIVERS

Col. BICKNELL

The most important problems for the Chinese Army, Government and Party are the lack of planes, heavy artillery and the maintenance of the goods prices.

The Chinese Government intend to construct a road from Sikang to British India. This road is to begin at Sichang in the province of Sikang, passes through Yungning and Taching in Yunan, Taching and Chayu in Sikang up to Sadiv the terminus of the railway in the province Assam. The length will be about thousand kilometers. The traffic along the Burma-Yunnan road which was originally calculated to be about 3000 tons a month has increased with 7000-10,000 tons a month. At Rangoon and along this road about 200,000 tons are still waiting for transport.

The war Ministry consents to publish gradually the list of killed and wounded men. The estimated loss of the enemy is about two million.

Since the outbreak of war between Germany and Russia the relations between the Kuomintang and Communists are becoming better.

The West road from Ho-erh-kwo-ase near the Chinese Russian frontier to Chungking has a length of 4406 kilometers. The transport along the Burma-Yunnan road is about 15,000 tons a month. The road is repeatedly bombed. The Kungky bridge has been bombed 16 times, the Huitung bridge 6 times, the Changn bridge 5 times. Damage has not been repaired. Now ferry-boats, pontoon bridges and wire ropes are used. In ordinary times traffic goes on, but during the rainy season it will be difficult and traffic will probably have to be stopped.

Value not known.

This data well known.

INDO CHINA—Persecution of Chinese

The Chinese Embassy at Vichy was informed by Chungking that the Saig police have arrested a number of Chinese men and women, some for taking part in a patriotic action, some for being suspected to be communists and others because

they refused to pay their taxes to the enemy. The Ambassador must discuss this question with the French Government and ask them to instruct the Government of Indo-China:

1. To allow respite to those who are behind in paying their taxes.
  2. To liberate the suspected people against whom there is no convincing evidence;
  3. As the people who took part in the patriotic action are most wealthy merchants and as their arrest and the order to expel them from the country have already caused a repercussion in local business, the Ambassador should request to have them released and the order to expel them cancelled.
- Value 1.  
[Hand written:] No value & may be reported by U. S. Consul. Not carded.

To Capt. Mayfield  
Extract No. 167 for Honolulu

14th OCTOBER, 1941.

Informer revisited Sasebo Dockyard in February and reports the following *hearsay* information.

- A. 6,000 ton cruiser was launched in the summer of 1940; and there were then rumours current that her tonnage was, in fact, 10,000 tons.
- B. A new cruiser was laid down about January 1941.  
This is said to be a sister ship of the vessel mentioned in paragraph A above.
- C. A "special type destroyer" is being built here.
- D. Aircraft carrier, formerly reported as completed has now left Sasebo.
- E. A floating dock, described as "the largest and most modern in Japan" has recently been completed here.
- F. In February 1941, 24 repeat 24-hour shifts were being worked and source was told that the yard was mainly employed on refits and repairs.

Capt. Mayfield  
Extract No. 165 for Honolulu

14th OCTOBER, 1941.

[Hand written:] rating C

- A. — confirms construction of naval small craft at the following yards only: URAGA, FUJIMAGATA AND HARIMA.
- B. This is only hearsay, but note that we now have independent reports from three different agents regarding construction at HARIMA yard.
- C. — also quotes a Japanese press report that the destroyer TANIKAZE was launched at HARIMA at end of 1940.  
Comment (There has always been great confusion regarding this particular destroyer.) The old TANIKAZE was still in commission up to 1935; and in 1937 we reported her as still at sea, having been rearmed and reconditioned.
- D. Source was told that destroyers have recently taken 8 repeat 8 months to build from laying down to completion.

To Capt. Mayfield  
Extract No. 163 for Honolulu

14TH OCTOBER, 1941.

----- reports on ENOSHIMA Peninsula, 17 kms. WNW of YOKOHAMA, in July 1941.

- A. 4 oil tanks have been completed here and 8 are under construction, total 12.
- B. 300 repeat 300 labourers are engaged in defence works.
- C. A naval ferry service running from HIRATSUKA to YOKOSUKA calls here.

To Capt. Mayfield  
Extract No. 159 for Honolulu

13TH OCTOBER, 1941.

----- obtained following *hearsay* information on Yokosuka dockyard from 3 entirely independent sources.

First sub source, a Tokyo merchant.

- A. Capital ship, 43,000 tons launched in summer of 1940.
- B. Capital ship, sister ship to above, on slip.

- C. Heavy cruiser, over 10,000 tons, on slip.
  - D. One vessel newly laid down, class unknown.
  - Second sub source*, a Yokohama electrical engineer.
  - E. Capital ship, over 40,000 tons, on slip.
  - F. Heavy cruiser, 15 to 25,000 tons, on slip.
  - Third sub source*, a Tokyo journalist.
  - G. Capital ship, over 40,000 tons, launched June 1940.
  - H. Capital ship, sister ship to above on slip.
  - I. Heavy cruiser, 15,000 tons, on slip.
  - J. *Comment*. All 3 sources seem agreed that there are 2 heavy ships *still* on slips at Yokosuka. (See 14ND card 1824)
- Otherwise, all above information is given with utmost reserve.

To Capt. Mayfield  
Extract No. 158 for Honolulu

13TH OCTOBER, 1941

About 300 workmen from Nagasaki dockyard were employed at Kure from October 1940 to February 1941. ----- following report is based on conversations with these men.

A. The Capital Ship, Nisshin, of over 40,000 repeat 40,000 tons, is now being completed here. *Note*:

*Comment*: Contradiction of agent's previous report that the Nisshin was a 10,000-ton cruiser.

- B. Another Capital ship of over 40,000 tons on slip.
- C. One heavy cruiser of unknown displacement on slips.
- D. One 20,000 repeat 20,000 ton aircraft carrier on slips.

E. Further confirmation of continuous submarine construction, which is now being carried out under supervision of considerable numbers of German technicians, who are constantly to be seen, both in Kure and the surrounding countryside.

F. Although we do not repeat nor regard the above information as accurate, it agrees remarkably closely with that given by the American Intelligence.

11TH OCTOBER, 1941

To Capt. Mayfield  
Extract No. 157 for Honolulu.

----- having revisited Nagasaki in February and received additional information up to May, reports as follows:—

A. *No. 1 Slip*. The Kashiwara Maru (tonnage of 27,700 tons confirmed) and her sister ship Itsuno Maru building at Kawasaki Yard, Kobe, are both being converted for use by the Fleet Air Arm.

*Note*. It is quite uncertain whether these are to be aircraft carriers, seaplane tenders or "aviation transports".

B. *No. 2 Slip*. A liner was laid down after launch of Kasuga Maru (April 1941).

*Told* she was towed to SASEBO on 1st May for conversion to aircraft carrier.

C. *No. 3 Slip*. A 12,000 tons merchant vessel was laid down after launch of Kobe Maru.

D. *No. 4 Slip*. A 12,000 ton merchant vessel was laid down here after launch of Nitta Maru.

*NOTE*. Source was *told* that vessels building on both No. 3 and No. 4 slips had been taken over by the Navy but that up to February 1941 no repeat alterations had been made to constructional plans.

E. *No. 5 Slip*. *Note*. This was formerly mistakenly reported as No. 4 slip. A "new type destroyer" is believed to be under construction here but she has been screened.

F. *No. 6 Slip* (previously reported as No. 5 slip). Capital ship under construction here, was launched on 23rd October, 1940.

Source *saw* this vessel at a great distance in February 1941 and said it did not look like an aircraft carrier, as there was a heavy forward superstructure and a long low superstructure amidships.

Source was *told* that this vessel was towed to Sasebo in February, 1941 for completion.

A new naval vessel (class unknown) is now under construction, and the ship is still screened.

G. 24 repeat 24 hour shifts are now being worked at Nagasaki.

Source was told that Kasuga Maru was not repeat not launched until April 1941 and that she was then towed to Sasebo on the 1st May for conversion to "an aircraft carrier".

See note to paragraph A above.

7TH OCTOBER, 1941.

— reports the following alterations in dispositions of Germans working in Japan.

- A. Kure. 5 working in shell factory, and 4 in shipbuilding yard.
- B. Yokosuka. 18 working in munitions factory, 26 in shipyard, 6 at aerodrome.
- C. No change.
- D. Maizuru. 5 working on A. R. P.

E. No change.

F. Totsuka. 18 aviation and parachute instructors, two constructional neers.

G. Shirahama. 8 working on aerodrome.

H. Nakamita. 10 working at aerodrome.

I. Nagoya. 4 working at Aichi aircraft factory.

J. Himeji. 5 working at chemical warfare factory.

K. 3 Germans, living in Osaka, pay periodic visits to Nankia Heavy Indus Corporation to superintend parachute manufacture.

L. Source was told that 125 Germans, en route for Japan, were detained by U. S. S. R. on outbreak of Russo-German hostilities.

M. Note please we have already reported movement of 30 German persons from Japan to Indo China.

N. Source was further told that there were 11 German aviation and parachute instructors stationed at Nanking, and a total of 84 attached to Japanese forces at Shanghai, Hankow and Nanchang, but this is given with reserve.

*Extract No. 172 for Honolulu*

6TH OCTOBER, 1941

Col. BICKNELL only

Source revisited Shirahama aerodrome and reports as follows.

A. Area has now been extended to 600 by 750 yards repeat 600 by 750 yards.

B. A sea wall is being built along the northern boundary and further constructional work is in progress at the North East corner.

Total of 1,200 labour force are still employed here.

C. Following buildings have now been erected to south of aerodrome:

1 large single storey workshop.

Two storey office.

Five oil tanks.

There are an additional five tanks on two small islands about one mile west of aerodrome.

D. All 10 tanks are described as about 40 feet in diameter and built partly underground with only 4 feet in height projecting above the surface.

E. Parachute training centre. All wounded have now been removed from establishment which is in full occupation by air force personnel and candidates for parachutist numbering in all 3,400.

F. A small proportion of these are attending lectures in fighter tactics, but great majority are undergoing elimination tests before commencing training in para troops.

These candidates include a considerable proportion of men formerly engaged in various technical trades such as plumbers and mechanics.

G. 8 German advisers are attached, two supervising aerodrome construction and six instructing in parachute work and aviation.

H. 50 women are employed in folding parachutes.

Capt. MAYFIELD

2nd OCTOBER, 1941

Following received indirectly from German source, reported to have good connections in Japan.

A. German ambassador Tokio is concentrating:—

1. On breaking down democratic tendencies of Court groups and winning over to pro-Axis views the head of the Japanese fleet who are anxious to avoid conflict with America.

2. On destroying the purely Japanese prejudices which have so far prevented the unification of the anti-Soviet, pro-Axis and Right army groups into a united front.

3. Encouraging higher officers of the KWANTUNG and Korean armies to adopt an independent policy of action in respect to Far Eastern Soviet Army.

B. German ambassador has exercised considerable influence over General SENJURO HAYASHI, Admiral SUETSUZU, Admiral RYOSO NAKAMURA, Colonel HASHIMOTO, and among civilians were SEIGO HAKANO, MITSUHI TOYAMA, KENSO ADACHI.

C. "Waverers" at present are General ARAKI and General SUGIYAMA.

D. In Korean and Kwantung forces following are known to be influenced by German ambassador: Lt-General KIMURA, General ITIGAKI, Major General MITSUNAMI and Lt-General TAKAHASHI. These are stated to be quietly at work propagating for a move against Soviet forces in far east on basis that Japan cannot enter into negotiations with either America or U. S. R. Government resulting in a guarantee of the INVIOABILITY of Soviet Far Eastern frontiers and, as a consequence of this, provide the possibility whereby Soviet High Command could reinforce the West by withdrawing forces from the East.

(Value 3.)

*Extract No. 145 for Honolulu*

A. Source reports that on September 20th he met a certain CHU CHE SHENG, a head of a certain department of the Nanking Ministry of War.

B. Latter stated, appropos of announcement over the radio of sentence passed on a Japanese in Singapore for possession of seditious literature that "not long" General HATA had very secretly approached head of War Ministry, of Nanking, requesting his co-operation in enlistment of Chinese agents for work in Thailand, Burma and Malaya. HATA stipulated that candidates should be either pure *FUKINESE* or *Chinese* speaking dialect of that province.

C. Chiu Che Sheng stated that a certain number of men were recruited and despatched overseas at hands of one CHEN KUANG, returned Japanese educated Chinese. Those chosen, in all cases, and some previous military knowledge gained through service at one time or another with Chinese forces. According to source CHEN KUANG is responsible directly to Japanese military H. Q. at Nanking and to all their authority.

D. Source endeavours to follow up. It is sent merely because Chiu Che Sheng's statements were spontaneous but it is not known if they have any foundation in fact.

(Value 3.)

The following is a report obtained October 1 from an American Shipping Agent from Kobe enroute to San Francisco.

1. He reports about September 10, 800 trucks assembled in the Sports ground Kobe and loaded soldiers. He could not state regiments since no civilians allowed near but he had opportunity to count the trucks. Their destination was supposedly Dairen.

2. Supplies of lub oil and gasoline are stored in valleys at Itozaki near Naval base, off the Inland sea. These valleys are dammed either end with concrete blocks—the whole stored area covered with soil and grass planted. A stevedoring superintendent told him Japanese navy has oil reserves for 2 years.

3. Maruzen Oil Co., Shanghai reported to be still importing gasoline and oil from U. S. which is then transhipped to Japan.

4. In early September a Frenchman from Saigon told him the Japanese were bluffing regarding troop numbers in French Indo China to divert public attention from the huge numbers being sent to the Siberian front via Dairen. The Frenchman estimated Japanese troops in French Indo China were only 35,000.

5. He reports the intense anti-American and British feeling in both Kobe and Yokohama. Every obstacle is put in the way of these nationals trying to complete formalities to leave the country. Both British and Americans have to stand in line in the streets for hours awaiting their applications to local police or prefecture officials examination, only to be told to come again next day. Personal search is made, particularly of British before they leave. One man, a Canadian (CPR Agent) was forced to lower his pants before embarking whilst police examined his body for hidden money.

(Valuation C2.)

**INDO CHINA—AVIATION—LANDING GROUND AT: CAP. ST. JACQUES**

(Cap. St. Jacques Town—107°06 East 10°21 North)

It will be noticed that the centre arm of the "T" has been somewhat extended, and that parts of the old landing Ground have been neglected and short scrub is now growing there.

**Surface.** The ground is reported as not suitable for Heavy Bombers.

Surface is sandy and not liable to flooding.

Source considers that the surface would be firmer after rain than during dry weather.

**Buildings:** Nil.

**Activities:** There is, at present, little activity and the Landing Ground is not being used.

A small Japanese guard is, however, on duty at nights.

(Valuation B 1.)

602 CONGRESSIONAL INVESTIGATION PEARL HARBOR ATTACK

SEPTEMBER 29, 1942

To: Col. BICKNELL  
Mr. SHIVERS

It was reported that Admiral Decoux

A. Expressed his surprise at the many facilities accorded to Japanese in southern Indo China and his intention to put a stop to it. From personal observation in Saigon it was stated that something appears to have been done.

B. Stated that he had given instructions to Press to cease attacks on Britain and U. S. This was confirmed by Editor of "Breton" who states these instructions were given to a Press Meeting on 20th September.

(Value 2.)

*Extract No. 151 for Honolulu*

29th SEPTEMBER, 1942

Capt. MAYFIELD, only

— revisited Kure at beginning of July but was unable to enter dockyard himself owing to increased security measures.

We are of course unable to interrogate his sub source directly and following information is therefore given with reserve.

A. *Job F8.* Construction of upper works has been commenced.

B. *Jobs C. 96 and C. 97.* Vessels are expected to be launched in October completed in January 1942.

C. *German merchant ships.* Two German merchant ships of 6,000 and 4,000 tons respectively were being overhauled and refitted, having arrived from Kure on 2nd June. (Add ¶7 of #152)

([omit] Their structure was said to have deteriorated to such an extent to make them unable to carry the guns for which they had been designed they would therefore be with lighter guns than had originally been intended)

Source was told that these vessels would probably operate as troop transporters under Japanese flag.

D. *Labour force.* Has recently decreased to 6,300 repeat 6,300: this is believed due to shortage of raw materials: and superfluous labour was released for work in rice fields. (Muroshima is a rice growing district.)

One 10 repeat 10-hour shift is being worked on all shipbuilding jobs.

E. *New shell factory.* Labour force has been increased to 2,400 repeat 2,400 working in three shifts.

F. *German technicians.* Five repeat five are attached to shell factory four to shipyard.

(Rate C.)

To: Col. BICKNELL  
Mr. SHIVERS

29th SEPTEMBER, 1942

It was reported that—

A. The better class Annamites are pro French and anti Japanese and will join Pan Asiatic League the Japanese are forming. The Japanese are obtaining recruits for this League from the unemployed clerk class and from hired car drivers who are employed by them.

B. The Chinese more than any other community are inclined to cooperate with Japanese especially when their pockets gain.

C. There is talk of the formation of a Buddhist League.

Capt. MAYFIELD, only

----- revisited Malzuru dockyard at end of June and reports as follows:

A. *Pocket battleship afloat, "KISHU."* Vessel is still berthed near the slip from which she was launched.

Source was told that although the (rate D) Naval authorities were not repeat not satisfied with her performance, improvements could only be effected by extensive reconstruction. The authorities have decided not repeat not to undertake this, and vessel would therefore shortly join the sea-going fleet.

B. *Pocket battleship on slip.* Work still suspended.

C. *Two small vessels on slips.* Work still suspended, and hulls appear to have been put in a state of preservation, painted black and covered with canvas.

D. *Job H.1.*

*Forward Superstructure:* 6 storeys have now been completed and source was told there were to be 11 in all.

*Midship superstructure.* A row of steel girders has been erected on the after section. The section adjacent to the after superstructure has been increased in height, and what appears to be the stump of a mainmast is now visible.

*Aircraft hangar.* Source was told that the low structure immediately aft of the forward superstructure was to be the aircraft hangar.

Note. Source has previously reported that this ship was identical with "Job 45" at Yokosuka, and this resemblance appears to be growing.

E. *Job V.6.*

*Forward superstructure.* 7 storeys are now completed and work has commenced on the 8th.

Source was told this superstructure would also have 11 storeys.

F. (Rate D.) Source was told that launching of both these vessels had been delayed until December, but that it was expected to complete them by April. He volunteered the explanation that the short period required for completion was made possible by the advanced state of construction before launching.

He was also told that the difference at present to be seen between these two ships would disappear when they were completed.

G. 10 repeat 10-hour shifts were being worked on both ships.

H. (Rate D.) *2 new destroyers projected.* Source was told that, although blue print plans for these vessels had arrived in the yard, work had not repeat not commenced, due to the inability of Yawata Iron Works to supply constructional steel.

He was told that at lease one of the destroyers would be built in dry-dock.

I. 4 repeat 4 submarines (2 identified as I.57 and I.64) were in harbour.

J. Labour force in shipyard was reduced to 5,300 repeat 5,300 during June. About 7,000 repeat 7,000 Korean labourers are engaged in defence works outside the dockyards.

K. A. R. P.

Source was told that 5 Germans were supervising A. R. P. organization.

He said 4 large cases of sound locators arrive by train.

He was told that all important archives had been shifted from this dockyard, in anticipation of bombing attacks in the event of war with Russia.

**Extract No. 152 for Honolulu**

25th SEPTEMBER, 1941.

**JAPAN NAVAL KURE DOCKYARD**

Capt. MAYFIELD, only

*Increased Security Measures*

1. Source was unable to visit the dockyard in person, owing to increased security measures, and all the following information has been secured from a contact who had access to the yard. This sub-source has not been interrogated; his information is therefore given with reserve.

2. At the end of May a new permit for entry into the dockyard was issued; several arrests were made of unauthorized persons in the vicinity of the yard.

3. This was partially due to the increased troop movements from Ujina. Source reports on dockyard at the beginning of July:—

*Job F. 8*

4. Work was progressing on the upperworks.

2 DESTROYERS. C.96 and C.97

5. Vessels expected to be launched in October and completed in January

*German merchant ships*

6. Two German vessels, 6,000 and 4,000 tons respectively, arrived in the bay on 2nd June from Kobe for overhaul and refitting, and were still here at the beginning of July.

No card—reported in #151

add to #151

7. It was found that the ships were in poor condition. They are therefore more lightly armed than originally planned.

8. Sub-source was told that these vessels, on completion of refitting, will operate as transports under the Japanese flag.

NOTE: This last item is given with the utmost reserve.

*Labour force.*

9. Decreased to 6,300.

10. One 10-hour shift is worked on all shipbuilding jobs.

11. Decrease in labour force has been due to shortage of raw materials; superfluous labour has been released for work in the ricefields. (Miroshino a rice growing district).

*Shell factory*

12. Labour force increased to 2,400 working in 3 shifts.

GERMAN TECHNICIANS. 5 are attached to shell factory, 4 to shipyard.

*Extract No. 146 for Honolulu*

Capt. MAYFIELD, only

25th SEPTEMBER, 1941

A. Our telegram of 24th September, paragraph C. suggests that the vessel launched is the pocket battleship which we have previously reported as built at Yokosuka, but regarding which no further information was obtainable on her last trip.

B. Please note this is only conjecture, and we have no repeat no definite evidence to support it.

To: Col. Bicknell  
Capt. MAYFIELD

SEPTEMBER 25, 1941

---- reports.

A. 2 new types of Japanese heavy bombers have recently appeared in N. China. They are described as "type 98 and type 99 Naval."

B. Only specifications available and which apply to both types are:

Duration of flight, when not repeat not carrying maximum load, 10 repeat hours.

Speed not repeat not more than 250 miles repeat 250 miles per hour.

Service ceiling 35,000 repeat 35,000 feet.

C. The Hitachi aircraft works and the Ikegai Iron works are both producing German Jumo Junkers aero engines.

Combined output of these two works is 40 to 50 Jumo aero engines per month.

NOTE: Both these factories are located in town of Kawasaki which is midway between Tokyo and Yokohama and should not repeat not be confused with factories at Kobe.

D. Air force connections have recently been replaced by new men: this information is therefore not repeat not as reliable as that formerly obtained from same source and should be accepted with reserve pending confirmation.

*Extract No. 133 for Honolulu*

24th SEPTEMBER, 1941.

Capt. MAYFIELD only

A. ---- revisited Yokosuka dockyard at beginning of June but, owing to greatly increased security measures was unable to walk about the yard as on previous occasions.

B. He was obliged to remain in the waiting room in the administrative building, but was able to see the two large ships, jobs A45 and F15, both of which were still on the slips.

C. Note please that this contradicts reports by ----- that one heavy ship was launched here in the Spring; but discrepancy can be explained, if his statement in report under reference that three heavy ships are building here is correct.

D. *Job A45.* Main alternation of appearance is in forward superstructure where 7th storey has been completed, 8th storey has been added and 9th storey has been begun.

Source was told that there were to be 11 repeat 11 storeys in all, a fire control top being the 11th.

Source was also told that the aircraft hangar was situated in the low structure immediately aft of the forward superstructure.

Source was also told that this ship was due to be launched in October repeat October and to be completed in April, 1942. *Note.* Very short time for completion may be explained by the unusually advanced condition in which this ship is apparently being launched.

E. *Job F15.* Forward superstructure. 6th storey has been completed and work has commenced on a 7th storey which is built in at the after end.

Source was informed, but not repeat not definitely, that launch would take place about the same time as capital ships.

F. 24 repeat 24 hour shifts are still being worked on both these vessels.

G. Source was told that there was a total of 26 German technical advisers in the ship building department of which 4 were supervising the fitting out of these two vessels, particularly as regards the following points.

1. Mounting of new type of anti-aircraft gun.
2. Construction of fire control tower.
3. Improved method of catapulting aircraft.

H. *Destroyers.* Source was told that work on the two destroyers under construction here had been held up by shortage of steel produced by the Yawata Iron Works.

Source was told that 4 submarines and one transport were being refitted here in June.

J. *Labour force.* Total labour force in shipyard estimated at 8,800 repeat 8,800.

K. *A. R. P.* Source saw 9 air raid shelters near the main offices: constructed of concrete and estimated to be 120 feet by 60 feet by 11 feet high, of which 4 feet was below ground level.

*Extract No. 173 for Honolulu*

Only to BICKNELL

24th SEPTEMBER 1941.

INDO CHINA AVIATION LANDING GROUNDS

The following are less important Landing Grounds in South Indo China, but worthy of mention:

1. BARIA (107 11 East 10 31 North) 245 x 300 metres.
2. HON QUAN (106 36 East 11 37 North) 600 x 130 metres.
3. LONG THANH (108 17 East 11 7 North) 400 x 180 metres.
4. NUI BARA—500 x 350 metres.
5. TRANG BANG (106 22 East 11 1 North) 400 x 400 metres
6. VIN CHAU (105 54 East 10 10 North) 580 x 270 metres.
7. VO DAT (107 36 East 11 14 North) 600 x 750 metres.
8. SOCTRANG (105 31 East 9 32 North) 510 x 250 metres.

Of the above the following is known :

No. 5. Cannot be enlarged owing to nature of surrounding country.

No. 7. Of earth and grass surface. Liable to flooding during rains.

No. 8 SOCTRANG. Situated 2 kins to the SW of SOCTRANG on the road to BAI XAU. Ideal for enlargement as it is surrounded by flat land. Japanese have purchased the surrounding land and intend to enlarge and build an important aerodeome there.

Valuation B. 2

23rd SEPTEMBER, 1941.

JAPAN NAVAL MAIZURU DOCKYARD

orce revisited Maizuru dockyard at the end of June and reports as follows:

**POCKET BATTLESHIP AFLOAT—"AISHU"**

This vessel was seen berthed near the slip from which she was launched.  
 No work was going on, but source saw the large crane had been moved  
 er.

He was told that it was expected that this vessel would soon be sent to  
 be fleet, although the (Naval Authorities were not satisfied with her. This  
 because improvements could only be made by extensive reconstruction,  
 could not be authorized.)

**POCKET BATTLESHIP ON SLIP**

Work was still suspended on this vessel.

**TWO SMALL VESSELS ON SLIPS**

No further work on these vessels.

Entire keels have been covered with canvas, and painted black. Source  
 old that this was to preserve the steel.

**OB "H. I."**

ard Superstructure:

Six storeys have been completed and work has begun on the seventh.

Source was told that there were going to be eleven storeys in all.

RE.—This agrees with what he was told concerning the A.45 at Yokosuka.

hips Superstructure:

A row of steel bars has been put up in the after section.

The section adacent to the aft superstructure has been increased in height,  
 post or mainmast is visible.

aft hangar

Source was told that the low structure immediately aft of the forward  
 structure was the aircraft hangar.

**JOB V. 6.**

ard Superstructure

even storeys now completed and work has commenced on the eighth.

Source was told that this vessel, also, was to have eleven storeys.

and V. 6 GENERAL

Source was told that launch of both these vessels had been delayed until  
 umber, but that it was expected to complete them by April, this brief period  
 completion will be made possible by the advance state of construction before  
 ching.

In conversation with dockyard employee, source commented on dissiml-  
 y of forward superstructure on these two vessels, and on that of the A. 45 at  
 suka. He was told that on completion these differences would disappear.  
 10-hour shifts were worked on these vessels.

**PROPOSED TWO NEW DESTROYERS.**

Although the plans of these vessels had arrived at the yard, work had not  
 menced, owing to the inability of the Yawata Iron Works to supply steel.

18. Source was told that at least one of the destroyers would be built in dock.

(G). MISCELLANEOUS.

*Vessels refitting.*

19. Four submarines were seen moored in the harbour, two of which were to be I. 57 and I. 64.

20. One large armed trawler was seen in dry dock.

*Labour Force:*

21. This was reduced to 5,300 repeat 5,300 in the shipyard in June.

22. About 7,000 Korean labourers are engaged in the preparation of docks works outside the dock yard.

**MILITARY POLICE:**

23. A unit of 35 gendarmes is stationed in the dockyard.

**A. R. P.**

24. Source was told that five Germans were attached to assist in A. R. P. matters.

25. At the end of June, source saw four large cases of sound locators by train.

26. He was told that important documents had been shifted from the dock in anticipation of war with Russia. Should this occur, it is expected that Maizura will be bombed.

SEPTEMBER 23RD, 1941

*Extract No. 99 for Honolulu*

-----reports September 5th, Hainan Island.

A. Among instructions issued by General TERAUCHI SHOICHI (DQU COM AAB) to forces in this area were:

1. Black out exercises to commence from September 10th.

2. To complete by end of October the construction of 5 repeat 5 small factories. They are under direction of engineer Colonel HARAKAMI AAG).

B. Following are principal Intelligence Agents appointed at:—

Hainan Island, SANO (AFQ TAK).

Indo-China, TSUKADA (CIG JYS).

Canton, YOSHIMOTO TAIGIRO (BAD GOK CQU MAY SQU).

C. August 24th 500 repeat 500 cases of bombs, 1,200 repeat 1,200 cases of shells and 300 repeat 300 cases of aircraft spares landed at YU LIN KAN Japan.

SEPTEMBER 23RD, 1941

*Extract No. 100 for Honolulu*

D. August 25th 22 repeat 22 twin engine bombers, commanded by C. MORIYAMA (H DU DYA) arrived at KIUNG SHAN aerodrome from Foshan (stated to be dive bombers but this is to be accepted with reserve and is being questioned on this type).

E. According to air force gossip it has been decided that with the advent of the foggy season at Chung-King aircraft at Hankow will be transferred to the southern area and that after September 500 repeat 500 bombers are based in Indo-China.

To Col. Bicknell, Mr. Shivers

*Extract No. 136 for Honolulu*

23RD SEPTEMBER, 1941

JAPANESE DAILY NOTES, YAMAMOTO GORO, VISA REFUSED

September 6th, 1941—YAMAMOTO Goro, member of the Mitsubishi Kaisha applied for a visa at the Netherlands consulate general at Batavia. He has been in the Netherlands Indies from February 19, 1940, till June 1941, as a representative of the aforesaid firm, but travelled over West Middle Java with YOSHIDA Toshio, naval officer and Major FUKUDA N.

medical officer. He now explains that his former stay at Java was connected with the audit of the accounts of the Mitsubishi concern (Batavia and Soerabang branches). However he never applied for a labour permit. There is no sufficient reason now for a renewed audit of the accounts after 4 years, visa was recommended for refusal.

Situation 1.

to Col. Bicknell

*Extract No. 134 for Honolulu*

20TH SEPTEMBER, 1941.

#### JAPANESE TROOPS IN INDO-CHINA

Partial confirmation as to presence of puppet troops in *Indo-China* is afforded from Free French sources, who put their proportion of total very much higher, i. e. 40 repeat 40 per cent Chinese and 10 repeat 10 per cent Manchukuo Korean.

Our opinion (based on experience in Formosa, Hainan and South China) that proportion of puppet troops to Japanese is always greatly exaggerated has very seldom proved to be more than 20 repeat 20 per cent.

Col. Bicknell, Mr. Shivers

SEPTEMBER 19, 1941.

#### *Survey of the Political Situation in Japan* *Excellent survey for Sept. 19*

According to a well-informed Japanese, the army as well as about fifty ultranationalistic, pan-Asiatic organizations brought heavy pressure upon the Japanese government and the Navy in order to attack the oil tankers from America Vladivostokward. The Navy refused positively, maintaining that it was up to her to force Japan's national policy, being however prepared to carry out the policy decided by the Emperor with all its might.

The Japanese Navy seems as yet to be opposed to provoke America and is determined to be no match for the combined America-Allied Forces in the Pacific.

The army is firmly determined to continue to assist Germany in accordance with the Tripartite Pact by binding the Allied Forces in South-East Asia through occupation of Indo-China, which country Vichy handed over to the Japanese in the order of Hitler and through concentration of big military forces (about 1 million) at the Manchukuo frontier in order to lighten the pressure on Germany's East front.

The army was absolutely convinced that the Russian resistance would be annihilated, being much impressed by the reports of the Japanese military mission to Germany under Lt. General MATSUSHIMA. The army therefore expected soon to be able to occupy Siberia and the Maritime Provinces.

The army authorities and the majority of the Japanese people however do not fully realize that a quick destruction of Russia's army cannot be counted on with the result that the army is holding back for the present.

The recent speech of General Baron Sadao ARAKI concerning the necessity of national unity against the threatening danger from abroad, really has the effect of opinion between the army and navy about Japan's immediate policy as background.

Minister Sankichi TAKAHASHI, Cabinet-adviser and one of the most powerful Japanese leaders, published recently an article in which he doubted whether Germany will win the war and which should be considered as a hint, that the conclusion of the Tripartite Pact was a blunder.

The dispute between Army and Navy is supposed to have strengthened the position of KONOR and the entourage of the Emperor, giving the present situation a chance to maintain itself and to withhold the army from bringing about an armed conflict.

However, all this by no means implicates that Japan directly will turn its back on Hitler, nor will Japan be inclined to negotiate about the withdrawal of troops from Indo-China. This is considered impossible, firstly in view of the fact that the Axis-Pact was announced by Imperial Decree and secondly in view of the vital importance of the stranglehold on Indo-China by Japan, economically and strategically.

Another question to be reckoned with is the mission to Indo-China of Ambassador YOSHIZANA and his suite of Army, Navy, and other officials, who actually prepared Yoshizawa's appointment to Governor-General of Indo-China.

SEPTEMBER 18, 1941

To: Capt. Mayfield, Col. Bicknell, Mr. Shivers

It is reported on 7th September, that.

A. Japanese Consul General Batavia stated that Japanese Government intended to attach the courier NOMOTO TATSUO to the Consulate for two months after his return from Singapore.

B. Consul General ISHIZAWA stated that N. is cipher expert attached to the Consulate with instructions on use of the new complicated Japanese code.

C. N. told Immigration authorities that he would hold conferences at various Japanese Consulates and would serve as a temporary cashier at Consulate General Batavia.

D. It was stated KAWASAKI YOSHIZAKI, who sailed from Japan on 14th September, was registered as a secretary to Consulate General but was in reality a code expert in service of Japanese Navy.

SEPTEMBER 17, 1941

To: Col. BICKNELL  
Mr. SHIVERS

It was reported on September 14 that General WU YI PING, who returned to that day from Tokio after a special visit on behalf of Nanking Government, stated:—

A. KONOYE Cabinet was experiencing much difficulty as a result of increasing criticism from extreme right-wing elements who were secretly demanding drastic measures to be taken to conceal Japan's position in the TIEH YO.

B. If it was true Premier had strengthened his position by obtaining support of the so-called "court groups" it was doubtful if this support was powerful enough to keep despotism of Rightists in full check. Main argument of the latter is that Japan, in order to gain any real results from conversations with American democracies in general, will have to make definite concessions, not only in China and Far East questions in general, but most probably in connection with her future relations to Axis.

C. Equally the Government understands that such concessions (particularly in relation to the China incident, which was started by the Army extremists) will lead to open insubordination of extreme Right groups and adoption of a protective policy by them, either in north or south, which will finally identify Japan's fate with that of Germany.

D. Cabinet's policy is therefore to drag out conversations with America to the utmost possible limit and to profit by any easing in the Far East situation which strengthens its own position.

E. Cabinet is also exercised as to the final effects of British and American economic policy and while it is putting on a bold front at present it realizes that the Japanese people are becoming anxious as to the future. This anxiety has been further increased by the inability of Germany to force a quick decision against Russia and thus help to remove the menace of the Soviet forces in the Far East.

SEPT. 17, 1941

July 18, 1941

From censorship we learned that an AGARIE Saburo at Pelew (writing as a fisherman at Ambon) employed by the Japanese Navy Ministry "gathered stones."

"as you know" thus he writes further to his friend, "there are starting this 100 persons enlisted yearly as "celestial storming troops" destined for the Netherlands Indies. Although I should like to take part in it, I abandoned this as I earn monthly 200 and 300 yen."

It is very remarkable that some time ago a similar letter concerning the train- on the Island of Yap of storm troops destined for the Netherlands East Indies came to our attention.

19, 1941

Reference S. B. Japanese Notes from 9th July 1941, concerning KOSUGI Inori, director of Ishihara Sanyokoshi, who wished to make a tour of inspection of the I. S. K. Mines in Jahore and Trankanu.

On this person, formerly managing director of Nanyo Koshtsu Kaisha at New Guinea, entrance was refused to this country because of his devising plans to attack this country, as was revealed from his writing during a home search at the I. S. K. office at Nanokwari. According to him the Nanyo Kobatsu Kaisha is an outpost of the Japanese southward move, and his employees were the stormtroops. In connection with the discovery of this compromising correspondence he was dismissed by his company just as was (for the same reason) IWOUE, former administrator.

It is not without interest that this arduous southward expansionist now enters the service of the notorious Ishihara!

Reported to Col. Bicknell

11th SEPTEMBER, 1941.

JAPAN—ECONOMIC—EFFECT OF ALLIED PRESSURE ON JAPAN IN N. E. I.

Concerning the economic pressure on Japan the following can be remarked. IMAGAWA Yoshitochi, Director of the Yokohama Specie Bank, Batavia, is rumoured to have said that the economic retaliatory measures taken by England, America and the Netherland East Indies were a heavy blow for Japan's economic position, but, in view of the good relations with Thailand, Indo-China, Manchuria and occupied China, Japan would quickly recover from it.

The difficult point was always and would remain whether the oil supplies would be stopped or not. The Japanese ambassadors in America and England had received instructions to do their utmost to prevent the stopping of these supplies. In the other case Japan would not hesitate but immediately take the necessary steps to occupy Borneo.

In the latter case (provided the Japan Japs had not attacked the other islands) England and America would only protest and not intervene).

According to a report from Soerabaja some big Japanese firms as for instance the Naayo Veem (Southern Godown Company) dismissed already members of their staff. In view of a report in Japanese newspaper the Japanese Consul at Soerabaja wrote this newspaper that the Japanese banks and firms did not intend to close down following the Netherlands economic measures. A similar letter he addressed to the head of the local Government of Soerabaja.

## NETHERLANDS EAST INDIES AND SOUTH SEAS

## JAPANESE ESPIONAGE TRAINING.

From censorship we learned that MURAKAMI Shogo, employee of the Tjijoda Department Store, Soerabaja, in possession of a temporary residence permit dated 8.4.34, No. 434, being on furlough in Japan, follows a course at school of great importance for the National Policy" where he received lessons from officers of the Army and Navy, and from officials of the Ministry of Overseas affairs.

The name of the School he indicates as "XXX Institute, the teachers are marked in the same way XXX officers of the Army etc.,

Undoubtedly the School in question is one of the "Southward Expansion" schools where Japanese colonists are trained for their future task of propaganda and espionage.

Moreover Murakami is a great admirer of the German "Kultur", as we in February already learned from censorship. He has made a study of the German language and intended to go to Germany.

In connection with the above his temporary residence permit was cancelled by Government Order as he is considered dangerous for public peace and order.

9TH SEPTEMBER, 1941.

## N. E. I. JAPANESE ACTIVITIES AND APPLICATIONS FOR VISAS

ARAKI Keijiro, managing director of Toyo Bosuifu Manufacturing Co. applied for a visa at the Netherlands Consulate-General, Tokio. He intends to stay here for 3 months to inspect a rubber factory now under construction at Soerabaya following up his visit to this country in December in connection with the erection of a factory of waterproof cloth at Soerabaya. Although this matter is still under consideration and for this purpose MASHIBA Tetsuo, a proxy of this firm, is already in this country, it was advised to grant the visa under condition however that the duration of his stay is limited.

SHIGITA KENZO, exporter of automobile parts, accessories, etc. applied for a visa at the Netherlands Consulate-General, Shanghai. He intends to make a 2 month's business trip over Java. Applicant paid already a visit of about 14 days in April 1940 and a visit of about 20 days in January-February 1941 to Java. No objection.

HAYASHI Junjiro, acting manager of Nomura & Co. Singapore, who on 29th July left this country by plane after having paid a short visit to Batavia, again applied for a visa at the Netherlands Consulate-General, Singapore, as he has

to negotiate once again with the director of the Batavia Branch of this It was advised to grant the visa provided the duration of his stay is previously.

*Extract No. 96 for Honolulu*

9TH SEPTEMBER, 19

N. E. I.: JAPANESE EVACUATION OF WOMEN

In connection with the growing political tension between Japan and Netherlands Indies 180 Japanese women and children of Batavia, Sama and Soerabaya are reported to have embarked on 1st August on board of HARUNA MARU to return to their home country. From conversations during this embarkment it appeared that these families do not intend to return to this country before the war is over (which would be within 6 months according to some optimistic Japanese).

The employees of the Domei Agency in this country get also telegraphic consent from Tokio to repatriate their families. The Japanese Consul-General at Batavia is reported to have sent a circular to the Japanese colonists in order to advise them to speed up the evacuation of their wives and children. "Nanyo Kaiun" received permission from the Japanese Government to delay the passengers accommodation of the next two ships (Nichiran Maru and Burma Maru) for evacuation purposes. The Nichiran Maru is leaving Soerabaya on the 12th August.

In Semarang it is rumoured that the German women who from the Netherlands Indies intended to return to Germany via Japan and Russia are working in Japanese munition factories.

9th SEPTEMBER, 19

----- reports regarding aerodromes which are in the vicinity of, and perhaps be identical with those already reported by R. A. F. Intelligence.

A. SUNOSAKI (IGD EAB) Naval aerodrome and seaplane base.

Pin point 34° 58' North, 139° 49' East.

6 kilometres East of promontory of the same name and 4 kilometres west of town of Joje (VIA HAL).

Area about 100 acres repeat 100 acres.

Possibly identical with Tateyama aerodrome.

B. FUNAHASHI (OJL HOP) Military aerodrome.

Pin point 35° 42' North, 139° 56' East. West of and adjacent to railway station of same name.

Area about 106 acres repeat 106 acres.

*Buildings:* 4 hangars, also barracks.

300 paratroops from Eastern Section Army headquarters undergoing training here under German supervision.

Source states "there is an aircraft factory in vicinity with German technicians attached".

Perhaps identical with Shinosaki aerodrome.

C. AKITSU (ITA IFX) Military aerodrome.

Pin point 35° 49' North, 139° 29' East. One and a half kilometres North of railway station of same name.

Area about 170 acres repeat 170 acres.

Total of 3000 personnel stationed here, of which a very small proportion believed to be paratroops being trained by German instructors.

Perhaps identical with Sayama aerodrome.

D. SHINAGAWA (BGU ECB) aerodrome and seaplane base.

Position approximately 35° 38' North, 139° 44' and a half minutes East.

One and a half kilometres south east of railway station of same name.

Area about 80 acres repeat 80 acres.

Possibly identical with Shibata aerodrome, already reported:

*Extract No. 114 for Honolulu*

9th SEPTEMBER, 1941.

----- reports on the following *new aerodromes* in Japan.  
 Yokkaido (BYO, PON, SIR) Military Aerodrome. Pin point 35° 40' North, 139° 09' East. One kilometre North West of railway station of same name. Area 75 repeat 75 acres.  
 Mio (AAF AHU) Military Aerodrome. Pin point 35° 0' North, 138° 31' East. Small number of paratroops from Shidzuoka Military formations are being trained here.  
 Suma (UHN LIL) Naval Aerodrome. Still under construction. Location approximately 5 kilometres west of Kobe. Area about 325 acres repeat 325 acres.

*Extract No. 115 for Honolulu*

9th SEPTEMBER, 1941.

Kanoya (UZH DUW) Military Aerodrome. Pin point 31° 25' North, 130° 05' East. Locally known as Kasanohara (MEN TAK AYO) Aerodrome. Area about 325 acres repeat 325 acres. Parachute unit being trained by German instructors. Aircraft factory in vicinity employing several thousand workmen. Possibly identical with Kanoya Naval Aerodrome.

*Extract No. 118 for Honolulu.*

9TH SEPTEMBER, 1941.

----- furnishes following information regarding aerodrome already reported by R. A. F. Intelligence.  
 Tsudanuma (IFX, JYS, IEC) Military Aerodrome. Area 75 repeat 75 acres. Paratroops of 1st repeat 1st Division under training here.  
 Yokaichi (BYO, GAZ, ECK) Military Aerodrome. Locally known as Yokaichi (ECB, BAC) aerodrome. Area 125 repeat 125 acres.

Col. Bicknell, Mr. Shivers

9TH SEPTEMBER, 1941.

Source reports that a meeting of important Japanese was held on August 1st in Yokohama Specie Bank Shanghai which was addressed by a certain Major General. He spoke—  
 Japanese-American conversations at Washington were commenced at urgent request of German Government conveyed to Admiral Toyoda through German Ambassador.  
 German Government's view was that only through such conversation would it be possible to discover real intention of Great Britain and U. S. A. following occupation of Iran and before opening of Moscow conference.  
 Ott in his message to Toyoda stressed that it should be possible for Japan, in discussing question of American aid to Russia via Vladivostock, to discover quantity and exact nature of cargoes which it is intended to send to Russia, number of vessels to be used, whether they would be convoyed and nature of at least main clauses in agreement for American assistance to Soviet.  
 He thought also, it should be possible to discover whether or not American aid would be sent via Iran.  
 He admitted that in its greater measure such information would be of more value to Germany than to Japan but held also that Japan would through such conversations obtain a clear indication of Anglo-American decisions and future plans in Pacific area and the degree of solidarity of the A. B. C. D. front.  
 He admitted that to gain such invaluable information Japan would have to adopt a conciliatory attitude but this coupled with astute diplomacy would probably cause American statesmen to reveal more than they realized.  
 KUNO stated German Government's proposals were fully discussed at recent meeting of Supreme Command. The results were conveyed by Prince Hiroto to the Emperor who then authorized former to address his recent message to American President.  
 Comment. I do not know what interpretation of value to place on this report. It may be a clever fabrication; on the other hand it is not inconsistent with

"SLICK" methods of German diplomacy and FACTUAL information and indications sought would be of much value to Reich if obtained.

Source was not repeat not at meeting but obtained the above information from Minutes of the Meeting filed at CONCORDIA Association. Comments would be of great value to us.

Your comments would be appreciated.

*Extract for Honolulu*

SEPTEMBER 6, 1941.

#### JAPAN—AIR

#### NOTES ON MISCELLANEOUS AERODROMES

Following is some miscellaneous information mostly hearsay on Japanese aerodromes:

##### A. SUNOSAKI ( )

1. Naval aerodrome and seaplane base.
2. *Locations.* Entrance Yokohama Bay. 34°58' north, 139°49' east. 6 kilometres east of promontory of same name. 4 kms. west of town of HOJO ( ) and TATEYAMA. NOTE: R. A. F. Intelligence thinks this is Tateyama aerodrome, located by them 34°59' N. 139°53' E.
3. *Area.* 120,000 tsubo, i. e. about 100 acres.
4. *Aircraft.* Aircraft stationed here include Messerschmitt ME 110 and Piaggio P. X. I. R. C. 40. Heavy bomber.

##### B. FUNABASHI (E. OF TOKYO 6 MILES)

5. Military aerodrome.
6. *Locations.* 35°42' north, 139°58' east. West of and adjacent to town and railway station of this name.
- NOTE: This might be the same aerodrome as that reported by R. A. F. Intelligence as Shinosaki; 35°43' N. 139°54' E.
7. *Area.* 130,000 tsubo, i. e. about 106 acres.
8. *Parachute Training.* 300 troops of the Eastern Section Army H. Q. are under training here as parachutists under German supervision.
9. There is one parachute training tower.
10. *Buildings.* Four hangers. Barracks for parachutists and aviation personnel.
11. *Aircraft factory.* Source states "there is an aircraft factory here with a few German technicians attached." This is hearsay only and no further information is available.

##### C. TSUDA NUMA

12. Military aerodrome.
13. *Location.* 35°41' North, 140°01' East. West of and adjacent to railway station of same name.
- NOTE: R. A. F. Intelligence gives location as 35°39' N, 140°05' E.
14. *Area.* 90,000 tsubo or 75 acres.
15. *Parachute training.* Parachute troops of 1st division are under training here.
16. There is one parachute training tower.

##### D. YOKAIDO

17. Military aerodrome.
18. *Location.* 35°40' North, 140°09' East. 1 kilometre N. W. of town and railway station of same name.
19. *Area.* 90,000 tsubo or 75 acres.

##### E. AKITSU

20. Military aerodrome.
21. *Location.* 35°49' north, 139 29' east.  
1 and a half kms. north of railway station of same name.
22. NOTE: This might be the same aerodrome as that reported by R. A. F. Intelligence as Sayama; 35°44' N, 139°28' E.
22. *Area.* 200,000 tsubo, i. e. about 170 acres.
23. *Parachute training.* Parachute training is carried out here under the supervision of German advisers.

There are *two* parachute jumping towners.

*Personnell* Total of 3,000 men are based here, inclusive of aviation personnel and parachutists.

#### F. YOKAICHI

*Military aerodrome.*

*Location.* 35°06' north, 136°13' east. 3 kms. E. S. E. of town of same name.

*NOTE:* R. A. F. Intelligence gives location as 35°10' N. 136°15' E.

Source states that name of aerodrome is known locally as Kawai, although AICHI is the nearest town.

*Area.* 150,000 tsubo or 125 acres.

*Parachute training.* There is *one* parachute training tower here.

#### G. MIO

*Military aerodrome.*

*Location.* 35°00' north, 138°31' east.

*Parachute training.* A small number of parachutists from SHIDZUOKA is under training here. There is *one* parachute training tower.

#### H. SUMA

*Naval aerodrome.* A new aerodrome is *under construction* at SUMA.

*Location.* Approximate 5 kms. west of KOBE.

*Area.* 400,000 tsubo, i. e. about 325 acres.

#### I. TOKYO

There is an aerodrome and seaplane base one and a half kms. S. E. of AGAWA railway station. Position is approximately 35°38' N, 139°44 and a minutes East.

*Area.* 100,000 tsubo, i. e. about 80 acres.

*Comment.* This may possibly be the SHIBATA aerodrome reported previously

#### J. KANOYA

*Location.* 31°25' north, 130°51' east.

*NOTE:* (a) Source states that this is a military aerodrome, whereas R. A. F. intelligence says it is Naval, and located at 31°2' N., 130°53' E. It is probable our source was misinformed as to the service, but it is possible that there are separate aerodromes in the vicinity.

Source also states that aerodrome is known locally as the KASANOHARA aerodrome.

*Area.* 400,000 tsubo, i. e. about 325 acres.

*Parachute training.* There is a parachute unit here being trained by German instructors. There are *two* parachute jumping towers.

*Aircraft factory.* Source was told that there was an aircraft factory here employing several thousand workmen.

act for Honolulu:

SEPTEMBER 5, 1941.

- reports considerable air traffic passing through Waichow Island from East to West, including a large proportion of twin-engined monoplane bombers.

SEPTEMBER 5, 1941.

The idea of the intensity of paratroop training at KOGO can be formed from the fact that 8 aircraft have been in daily use since the middle of July for this purpose.

#### Unfamiliar Type of Armoured Car

old and well-established Source, who can generally be relied upon to use his eyes with accuracy, has reported seeing at TAKAO an unfamiliar type of armoured car which he describes as follows:

2. 20 ft. long, 9 ft. high, and six wheels with three wheels at the front back. (i. e. three wheels abreast).

3. This is given with all due reserve, but we should be interested to whether it fits in with any new type of vehicle in use elsewhere.

3RD SEPTEMBER, 1941

Extract No. 124 for Honolulu.

— gives following information on Japanese Naval Air units in China. (Compiled in April, 1941).

A. North China. Tsingtao Naval Squadron: Two light bomber squadrons.  
B. Central China. 2nd Combined Air Unit. YAMAMOTA KAWAHIRA (GOK ECB ECU).

1. 12th Naval Air Squadron, Location unknown. FURUSE KIKI (IRX RAW DIH). Three light bomber, three fighter squadrons.

2. 13th Naval Air Squadron, Location unknown. KIKUCHI ASAZO (ICK GOB AAF). 4 Heavy bomber, 1 reconnaissance squadron.

3. "Detached Air Unit". Location unknown. 2 light bomber squadrons.

C. South China. 1st Combined Air Unit. YAMAGUCHI TAMON (DYA CPA CBZ).

1. Kanoya Naval Air Squadron. Hainan. Three heavy bomber squadrons.

2. Takao Naval Air Squadron. Hainan. Three heavy bomber squadrons.

3. Kisarazu Naval Air Squadron. Walchow Island. Four heavy bomber, one fighter squadron.

D. Third Combined Air Unit. ONISHI TAKIJIRE (CQE PZA ISE IKB S).

1. 14th Naval Air Squadron. Sancho Island. 3 light bomber, 1 reconnaissance squadrons.

2. 15th Naval Air Squadron. Hainan. YAMAMOTO CHIKAO (DYA QAL UBR). 3 heavy bomber squadrons.

3. 16th Naval Air Squadron. Hainan. 2 heavy bomber, 1 fighter squadron.

E. 2nd Air Unit. KAGA. 3 light bomber, 1 fighter squadron. RYUHO (light bomber, 1 fighter squadron).

F. 3rd Air Unit. NOTORO and KAMOI. 2 reconnaissance squadrons each.

G. 4th Air Unit. CHIYODA and MOZUHO. 2 reconnaissance squadrons each.

H. Total aircraft 590 repeat 590.

SEPT. 1, 1941

-----reports he recently met brother of Mayor of ----- who returned from Japan on 19th instant, later stated.

A. 5 new (reorganized) divisions have been mobilized in Japan for service Manchuria.

B. All forces in Korea other than two divisions are to be in process of being moved into Manchuria and to North Korea.

C. 3 new mechanized divisions have been added to Kwangtung army as well as chemical warfare units trained in Japan by German instructors.

D. Training of para troops is being intensified but is considerably delayed lack of transport aeroplanes. Passenger aeroplanes from commercial air line are being used for training purposes.

E. Source stated he heard that 2 capital ships will be completed and commissioned to battle fleet by end of this year and that 2 aeroplane carriers will be completed in March and July 1942 respectively (it should be noted that this was merely overheard in conversation).

F. Above passed with reserve as I am not in position to estimate reliance on original source.

30TH AUGUST, 1941

Extract No. 110 for Honolulu

----- independently reports on UDA (NYI JYS) aircraft factory.

A. Location 3 kilometres south of Kasumigaura aerodrome.

Pin Point: 35 degrees 59 minutes North 140 degrees 14 minutes East.

Note: This disagrees with ----- report who states it is in Tokyo, but Kasumigaura might loosely be called "near Tokyo".

B. This factory has been producing aircraft for the last 3 years.

C. Labour force 3,500 repeat 3,500.

D. Production—45 repeat 45 aircraft per month.

Note: We think that this factory is only used for assembling aircraft.

E. The German Messerschmidt M. E. 110 is under production here.

F. On 20th May source saw 6 or 7 Messerschmidts on the adjacent Kasumigaura aerodrome.

Extract No. 102 for Honolulu

29 T. H. AUGUST, 1941.

## JAPAN

## AIR

## Kasumigaura Aerodrome

*Location:*

1. On the shore close to western corner of Lake KASUMIGAURA, East of and adjacent to AMI Village.
2. Latitude 36°, 02' North. Longitude 140° 14' East.

*Size and Shape:*

3. Roughly rectangular, total aerodrome area, inclusive of buildings, about 1200 X 2000 yards. Source was informed that south edge of landing field had been extended about 300 yards.

*Surface:*

4. Sand and grass.

*Barracks and offices:*

5. 26 buildings on the east side provide accommodation for Headquarters, offices and barracks. These are two storey buildings painted in camouflage patches of brown and green.

*Hangars and Repair Shops:*

6. There are two steel hangars cum workshops on the north edge, about 200 by 90 feet high.
7. Source was told that aircraft were stored in three layers in these hangars.
8. A new large circular hangar about 250 yards in diameter was completed at the end of 1939 in the south-east corner.
9. This hangar only protrudes about 20 feet above the ground at its highest point and is believed to extend some distance below ground level.
10. It is built of reinforced concrete and covered with earth and grass.
11. There are 8 doors to this hangar.

*W/T*

12. The W/T station is situated on the south edge.

*Seaplane and Flying boat facilities:*

13. Hangar accommodation is believed to be provided by the two hangars on the north edge.
14. A number of mooring buoys were seen off shore.
15. What appeared to be three catapults were seen on the water's edge, north of the aerodrome.

*Aviation School:* 16. Source was informed that there is an aviation school here with 600 students.

*Personnel:* 17. Total of 2,600 aviation personnel is stationed here.

*Parachute Training:*

18. Two high towers for parachute training were seen on the south edge.
19. Source was told that 1,000 troops were being trained as parachutists, but it is believed that this large number is being tested out as to suitability and only a small proportion will be retained for training.

*German Advisers:* 20. 10 Germans are attached to this aerodrome and to the neighboring UDA Aircraft Factory.

*Aircraft:* 21. Source saw about 20 aircraft along the south edge, including 6 or 7 Messerschmitts Me 110.

*Valuation B. 2.*

Extract No. 111 for Honolulu  
— reports.

29TH AUGUST, 1941.

A. On 28th May at a naval air demonstration at Misaki near Yokohama he saw two 3-engine repeat 3-engine monoplane aircraft and 18 twin-engine monoplane aircraft.

B. Concerning the three-engined aircraft he was told:

C. These were Italian "Piaggio P. XI. RC. 40" bombers manufactured in Japan.

D. The engines are 14, repeat, 14 cylinder 1,000, repeat, 1,000 horsepower.

E. Load capacity: 4,200 kilogrammes, repeat, 4,200 kilogrammes.

F. Camouflage on under wings was light blue, grey and pale green in irregular patches.

G. Reference paragraph C above. It is suggested that these aircraft are with Italian engines and for this reason are named after them.

H. *Concerning the twin engine aircraft he was told:*

I. These were German Messerschmidt M. E. 110 fighters manufactured in UDA factory.

J. These aircraft gave a demonstration of *low level dive bombing*.

K. Source noted, however, that both these types of aircraft had single, not single rudders and stuck to this statement even when shown pictures in Japan.

L. Both these types of aircraft are based on the Sunosaki naval aerodrome near the promontory of the same name on the South West tip of China peninsula.

#### Extract for Honolulu

August 29, 1941

----- reports.

A. On June 25 600 troops of NAKANO (AAW TAK) armoured cars unit and 300 service corps troops with unknown number of armoured cars and motorcycles combinations, embarked on 2 transports at SHIBAURA, Tokio and for Formosa.

B. On July 5, 1000 repeat 1000 men of 32d repeat 32d infantry regiment embarked on 2 transports in Shibaura for Formosa.

Source of paragraphs A and B above was a ----- friend of source who was in dock at Shibaura for 14 days.

C. On June 16 1 transport arrived SHIKAMA (Port of HIMEJI) from Shanghai and discharged 200 wounded of 11th mixed brigade and 100 boxes of supplies. The wounded were sent to TSUYAMA (OKAYAMA KEN).

D. Reinforcements leaving Japan in May and June for north China have been drawn from following districts.

SENDAI, KANAZAWA, YAMAGATA and YONEZAWA.

E. Reinforcements during same period for south and Indo China were drawn from: KANAZAWA, KYUSHU, KAGOSHIMA, KURUME, SAGA and KUMAMOTO.

Valuation C 2.

#### Extract No. 109 for Honolulu

28TH AUGUST, 1941

----- reports on Yokosuka dockyard in June.

Valuation C.2.

B. *Capital ship*. This was launched in Spring of 1941.

C. *Armament* will consist of:

- 9 16 inch (40cm)
- 20 5 and a half inch
- 10 anti-aircraft.

D. Name Takamatsu.

E. A sister-ship is under construction at Maizuru dockyard.

F. *Heavy Cruiser*. This vessel is still on the slips.

G. Name Chichibu.

H. Displacement variously given as 10,000 tons to 25,000.

Note that this disagrees with ----- who states that it is 19,00 and ----- who says "between 15,000 and 25,000" tons.

I. 2 *Destroyers* are being armed in the bay. Source was unable to state whether these vessels were launched here or not.

J. Four repeat four fast motorboats are under construction. They are 10 tons and have one gun mounted forward.

Source was told that similar vessels were under construction in many Japanese shipyards. A merchant from Formosa informed him that private shipyard Takao were building the wooden hulls only of these ships for fitting out in Japanese yards.

K. A 7,000 ton cruiser and a destroyer were in dry dock.

L. One cargo boat was undergoing alterations.

M. On 10th June there were concentrated here:—

8 cruisers, 1 seaplane carrier, 11 destroyers, over 10 submarines and 18 transports.

N. Two of these transports were fitted with degaussing apparatus (described by source) and were destined for conveyance in the Sea of Japan.

O. About 20 German technicians travel daily to Yokosuka from Tokyo.

act for Honolulu

AUGUST 28, 1941.

Following is a summary of report dated August 15 on Manchurian frontier conditions:

**Mobilization: Troop movements.**

1. Whole population, men and women, of eastern part of former Chinese Eastern Railway district has been mobilized as "militia" for defensive and anti-aircraft work, all are registered and may not leave their villages without permission from staff headquarters.

2. Fresh units of Japanese troops arrived in MULIN district as from end of July, movements being shrouded in great secrecy. Police forbade population to visit villages or engage in fishing or other occupation in vicinity except under special permit, this applying even to normal agricultural labour. Troop movements took place at night.

**Construction.**

1. New barracks near Mulin coal mines are now occupied by troops recently arrived. Manoeuvres in which tanks participated took place.

2. Work has commenced on the new highway from IRIKTE through CHOLA-ARSHANU district. Cossacks resident in this district are engaged on the work.

3. PEIAN-HEIHO. Manchurian dollars 1,500,000 has been allocated for this work which includes hospitals, barracks, etc.

4. TIAMOSI. Several European firms at Harbin have been permitted to tender work in this district and for work in connection with the TIAMOSI-MUDALZIAN railway (opened two years ago). Construction of Government buildings, residences, hospitals, barracks, etc. Total allocation said to be Mongolian dollars 3,000,000. All employees must be certified. Work to be completed not later than June 1, 1942.

**Travel restrictions.**

1. New regulations, affecting all Europeans and most Chinese, were introduced as from August 1 in Manchurian frontier regions. Permits for all travel must be obtained from Police H. Q., travel in interior prohibited. Restrictions especially severe in Mulin district. Special control established at Mulin and SUIFENHO.

2. In spring of this year pressure was brought to bear on all foreigners in JEHOI Province and many left. Remaining foreigners—about 25 missionaries—are not now permitted to travel beyond the cities. Tarter business men have also been recommended to remove their business to MUKDEN area. Reason given is that Jehol is not safe—that troops have been greatly augmented, large troop movements are taking place, considerable road construction is in hand and it is not desired that aerial manoeuvres should be witnessed by foreigners.

**Censorship.** Private correspondence from within Manchuria addressed to Japan is now censored.

*Extract for Honolulu*

August 21, 1941

A. It is reported that disembarkation at *Dairen* and ports in Korea of Chinese troops from Japan is confirmed. One tank regiment with medium tanks and one motorized infantry regiment, with new equipment observed, disembarked at *Dairen* (no date given).

B. Main regions of concentration reported to be North Korea KIRIN, TUNHUA, MUTANKIANG, POGRANICHNAYA and MUTANKIANG—LIN—MISHAN areas.

C. In North China troops are being concentrated in KALGAN area.

*Extract for Honolulu*

August 21, 1941

----- reports.

A. There are naval bases or depots at KOSHIRO repeat KOSHIO, TAKAHACHI repeat TAKAHACHI and ZUSI repeat ZUSI and air bases at KAMAKURA repeat KAMAKURA and TOYOHASHI repeat TOYOHASHI.

B. Source states that at end of June there was considerable movement of Japanese sailors from Tokyo to Koshiro and Takehachi and that between June 24 and June 28 numerous tramloads of young men arrived at Zusi.

C. At Numazu repeat Numazu source observed soldiers wearing green bandoliers on shoulders and also several howitzers pulled by heavy trucks with camouflage netting on platforms.

D. At HAMAMOTO repeat HAMAMOTO he observed 97th repeat 97th, 72d repeat 72d and 8th repeat 8th divisions.

E. At WUSHIZU repeat WUSHIZU 22d repeat 22d Division. At OKOYAMA repeat OKOYAMA and HIROSHIMA 2d repeat 2d and 4th repeat 4th divisions. New oil storage tanks in this district which is very heavily industrialized.

*Comments.*

All above observations were made at end June. Although agent has no military training he is newly recruited and I have had no opportunity of examining him. Valuation therefore C 3.

F. ----- was informed by Polish refugee journalist in Japan at end June that he had seen great earthworks, indicating underground aerodrome with planes landing, at TAKARUZUKA repeat TAKARUZUKA. Valuation C 3.

G. Area between Kobe, AWAJI repeat AWAJI and SAKAI repeat SAKAI heavily fortified. Valuation C 3.

Following from a responsible British source,

When Itagaki was appointed C-in-C, Korea, this writer took the view that he is a convinced northerner expansion, as opposed to southern expansion belief and that his appointment was therefore to be interpreted as a precaution against the need for big operations in Manchuria, Korea being the first reserve pool in Manchuria. A technically competent observer in Hongkong now confirms this view and adds that Ushiroku, formerly C-in-C, South China, now Chief of Staff at Nanking of the Japanese forces in China, is of the same persuasion. He is counted on not to neglect the north, therefore, however, tempting the gains in the south may be at the moment.

Renewed reports from Shanghai that observers there expect something to happen in Thailand, South China, Indo-China, etc., by a certain date, such as Sept. 15th bear all the earmarks of crude Japanese attempts to wage a war of nerves on the democracies, doubtless at the request of the senior Axis partners. The Japanese in the past have often revealed their long term objectives, but have very seldom talked about their next move and carried it out, secrecy in that respect being a habit with them.

*Extract for Honolulu*

AUGUST 20, 1941.

----- reports on Indo China.

A. Japanese strength in TONKIN area (August 1) approximately 25,000 repeat 25,000.

B. Strength in southern Indo-China (August 12) approximately 36,000 repeat 36,000.

C. Collaboration between French and Japanese authorities appears close and it is believed that French troops are to be sent to the Yunan and KWANGSI borders.

D. Quantities of railway equipment is being sent to PNOM PENH for the construction of a railway to the THAI border.

AUGUST 21, 1941.

J. July 28 a transport left TOSHIYEN for Indo-China after loading 20 repeat 20 launches, 120 repeat 120 mines and a quantity of naval ammunition.

AUGUST 19, 1941.

A. At recent Japan-Vichy negotiations Japanese delegates expressed concern over Madagascar as controlling Atlantic Indian Ocean communications.

B. A proposition is mooted for a Japanese fishing company with a capital of a million yen to start operations around island.

*Extract No. 57 for Honolulu*

19th AUGUST, 1941.

A. At recent Japan-Vichy negotiations Japanese delegates expressed concern over Madagascar as controlling Atlantic Indian Ocean communications.

B. A proposition is mooted for a Japanese fishing company with a capital of a million yen to start operations around island.

*Extract No. 54 for Honolulu*

AUGUST 19th, 1941.

----- reports.

Sancho Island.

A. On August 2nd, 500 naval landing party left.

B. Total garrison strength now 400 repeat 400 naval landing party and 200 puppets.

C. Present stock : 2,000 repeat 2,000 cases small arms ammunition. 900 repeat 900 cases shells.

D. At KUKOK Island are 200 repeat 200 KATSUMMRA (AUE GPA) naval landing party, 100 having left on July 22nd.

*Extract No. 35 for Honolulu*

AUGUST 18th, 1941.

----- who was recently elected as a Sakdal candidate for next political elections, states that local Japanese agents (whose names I have given to American Military Intelligence) have recently been cultivating him closely and volunteering following information :

A. 650-700 aeroplanes are now assembled on Formosa.

B. Attack on Philippines and Singapore simultaneously, will take place about end August.

C. Campaign in Philippines to begin with rising in Mindanao and bombing of Manila.

D. Attack on Singapore to be overland through Siam. where at least 3 repeat 3 divisions of Siamese army will support Japanese.

E. Heavy troop concentrations are ready in Hainan and Saipan. This looks like a whispering campaign.

Valuation C 3.

*Extract for Honolulu*

AUGUST 18, 19

----- Report that his Japanese business associates (who include heads of Mitsui and Yokohama Specie Bank) appear genuinely to believe present Japanese threats of further southward expansion are merely a "matter of nerves" and that, under present conditions, Japan does *not* intend to attack Great Britain or America.

Valuation B 2.

*Extract No. 33 for Honolulu*

AUGUST 16TH, 19

A. Local Agents Tokio Fire and Marine Insurance Company received telegram August 15th from Tokio instructing them:

1. To accept no new business or renewals until further notice.
2. To cancel local reinsurance Treaty.
3. To persuade local Japanese clients to insure direct with Japan if possible.

B. This company's 1940 premium income from Philippines slightly exceeded 200,000 pesos (25,000 pounds).

Valuation A 1.

*Extract for Honolulu*

AUGUST 16, 19

----- of German Embassy recently returned from Japan is reported to have stated:

A. Mobilization continues in Japan and it is known that certain units are being equipped for service in cold climate.

B. In the event of hostilities between Japan, America and Great Britain Japanese neutrality regarding Russia will not repeat not be maintained.

C. In this event Japan proposed to try to effect occupation of entire territory north of Vladivostok up to Amur River, northern half of SAGHALIEN and KAMCHATKA.

D. Object would be to lessen danger of air attack against industrial centers in Japan and prevent American supplies reaching Russia through these areas.

E. Japanese policy in northwards threat and southern expansion is identical to force *democratic* front to maintain forces in readiness to meet potential danger. At the same time he added that it was not yet possible to say definitely whether Japan's large scale preparations were merely to keep anti Axis powers generally on the alert in Asia or whether they mean Japan is seriously contemplating an active part in war.

F. Same source stated that anti British and anti American feelings are growing as the population is suffering from lack of foodstuffs, with it material and certain essential commodities and fear of the introduction of card rationing system in near future.

*Extract for Honolulu*

AUGUST 15, 19

A. It is reported that as a retaliatory measure for British and American action against Japan Japanese military authorities discussed with Nanhai Government desirability of blockading International Settlement on line of Tientsin blockade of British Concession.

B. Japanese "business" Shanghai strongly opposed this and sent delegation of four representatives to interview General KAGESA at Nanking.

C. Latter assured delegation that if any steps were taken along lines suggested at any time, every effort would be made to safeguard Japanese interests operating in International Settlement. He further stated that they were contemplated in the near future as there was no complete accord between Japanese naval and military authorities on matters.

AUGUST 10, 19

It is reported.

A. following completion of Japanese military occupation of Indo-China Japanese military have been considering possibilities of securing control of Tientsin French Concession through puppet North China administration.

B. Local military circles consider if Tientsin venture is accomplished similar action might be taken through Wang-Ching-Wei Government at other ports.

Japanese controlled territory and eventually give them full control of all Axis interests.

Above passed for it may be worth enquiries proceeding.

*Extract for Honolulu*

AUGUST 14, 1941.

Following from Free French sailors who left Saigon about August 8. Valued C 2.

S. S. Francois Louis Dreyfus is leaving or has left Saigon with cargo of rubber in lower hold marked "Tokyo." Rest of cargo, nature not known, marked "San Francisco."

Vessel will be escorted by escort vessel AMIRAL CHARNER repeat AMIRAL CHARNER and the submarine PEGASE repeat PEGASE.

S. S. SAGITAIRE has turned back near Cape of Good Hope and will have to go to Madagascar instead of proceeding to France with her cargo of rubber.

*Extract for Honolulu*

AUGUST 13, 1941.

As reported.

Japanese plans for taking over French Concession in Shanghai has been completed and provided future developments in general situation in Far East do not necessitate change in plans, Nanking Government expected to assume control in concession before October 10.

Committee studying this matter under chairmanship of HSU LIANG (Former Minister) and General KAGESA have forwarded their recommendations to the Government for consideration.

AUGUST 8, 1941.

----- reports.

On July 31 700 Chinese laborers were recruited by Japanese in Po On area under the German expeditionary engineer corps" and are as soon as possible being sent to Germany.

According to a high puppet official further recruiting is being carried out.

*Extract for Honolulu*

AUGUST 13, 1941.

Between July 25 and July 29 12,000 repeat 12,000 troops left Bangkok for China frontier.

Partial confirmation is afforded by official Siamese communiques which list that infantry, artillery, cavalry, tank, signal, veterinary and special units left for frontier at end of July.

An order has been placed with Japanese for delivery in July 1942 of 2 repeat ships probably torpedo-boats to replace 3 vessels sunk by French.

500,000 TICULS have been paid on account of this order.

Situation C-3.

*Extract No. 27 for Honolulu*

AUGUST 12, 1941.

At a meeting held by High Command at Canton on July 27th to discuss retaliatory measures on British and American freezing, following steps were decided and forwarded to Tokio for approval:

Ascertaining financial holdings of British and Americans in South China.

Watch on movements of Consuls and merchants in occupied zone and possibility of expulsion.

Banning of exports to Hongkong and tightening of blockades. The Government to be forced to co-operate in this measure.

Expediting the plans for the subversing of Indian and Chinese personnel in British forces.

Unifying of new territories of Hongkong and KULANGSU to the Puppet Government.

*Extract for Honolulu*

AUGUST 12, 1941.

Y. K. Tokio despatched confidential telegram August 9 to their Japanese representative in Manila stating that Japanese Government have ordered:

S. S. ASAMA MARU (Now between Honolulu and San Francisco) to return to Japan.

B. S. S. NITTA MARU to remain in Yokohama until further notice.  
 C. Through cargo loaded at Manila for United States on these vessels discharged at Yokohama and Kobe respectively.  
 Valuation A-1.

*Extract No. 23 for Honolulu*

August 12th, 1941

To: Capt. I. H. MAYFIELD  
 Mr. R. SHIVERS  
 Col. GEO. BICKNELL

A. 372 repeat 372 Japanese residents of Philippines have booked and passages in S. S. MARECHAL JOFFRE due leave Manila for Shanghai A 13th.

B. This is about four repeat four times the usual volume of Japanese departures.

Valuation A 1.

Completely reliable source and information.

C. Okayama aerodrome,

1. Between July 7 and July 15 about 25 repeat 25 aircraft have been arriving nightly from Japan.

2. Aircraft based here July 19 are: 40 repeat 40 3 engined monoplane B; 40 repeat 40 twin engined monoplane medium B; 40 repeat 40 single engined monoplane light B; 60 repeat 60 monoplane fighters; 20 repeat 20 reconnaissance 4 repeat 4 four-engine transports.

3. This is largest aerodrome in Formosa being about one mile square.

D. July 14 6 repeat 6 fighters arrived TAIHOKU from QUEMOY Island.

E. July 10 to July 11, 15 repeat 15 fighters arrived KAGI from Japan.

F. July 15, 15 repeat 15 monoplane fighters arrived HEITO from Kwan.

G. Aircraft reported at Quemoy 12 repeat 12 fighters.

H. June 6, mines by naval units from Pescadores.

I. July 11 200 repeat 200 mines and 120 repeat 120 torpedoes landed at Canton from Japan.

At a meeting held by High Command at Canton on July 27 to discuss retaliatory measures on British and American Freezing, following steps were decided and forwarded to Tokio for approval:

1. Ascertaining financial holdings of British and Americans in South China.

2. Watch on movements of Consuls and merchants in occupied zone and possibility of expulsion.

3. Banning of exports to Hongkong and tightening of blockades. The Government to be forced to cooperate in this measure.

4. Expediting the plans for the subversing of Indian and Chinese personnel in British forces.

It is reported.

A. Following completion of Japanese Military occupation of Indo-China, military have been considering possibilities of securing control of Tientsin and Concession through puppet North China administration.

B. Local military circles consider if Tientsin venture is accomplished, action might be taken through Wang-Ching-Wei Government at other points in Japanese controlled territory and eventually give them full control of Axis interests.

C. Above passed for what it may be worth enquiries proceeding.

*Extract No. 24 for Honolulu*

AUGUST 9TH, 1941

To: Capt. I. H. MAYFIELD  
 Mr. ROBT. SHIVERS  
 Col. GEO. BICKNELL

Following is summary information to hand on HULL.

A. AMOS TYLER HULL, employed by R. K. O. Pictures.

B. Is known to have received special facilities over a considerable period in Japanese Military in Mongolia, Hangchow and Shanghai areas and has stated that he could secure passes at any time for any area from Japanese.

C. Shanghai French Intelligence emphatic that Hull was in Japanese employ.

A. Local Agents N. Y. K. have today received telegram from N. Y. K. Tokio stating that *all* "overseas" service is now suspended.

B. "Overseas" means all sailings except Japan-China ports.  
Valuation A 1.

*Extract No. 61 for Honolulu*

8TH AUGUST, 1941.

----- reports.

A. On 31st July 700 Chinese laborers were recruited by Japanese in Po On area for "the German expeditionary engineer corps" and are as soon as possible being sent to Germany.

B. According to a high puppet official further recruiting is being carried out.

It is reported that the following railways in Manchuria are now regarded as military lines on which number of passenger trains has been reduced to minimum.

A. Harbin-Lafa-Tunhara and to Korea via Tumen.

B. Harbin Peian-Helho

C. Hsingchiang-Taonan

D. Taonan-Doekk Arshan

E. Tsitsihar-Peian

F. Tsitsihar-Bukhedu-Hailar and Manchouli

G. Tumen-Mudadzian

H. Mudadzian-Tzetslamusi

I. All railways in Jehol

J. Since end of June 1941 steps have been taken to increase capacity of single track Hsingchiang Harbin by construction of sidings and numerous small stations for storage.

K. In Kwangtung leased territories since 1940 sand bag emplacements guarding bridges station, etc. have been replaced by permanent brick and cement structures.

L. Japanese War Office has acquired by purchase several large buildings in Harbin and private hospitals have been warned that they may be taken over if necessity demands.

*Extract for Honolulu*

AUGUST 7, 1941

It is reported.

A. Between July 10 and July 17 about 50,000 Japanese troops passed through Mukden proceeding north \* \* \* carried full war kit. (Note. No means of checking numbers, which should be accepted with reserve.)

B. During period named a total of 75 troop "specials" passed through Mukden. Flat cars carried artillery and tanks.

C. On departure from Mukden on July 21 source was told by Japanese station master of South Manchurian railway that he had received orders to transit a total of 240 troop specials, but over what period was not stated. As South Manchurian Railway was short of cars these would be drawn from Peking Mukden, Peking Suiyuan and Peking Hankow lines.

D. On July 20 troops from Jehol area arrived in Mukden. They travelled in special troop trains via KOUPAUTZE on Peking Mukden line. Source saw great activity at Tangku Tun junction.

AUGUST 5, 1941.

I. Admiral TOYODA has already informed German Ambassador that Japan is ready to readjust its political relations with Reich as prerequisite for closer economic accord upon which will be founded future economic relations between Asia and Europe.

J. Admiral NOMURA has been instructed to work for a modification of \* \* \* American embargo policy and to offer readjustment of American Japanese relations on basis of *mutal* recognition on land sea and air of all areas defined and recognized as for spheres of influence of U. S. A. and British.

*Extract No. 21 for Honolulu*

6th AUGUST, 1941.

To Capt. I. H. MAYFIELD  
Mr. ROBERT SHIVERS  
Col. GEORGE BICKNELL

Following report on DAKAR given to ----- by Free French business man who was in DAKAR from February 5th till May 28th.

Valuation C 2:—Casual observation believed reliable.

A. *Battleship Richelieu* could proceed at greatly reduced speed, but complete repairs can not be carried out at DAKAR.

B. Other warships at Dakar:—

*Cruisers* Georges-Leygne repeat Georges-Leygne and Gloire repeat Gloire.

*Escort Vessels* D'ENTRECASTEAUX repeat D'Entrecasteaux and Bougainville repeat Bougainville.

Also about 3 repeat 3 destroyers and 15 repeat 15 submarines.

C. *Fortifications* on island of GORÉE have been modernized. Headland at end of the "CORNICHE" also fortified. Fortifications of little strength at RUFISQUE.

D. *Troops* totalled about 15,000 repeat 15,000 Senegalese tirailleurs, spahis and Colonial infantry.

*General BARRAU* repeat BARRAU in command.

*Extract No. 22 for Honolulu*

For: Capt. I. H. MAYFIELD

Mr. Robt. SHIVERS

Col. Geo. BICKNELL

Following is continuation of report on DAKAR dated 6th August.

E. Air-France Service operating twice weekly in both directions MARI-CHANE—CASABLANCA—FORT ETIENNE—DAKAR.

General BERGERET, in charge of French Aviation, visited Dakar regarding project to extend Air-France Service to Brazil, stating that this South American service could be re-established if German air service was allowed to pass through Dakar once a week.

F. Governor BOYSSON refused this and matter was shelved (Valuation for this and immediately preceding paragraph C 1).

Reliable from new contact.

G. Morocco Outgoing visas granted only after approval of German authorities. (Valuation C 1).

H. *Aerodromes* at DAKAR one on the Medina plateau at OUAKAM with 2 asphalt runways (1000 metres by 80 and 1300 metres by 150).

Other aerodrome near Rufisque.

*Seaplane hangars* at BEL-AIR, a little beyond arsenal.

Valuation C 2. Believed reliable from new contact.

I. *Munitions*. Local French officer told source that Navy has supplies but that army is short.

J. *Exercises*. Local Air forces carry out combined exercises with fleet from Monday or Tuesday, to Friday, of each week but seldom on weekend.

K. *Attitude of natives*:

Hatred of Germans indifference to British.

*French community would prefer intervention in Dakar by America to intervention by Britain.*

Valuation C 2.

Believed reliable from new contact.

*Extract No. 75 for Honolulu*

5th August, 1941.

----- organization reports on Formosa for end of June.

A. Orders have been given to recruit 100,000 repeat 100,000 men between ages of 35 and 45 for service in their labour corps.

B. Another 150,000 repeat 150,000 conscripts are to be mobilized for intensive military training.

JAPAN MILITARY, FORMOSA

KEELUNG

Supplies

1. On June 17 s. s. "Horal Maru" arrived at Keelung from Japan with about 400 cases of military uniforms and steel helmets. 200 cases were sent to Karenko per s. s. "Fukusei Maru" and the remainder to Taihoku by train.

2. On June 19 Transport No. 140 arrived at Keelung from Japan with military supplies which were sent by rail to Taihoku and Talchu. The transport left again on June 22 with a full load of copper ore.

3. On June 20 Transport No. 135 arrived at Karenko with 600/700 tons of petrol from Japan via the Pescadores (where she unloaded an unspecified amount of petrol).

## Conscription

4. The Governor of Formosa has received orders to recruit within the next month 100,000 men between ages of 35 and 45 for service in Labour Corps.

5. It is reported that an additional 150,000/200,000 recruits in Formosa are to be mobilized for intensive military training.

## Troop Movements

6. From June 23 to June 29 500 troops of the Taihoku infantry were exercised in coastal defense along the coast near Shinchiku.

7. On June 25 180 artillery arrived at Karenko from Taihoku together with 6 A. A. guns drawn by trucks and 4 A. A. machine guns.

8. On June 25 Transports Nos. 141 and 163 arrived at Keelung and embarked military supplies and provisions. They sailed together for Hainan on June 27.

## TAKAO

9. Transport No. 174 arrived at Takao on June 17 with large quantities of military personnel, equipment (uniforms, steel helmets, respirators, etc.), all of which were sent by rail to Tainan.

10. 60 German naval, military and air force experts and over 30 Japanese officers also arrived by the same vessel. Soon after landing they all embarked in s. s. "Hosan Maru" for the Pescadores. It is reported that all these men will soon be transferred to South China.

11. On June 21 260 Mountain Artillery, together with local recruits left Tainan for Koshun for exercises.

12. On June 25 6 armoured cars and 3 tanks left Tainan for Taito to participate in coastal defence exercises.

13. On June 28 about 800 recruits from the Koshun sector were sent to join the labour corps at Tainan. These men were issued with a complete set of uniforms and equipment, but no rifles. Their ages were between 35-45. On June 30 they returned to Koshun for further training.

## Valuation B. 3.

Secret booklet printed October 1940 by Chinese staff contains following information on Hiroshima Iron Works:

A. Yearly production 9 repeat 9 A. A. guns, three tanks, unknown number of Naval and Military guns. Monthly production of shells 300.

B. Raw materials are obtained from Yawata, Kyushu.

C. 2,000 repeat 2,000 men and women employed.

JULY 30, 1941.

----- organization reports for middle of June.

A. All conscripts in Formosa have been called up for military training.

B. 4,000 troops are stationed at Taichu. These are of all arms and include 6 tanks and 8 armoured cars.

C. The seacoast at Chinchiku has been strengthened by 46 machine guns posts. These are placed at intervals of 150 yards and each holds 6 to 8 mm. They were recently erected in great haste.

AUGUST 5, 1941.

A. It is reported that mobilization and reequipment of troops in Korea Kwangtung and Manchuria is quietly progressing in preparation of eventual movement against the Soviet.

B. There has been a "tug of war" between high ranking military officials as to when move should be launched and that question is still not settled. It is thought that the only event which would stop the move would be a decisive German defeat at hands of Soviet.

C. High Japanese official has expressed some concern over Japanese anti-aircraft defences and lack of air raid protection but no further details were mentioned.

## Report for Honolulu

AUGUST 2, 1941.

----- reports.

A. A large aerodrome is under construction near Kamakura. Note: We believe this is identical with Totsuka aerodrome.

B. Overall dimensions: 3,500 by 3,500 yards.

634 CONGRESSIONAL INVESTIGATION PEARL HARBOR ATTACK

C. Labour force 8,000 repeat 8,000 under supervision of 18 repeat 18 engineers.

D. Aerodrome expected to be completed in August.

E. 3,000 repeat 3,000 parachute troops are under training here.

F. Comment: Valuation C 3.

AUGUST 1,

----- reports on Kobe.

A. The floating dock here, capable of accommodating ships of 16,000 tons, expected to be transferred to Hainan.

B. At the end of May an "aircraft tender" was under repair in this dock.

C. Total of 2,000 repeat 2,000 workmen working day and night shift engaged on aircraft tender and reconditioning the dock.

Valuation C 3.

*Extract for Honolulu*

AUGUST 1,

JAPAN NAVAL CONSTRUCTION OF POCKET DESTROYERS

Secrecy surrounding construction of "Pocket Destroyers"

1. Following information is hearsay and is given with the utmost reserve.

2. Some old hulks have been emptied of machinery and equipment and "pocket destroyers" are being constructed *within* them.

3. As a further aid to secrecy the positions of these hulks are changed by moving them from one place to another.

*Comment*

4. This may be an exaggerated account of Japanese tendencies to secrecy, but there may be something in it, and the report is passed on for what it is worth.

Valuation C 4

AUGUST 4,

----- reports.

A. Naval guns are being made at Osaka arsenal under German supervision.

B. In May 8 warships at Yokosuka were being fitted with new guns from Osaka arsenal.

Valuation C 3.

*Extract No. 20*

To Capt. I. H. Mayfield

Mr. Robert Shivers

Col. George Bicknell

1st AUGUST, 1941

----- reports

A. On June 15th German S. S. Ramses had completed overhaul of engines at Nagasaki.

B. Guns were being fitted and they are expected to be camouflaged as deck guns.

C. Ordnance supplies will be drawn from Osaka arsenal.

D. Strength of crew 150 repeat 150.

Valuation C 3.

To Capt. I. H. M. Mr. Robert Shivers, Col. George Bicknell

1st AUGUST, 1941

----- reports.

A. On June 15th German S. S. RAMSES had completed overhaul of engines at Nagasaki.

B. Guns were being fitted and they are expected to be camouflaged as deck guns.

C. Ordnance supplies will be drawn from Osaka arsenal.

D. Strength of crew 150 repeat 150.

Valuation C 3.

*Extracts for Honolulu*

JULY 31, 1941

A. It is stated that Japanese Government is "contemplating" taking French Concession Shanghai in name of Nanking Government. Japanese military wish to take action as soon as possible but it is not in complete agreement with Japanese Government.

nese naval landing party. Meanwhile Nanking is going ahead selecting personnel for future administration which is entitled "Shanghai Special Administrative Area."

I personally interpret Nankings action as wishful thinking but against this I have warned me that both Japanese and Nanking efforts at penetration of the region have lately been intensified.

AUGUST 5, 1941.

----- organization reports on Formosa for end of June.

Orders have been given to recruit 100,000 repeat 100,000 men between ages 18 and 45 for service in their labour corps.

Another 150,000 repeat 150,000 conscripts are to be mobilized for intensive military training.

JULY 30, 1941.

#### JAPAN NAVAL VENALITY OF JAPANESE NAVAL OFFICERS

On the 28th June the captain of the destroyer ACHI of the 13th Destroyer Division, FASAHARA Asaji ( ), who was under suspicion of having allowed smuggling in his blockade area, was found guilty and was replaced by his superior officer.

-----

The ASHI was patrolling off Hainan Island at the time.

SHINOMI (or HIIMI) Seiichi ( ), commanding the South China Fleet, is suspected by his subordinate officers to be himself financially interested in the Chinese smuggling racket.

When Chiu-Ting-Wah, the puppet magistrate of Chungshan, was assassinated recently in Macau, it was extensively rumoured that SHINOMI's personal interference with the Governor of Macau was brought about by the consideration that Chiu had previously been working hand in glove with SHINOMI in breaking the blockade which the latter himself was responsible for maintaining.

JULY 29, 1941.

----- source not well placed July 25.

Japanese army is calling up all English and Malay speaking Japanese irrespectively of age.

NOTE.—Some Straits born and educated Japanese have left for army service in Japan.

----- value 3.

30th JULY, 1941.

#### *Extract No. 73 for Honolulu*

----- organization reports for middle of June.

All conscripts in Formosa have been called up for military training.

4,000 troops are stationed at Taichu. These are of all arms and include tanks and 8 armoured cars.

The seacoast at Chinchiku has been strengthened by 46 machine guns posts. They are placed at intervals of 150 yards and each holds 6 to 8 men. They were recently erected in great haste.

JULY 30, 1941.

#### *Extract for Honolulu*

----- is reported:

Japanese Government is considerably perturbed by the "insincerity" of the Chinese Government."

Japanese Government states that in spite of military "representations" by Japanese Minister at Bangkok, there has been little if any improvement in the unpromising attitude of Siamese Government towards Japan and that it is largely due to British and American intrigue and influence.

Instructions have been sent to Japanese Minister at Bangkok to make her immediate and strong representations to Siamese Foreign Office on this matter.

FEI WEN CHUAN further stated Japanese Government in carrying out her programme in French Indo-China is most anxious that its relations with France shall be clarified and that unless latter changes its attitude toward Japan her coprosperity programme Japan will take whatever steps she deems necessary to bring Siam into line.

AUGUST 20, 1941.

----- reports on oil fuel tanks in Pescadores.

A. *Ansan Naval Base*.—Large surface tank capacity 600 repeat 600 tons.  
Small surface tank capacity 400 repeat 400 tons.

B. 1 underground at Taishoku Fort capacity 400 repeat 400 tons.

C. 1 underground tank at Kelmo-U aerodrome capacity 300 repeat 300 tons.

D. Comment: It is regretted that source was unable to differentiate between types of oil fuel.

Valuation C 2.

JULY 29TH, 1941.

*Extract No. 18 for Honolulu*

A. Following is actual text of order issued on July 28th (but not published by K. OYAMADA for administrative Commissioner Chinese Maritime Customs obtained very confidentially.

Begins:

B. Shipments of exportation and interport export for America and England and their colonies, Burma, French Indo China, Hongkong and unoccupied areas of China of following goods are temporarily to be referred to me before release:—

Machinery, provisions, oils, chemicals, cereals and fodder, fertilizer, cotton piece goods and yarn:—

Except for Japan and North China:—

Signed K. Oyamada.

(Sent to Capt. I. H. Mayfield, Mr. Robert Shivers, Col. Geo. Bicknell)

JULY 28TH, 1941.

*Extract No. 19 for Honolulu*

A. June 16th 150 repeat 150 infantry transferred from TAICHU to KOGO for parachute training and on June 18th 200 repeat 200 paratroops were transferred from KOGO to ROKKO.

B. KOGO area now under martial law and entry near-impossible.

C. Recruiting for army and labour corps still being maintained.

JULY 26, 1941.

*Extract for Honolulu.*

It was reported July 24.

A. Thailand is secretly making preparations of a military character and is not releasing, as originally intended, certain classes called up over the Indo China dispute.

B. The Thai delegates who have gone to the Indo China border to take over the ceded territory have also been given a special mission which is presumed to be connected with Japanese Southward move.

JULY 23, 1941.

It has further been reported that circular has been issued to German firms by German Chamber of Commerce, on instructions from Commercial Counsellor instructing them that they *must* keep all goods purchased for export to Germany for a period of at least five months (from middle of July) since it can be expected that transport via Siberia will be resumed before expiration of that period. In the event of firms encountering difficulty over go-down storage space they are advised to ship goods to Dairen for storage. Further all purchases of goods in immediate future for export to Germany must be of "non-perishable" kind.

AUGUST 5, 1941.

## JAPAN NAVAL FLEET ORGANIZATION

Following is passed with utmost reserve:

1. In June the Japanese Navy will be divided into 4 fleets with Admiral Kato as Commander-in-Chief.

2. The 1st Fleet will be stationed near Indo-China, Thailand and Hainan.

[2] 3. The 2d fleet will be the main force for the southward advance.

The 3d fleet will be stationed to cover the Pacific flank and watch the American Fleet.

The 4th fleet will be engaged in transport (? convoy) work.

Valuation C 5.

JULY 28, 1941.

It is stated that according to information obtained from local Japanese naval authorities intended to construct a submarine base at CAMRANH BAY. Also, according to letters from Tokyo and Hanoi to localordia Club it was clear that immediate steps were to be taken:

Completely to suppress all pro Chungking elements in Indo China.

To encourage Annamite independence movement which would be definitely Japanese and anti French.

believes object of such a move is creation of internal domestic trouble throughout Indo China which will provide further excuse for expansive Japanese control.

to Capt. I. H. Mayfield, Mr. Robert Shivers, Col. Geo. Bicknell)

JULY 25TH, 1941.

*Extract No. 16 for Honolulu*

----- reports.

On June 8th following units of 12th repeat 12th division total strength repeat 6,000 left Hainan for Manchuria.

h infantry regiment.

h infantry regiment.

h artillery regiment.

On June 14th HIROSE (EGZ IRX) infantry regiment of 11th repeat 11th on left Hainan. On June 30th this unit arrived Dalren and went on to TUNGKIANH in Manchuria.

----- reports that on June 24th 11th cavalry regiment of 11th division left WHAMPOA from North River area and embarked for Manchuria.

Valuation C 3.

Message ends.

to Capt. I. H. Mayfield, Mr. Robert Shivers, Col. Geo. Bicknell)

JULY 25TH, 1941.

*Extract No. 15 for Honolulu*

----- reports July 25th.

July 18th 200 repeat 200 Japanese secret police arrived Saigon.

July 21st Lieutenant General HOMMA (GOK TTA) commander-in-chief of Japanese army and Major General SUMIDA (IPB JYS) arrived Saigon with repeat 30 German and Italian advisers.

On mornings of both July 20th and July 21st aid reconnaissance carried on Saigon by 6 aircraft.

July 20th one cruiser, one destroyer, one unidentified auxiliary and four transport ships arrived CAMRANH BAY.

Message ends.

*Extract No. 79 for Honolulu*

23RD JULY, 1941.

has further been reported that circular has been issued to German firms German Chamber of Commerce, on instructions from Commercial Counsellor, acting them that they must keep all goods purchased for export to Germany period of at least five months since it can be expected that transport via sea will be resumed before expiration of that period. In the event of firms entering difficulty over go-down storage space they are advised to ship to Dalren for storage. Further all purchases of goods in immediate future for export to Germany must be of "Non-perishable" kind.

*Extract for Honolulu*

JULY 22

It was reported 12 July that in Japanese whispering campaign in following is now being said:

1. in MENADO. Japan has decided to attack N. E. I. Local Japan be taken off in vessels from Pelao.
2. Japan will send her invading forces, ships and aircraft to N. E. eastward of the Philippines. N. E. I. will capitulate before aid from arrives.
3. Japanese will not be evacuated as evacuation would give N. E. I. in of pending attack.

*Extract for Honolulu*

JULY 16

## HONG KONG—JAPANESE SPONSORED SUBVERSIVE ACTIVITIES

Following information is dated June 20, 1941.

1. WANG KI (——), who was previously Wang Ching Wei's representative in Hong Kong is now the Police Commissioner at Canton. The post of representative has been taken over by LAM FEI (——).
2. LAM FEI (——) with 45 senior agents under him, is mainly in the collection of military intelligence in Hong Kong; they also recruit tionable characters for subversive activities.
3. The removal of the Japanese Military Attache's Department to Macau caused the Japanese great inconvenience. TAKEDA, of the Special Section, has now been attached to the Japanese Consulate in Hong Kong to control the intelligence section here.

## INCITEMENT OF DISTURBANCES AND RIOTS

4. Plans are prepared for the creation of strikes, disturbances and riots and if Japan breaks with Britain. One of the principal agents employed in this department is JOHN LUI (——), a senior member of the Shanghai Fing Insurance Co. Lui's headquarters is established at 19/20 Connaught West, 3rd floor (next door to the Ping On Hotel), where he is operating CHUN KIN FIRM (——). He left for Shanghai recently and a few days ago returned to Hong Kong; it is believed that it is his intention to go to Singapore in the near future.
5. One of Lui's close associates is the son of the Chief Detective of Hong Kong, CHENG SAI-HOI. Lui is also believed to have been the founder of the Man Alumni Association (——).
6. According to information imparted to an agent in the employment of the Japanese, FURUKAWA (——), Chief of Japanese Naval Intelligence at Macau, learned that the Japanese hope to have recruited about 100,000 refugees as sleeper agents to take part in sabotage and nuisance activities in Hong Kong in the event of an outbreak of hostilities between Britain and Japan.
7. A large number of refugee street-sleepers are already receiving financial assistance from the Japanese.
8. *Japanese Agents.* Other Chinese employed by the Japanese are: TAM KWOK-WA (——), who was employed by the Special Service Department at Macau to act as Liaison between them and Agents in Hong Kong in this connection he made innumerable visits here.
- CHAU WING TING (——), who has been in the employ of the Japanese in Hong Kong for the past ten years, mainly operating in the Swatow/Amoy sector. He is believed to be residing in Connaught Road West (1st Floor—the number is at present unknown and is being investigated).

## ARMS SMUGGLING

9. Source stated that puppet officials of the Chungshan area and Japanese agents are being permitted to enter Macau with arms, and it is through this channel that a large quantity of illicit arms are being smuggled into Hong Kong.

[Extract No. 13 for H]

*Telegram from Hongkong of July 19th, 1941*

----- reports June 15th.

A. June 1st 150 repeat 150 mines and 60 repeat 60 torpedoes landed at KARENKO, E. Coast Formosa, 24° N 121° E, from Islands.

B. During June Pescadore Naval units carried out mine laying operations along the Formosan coast. (Message ends.)

[Extract No. 14 for H]

*Telegram from Hongkong of July 19th, 1941*

----- reports June 15th.

A. June 4th 6 repeat 6 twin-engine monoplane bombers arrived KARENKO from Japan en route for Hainan.

B. On June 7th 6 repeat 6 monoplane fighters arrived HEITO from Japan.

C. On June 11th 12 repeat 12 monoplane fighters left KAGI for QUEMOY. (Believed all aircraft at Quemoy had left for Hainan).

D. Aircraft based Heito June 10th:

9 repeat 9 twin-engine monoplane bombers.

18 repeat 18 monoplane fighters.

3 repeat 3 reconnaissance.

12 repeat 12 trainers.

3 repeat 3 transports (3 engine monoplanes).

E. Aircraft based KAGI aerodrome June 10th:

9 repeat 9 monoplane bombers.

18 repeat 18 monoplane fighters.

14 repeat 14 reconnaissance.

E. On June 8th 500 repeat 500 paratroops arrived KOGO from TAIHOKU for training. Present number of paratroops at Kogo now about 1000 repeat 1000. Message ends.

[Extract No. 12 for H]

*Telegram from Hongkong of July 17th, 1941*

Commissioner of Customs Hongkong reports that on July 16th the following were observed at BOCCA TIGRIS:

25 repeat 25 transports.

100 repeat 100 (approximately) landing barges (empty).

1 repeat 1 motor landing craft. Message ends.

JULY 14, 1941

*Extract for Honolulu*

----- reports.

A. On April 19 two armed merchant men arrived Kobe and unloaded scrap metal and 1,000 caskets of ashes and were loaded up with construction materials and 40 cases of aircraft components.

B. The cases measured about 8 x 6 feet.

C. 400 men of a naval landing party and 130 coolies who had been segregated until going on board embarked on April 21.

D. The ships left for Spratley Island on April 21.

JULY 14, 1941

----- reports.

A. On April 20, 2 repeat 2 of the German vessels lying at Kobe left for Kure.

B. Guns to be fitted and ships will be ready for sea again at the beginning of August.

JULY 15, 1941.

----- reports on French Indo China and Hainan:

A. On June 8 12,000 men left French Indo China.

B. It is rumored that they were bound for Manchuria but this is given with great reserve.

C. On June 14 the following units of the 11th repeat 11th Division, t  
 3300 repeat 3300 men left Hainan for unknown destination:  
 HIROSE (EGZ IRX) infantry regiment  
 NAKAMURA (AAW GPA) Medium Artillery Battalion  
 HIRAOKA (FEU DYJ) Transport Company  
 YOSHINO (BAD TAK) and KUNO (COP MZA) Cavalry Squadron

JULY 14

*Extract for Honolulu*

A translation of a letter from Information Section of Concordia Society  
 branch of same, dated July 2, which states that on that day the nationa  
 in connection with Russo-German war was decided at a liaison converence b  
 the Government and High Command. The following general principle  
 stated to have been decided upon.

A. Japanese Government recognizes as her main guiding principles  
 tional safety and the success at any cost of establishment of new order  
 Asia.

B. Japan must depend only upon her strength and resources and conc  
 her attention upon East Asia problems.

C. She must use every means to further her own aims but always ta  
 consideration the constantly changing international position and must no  
 herself to be detracted from her present course by any claims requests  
 gestions if even slight risk of wasting her power and resources is involved.

JULY 12,

*Extract for Honolulu*

----- reports.

A. 20 repeat 20 of these vessels are under construction at Harima sh  
 Osaka.

B. 24-hour shifts were being worked on these jobs in May.

C. Vessels are expected to be completed at end of July.

D. Specifications:

Displacement 100 tons.

Dimensions 200 ft. x 28 ft. x 5 ft. 6".

(Note that these dimensions will give displacement of well over that r  
 and are therefore given with the utmost reserve).

Speed: 30 knots.

Armament: 6 machine guns.

E. Source further stated that these ships are to be used as troop landin  
 in the Southern expansion movement.

Valuation B 3 for paragraphs A to C only.

*Extract for Honolulu*

July 9,

----- reports.

A. In collaboration with German advisers the construction of 75 rep  
 submarines is projected in Japan.

B. Shipyards in Osaka have been allotted 20 repeat 20 of these jobs o  
 which the Osaka Iron Works are to build 4.

C. Valuation C. 3.

July 11, 194

----- reports from Japan on aerial bomb factory in Himeji.

A. Name of factory is Nakabe (AAW? SRY) Heavy Industrial W

B. Labor force in mid May 600 repeat 600.

C. Monthly production 3,000 aerial bombs and 2,500 flares.

D. 4 repeat 4 German engineers are attached.

July 11,

----- reports mid May.

A. A Shadow factory situated at Kawaguchi in Osaka has now started  
 ufacture of fighter aircraft wings and parts of fuselage for the Aichi F  
 Nagoya.

B. Labor force 2,600 repeat 2,600 working ten hours per day.

C. Estimate of production is wings etc., for about 100 fighters per mo

D. 3 German advisers are attached to the Kawaguchi Factory.

*Extract from letter from Manila 7-12-41*

Commandeering of Japanese ships by the Japanese government reached significant proportions,—many vessels used wholly in Japanese commercial interests and *not* running to U. S. ports. Nothing seems to be brewing in Japan, and although anything except helpful waiting by Tokio may make no sense to us the symptoms nevertheless indicate preparations for activity against either Russian Maritime Province or Indo China. I think *not* a) because of the strength and separateness of the Russian Empire in the Far East and probably latter). It seems extraordinary that the Japanese should not now begin to turn towards America and cease their irritating gestures—but the preparations are proceeding and the removal of these profitable vessels is costing them money in the meantime.]

GERALD WILKINSON

[Copy]

*Controller.*

decides all *quantities* of all materials required by factory under his control. Controls all *purchases* of tools, machines, etc. He even control development and study of prototypes. He decides all promotions, changes in personnel, organization of leisure and settlement of internal disputes. He supervises allotment of salaries, wages and bonuses. His control is complete and his decisions are final.

*Trained Engineers.*

Only certificated engineers from *Imperial* Universities of Tokyo, Kyoto, etc., are earmarked for Naval, military or aviation factories. Engineers with certificates from *private* universities (such as Waseda) may be employed in other defence industries. Factories which are not working for national defence get no certificated engineers. Numbers are carefully fixed, e. g., Ishikawajima is Allowed only 3 Imperial University graduates per annum. This system extremely unpopular amongst students.

*Limitation of Salaries.*

Imperial University engineers draw total yearly salary and bonus of 1440 Yen. Graduates from private university get only 1170 Yen annually. Salaries only begin after five years service and absolute maximum attainable is 1440 Yen per annum.

*Artisans.*

Average wages are 50 to 65 sen per hour, with exceptionally good hands get Yen 1.25 to 1.50 per hour with a working of 12 hours, this works out at lower salaries than that of certificated engineers. Good workmen are treated with utmost circumspection but in spite of this they are often held up by absence of whole gangs who are shamming sick and have no work a week or fortnight's holiday.

*Discipline.*

Factory personnel may change their factory or branch of work without consent from the controller. Management is a matter of utmost delicacy as personnel is excessively sensitive and will accept no supervision. They are also disinclined to accept any responsibility.

*Naval and Military Friction.*

This extends to an astonishing degree, even when the same article is being used for both services. Drawings of all drawings have to be produced in two different forms for the Army and Navy. Component parts have to have entirely different names for the Army and Navy with the result that double checking and control service has to be established.

Two distinct *trial and reception* services have to be established. Wastage involved in this duplication is incalculable.

*Extract for Honolulu*

July 7, 1941

Source reports that he has been informed by two separate Chinese sources that they understood Japan promised Germany, in return for recognition of Wang Ching Wei, to blockade Vladivostok and that action was likely at an early date.

July 12, 1941

----- reports on the Aichi Aircraft Factory, Nagoya.

A. Beginning of April 3 German engineers arrived at this factory from the Dornier works.

B. Name of one is given as Andernich (DJI IZU DUN).

C. They are supervising construction of a new type of fighter.

D. This is described as K.22 type twin-engine 2 seater. It is still in the experimental stage.

E. Production aimed at is 50 repeat 50 per month. (Note that production figures of this aircraft coincide with those given for dive bomber reported as being manufactured in this factory in January.)

F. Labor force 2,600 repeat 2,600 working 24-hour shifts.

*Extract No. 9 for Honolulu*

To London :

3rd July, 1941

A. A Chinese Maritime Customs cruiser which had been scuttled by the Chinese in West River area has been salvaged by Japanese and put into commission for the Kwangtung Defense Headquarters.

B. Name HIP LIK.

Length about 310 feet.

Armament one small gun at bow and stern and two machine guns.

C. Note please that this vessel has been definitely allocated to the Puppet Chinese Naval Force.

*Extract No. 10 for Honolulu*

2ND JULY, 1941

To London :

A. There is no repeat not landing ground at Boryo.

*Katosha* is evidently identical with *Kato* and there is definitely a landing ground with two hangars here.

There is also a landing ground at *Suiteiryu*, which is usually used in connection with military training at Boryo.

B. *Koko* is believed to be the same as *Kogo*, but we do not repeat not agree with longitude of the latter place as given by you (we make it 121 degrees 03 minutes East). *Koko* is believed to be the centre of parachute training in Formosa.

My immediately following telegram.

*Extract No. 11 for Honolulu*

2ND JULY, 1941.

To London :

My immediately preceding telegram.

*Shinchiku* is an entirely separate aerodrome and we believe that naval air force units are permanently based here.

C. Agreed that *Reigaryu* is the same as *Takao*.

D. *Taihoku* aerodrome is equipped for night flying and has a civil aviation school and a military aviation centre attached.

*Matsuyama* was originally a civil aerodrome but barracks have recently been built here.

E. Detailed summary and sketch maps of aerodromes in Formosa have been despatched by bag.

*Extract No. 2 for Honolulu*

18TH JUNE, 1941

A. *Controller*.—Decides all quantities of all materials required by factory under his control.

Controls all purchases of tools, machines, etc.

Can even control development and study of prototypes.

Decides all promotions, changes in personnel, organization of leisure and adjustment of internal disputes.

supervises allotment of salaries, wages and bonuses.

control is complete and his decisions are final.

12th JUNE, 1941

JAPAN—MILITARY—BODY ARMOUR

Following item from ----- dated 19th March, 1936, may be of interest in view of recent reports of bullet proof vests, etc.

An excellent anti-bullet steel has been evolved by the Metallurgical Laboratory of the Tohoku Imperial University headed by Mr. K. Konda. According to the latest Announcement, the steel is composed of the following:—

0.15–0.35% of carbon,  
0.5–1.5% of chrome,  
0.6–2.0% of manganese,  
0.2–1.0% of molybdenum,  
0.2–1.0% of cobalt of banadium,  
0.9% of silicon  
and the remainder iron.

Series of tests for hardness proved that the metal was more efficient than the foreign anti-bullet steel. Discoverers of the metal are Messrs. K. Ono and H. Hiba.

Federal Bureau of Investigation, U. S. Department of Justice, Aug. 9, 1941. (Honolulu Field Office.)

*Extract No. 24*

To Capt. I. H. MAYFIELD  
Mr. ROBT. SHIVERS  
Col. GEO. BICKNELL

Following is summary information to hand on HULL.

A. AMOS TYLER HULL, employed by R. K. O. Pictures.

B. Is known to have received special facilities over a considerable period of time from Japanese Military in Mongolia, Hangchow and Shanghai areas and has stated that he could secure passes at any time for any area from Japan.

C. Shanghai French Intelligence emphatic that Hull was in Japan (#1421)

*Extract No. 33 for Honolulu*

A. Local Agents Tokio Fire and Marine Insurance Company received August 15 from Tokio instructing them:

1. To accept no new business or renewals until further notice.
2. To cancel local reinsurance Treaty.
3. To persuade local Japanese clients to insure direct with Japan if possible.

B. This company's 1940 premium income from Philippines slightly over 200,000 pesos (25,000 pounds).

(Valuation A 1.)

To: Col. BICKNELL  
Mr. SHIVERS

A. Source reports that on September 20 he met a certain CHIU CHE, who is head of a certain department of the Nanking Ministry of War.

B. Latter stated, a propos of announcement over the radio of sentence passed on a Japanese in Singapore for possession of seditious literature that "General HATA had very secretly approached head of War Ministry of Japan requesting his cooperation in enlistment of Chinese agents for work in Burma and Malaya. HATA stipulated that candidates should be either FUKINESE or Chinese speaking dialect of that province.

C. Chiu Che Sheng stated that a certain number of men were recruited and despatched overseas at hands of one CHEN KUANG, returned Japanese agent. Chinese. Those chosen, in all cases, had some previous military knowledge through service at one time or another with Chinese forces. According to CHEN KUANG is responsible directly to Japanese military H. Q. at Nanking and to all their authority.

D. Source endeavours to follow up. It is sent merely because of Chiu Sheng's statements were spontaneous but it is not known if they have any foundation in fact.

(Value 3.)

*Extract for Honolulu*

—Who was recently elected as a Sakdal candidate for next political elections, states that local Japanese agents (whose names I have given to you) Military Intelligence have recently been cultivating him closely and volun- teered the following information.

A. 650-700 aeroplanes are now assembled on Formosa.

B. Attack on Philippines and Singapore simultaneously, will take place by end August.

C. Campaign in Philippines to begin with rising in Mindanao and then in Manila.

D. Attack on Singapore to be overland through Siam, where at least 3 divisions of Siamese army will support Japanese.

E. Heavy troop concentrations are ready in Hainan and Saipan. This is like a whispering campaign.

(Valuation C 3.)

## CLAUSEN INVESTIGATION EXHIBIT No. 7

*Investigation by Lt. Colonel Henry C. Clausen, JAGD, for the Secretary of War  
Supplementary to Proceedings of the Army Pearl Harbor Board*

The first two documents are notes of two intercepts dated 6 December 1941 of messages from the Japanese Consul at Honolulu to Tokyo and which were not included in Top Secret Exhibit "B" before the Army Pearl Harbor Board. The documents following those mentioned in *a* above are the intercepts which comprise Top Secret Exhibit "B" before the Army Pearl Harbor Board. Certain of these have been initialed by witnesses before me and are referred to in my affidavits.

#253 release p5 ——— 123a.

1. On American continent in Oct. Army began training barrage balloons at Camp Davis, N. C., 400,500 balloons considering use in defense of E. Panama. So far as Hawaii concerned though investigations made, they set up mooring equipment, nor have they selected troops to man them. No signs barrage balloon equipment. "In a ing for maintenance balloons. No signs barrage balloon equipment. "In a it is difficult to imagine that they have actually any limits to barrage balloon fence. "I imagine that in all probability there is considerable opportunity to take advantage of a surprise attack against these places.

In my opinion battleships do not have torpedo nets. Details not known report results of investigation.

Strictly secret.

Henceforth, we would like to have you make reports concerning vessels the following lines insofar as possible.

1. The waters (of Pearl Harbor) are to be divided roughly into five sub (We have no objection to your abbreviating as much as you like.)

Area A. Waters between Ford Island and the Arsenal.

Area B. Waters adjacent to the Island south and west of Ford Island. area is on the opposite side of the Island from Area A.)

Area C. East Loch.

Area D. Middle Loch.

Area E. West Loch and the communicating water routes.

2. With regard to warships and aircraft carriers, we would like to have report on those at anchor, (these are not so important) tied up at wharves, buoys and in docks. (Designate types and classes briefly. If possible we like to have you make mention of the fact when there are two or more vessels along side the same wharf.)

#943 (Part 1 of 2)\* (To be handled in Government Code)

I had an interview with Rear Admiral TURNER. If I sum up what he me, it is this:

\*—For part 2 see S. I. S. #23516.

What the United States wants is not just a pretense but a definite promise. To hold a conference of the leaders of the two governments be held without a definite preliminary agreement, and should, in the meantime, an advance be made into Siberia, the President would be placed in a terrible predicament. He speaks of peace in the Pacific and talks as if she can decide matters independently, and so it would seem to me that Japan could set aside most of her obligations toward the Three-Power Alliance. As to the question of withdrawing stationing troops, since it is impossible to withdraw troops all at once, it would seem that a detailed agreement could be arranged between Japan and America for a gradual withdrawal."

He speculated on the various difficulties which Japan had to face internally. It seems that this opinion of his has also been given to the Secretary of State.

3. (Part 2 of 2)\*

He said that should the Russo-German war suddenly end and should Germany win Great Britain peace, it would be after all a German peace and England would not now accept it. Now, this man is a responsible fellow in an important position and I take it that this is the view of the Navy. On the other hand, MOORE and his following consider that should Moscow make a separate peace with Berlin and should Berlin then turn to London with generous peace terms, the whole fray would end with unimaginable quickness. CASTLE<sup>b</sup> told me that EDWARD GIBSON feels the same way and that Japan, too, should be on the alert for this possibility. This, however, I take to be a minority view entertained by Isolationists. MOORE<sup>c</sup> reports that Secretary HULL told Senator THOMAS that he is proceeding patiently with the Japanese-American negotiations, but he does not think that Japan will not mistake this for a sign of weakness on America's part, and that no answer had arrived to the memo of October 2nd. KIPLINGER<sup>d</sup> reports that there is a very good basis for rumors of a cessation of hostilities between Russia and Germany and that the chances for war between Japan and the United States are fifty-fifty.

\*Part 1 of 2 not available.

File (CA)

1

Although I have been requested by both the German and Italian Ambassadors in Tokyo to give them confidential information on the Japanese-American negotiations, I have, in consideration of the nature of the negotiations, been declining to do so. However, early this month, following the German attacks on American merchant ships and the consequent (revival?) of the movement for the revision of the Neutrality Act, the German authorities demanded that the Japanese Government submit to the American Government a message to the effect that the Japanese Government observes that if the ROOSEVELT Administration continues to back the Axis Powers increasingly, a belligerent situation would inevitably develop between Germany and Italy on the one hand and the United States on the other, and this would provide the reasons for the convocation of the duties envisioned in the Three Power agreement and might lead Japan to join immediately the war in opposition to the United States. We have not, as yet, transmitted this message because, in view of the Japanese-American negotiations, we found it necessary to consider carefully the proper timing as well as wording of the message. The German authorities have been repeatedly making the same request and there are reasons which do not permit this matter to be postponed

any longer. While Japan on the one hand finds it necessary to do something the way of carrying out the duties placed upon her by the Three Power Agreement she had concluded with Germany, on the other hand, she is desirous of making a success of the Japanese-American negotiations. Under the circumstances she can do no other than to warn the United States at an appropriate moment such words as are given in my separate wire and as would not affect the Japanese-American negotiations in one way or another. This message is a message between me and you.

(Separate Wire)

The Imperial Japanese Government has repeatedly affirmed to the American Government that the aim of the Tripartite Pact is to contribute toward the prevention of a further extension of the European war. Should, however, recent tension in the German-American relations suffer aggravation, there would arise a distinct danger of a war between the two powers, a situation in affairs over which Japan, as a signatory to the Tripartite Pact, naturally must help entertain a deep concern. Accordingly, in its sincere desire that notwithstanding the German-American relations will cease further deterioration but that the existing tension will also be alleviated as quickly as possible, the Japanese Government is now requesting the earnest consideration of the American Government.

I have already wired you something about my present psychology. I am aware that I, too, should go out with the former cabinet. I know that for some time the Secretary of State has known how sincere your humble servant is, and how little influence I have in Japan. I am ashamed to say that it has come to my ears that this is the case. There are some Americans who trust this novice and who say that things will get better for me, but alas, their encouragement is not enough. Among my confreres here in the United States there are also some who feel the same way, but, alas, they are all poor deluded souls. As for Your Excellency's instructions, WAKASUGI can carry them out. Nor do I imagine that you all have any objections. I don't want to be the head of a dead horse. I don't want to continue this hypocritical existence, deceiving other people. No, don't think I am trying to flee from the field of battle as a man of honor this is the only way that is open for me to tread. I send me your permission to return to Japan. Most humbly do I beseech your forgiveness if I have injured your dignity and I prostrate myself before you to the depth of my rudeness.

(Of utmost secrecy).

Because of various circumstances, it is absolutely necessary that all arrangements for the signing of this agreement be completed by the 25th of this month. I realize that this is a difficult order, but under the circumstances it is an avoidable one. Please understand this thoroughly and tackle the problem of saving the Japanese-U. S. relations from falling into a chaotic condition so with great determination and with unstinted effort, I beg of you.

This information is to be kept strictly to yourself only.

JD-1: 6254 Secret (D) Navy Trans. 11-5-41 (S-TT)

Tokyo  
 Hongkong  
 December 14, 1941

119 (To be handled in Government Code)

(Strictly secret outside the Department)

While the Imperial Government hopes for great things from the Japanese negotiations, they do not permit optimism for the future. Should the negotiations collapse, the international situation in which the Empire will find itself will be one of tremendous crisis. Accompanying this, the Empire's foreign policy it has been decided by the cabinet, insofar as it pertains to China, is: we will completely destroy British and American power in China.

We will take over all enemy concessions and enemy important rights and interests (customs and minerals, etc.) in China.

We will take over all rights and interests owned by enemy powers, even if they might have connections with the new Chinese government, should it become necessary.

In realizing these steps in China, we will avoid, insofar as possible, exhausting our veteran troops. Thus we will cope with a world war on a long-time basis. Should our reserves for total war and our future military strength wane, we have decided to reinforce them from the whole Far Eastern area. This has been the whole fundamental policy of the Empire. Therefore, in consideration of the desirability to lighten our personal and material load, we will encourage the activities of important Chinese in their efforts in the occupied territories insofar as is possible. Japan and China, working in cooperation, will take over military bases. Thus, operating wherever possible, we will maintain peace throughout the entire Far East. At the same time, we place great importance upon the acquisition of materials (especially from unoccupied areas). In order to do this, all in the cabinet have concurred, in view of the necessity, of a reasonable relaxation of the various restrictions now in force (after you have fully realized the critical situation which has brought the above decisions upon you will, of course, wait for instructions from home before carrying them out).

In connection with the above, we have the precedent of the freezing legislation. We are wiring you this particularly for your information alone. Please keep it very quiet the existence of these decisions and the fact that they have been transmitted to you.

The message is directed to Nansu,\* Hokudai,\* Shanghai, Tientsin, Hsinkingow, and Hongkong. Hokudai\* will transmit to Kalgan and Taiyuan. Tsing-tai will transmit to Tsinan. Canton will transmit to Amoy.

1. The warships at anchor in the Harbor on the 15th were as I told you in my #219<sup>a</sup> on that day.

Area A<sup>b</sup>—A battleship of the Oklahoma class entered and one tank ship departed.

Area C<sup>c</sup>—3 warships of the heavy cruiser class were at anchor.

2. On the 17th the Saratoga was not in the harbor. The carrier, Enterprise, or some other vessel was in Area C. Two heavy cruisers of the Chicago class and one of the Pensacola class were tied up at docks "KS". 4 merchant vessels were at anchor in Area D.<sup>d</sup>

3. At 10:00 a.m. on the morning of the 17th, 8 destroyers were observed entering the Harbor. Their course was as follows: In a single file at a distance of 1,000 meters apart at a speed of 3 knots per hour, they moved into the Harbor. From the entrance of the Harbor through Area B to the buoy in Area C, to which they were moored, they changed course 5 times each at roughly 30 degrees. The elapsed time was one hour, however, one of the destroyers entered Area A after passing the water reservoir on the East side.

Re my #797\*

The condition outlined by them namely "After the peaceful policies of Japan  
been made more definite" we imagine would naturally have reference to  
question of the three-power treaty. It does not mean merely that Japan  
withdraw her troops from Southern Indo-China, and that then the U. S.  
go back to conditions prior to the freezing act. It leaves the way open for  
U. S. to bring up rather complicated terms.

On the other hand, the internal situation in our country is such that it would  
difficult for us to handle it if we withdraw from Southern French Indo-China,  
ly on assurances that conditions prior to this freezing act will be restored.  
ould be necessary to have a proposed solution that would come up to the B\*\*  
osal. With the situation as urgent as it is now, it is of utmost importance  
you play your hand for the amelioration of the situation, to the extent of  
proposal in your message, then to push on for an understanding.

The Ambassador did not arrange this with us beforehand, but made the pro-  
posal contained in your message for the purpose of meeting the tense situation  
ing within the nation, but this can only result in delay and failure in the  
negotiations. The Ambassador, therefore, having received our revised instruc-  
, (after reading our #797\*, #800\*\*\* and #801\*\*\*\*) will please present  
B\*\* proposal of the Imperial Government, and no further concessions can  
ade.

If the U. S. consent to this cannot be secured, the negotiations will have to be  
en off; therefore, with the above well in mind put forth your very best  
ts.

Please note what you say in your #1133\*\*\*\*\* and, #1134\*\*\*\*\*, but in these nego-  
ns consent can be given only within the scope of the instructions of this  
We would emphasize this.

To both you Ambassadors.

It is awfully hard for us to consider changing the date we set in my You should know this, however, I know you are working hard. Stick to policy and do your very best. Spare no efforts and try to bring a solution we desire. There are reasons beyond your ability to guess. I wanted to settle Japanese-American relations by the 25th, but if within the next three or four days you can finish your conversations with the Americans if the signing can be completed by the 29th, (let me write it out for the twenty-ninth); if the pertinent notes can be exchanged; if we can get an understanding with Great Britain and the Netherlands; and in short if everything can be finished, we have decided to wait until that date. This time we are not automatically going to happen. Please take this into your careful consideration and work harder than you ever have before. This, for the present, is information of you two Ambassadors alone.

—See J. D. #6254. Tokyo wires Washington that because of the various circumstances it is absolutely necessary that arrangements for the signing of the agreement be completed by the 25th of this month.

#1180. (Part 1 of 2)

From NOMURA and KURUSU.

As we have wired you several times, there is hardly any possibility of having them consider our "B" proposal in toto. On the other hand, if we let the situation remain tense as it is now, sorry as we are to say so, the negotiations will inevitably be ruptured, if indeed they may not already be called so. Our failure and humiliation are complete. We might suggest one thing for saving the situation. Although we have grave misgivings, we might propose, first, that President ROOSEVELT wire you that for the sake of posterity he hopes that Japan and the United States will cooperate for the maintenance of peace in the Pacific (just as soon as you wire us what you think of this, we will negotiate for this sort of an arrangement with all we have in us), and that you in return reply with a cordial message, thereby not only clearing the atmosphere, but also gaining a little time. Considering the possibility that England and the United States are scheming to bring the Netherlands Indies under their protection through military occupation, in order to forestall this, I think we should propose the establishment of neutral nations, including French Indo-China, Netherlands India and Thai. (As you know, last September President ROOSEVELT proposed the neutrality of French Indo-China and Thai.)

From: Washington  
To: Tokyo  
November 26, 1941  
Purple. (Extremely urgent)

#1180. (Part 2 of 2)

We suppose that the rupture of the present negotiations does not necessarily mean war between Japan and the United States, but after we break off, as we said, the military occupation of Netherlands India is to be expected of England and the United States. Then we would attack them and a clash with them would be inevitable. Now, the question is whether or not Germany would feel duty bound by the third article of the treaty to help us. We doubt if she would. Again, you must remember that the Sino-Japanese incident would have to wait until the end of this world war before it could possibly be settled.

In this telegram we are expressing the last personal opinions we will have to express, so will Your Excellency please be good enough at least to show it to the Minister of the Navy, if only to him; then we hope that you will wire us back instantly.

From: Washington (Nomura)  
To: Tokyo  
November 26, 1941  
Purple. (Extremely urgent)  
#1190. (Part 2 of 2)\*

To be handled in Government Code.

The United States is using the excuse that she is at present negotiating with the various competent countries. In view of the fact that she will propagandize that we are continuing these negotiations only with the view of preparing for our expected moves, should we, during the course of these conversations, deliberately enter into our scheduled operations, there is great danger that the

responsibility for the rupture of negotiations will be cast upon us. There have been times in the past when she could have considered discontinuing conversations because of our invasion of French Indo-China. Now, should we, without clarifying our intentions, force a rupture in our negotiations and suddenly enter upon independent operations, there is great fear that she may use such a thing as that as counter-propaganda against us. They might consider doing the same thing insofar as our plans for Thai are concerned. Nevertheless, such a thing as the clarification of our intention is a strict military secret; consequently, I think that it might be the better plan, dependent of course on the opinions of the Government, that the current negotiations be clearly and irrevocably concluded either through an announcement to the American Embassy in Tokyo or by a declaration for internal and external consumptions. I would like, if such a course is followed, to make representations here at the same time.

Furthermore, in view of the fact that there are considerations of convenience having to do with my interview with the President, should there be anything that you would want me to say at that time, please wire me back at once.

From: Washington.

Re your #1189\*.

Well, you two Ambassadors have exerted superhuman efforts but, in spite of this, the United States has gone ahead and presented this humiliating proposal. This was quite unexpected and extremely regrettable. The Imperial Government can by no means use it as a basis for negotiations. Therefore, with a report of the views of the Imperial Government on this American proposal which I will send you in two or three days, the negotiations will be de facto ruptured. This is inevitable. However, I do not wish you to give the impression that the negotiations are broken off. Merely say to them that you

awaiting instructions and that, although the opinions of your Government not yet clear to you, to your own way of thinking the Imperial Government always made just claims and has borne great sacrifices for the sake of peace in the Pacific. Say that we have always demonstrated a long-suffering and conciliatory attitude, but that, on the other hand, the United States has been unbending, making it impossible for Japan to establish negotiations. Since things have come to this pass, I contacted the man you told me to inquire #1180<sup>b</sup> and he said that under the present circumstances what you suggest is entirely unsuitable. From now on do the best you can.

Re my #844\*  
We wish you would make one more attempt verbally along the following lines:

The United States government has (always ?) taken a fair and judicial position and has formulated its policies after full consideration of the claims of both sides.

However, the Imperial Government is at a loss to understand why it has now taken the attitude that the new proposals we have made cannot be made the basis of discussion, but instead has made new proposals which ignore actual conditions in East Asia and would greatly injure the prestige of the Imperial Government.

With such a change of front in their attitude toward the China problem, what has become of the basic objectives that the U. S. government has made the basis of our negotiations during these seven months? On these points we would request careful self-reflection on the part of the United States government.

In carrying out this instruction, please be careful that this does not lead to anything like a breaking off of negotiations.)

D-1: 6898 (SIS 25445) dated 28 Nov., in which Tokyo's first reaction to the new U. S. proposals castigates them as humiliating. When Japan sends a reply in 2 or 3 days stating its views on them the negotiations will be 'de facto' ruptured. However, do not give the impression that negotiations are broken off.

NOTE: Following is a preliminary, condensed version of conversation between Ambassador Kurusu and the Japanese Foreign Office American Division Chief Yamamoto on Sunday night)

Kurusu: "It is all arranged for us to meet Hull tomorrow. We received a short message from you, didn't we? Well, we will meet him in regard to that. There is a larger one coming isn't there? In any case we are going to see him about the short one." (i. e. telegram. The longer one is probably Tokyo's reply to Mr. Hull's proposals.)

Yamamoto: "Yes. I see."

Kurusu: "The President is returning tomorrow. He is hurrying home."

Y: "Is there any special significance to this?"

K: "The newspapers have made much of the Premier's speech, and it is having strong repercussions here."

Y: "Is that so?"

K: "Yes. It was a drastic statement he made. The newspapers carried large headlines over it; and the President seems to be returning because of it. There no doubt are other reasons, but this is the reason the newspaper are giving."

(Pause)

"Unless greater caution is exercised in speeches by the Premier and others, it puts us in a very difficult position. All of you over there must watch out about these ill-advised statements. Please tell Mr. Tani."

Y: "We are being careful."

K: "We here are doing our best, but these reports are seized upon by the correspondents and the worst features enlarged upon. Please caution the Premier, the Foreign Minister, and others. Tell the Foreign Minister that we had expected to hear something different, some good word, but instead we get this." (i. e. Premier's speech.)

JD-1: 6922 Secret (M) Navy trans. 30 Nov. 1941 (R-5) 25497

(After a pause, Kurusu continues, using voice code)

K: "What about the internal situation?" (In Japan)

Y: "No particular—(one or two words faded out)—"

K: "Are the Japanese-American negotiations to continue?"

Y: "Yes."

K: "You were very urgent about them before, weren't you; but now you want them to stretch out. We will need your help. Both the Premier and the Foreign Minister will need to change the tone of their speeches. ! ! ! Do you understand? Please all use more discretion."

Y: "When will you see them. The 2nd?"

K: "Let's see. . . this is Sunday midnight here. Tomorrow morning at ten. That will be Monday morning here."

(Pause)

"Actually the real problem we are up against is the effects of happenings in the South. You understand don't you?"

Y: "Yes. Yes. How long will it be before the President gets back?"

K: "I don't know exactly. According to news reports he started at 4:00 this afternoon. He should be here tomorrow morning sometime."

Y: "Well then—Goodbye."

#986 (Strictly Secret) (To be handled in Government Code) (Part 1 of 2)  
 (Secret outside the Department)

1. Japan-American negotiations were commenced the middle of April of this year. Over a period of half a year they have been continued. Within that period the Imperial Government adamantly stuck to the Tri-Partite Alliance as the cornerstone of its national policy regardless of the vicissitudes of the international situation. In the adjustment of diplomatic relations between Japan and the United States, she has based her hopes for a solution definitely within the scope of that alliance. With the intent of restraining the United States from participating in the war, she boldly assumed the attitude of carrying through these negotiations.

2. Therefore, the present cabinet, in line with your message, with the view of defending the Empire's existence and integrity on a just and equitable basis, has continued the negotiations carried on in the past. However, their views and ours on the question of the evacuation of troops, upon which the negotiations rested, (they demanded the evacuation of Imperial troops from China and French Indo-China), were completely in opposition to each other.

Judging from the course of the negotiations that have been going on, we first came to loggerheads when the United States, in keeping with its traditional ideological tendency of managing international relations, re-emphasized her fundamental reliance upon this traditional policy in the conversations carried on between the United States and England in the Atlantic Ocean. The motive of the United States in all this was brought out by her desire to prevent the establishment of a new order by Japan, Germany, and Italy in Europe and in the Far East, that is to say, the aims of the Tri-Partite Alliance. As long as the Empire of Japan was in alliance with Germany and Italy, there could be no maintenance of friendly relations between Japan and the United States was the stand they took. From this point of view, they began to demonstrate a tendency to demand the divorce of the Imperial Government from the Tri-Partite Alliance. This was brought out at the last meeting. That is to say that it has only been in the negotiations of the last few days that it has become gradually more and more clear that the Imperial Government could no longer continue negotiations with the United States. It became clear, too, that a continuation of negotiations would inevitably be detrimental to our cause.

3. The proposal presented by the United States on the 26th made this attitude of theirs clearer than ever. In it there is one insulting clause which says that no matter what treaty either party enters into with a third power it will not be interpreted as having any bearing upon the basic object of this treaty, namely the maintenance of peace in the Pacific. This means specifically the Three-Power Pact. It means that in case the United States enters the European war at any time the Japanese Empire will not be allowed to give assistance to Germany and Italy. It is clearly a trick. This clause alone, let alone others, makes it impossible to find any basis in the American proposal for negotiations. What is more, before the United States brought forth this plan, they conferred with England, Australia, the Netherlands, and China—they do so repeatedly. Therefore, it is clear that the United States is now in collusion with those nations and has decided to regard Japan, along with Germany and Italy, as an enemy.

Indications are that the United States desires to continue the negotiations even if it is necessary to go beyond their stands on the so-called basic principles. However, if we keep quibbling on the critical points, and continue to get stuck in the middle as we have been in the past, it is impossible to expect any further developments. If it is impossible from the broad political viewpoint, to conduct a leaders' meeting at this time, would it not be possible to arrange a conference between persons in whom the leaders have complete confidence, (for example Vice President Wallace or Hopkins from the United States and the former Premier Konoye, who is on friendly terms with the President, or Adviser to the Imperial Privy Council Ishii). The meeting could be arranged for some midwestern point, such as Honolulu. High army and navy officers should accompany the representatives. Have them make one final effort to reach some agreement, using as the basis of their discussions the latest proposals submitted by each.

We feel that this last effort may facilitate the final decision as to war or peace. We realize of course that an attempt to have President Roosevelt and former Premier Konoye meet, failed. Bearing in mind the reaction to that in our nation it may be to our interest to first ascertain the U. S. attitude on this possibility. Moreover, since we have no guarantee either of success or failure of the objectives even if the meeting is held, careful consideration should first be given to the matter.

We feel, however, that to surmount the crisis with which we are face to face it is not wasting our efforts to pursue every path open to us. It is our opinion that it would be most effective to feel out and ascertain the U. S. attitude regarding this matter, in the name of the Japanese Government. However, if this procedure does not seem practical to you in view of some internal conditions, then how would it be if I were to bring up the subject as purely of my own origin and in that manner feel out their attitude. Then, if they seem receptive to it the government could make the official proposal.

Please advise me of your opinions on this matter.

----- In the event that Manchuria participates in the war -----  
in view of various circumstances it is our policy to cause Manchuria to participate in the war in which event Manchuria will take the same steps toward England and America that this country will take in case war breaks out.

A summary follows:

1. American and British consular officials and offices will not be recognized as having special rights. Their business will be stopped (the sending of code telegrams and the use of short wave radio will be forbidden). However it is desired that the treatment accorded them after the suspension of business be comparable to that which Japan accords to consular officials of enemy countries resident in Japan.

2. The treatment accorded to British and American public property, private property, and to the citizens themselves shall be comparable to that accorded by Japan.

3. British and American requests to third powers to look after their consular offices and interests will not be recognized.

However the legal administrative steps taken by Manchoukuo shall be equitable and shall correspond to the measures taken by Japan.

4. The treatment accorded Russians resident in Manchoukuo shall conform to the provisions of the Japanese-Soviet neutrality pact. Great care shall be exercised not to antagonize Russia.

Codes Manchukuo, etc.

Re my #1231.

Today, the 2nd Ambassador KURUSU and I had an interview with the Secretary of State WELLES. At that time, prefacing his statement by saying that it was at the direct instruction of the President of the United States, he turned over to us the substance of my separate wire #1233\*. Thereupon we said: "Since we haven't been informed even to the slightest degree concerning the disposition of our troops in French Indo-China, we will transmit the gist of your representations directly to our Home Government. In all probability they never considered such a thing as this could possibly be an upshot of their proposals of November 20th." The Under-Secretary then said: "I want you to know that the statement of the United States takes is that she opposes aggression in any and all parts of the world." Thereupon we replied: "The United States and other countries have pyramidized economic pressure upon economic pressure upon us Japan. (The Under-Secretary made the statement that economic warfare was even worse than forceful aggression.) We haven't the time to argue the pros and cons of this question of rights and wrongs. The people of Japan are faced with economic pressure and we want you to know that we have but the choice between submission to this pressure or breaking the chains that it invokes. \*We want you to realize this as the situation in which all Japanese find themselves as the result of the recent incident in China; the President recently expressed cognizance of this situation.

#1232. (Part 2 of 2)

Furthermore, I would have you know that in replying to the recent American proposals, the Imperial Government is giving the most profound consideration to this important question which has to do with our national destiny." The Secretary of State WELLES said: "I am well aware of that." I continued: "I cannot overemphasize the fact that, insofar as Japan is concerned, it is very difficult for her to accept the new American proposals as they now stand. Our proposals proffered on the 21st of June and the proposals of September 24th representing our greatest conciliations based on the previous proposals have not stood. In spite of the fact that the agreement of both sides was in the air, it has come to naught. At this late juncture to give thoughtful consideration to the new proposals certainly will not make for a smooth and speedy settlement of the negotiations. Recently, we promised to evacuate our troops from French Indo-China in the event of a settlement of the Sino-Japanese incident and the establishment of a just peace in the Far East. In anticipating the settlement of fundamental questions, the question of the representations of this date will naturally dissolve." The Under-Secretary assiduously heard us out and then said: "The American proposals of the 26th were brought about by the need to clarify the position of the United States because of the internal situation."

here." [2] Then he continued: "In regard to the opinions that you have expressed, I will make it a point immediately to confer with the Secretary."

I got the impression from the manner in which he spoke that he hoped Japan in her reply to the American proposals of the 28th would leave this much room.

Judging by my interview with Secretary of State HULL on the 1st and my conversations of today, it is clear that the United States, too, is anxious to peacefully conclude the current difficult situation. I am convinced that they would like to bring about a speedy settlement. Therefore, please bear well in mind this fact in your considerations of our reply to the new American proposals and to my separate wire #1233<sup>a</sup>

## MEMORANDUM

The Government of Japan, prompted by a genuine desire to come to an amicable understanding with the Government of the United States in order that the two countries by their joint efforts may secure the peace of the Pacific area thereby contribute toward the realization of world peace, has continued negotiations with the utmost sincerity since April last with the Government of the United States regarding the adjustment and advancement of Japanese-American relations and the stabilization of the Pacific area.

The Japanese Government has the honor to state frankly its views concerning the claims the American Government has persistently maintained as well as the measures the United States and Great Britain have taken toward Japan during these eight months.

It is the immutable policy of the Japanese Government to insure the stability of East Asia and to promote world peace, and thereby to enable all nations to each BOAMPYQBR place in the world.

Ever since the China Affair broke out owing to the failure on the part of China to comprehend Japan's true intentions, the Japanese Government has striven for the restoration of peace and it has consistently exerted its best efforts to prevent the extension of war-like disturbances. It was also to that end that in September last year Japan concluded the Tri Partite Pact with Germany and Italy.

NY 1: 7143 Secret Navy Trans. 12-6-41 (S) 25843

: Tokyo  
Washington  
November 6, 1941

le  
(Part 2 of 14)

However, both the United States and Great Britain have resorted to every possible measure to assist the Chungking regime so as to obstruct the establishment of a general peace between Japan and China, interfering with Japan's constructive endeavours toward the stabilization of East Asia, exerting pressure on the Netherlands East Indies, or menacing French Indo-China, they have attempted to frustrate Japan's aspiration to realize the ideal of common prosperity in cooperation with these regions. Furthermore, when Japan in accordance with its protocol with France took measures of joint defense of French China, both American and British governments, wilfully misinterpreted this as a threat to their own possession and inducing the Netherlands government to follow suit, they enforced the assets freezing order, thus severing economic relations with Japan. While manifesting thus an obviously hostile attitude, these countries have strengthened their military preparations perfecting an encirclement of Japan, and have brought about a situation which endangers the very existence of the empire.

NY 1: 7143 Secret Navy Trans. 12-6-41 (S) 25843

: Tokyo  
Washington  
November 6, 1941

le  
(Part 3 of 14)

Nevertheless, facilitate a speedy settlement, the Premier of Japan proposed, in August last, to meet the President of the United States for a discussion of important problems between the two countries covering the entire Pacific area. However, while accepting in principle the Japanese proposal, insisted that the meeting should take place after an agreement of view had been reached on

fundamental—(75 letters garbled)—The Japanese government submitted proposal based on the formula proposed by the American government, taking fully into consideration past American claims and also incorporating Japanese views. Repeated discussions proved of no avail in producing readily an agreement of view. The present cabinet, therefore, submitted a revised proposal moderating still further the Japanese claims regarding the principal points of difficulty in the negotiation and endeavoured strenuously to reach a settlement. But the American government, adhering steadfastly to its original proposal, failed to display in the slightest degree a spirit of conciliation. The negotiation made no progress.

JD-1: 7143 Secret Navy Trans. 12-6-41 (S) 25843

From: Tokyo  
To: Washington

Purple

#902 (Part 4 of 14)

Thereupon, the Japanese Government, with a view to doing its utmost for averting a crisis in Japanese-American relations, submitted on November 20, 1941, still another proposal in order to arrive at an equitable solution of the most essential and urgent questions which, simplifying its previous proposal, stipulated the following points:

(1) The Governments of Japan and the United States undertake not to dispatch armed forces into any of the regions, excepting French Indo-China, the Southeastern Asia and the Southern Pacific area.

(2) Both Governments shall cooperate with a view to securing the acquisition in the Netherlands East Indies of those goods and commodities of which the two countries are in need.

(3) Both Governments mutually undertake to restore commercial relations to those prevailing prior to the freezing of assets.

The Government of the United States shall supply Japan the required quantity of oil.

(4) The Government of the United States undertakes not to resort to measures and actions prejudicial to the endeavours for the restoration of general peace between Japan and China.

(5) The Japanese Government undertakes to withdraw troops now stationed in French Indo-China upon either the restoration of peace between Japan and China or the establishment of an equitable peace in the Pacific area; and it prepared to remove the Japanese troops in the southern part of French Indo-China to the northern part upon the conclusion of the present agreement.

JD-1: 7143 Secret Navy Trans. 12-6-41 (S) 25843

From: Tokyo  
To: Washington  
December 6, 1941  
Purple

#902 (Part 5 of 14)

As regards China, the Japanese Government, while expressing its readiness to accept the offer of the President of the United States to act as "Introducer of peace between Japan and China as was previously suggested, asked for an undertaking on the part of the United States to do nothing prejudicial to the restoration of Sino-Japanese peace when the two parties have commenced direct negotiations.

The American government not only rejected the above-mentioned new proposal but made known its intention to continue its aid to Chiang Kai-Shek; and in spite of its suggestion mentioned above, withdrew the offer of the President to act as the so-called "Introducer" of peace between Japan and China, pleading that time was not yet ripe for it. Finally, on November 26th, in an attitude of imposition upon the Japanese government those principles it has persistently maintained, the American government made a proposal totally ignoring Japanese claims, which is a source of profound regret to the Japanese Government.

JD: 1 7143 Secret Navy Trans. 12-6-41 (S) 25843

: Tokyo  
Washington  
umber 6, 1941  
e

(Part 6 of 14)

From the beginning of the present negotiation the Japanese Government always maintained an attitude of fairness and moderation, and did its best to reach a settlement, for which it made all possible concessions often in spite of great difficulties.

As for the China question which constituted an important subject of the negotiation, the Japanese Government showed a most conciliatory attitude.

As for the principle of Non-Discrimination in International Commerce, adopted by the American Government, the Japanese Government expressed its desire to see the said principle applied throughout the world, and declared that in accordance with the actual practice of this principle in the world, the Japanese Government would endeavour to apply the same in the Pacific area, including China, and made it clear that Japan had no intention of excluding from China economic activities of third powers pursued on an equitable basis.

Furthermore, as regards the question of withdrawing troops from French Indo-China, the Japanese government even volunteered, as mentioned above, to carry out an immediate evacuation of troops from Southern French Indo-China as a measure of easing the situation.

: 1 7143 Secret Navy Trans. 12-6-41 (S) 25843

: Tokyo  
Washington  
umber 4, 1941  
e

(Part 7 of 14)

It is presumed that the spirit of conciliation exhibited to the utmost degree by the Japanese Government in all these matters is fully appreciated by the American government.

On the other hand, the American government, always holding fast to theories regardless of realities, and refusing to yield an inch on its impractical principles, has caused undue delays in the negotiation. It is difficult to understand this attitude of the American government and the Japanese government desires to call the attention of the American government especially to the following points:

The American government advocates in the name of world peace those principles favorable to it and urges upon the Japanese government the acceptance of them. The peace of the world may be brought about only by discovering a mutually acceptable formula through recognition of the reality of the situation and mutual appreciation of one another's position. An attitude such as ignores realities and imposes one's selfish views upon others will scarcely serve the purpose of facilitating the consummation of negotiations.

3 Secret 25843

: Tokyo  
Washington  
umber 6, 1941  
e

(Part 8 of 14)

Among the various principles put forward by the American government as a basis for the Japanese-American agreement, there are some which the Japanese government is ready to accept in principle, but in view of the world's actual conditions, it seems only a Utopian ideal, on the part of the American government, to attempt to force their immediate adoption.

For example, the proposal to conclude a multilateral non-aggression pact between Japan, the United States, Great Britain, China, the Soviet Union, The Netherlands, and Thailand, which is patterned after the old concept of collective security, has been removed from the realities of East Asia.

The American proposal contains a stipulation which states: "Both governments will agree that no agreement, which either has concluded with any third powers, shall be interpreted by it in such a way as to conflict with the fundamental purpose of this agreement, the establishment and preservation of peace throughout the Pacific area." It is presumed that the above provision has been proposed with a view to restrain Japan from fulfilling its obligations

under the Tripartite Pact when the United States participates in the Europe, and, as such, it cannot be accepted by the Japanese Government.

JD:1 7143 Secret Navy Trans. 12-6-41 (S) 25843

From: Tokyo  
To: Washington  
December 6, 1941  
Purple  
#902 (Part 9 of 14)

The American Government, obsessed with its own views and opinions, is said to be scheming for the extension of the war. While it seeks, on the one hand, to secure its rear by stabilizing the Pacific area, it is engaged, on the other hand, in aiding Great Britain and preparing to attack, in the name of self-defense, Germany and Italy two powers that are striving to establish a new order in Europe. Such a policy is totally at variance with the many principles upon which the American Government proposes to found the stability of the Pacific through peaceful means.

3. Where as the American Government, under the principles it rigidly upholds, objects to settling international issues through military pressure, it is extremely in conjunction with Great Britain and other nations pressure by economic Recourse to such pressure as a means of dealing with international relations should be condemned as it is at times more inhuman than military pressure.

JD-1: 7143 Navy Trans. 12-6-41 (S) 25843

From: Tokyo  
To: Washington  
December 6, 1941  
Purple  
#902 (Part 10 of 14)

4. It is impossible not to reach the conclusion that the American Government desires to maintain and strengthen, in collusion with Great Britain and other powers, its dominant position it has hitherto occupied not only in China and other areas of East Asia. It is a fact of history that one country — (45 letters garbled or missing) — been compelled to observe the status quo under the Anglo-American policy of imperialistic exploitation and to sacrifice the interests to the prosperity of the two nations. The Japanese Government cannot tolerate the perpetuation of such a situation since it directly runs counter to Japan's fundamental policy to enable all nations to enjoy each its proper place in the world.

JD-1: 7143 Navy Trans. 12-6-41 (S) 25843

From: Tokyo  
To: Washington  
December 6, 1941  
Purple  
#902 (Part 11 of 14)

The stipulation proposed by the American Government relative to French Indo-China is a good exemplification of the above-mentioned American position. That the six countries,—Japan, the United States, Great Britain, The Netherlands, China and Thailand,—excepting France, should undertake among themselves to respect the territorial integrity and sovereignty of French Indo-China and equality of treatment in trade and commerce would be tantamount to placing that territory under the joint guarantee of the governments of five of the six countries. Apart from the fact that such a proposal totally ignores the position of France, it is unacceptable to the Japanese government in that an arrangement cannot but be considered as an extension to French Indo-China of a system similar to the one — (50 letters mission) — suitable for the present predicament of East Asia.

Purple  
#902 (Part 12 of 14)

5. All the items demanded of Japan by the American government regarding China such as wholesale evacuation of troops or unconditional application

principle of Non-Discrimination in International Commerce ignore the actual conditions of China, and are calculated to destroy Japan's position as the stabilizing factor of East Asia. The attitude of the American government in finding Japan not to support militarily, politically or economically any other than the regime at Chungking, disregarding thereby the existence of the Nanking government, shatters the very basis of the present negotiation. The demand of the American government falling, as it does, in line with its mentioned refusal to cease from aiding the Chungking regime, demonstrates clearly the intention of the American government to obstruct the restoration of normal relations between Japan and China and the return of peace to Asia.

le  
2 (Part 13 of 14)

In brief, the American proposal contains certain acceptable items such as those concerning commerce, including the conclusion of a trade agreement, mutual removal of the freezing restrictions, and stabilization of the Yen and Dollar exchange, or the abolition of extra-territorial rights in China. On the other hand, however, the proposal in question ignores Japan's sacrifices in the four years of the China Affair, menaces the empire's existence itself and disparages its honour and prestige. Therefore, viewed in its entirety, the Japanese government regrets that it cannot accept the proposal as a basis of negotiation.

The Japanese government, in its desire for an early conclusion of the negotiation, proposed that simultaneously with the conclusion of the Japanese-American negotiation, agreements be signed with Great Britain and other interested countries. The proposal was accepted by the American government. However, since the American government has made the proposal of November 26th the result of frequent consultations with Great Britain, Australia, The Netherlands and Chungking, ANDND \* presumably by catering to the wishes of the Chungking regime on the questions of *CHTUAL YLOKMMTT* \*\* be concluded that all these countries are at one with the United States in ignoring Japan's position.

probably "and as"  
probably "China, can but"

: Tokyo  
Washington  
December 1941

ple-Eng)  
Part 14 of 14

(Note: In the forwarding instructions to the radio station handling this part, appeared the plain English phrase "VERY IMPORTANT")

Obviously it is the intention of the American Government to conspire with Great Britain and other countries to obstruct Japan's efforts toward the establishment of peace through the creation of a New Order in East Asia, and especially to reserve Anglo-American rights and interests by keeping Japan and China at bay.

This intention has been revealed clearly during the course of the present negotiations. Thus, the earnest hope of the Japanese Government to adjust Japanese-American relations and to preserve and promote the peace of the Pacific through cooperation with the American Government has finally been lost.

The Japanese Government regrets to have to notify hereby the American Government that in view of the attitude of the American Government it cannot but consider that it is impossible to reach an agreement through further negotiations.

CLAUSEN INVESTIGATION EXHIBIT No. 8

*Investigation by Lt. Colonel Henry C. Clausen, Jagd, for the Secretary of War supplementary to proceedings of the Army Pearl Harbor Board*

The following documents comprise intercepts obtained from British sources. They consist of 41 documents extending over the period 21 November 1941 to 22 December 1941.

MOST SECRET.

To be kept under lock and key: never to be removed from the office.

*Japanese Consul, Singapore, Requests Issue of Code Words.*

No: 097975

Date: 21st November, 1941.

From: Japanese Consul-General, SINGAPORE.

To: Foreign Minister, TOKYO.

No: 717.

Date: 17th November, 1941.

Immediate:

Some day the British authorities will prohibit the use of cypher telegrams by this office. To prepare for this eventuality please draw up secret code words and send them by Consul-General OKAMOTO as diplomatic correspondence. Please include in this secret code, words necessary for military intelligence, evacuation of residents, the closing down of this office etc. Please see the Naval Secret Code which I have received recently.

Director. F. O. (3). F. I. D. Admiralty. Colonial Office. M. I. 5.

*Japanese Code Phrases for Broadcasting in Event of Emergency*

No. 008127

Date: 25th November, 1941.

From: The Foreign Minister. TOKYO.

To: The Japanese Chargé. LONDON.

No: 2363 Circular.

Date: 19th November, 1941.

To be treated as Chef de Mission Cypher.

The international situation is tense and we cannot tell when the worst may happen. In such an event, communications between the Empire and the enemy countries will immediately cease. Therefore when our diplomatic relations are on the point of being severed, we shall broadcast, as the weather report, the following phrases in the middle and at the end of the news in Japanese in our overseas broadcast service:

(1) If Japanese-American relations are in question: "Higashi no kaze ame" (Easterly wind, rain).

(2) If JAPAN and the SOVIET are concerned: 'Kita no kaze kumori' (Northerly wind, cloudy).

(3) In the case of JAPAN and BRITAIN (including the invasion of THAILAND or an attack on MALAYA): "Nishi no kaze hare" (Westerly wind, fine).

The appropriate phrase will each time be broadcast twice in a resolute voice and you should accordingly [group corrupt: destroy by fire] codes documents, etc.

The above is to be treated as strictly confidential.

From: The Japanese Chargé, LONDON.

To: The Foreign Minister, TOKYO.

No: 700 Urgent of 21st November, 1941.

*Japanese Foreign Office View of Conversations With America*

No: 998151

Date: 25th NOVEMBER, 1941.

From: The Foreign Minister, TOKYO.

To: The Japanese Diplomatic Representatives, ANGORA, &c

No: 2364 Circular.

Date: 20th November, 1941.

Confidential.

1. Since the formation of the new Cabinet the Government has started a conference in daily contact with Imperial Headquarters and has been able to debate a fundamental national policy to cope with the pressing situation of the day. In the morning session on the 5th instant, a decision was taken on the policy to be adopted for adjusting Japanese-American diplomatic relations.

2. The Japanese-American negotiations are to be pursued by considering the adjustment of diplomatic relations on an equitable basis. These have been in progress since the 7th, but there is a considerable difference of opinion between the two parties, and in view of the progress made so far there is some doubt as to whether a compromise will be reached. For our part, we are doing our utmost to reach a compromise, but we cannot make any further concession and the outlook is not bright. Should the negotiations break down, that part of the situation in which the Japanese Empire is involved will be critical.

The foregoing is for your exclusive information.

This telegram is addressed to BERNE, ANGORA and VLADIVOSTOK.

BERNE will repeat to VICHY, MADRID, LISBON, STOCKHOLM, HELSINKI, FORS and PRETORIA.

ANGORA will repeat to BUCHAREST, SOFIA and BUDAPEST.

Togo.

Director (3) P. O. (3). P. I. D. Admiralty. War Office (3). Air Ministry. Sir E. Bridges.

At this post there is nothing for it but to use the Navy's wireless. Details have been telegraphed by the Naval Attaché to the Admiralty. Please refer to them and make the necessary arrangements.

*Japanese Broadcasts: Reception in Rome.*

No: 098232

Date: 27th NOVEMBER, 1941.

From: The Japanese Ambassador, ROME.

To: The Foreign Minister, TOKYO.

No: 740.

Date: 20th November, 1941.

In regard to the general news broadcasts, not only JUO but JAP (which was changed on the 20th) were generally impossible to receive. This was due to unstable weather conditions at this time of year which made the note weak. In addition to which there was much interference from miscellaneous noises.

In view of the recent international situation the demand for [group communication ? news ? information] is steadily increasing. We foresee no difficulty about reception arrangements at this end but in present weather conditions group reception will not be possible on one wavelength only. It is essential that simultaneous broadcasts be sent on two or three wavelengths. I understand that the recently changed DOMEI broadcasts in English have begun simultaneous broadcasts, and I ask that every effort be made for these simultaneous broadcasts to be carried out.

For your information I will, till further notice, telegraph reception efficiently every three days.

HORIKI

Director. F. O. (3). P. I. D. M. I. 5.

*Japanese Cypher Machines: Security Measures.*

No: 096313

Date: 29th November, 1941.

From: The Foreign Minister, TOKYO.

To: BERNE, WASHINGTON, etc.

No: 2398 (Circular telegram).

Date: 25th November, 1941.

Most Secret:

Recently our cypher machines (the printing portion of "A" and the shift key of "B") have been designated as a State Secret. Any leakage of information connected therewith will incur the application of the National Defence Peace Preservation Law. As regards the machine in your keeping, you are strictly enjoined to take every precaution for safe and secret custody.

On the right-hand side of the number plate affixed to the printing portion and shift key, please write the words "Kokka Kimitsu" [State Secret] in red enamel.

This telegram is to be relayed, as the Foreign Minister's instructions, in the following manner:

From WASHINGTON to MEXICO, RIO DE JANEIRO and BUENOS AIRES.

By cable.

BERNE to LONDON, VICHY, BERLIN, ROME and ANGORA. By cable.

VICHY to MADRID. By safe hand.

HANOI to SAIGON. By safe hand.

Director. F.O. (3). M.I.5.

*Japanese Ambassador, Hanoi, Asks for Instruction in Event of Emergency*

No: 098400.

Date: 1st December, 1941.

From: Japanese [? Ambassador], HANOI.

To: Foreign Minister, TOKYO.

No: 118.

Date: 26th November, 1941.

[In Chef de Mission cypher recyphered on the machine].

(Secret.)

To judge from what I hear from the Military, the American answer reached us [? on the 24th]. If this is so the Cabinet Council will no doubt finally reach a decision in a day or two and determine whether it is to be peace or war. If Japanese-American negotiations are to be held we shall of course take in hand progressively the various undertakings previously planned; but if the negotiations break down, as preparations for military operations are nearing completion, an advance would be possible within ten days or so. In that event considerable modifications would be necessary in the programme of undertakings to be carried out under our present policy, and it will be necessary to initiate measures and negotiations in keeping with our military operations. What causes me most concern and [? anxiety] is whether, in the event of an outbreak of hostilities, it is the policy of the Government and Imperial Headquarters to carry on military operations leaving the status of the Government of INDO-CHINA as it is at present, and on this point I require to be informed in advance: and not only so but I want to make necessary preparations with all speed. If, therefore, you have any views on the development of the Japanese-American negotiations and the prospects alluded to I beg that you will telegraph them at once. Moreover, while it goes without saying that secrecy must be preserved, nevertheless, according to newspaper reports, AMERICA has been consulting with BRITAIN, AUSTRALIA, the NETHERLANDS and the Chinese in WASHINGTON, and these Governments are aware of the purport of the Japanese-American negotiations. And what is more, the Military here, as the result of comings and goings between here and TOKYO, are aware of the nature of your instructions and of the ins and outs of the negotiations: in fact I have the impression that the only people who are left in the dark are Foreign Office officials. Seeing that the situation is as tense as is indicated in your circular telegram No. 2383 [our No. 098127], should be glad to receive your instructions on these points as soon as possible, either by telegram, messenger or some other method.

## 672 CONGRESSIONAL INVESTIGATION PEARL HARBOR ATTACK

Director (3). F.O. (3). P.I.O. Admiralty. War Office (3). India (2). Colonial Office. Air Ministry. M.I.B. Major Morton. Sir E. Dominions Office.

From: Foreign Minister, Tokyo.

To: Japanese [? Ambassador], HANOI.

No: 93 of 26th November, 1941.

(Also in Chef de Mission cypher recyphered).

Reference your No. 118 (above).

My circular telegram \*No. 2414 gives the course of the Japanese-American negotiations and my circular telegram \*No. 2416 tells of their present condition. Even in the event of the worst happening the Imperial Government has not taken any special decision to make a change in the status of the Government of INDO-CHINA. You may therefore take it that for the present our intention is to maintain the status quo. Please do your best on this understanding.

Repeated to Paris and Berlin.

[Dept. Note \*Not yet decyphered].

### *Japan and the Axis: Plans in Event of Breakdown of Washington Conference*

No: 098413.

Date: 1st December, 1941.

From: Foreign Minister, TOKYO.

To: Japanese Ambassadors, BERLIN and ROME.

No: 2387 Circular.

Date: 24th November, 1941.

[Very corrupt text. In Chef de Mission cypher recyphered on the machine]

For your own information only.

The Japanese-American negotiations [?] are [seem to be] approaching final stage. . . . [two lines corrupt]. In the event of the breakdown of negotiations we shall be face to face with a rupture of relations with BRITAIN and AMERICA, and the necessity is likely to arise for the sudden tightening of the relations which have hitherto prevailed for cooperation between JAPAN, GERMANY and ITALY. My idea is that [? you] should then propose to the [two groups] action to be taken; but [two groups] I shall ask Your Excellency to be active during this month. It is possible that circumstances may necessitate having a special interview with Führer HITLER (Premier MUSSOLINI). Please bear this in mind. [Two groups] until you approach them you must refrain absolutely from saying anything to the Germans (Italians). Take your information and in haste.

At the moment the time is not ripe for a detailed report on the Japanese-American negotiations. Please note, however, that we have taken every precaution to obviate any obstacle to the maintenance of the Three Power Pact.

This telegram is addressed to BERLIN and ROME.

Director (3). F.O. (3). P.I.D. Admiralty. War Office (3). India (2). Colonial Office. Air Ministry. Sir E. Bridges. Dominions Office.

### *Japanese Communications by Naval Wireless in Event of Emergency*

No: 098414.

Date: 1st December, 1941.

From: Japanese Chargé, London.

To: Foreign Minister, Tokyo.

No: 778.

Date: 29th November, 1941.

In present circumstances it may happen that the despatch and delivery of telegrams may be purposely delayed or completely held up and that we shall not be able to depend on the reliability of communications. I therefore request you to take steps to [? make simultaneous use of] the Naval wireless, as in 760 [our No. 098127].

[Dept: Note: Cyphered in "X" and recyphered on the machine].

Director. F.O. (3). P.I.D. Admiralty. War Office (3). India (2). Colonial Office. Air Ministry. M.I. 5. Sir E. Bridges. Dominions Office.

*Japanese Plans: Instructions to Ambassador at Berlin*

35.  
 : 008452.  
 e: 2nd December, 1941.  
 m: Foreign Minister, TOKYO.  
 : Japanese Ambassador, BERLIN.  
 : 935 Very urgent.  
 e: 30th November, 1941.

Chef de Mission cypher recyphered on the machine].  
 Reference my circular telegram No. 2387. [Our No. 008413].  
 The Japanese-American negotiations begun in April of this year under the  
 mer Cabinet have now reached a stage at which a breakdown is inevitable, in  
 e of the sincere efforts of the Imperial Government. The Empire, faced with  
 s situation, has to take the most serious decisions. You should therefore see  
 arer HITLER and Foreign Minister RIBBENTROP at once and give them an  
 line of developments in confidence. At the same time you should tell them in  
 fidence that the attitude of BRITAIN and AMERICA has recently been pro-  
 vative and they have continued to move troops into all parts of Eastern ASIA.  
 meet this we too have been compelled to move troops, and it is greatly to be  
 ed that an armed collision will occur and we shall find ourselves in a state  
 war with BRITAIN and AMERICA. You should add that this may happen  
 er than is expected.

Here Part II is missing. It will be sent in later if received].  
 If when you make this communication questions are asked by the Germans  
 Italians as to our attitude towards RUSSIA, you should tell them that our  
 tude towards the SOVIET is as explained to them on 2nd July of this year,  
 t we will of course not relax our restraint on the SOVIET as the result of our  
 on in the south; but that if the SOVIET, acting in cooperation with BRITAIN  
 AMERICA, take hostile action against us, we are prepared to resist it reso-  
 ly; that it is on the South, however, that we lay most emphasis, and that we  
 ose to refrain from deliberately taking positive action in the North.  
 As all this concerns our plan of campaign it of course requires the utmost  
 ecy, and you should make a special point of impressing this strongly on the  
 mans and Italians.

With regard to telling the Italians, immediately after our Ambassador in  
 RLIN has told the Germans, Premier MUSSOLINI and Foreign Minister  
 NO should be informed. As soon as the dates for the German and Italian  
 rviews are fixed please telegraph.  
 ease repeat to Rome as my instructions.

Togo.

Director (3). F. O. (3). P. I. D. Admiralty. War Office (3). India Office  
 Colonial Office. Air Ministry. Sir E. Bridges. Dominions Office.

*Japanese orders for destruction of cypher machine in London Embassy*

Date: 3rd December, 1941.  
 No 698509.

m: Foreign Minister, TOKYO.  
 e Japanese Ambassador, LONDON.  
 [ ? 2443 ] Circular.  
 e: 1st December, 1941.  
 et and Urgent.

ease take steps for the immediate disuse of the cypher machine at your  
 assy.

With regard to the steps to be taken, these should conform to the instructions  
 previously. Please exercise the greatest care and, in particular, with regard  
 e methods of dismantling and breaking up the essential parts, carry them  
 strictly in accordance with instructions.

a receipt of this, please telegraph immediately the one word "SETSUJU"\*  
 eived) en clair, and, having carried out these instructions, telegraph the  
 "HASSO"\* (Despatched), also en clair.

With regard to the cypher connected with the machine, you are, of course,  
 to burn your copy No. 26 of the YU code (machine code) (the settings for  
 on the machine for communication between this Department and the Em-  
 y in LONDON).

(Dept. Note: \*These messages received, dated 2nd December, 1941.)  
 Director (3). F. C. (3). P. I. D. Admiralty. War Office (3). India Office (3).

*Japanese-Thai Relations: Japanese Ambassador, Berlin, Care Thai Minister*

No: 698525.

Date: 4th December, 1941.

From: Japanese Ambassador, BERLIN.

To: Foreign Minister, TOKYO.

No: 1347.

Date: 20th November, 1941.

I received a visit from the Thai Minister on the 20th. He opened his remarks by saying that he also was a soldier and would like to have a frank talk with me as between men who had known each other for many years. He then referred to a recent crop of rumours to the effect that JAPAN was to invade THAILAND and to reports of large Japanese troop concentrations on the Thai frontier in French INDO-CHINA, and asked point blank whether there was any truth in them or not. I replied that I had had no news from my home Government on these matters but that my own belief was that JAPAN's actions towards all Far Eastern races were aimed at applying the principle of live-and-let-live, the fact being that in cases such as that of the recent arbitration between THAILAND and French INDO-CHINA JAPAN had done her utmost for THAILAND for this very reason and would never invade THAILAND for the purpose of aggression. But the facts were that GREAT BRITAIN and AMERICA had set up the so-called ABCD front in opposition to JAPAN's establishment of a New Order, finally threatening the existence even of JAPAN herself. JAPAN of course would be compelled to continue her course brushing this aside, and that she wished to attain this and by peaceful means was obvious from the mere fact of her having sent Mr. KURUSU to AMERICA. However, if the worst came to the worst and it was unavoidable, JAPAN would have to take the necessary steps for her own existence—not that there would be any question of this happening if THAILAND soon understood JAPAN's ultimate purpose and displayed an attitude of cooperation with JAPAN; she would have to invade THAILAND only if that country should blindly follow the lead of GREAT BRITAIN and AMERICA and take up an attitude of opposition.

The Minister interposed by describing the position in which THAILAND was placed and by stating emphatically that THAILAND would never oppose JAPAN as an Anglo-American cat's-paw.

When suggesting his visit the Minister said that he wished to see me urgently and OMMINISI's view that he probably came on instructions from his home Government.

The Germans are also extremely interested in Thai problems and I should be glad if you would inform me at once as to the latest situation.

Director (3). F. O. (3). P. I. Admiralty. War Office (3). India Office (2). Colonial Office. Air Ministry. M. I. 5. Sir E. Bridges. Dominions Office.

*Japanese Chargé, London, Submits Plans for Withdrawal of Embassy etc. Staff*

Date: 4th December, 1941.

No: 098539.

From: The Japanese Chargé d'Affaires, LONDON.

T: The Foreign Minister, TOKYO.

No: 781.

Date: 1st December, 1941.

It is feared that in the event of the situation becoming critical the exchange of telegrams may become impossible. I therefore submit the following points for your consideration and request instructions.

1. In view of conditions at this post, countries suitable for protecting our interests after the withdrawal of this Embassy are BRAZIL or SWITZERLAND. I suggest that the matter be discussed in TOKYO with the country concerned, so that instructions may be sent by that Government to its Ambassador (Minister) in LONDON.

2. Is there any objection to burning the consular exequaturs at present held in custody, viz: LIVERPOOL, DUBLIN, RANGOON, BOMBAY, CALCUTTA, BATAVIA, MACASSAR and VANCOUVER?

The stipulations for withdrawal of the Embassy etc. staffs and of resident Japanese should be made with the British on a strictly reciprocal basis. If could be done it would be necessary to effect the exchange at a stipulated time, each side providing a ship. An agreement would have to be drawn up regarding the dates of departure etc. to prevent anything going amiss. In the case of GERMANY the exchange took place in HOLLAND, in ITALY's case it was at LISBON. If hostages are taken there is the danger that our nationals will not be able to leave the country). The evacuees to be exchanged

1st party: Embassy and Consular staff

2nd party: Newspaper correspondents

3rd party: Japanese Staff of banks and companies

were sent out from JAPAN (the 2nd and 3rd parties are not necessarily in order of precedence). Exchange for each party will be arranged separately. In principle I do not wish to include employees locally engaged and Japanese living here of their own wish. Concerning the above negotiations should be undertaken both here and in TOKYO and, if necessary, instructions can be given to the countries who will protect our interests.

Round figures the number of persons is:

a) Officials—34 (including the Chargé d'Affaires, secretaries, military and naval attachés, advisory consuls, telegraphic attachés, chancellors, special emissaries and their families).

b) Newspaper correspondents—6.

c) Bank and Company employees—30.

*Japanese Orders for Destruction of Cyphers etc. in Washington Embassy*

Date: 4th December, 1941.

No: 098540.

BJ/87

To: Foreign Minister, TOKYO.

From: Japanese Ambassador, WASHINGTON.

867 Secret.

Date: 2nd December, 1941.

Subject: Note: Compare our No. 098509].

Re: The telegraphic cyphers with which your Embassy is provided you are to use all (including the cyphers of other Ministers in your charge) except one each of the machine cypher now in use, cypher "O" and cypher "L".

You are also to discard\* one complete cyphers machine.

As soon as this is done you should telegraph the one word "HARUNO".

You should deal with files of in and out telegrams and other secret documents in an appropriate and suitable manner at your discretion.

The cyphers brought by Cypher Officer KOSAKA [? should all be burnt]. Consequently the need to get in touch with MEXICO referred to in my telegram No. 860 [not received] [last word corrupt].

Subject: Note: \*The word used, "haiki", can mean "cease to use", "abolish", "discard". It is not the normal word for "destroy".

*Japanese Ambassador, Berlin, Reports Ribbentrop's Statement on German War Plans*

No: 098541

Date: 4th DECEMBER, 1941.

To: Japanese Ambassador, BERLIN.

From: Foreign Minister, TOKYO.

1393.

Date: 29th November, 1941.

Subject: (de Mission Cypher).

Re: I was to have had an evening meeting yesterday, the 28th, with RIBBENTROP at his request, but he suddenly asked me to postpone it, and it was ten minutes before we met.

The reason for the postponement was that GOERING and leading Government and Forces personalities met at the Fuehrer's official residence and held an important conference lasting for many hours. Now that the objects of the Japanese campaign have for the most part been achieved, and the results of views with the Premiers and Foreign Ministers of the European countries related, they discussed the direction and policy of next year's campaign. I have no doubt that at this conference JAPAN's action was also discussed.

1. First of all RIBBENTROP again asked if I had received any news of the Japanese-American negotiations. I replied that I had not yet received official news. RIBBENTROP said JAPAN must not lose this opportunity of achieving the establishment of the New Order in East ASIA, and never there been a time when close cooperation between the three Allies was imperative. If JAPAN hesitated and GERMANY carried through the New Order in EUROPE alone, BRITAIN and AMERICA would turn the brunt of the attack against JAPAN. He insisted that, as the Fuehrer had said that the existence of JAPAN and GERMANY on the one hand and of AMERICA on the other was fundamentally incompatible, and the Germans were in receipt of reports that, owing to the stiff attitude of the Americans, there was practically no possibility of the Japanese-American negotiations being successful. I was so, and if JAPAN determined on war against BRITAIN and AMERICA, not only would this be to the common advantage of JAPAN and GERMANY, but he believed it would be to JAPAN's advantage also.

I said I know nothing of JAPAN's plans and therefore could not answer. I asked whether His Excellency really thought a state of war would arise between GERMANY and AMERICA. He replied that ROOSEVELT was discussing it and there was no knowing what he would do.

Considering that hitherto RIBBENTROP has always answered that AMERICA would avoid war, and in view of recent speeches by HITLER and RIBBENTROP, it seems to me that GERMANY's attitude towards AMERICA is gradually changing, and that she has reached the stage where she would not shun even war with AMERICA.

2. I enquired about the future of the war against RUSSIA. RIBBENTROP replied that the Fuehrer had said that it was now his inflexible determination to sweep away and crush the SOVIET once and for all. The most important military operations had been concluded, and a large part of the army would be withdrawn to GERMANY. They would, however, continue operations in the CAUCASUS and next Spring with a part of it they would make an attack on and beyond the URALS and chase STALIN into SIBERIA. I asked when approximately the attack was to be, and he said it was intended that the attack should start in May of next year.

I next observed that I gathered from what he said that they were quite determined on attacking the SOVIET, and the thing I should like done as far as possible was the creation of air communications between MANCHURIA and GERMANY. He replied that the Germans had been thinking of this for some time past, and he thought that next Summer it would not be impossible to make one hop from somewhere near the URALS to MANCHURIA.

3. I asked about plans for an attack on BRITAIN. He said that before landing in BRITAIN they would chase British influence clean out of the MEDITERRANEAN, EAST AFRICA, GIBRALTAR and the MEDITERRANEAN. I gathered from his statement by RIBBENTROP that they attach even more importance than they do to this area. I asked if they intended to carry on without, attacking the FISH ISLES. RIBBENTROP said that GERMANY was of course making preparations for this: but according to reports reaching GERMANY the international situation in BRITAIN was not any too good. For instance the split in the Conservative Party, the lack of confidence in CHURCHILL and the revolutionary ideas of BEVIN, the Labour leader, were making internal conditions quite difficult. There were of course some people who did not believe this: but the Fuehrer believed that conditions in BRITAIN were bad and thought that as a result of GERMANY's future operations, even, it might be, without an invasion, BRITAIN would be beaten.

In any case, however, GERMANY for her part had no intention whatever of making peace with ENGLAND, and the plan was to drive British influence out of EUROPE entirely. After the War, therefore, BRITAIN would be left absolutely powerless, and although the BRITISH ISLES would remain, all British territory would be split up into three under GERMANY, AMERICA and JAPAN. In AFRICA, GERMANY would, generally speaking, be satisfied

old colonies and would give a great part to ITALY. It was, he said, to ob-  
 (group corrupt) that GERMANY attached the most importance.  
 Remarking in conclusion that the very satisfactory progress of the War under  
 man leadership was fully recognised and that GERMANY naturally had to  
 and the area of operations by regarding as enemies not only BRITAIN but also  
 tries under British influence and those helping BRITAIN, I asked him when  
 thought the War would end. To this he replied that, although he hoped it  
 d be brought to a conclusion in the course of next year, it might possibly  
 nue till the following year.

also said that if JAPAN were to go to war with AMERICA, GERMANY  
 l, of course, join in immediately, and HITLER's intention was that there  
 d be absolutely no question of GERMANY making a separate peace with  
 LAND.

the end of this talk RIBBENTROP asked that the substance of it should  
 pt strictly secret, so please pay special attention to its handling.

is telegram has been given to the Naval and Military Attachés and to Vice-  
 ral NOMURA and Major-General ABE. Please have it shown to the Army  
 Navy.

### *Japanese Code Words for Telegraphing to Notify Critical Condition of Situation*

No: 008602

Date: 6th DECEMBER, 1941.

From: The Foreign Minister, TOKYO,

To: The Japanese Representatives, LONDON, etc.

No: 2409 Circular.

Date: 27th November, 1941.

To be treated as Chef de Mission Cypher.

The following is the method of telegraphing secret code words to notify the critical condition of the situation.

Using the names on the first column a plain language text will be made up on some ordinary subject. The second column will contain the information which it is desired to send.

(Example:

"Collision between Japanese and Soviet armies" will appear in the text under date [? 15th] as "Junior Secretaries HIJIKATA and KUBOTA are ordered for duty at your post. STOP").

Further telegrams sent by this method will all end with the word "STOP" to distinguish them from other communications. The word "OWARI" [— "end"] will therefore not be used.

Arimura: cypher communications prohibited.

Asai: communicate by wireless broadcast.

Asakura: listen carefully for wireless communication by broadcast.

Asikaga: jamming by oversea broadcasts reception impossible.

Azuma: pressure on JAPAN becoming greater.

Edoguti: prepare for evacuation.

Hanabusa: evacuation preparations made.

Hanazono: proceed with preparations for requesting suitable foreign envoy (consulate) to protect Japanese interests.

Hatakeyama: diplomatic relations severed between Japan and . . . . .

Hattori: relations between JAPAN and . . . . are extremely critical.

Hijikata: collision between Japanese and . . . . armies.

Hosino: JAPAN is engaged with . . . . on the whole front.

Ibaragi: telegraph time at which rupture of diplomatic relations between JAPAN and country to which you are accredited anticipated.

Inagaki: has telegram been received on the matter of . . . . ?

Ishikawa: telegram received on the matter of . . . .

Kashiwagi: positive action has begun against . . . .

Kobayakawa: stop granting Japanese entry and transit visas to . . . . nationals.

Kodama: Japan.

Komiyama: China.

Koyanagi: Great Britain.

Kubota: U. S. S. R.

Kuribara: France.

Kusunoki: Germany.

Matsutani: Italy.

Minami: United States of America.

Miwata: Canada.

Miyazaki: Mexico.

Morokoshi: [? Brazil].

Motizuki: Panama.

Nagamine: Argentine.

azato: Thailand.  
 gō: England and America.  
 i: Dutch East Indies.  
 wa: Burma.  
 moto: Malaya.  
 mura: Australia.  
 uka: Union of [? South Africa].  
 era: enemy country.  
 i: [? the individual in question].  
 hi: year.  
 ya: next year.  
 anaka: this year.  
 akibara: month.  
 no I: [? day].  
 Zyō: time.  
 : one.  
 ku: 2  
 arō: 3  
 i: 4  
 : 5  
 Ma] Sa Roku: 6  
 etarō: 7  
 kiti: 8  
 amatu: 9  
 ni: 0 (zero).

Togo.

Director (3). F. O. (3). P. I. D. Admiralty. War Office (3). India Office  
 Colonial Office. Air Ministry. M. I. 5. Sir E. Bridges. Dominions Office.

n: Foreign Minister, Tokyo.  
 Japanese Consul-General, Singapore  
 [and other posts unspecified].

2461 Circular of 3rd December, 1941.

et:

duplicates of secret code words (including those for use in broadcasting\*) are  
 kept until the last moment. If anyone has already burnt them he should  
 rm me by telegram and they will be telegraphed again.

Togo.

Dept: Note: \*These are presumably those given in our No. 098127].

*Japanese orders for destruction of cyphers, etc.*

/90

: 098803

te: 6th December, 1941.

n: Foreign Minister, Tokyo.

Japanese Ambassador, London.

2445 Circular. (Secret).

e: 2nd December, 1941.

Please take the following action without delay and see to it that no word of  
 aks out to outsiders.

Except for one copy each of the O, E, H, P, G, and L codes and the Character  
 e, all telegraphic codes (including the cypher books for intercommunication  
 een the Ministries of Foreign Affairs, War, and Marine) to be burnt.

When this has been done, the one word "HARUNA" to be telegraphed.

The files of all incoming and outgoing telegrams and all other confidential  
 uments to be burnt.

Taking all possible care not to arouse outside suspicion, all secret documents  
 e treated in the same way.

s these are precautions envisaging an emergency, you should communicate  
 ur duties and maintain your calmness and self-respect.

*Japanese-American negotiations account sent to Japanese Ambassador, Berlin.*

No. 098633.

Date: 7th December, 1941.

n: Foreign Minister, TOKYO.  
Japanese Ambassador, BERLIN.  
986.

: 30th November 1941.

Dept. Note: First paragraph missing).

The present Cabinet has therefore continued the negotiations (with  
AMERICA) hitherto on an equitable basis though at the same time exercising  
care to safeguard JAPAN's authority and existence.

Amongst the most knotty points in these negotiations has been the conflict in  
respective opinions regarding the question of withdrawing troops (with-  
drawal of troops from CHINA and INDO CHINA was demanded) etc., but to  
be by circumstances in the negotiations hitherto, the fundamental obstacle  
has been the traditional policy of AMERICA with regard to the conduct of  
international relations, that is to say her adherence to the same fundamental  
principles as were expressed in the recent Anglo-American talks at sea (? i. e.  
Atlantic Charter). In short, AMERICA's real intention is to veto and  
frustrate the establishment of the New Order in EUROPE and ASIA by JAPAN,  
GERMANY, and ITALY (i. e. the purpose of the Tripartite Pact), their view  
being that Japanese-American relations cannot be maintained on a friendly  
basis so long as JAPAN makes common cause with GERMANY and ITALY,  
acting on this view, they have to all intents and purposes demanded  
JAPAN's renunciation of the Tripartite Pact. This has brought the negotia-

tions to their final stage, and, as the talks of the last few days have made the matter still more clear, JAPAN has been compelled to realize that to continue the negotiations any longer cannot be expected to serve any useful purpose.

3. Again, the proposals presented by the American Government on the subject made the above attitude even clearer, the clause affecting the Tripartite Pact being worded: "It is agreed that any treaty which either of the two Governments may have concluded with a third country shall not be construed as conflicting with the principles of this treaty, in other words, with the maintenance of peace in all regions of the PACIFIC . . . ." It is apparent that the clause was planned with the object of restricting the interpretation of JAPAN's obligations under the Tripartite Pact, and thereby of making JAPAN refrain from giving support to GERMANY and ITALY in the event of American participation in the (group corrupt: ! European) war, and to judge by this clause alone it has been realised that, quite apart from all other questions, it would be impossible for the American proposals to be made (group corrupt: ! the subject of negotiations). Moreover the fact is that the American Government held discussions with GREAT BRITAIN, CHINA, AUSTRALIA, and the United States before presenting their proposals, and hence it can be seen that AMERICA is at present (? acting in common) with these countries and regards JAPAN as an enemy together with GERMANY and ITALY.

Director (3). P. O. (3). P. I. D. Admiralty. War Office (3). India Office (2). Colonial Office. Air Ministry. Major Norton. Sir E. Bridges.

*Japanese Ambassador, Rome, reports interview with Mussolini.*

No: 098650

Date: 7th December,

From: Japanese Ambassador, ROME.

To: Foreign Minister, TOKYO.

Date: 3rd December, 1941.

(Chef de Mission cypher recyphered on the machine).

Reference your No. 988 to BERLIN (our No. 098452).

Accompanied by ANDO I saw the Duce, MUSSOLINI. (CIANO also went) at 11 a.m. on the 3rd. I first gave him an outline of the Japanese-American negotiations as set forth in your No. 988 to BERLIN (our No. 098633). MUSSOLINI said he had been following the negotiations from their inception to-day with the greatest attention, and my communication had caused him no surprise. There was no doubt that the present situation was the natural result of the (? obstinacy) of the American Government and of President Roosevelt's policy of intervention. The plutocrats of AMERICA aimed at the economic exploitation of Eastern ASIA for their own benefit, and wanted to prevent JAPAN from the Axis and intervene in the European war. He had known from the beginning that JAPAN, who was faithful and loyal, would not respond to such an attitude on AMERICA's part, negotiations or no negotiations. As I and my predecessor knew, he was a whole-hearted supporter of Japanese fundamental policy for the establishment of a New Order in East ASIA, as it was in the past, so it was in the present and would be in the future. I firmly believed that JAPAN, as a natural right, would be the leader of East ASIA.

Director (3). P. O. (3). P. I. D. Admiralty. War Office (3). India Office (2). Colonial Office. Air Ministry. Major Norton. Sir E. Bridges.

I then spoke on the lines of your telegram under reference ( [This passage in brackets is not clear. The sense seems to be: "With regard to paragraph 2 of your telegram, it was to be done as one copy between our Ambassador in Berlin and RIBBENTROP and talks of some sort were in progress. I should like to ask the German Ambassador about it." ] ). With regard to paragraph 2 of the telegram MUSSOLINI said that if war broke out ITALY would give no support to the best of her power; that is to say she would do her best to keep the British Navy in the MEDITERRANEAN. Moreover GERMANY and ITALY

er had recently established an air blockade and were trying to put further pressure on BRITAIN in the MEDITERRANEAN. Also with regard to [? 2 ? 3], was ready to sign to-day. I therefore asked further with regard to 2 if ITALY would do this at once if JAPAN declared war on BRITAIN and on AMERICA. He replied that in accordance with the Three Power Pact naturally she would. However, it would be necessary to do it simultaneously with GERMANY, they would have to go through the formality of consulting with GERMANY. With regard to 3, I submitted the [one group] translation in your telegram No. 237 [not received], and asked which procedure he preferred, a single copy or separate copies. He replied that it should be done simultaneously with GERMANY, but he did not much mind what form it took. If it were possible a single copy would make a greater impression of strength. He would at once consult MACKENSEN on this point. At this meeting MUSSOLINI asked me questions about the Russian question, but I therefore did not refer to it. He repeated to BERLIN.

HORIKIRI.

*Japan and the Axis, Proposed Three-Power Pact.*

No: 098651

Date: 7th DECEMBER, 1941.

From: The Japanese Ambassador, ROME.

The Foreign Minister, TOKYO.

782.

Date: 5th December, 1941.

Reference my telegram No. 775. [Not received].

Accompanied by ARDO I had an interview with the Foreign Minister CIANO on the 5th at his request.

CIANO showed me the Italian text of the draft of a Three-Power Pact to which GERMANY and ITALY have agreed, (BERLIN will have telegraphed this to me, I imagine), regarding participation in the war and not making an independent armistice or independent peace. He said that if the Japanese would agree to this it could be signed at any time. The procedure could be arranged by consultations between BERLIN and TOKYO and then all the parties could sign. He repeated by telegram to BERLIN.

HORIKIRI.

*Japanese Foreign Minister's View of Washington Conversations.*

No: 098671.

Date: 8th DECEMBER, 1941.

From: Foreign Minister, TOKYO.

Japanese Ambassador, BERLIN, etc.

2416 Circular.

Date: 28th November, 1941.

Dept: Note: Very corrupt text].

Chef de Mission cypher).

With regard to the Japanese-American negotiations, the counter-proposal made by the Americans on the 27th ignores the position of JAPAN and cannot be considered for a moment. It seems, therefore, that there is nothing for it but to continue the negotiations. The situation is that it is impossible to guarantee within a few days from now there will be no [? change in] the relations of JAPAN with BRITAIN and AMERICA.

This is for your personal information only.

Togo.

No: 482.

Date: 30th November, 1941.

Recently at this post, we have been testing general news reception.

At present it is quite impossible [group corrupt: ? to hear] the 10.30 p. Tokyo time, broadcast and, for the time being, please note that we are listening to JVJ's [group corrupt: ? JZJ's] broadcasts directed to American states at 6.30 p. m., Tokyo time. The same, I understand, applies to Argentina.

Actually, reception conditions here are considered best between 4 a. m. and 6 a. m., Tokyo time, and I consider it would be most advantageous to use this period for South American broadcasts. Two wave-lengths [of frequencies] between 10 and 15 megacycles [group corrupt: ? are suggested].

Director. F. O. (3). P. I. D. M. I. 5.

*Japanese Ambassador, Bangkok, Wishes to Burn Codes.*

No: 098674

Date: 8th DECEMBER, 1941

From: The Japanese Ambassador, BANGKOK.

To: The Foreign Minister, TOKYO.

No: 883.

Date: 30th November, 1941.

In view of the state of emergency, I should like to burn all telegraphic codes except those set out below. Please wire at once whether you have any objections.

YO, KA, OITE, TO, TSU, FUJI, X. [Group corrupt]. MATSU with No. 1 rules for use, directions for using "B" machine (KO-OTSU [(a)-(b)]) and machine code—one of each of the above.

I, YAKKO [—NU]—two of each.

Further, I should like to burn all shipping codes, naval codes and codes used between the three Ministries. Please negotiate with the Departments concerned and telegraph instructions.

*Japan and the Axis: Proposed Three-Power Pact.*

No. 098693

Date: 8th DECEMBER, 1941

From: Japanese Ambassador, BERLIN.

To: Foreign Minister, TOKYO.

No: 1416.

Date: 5th December, 1941.

[Dept: Note: See our No. 088551].

(Chef de Mission Cypher).

Reference my No. 1407 [not received].

I called on RIBBENTROP at his request at 3 a. m. on the 5th. He made a formal reply that they accepted the two points put forward by us. My following telegram gives the draft Treaty which he gave me in this connection.

OSHMA

No: 1417 of 5th December, 1941.

(Chef de Mission Cypher).

(1. The last part of the Agreement is in the same form as the Three Power Treaty.

2. The place of signature is BERLIN.)

[Dept: Note: Translation follows at end of text].

Director (3). F. O. (3). P. I. D. Admiralty. War Office (3). India Office (2). Colonial Office. Air Ministry. M. I. 5. Sir E. Bridges. Dominions Office.

(Part of German text in original illegible.)

## Artikel 1

Als zwischen Deutschland und Italien einerseits und den Vereinigten Staaten Amerika andererseits der Kriegszustand eintritt, wird sich Japan sofort seinerseits als im Kriegszustand mit den Vereinigten Staaten befindlich betonen und diesen Krieg mit allen ihm zur Verfügung stehenden Machtmitteln führen.

## Artikel 2.

Deutschland, Italien und Japan verpflichten sich, im Falle eines gemäss Artikel dieses Abkommens von den drei Mächten gemeinsam gegen die Vereinigten Staaten von Amerika geführten Krieges ohne volles [gegen]seitiges Einverständnis einen Waffenstillstand oder Frieden mit den Vereinigten Staaten zu schliessen. Sie übernehmen die gleiche Verpflichtung auch hinsichtlich eines Waffenstillstands oder Friedens mit England für den Fall, dass zwischen Japan und England der Kriegszustand eintritt.

## Artikel 3.

Die drei Regierungen sind darüber einig, dass dieses Abkommen auf das strengste geheim gehalten wird. Sie werden jedoch die von ihnen in Artikel 2 übernommene Verpflichtung in einer noch zu verabredenden Form bekanntgeben, und sich Deutschland, Italien und Japan gemeinsam im Kriegszustand mit den Vereinigten Staaten von Amerika oder England oder mit diesen beiden befinden.

## Artikel 4.

Dieses Abkommen tritt sofort mit seiner Unterzeichnung in Kraft und bleibt so lange wie der am 27. September 1940 abgeschlossene Dreimächtepakt in Kraft.

OSHIMA.

*Translation*

View of the increasingly obvious desire of the UNITED STATES and ENGLAND to bring to nought a just New Order with all the armed forces at their disposal and to cut off the means of existence of the German, Italian and Japanese peoples, the German Government, the Italian Government and the Japanese Government have, in order to ward off these grave threats to the existence of the peoples, jointly resolved on the following:

## Article (1).

Should a state of war arise between JAPAN and the UNITED STATES, GERMANY and ITALY for their part shall also consider themselves to be at war with the UNITED STATES, and shall conduct this war with all the armed forces at their disposal.

Should a state of war arise between GERMANY and ITALY on the one hand and the UNITED STATES on the other, JAPAN for her part shall consider herself to be at war with the UNITED STATES, and shall conduct this war with all the armed forces at her disposal.

## Article (2).

GERMANY, ITALY and JAPAN bind themselves in the event of a war waged by the Three Powers against the UNITED STATES according to Article 1 of this Treaty, not to conclude any armistice or peace with the UNITED STATES without full mutual agreement.

They undertake a similar obligation regarding an armistice or peace with ENGLAND, should a state of war arise between JAPAN and ENGLAND.

## Article (3).

The three Governments are in full agreement that this agreement shall be kept strictly secret. They shall, however, announce in a form yet to be decided, the undertakings assumed in Article (2), as soon as GERMANY, ITALY and JAPAN find themselves jointly at war with the UNITED STATES of AMERICA or ENGLAND or with both these Powers.

## Article (4).

This agreement comes into force immediately on signature and remains in force as long as the Three Power Pact concluded on 27th September 1940.

*Japanese Notification of "Extremely Critical" Relations with Great Britain  
United States*

BJ/91

No. 008694

Date: 8th DECEMBER, 1941

From: Foreign Minister, TOKYO.  
To: Japanese Embassy, LONDON, etc.  
No. 2494 Circular.  
Date: 7th December, 1941.

Relations between JAPAN and GREAT BRITAIN and the UNITED STATES are extremely critical.

JAPANESE FOREIGN MINISTER

[Dept. Note: This telegram was sent in plain language with the special words inserted given in our No. 008602. It was despatched from TOKYO at hours OMT on 7th December 1941, i. e. Japan Time 8.50 p. m. on 7th December 1941].

Director (3). F. O. (3). P. I. D. Admiralty. War Office (3). India Office (2). Colonial Office. Air Ministry. M. I. S. Sir E. Bridges. Dominion Office.

*Japan and the Axis: Proposed Three-Power Pact.*

No: 008696

Date: 8th DECEMBER, 1941

From: The Foreign Minister, TOKYO.  
To: The Japanese Ambassador, BERLIN.  
No. 1004. Most immediate.  
Date: 7th December, 1941.

[Dept: Note: In Chef de Mission cypher recyphered on the machine].

Reference your Nos. 1418 and 1419 [these telegrams were received in correct and fragmentary form. The former appears to deal with Russian supplies the latter with the draft treaty].

We are in complete agreement with GERMANY's counter-proposals. Accordingly there is no objection to initialling right away and formally signing as soon as the [group corrupt: ? necessary] procedure has been completed. However, the situation may take a sudden turn and we cannot tell whether a [group corrupt: ?] collision may not occur in the interval before the formal signing is performed. Thus, supposing we initial now, it must be understood that for the actual signing, the text proposed by GERMANY may not apply to the existing circumstances (for example, clauses like No. 1 will be unnecessary if GERMANY and ITALY join in the war without delay).

[Two groups] I wish you to see RIBBENTROP immediately and explain the above particulars confidentially to him. Also make clear that it is the expectation of the Imperial Government that if war breaks out between JAPAN and AMERICA before the formal signature of the agreement, GERMANY and ITALY will immediately participate.

Director (3). P. O. (3). P. L. D. Admiralty. War Office (3). India Office (2). Colonial Office. Air Ministry. M. I. S. Sir E. Bridges. Dominion Office.

As regards the text of the agreement, [group corrupt: ? please negotiate] only for the stipulation concerning the non-conclusion of a separate peace. Respecting GERMANY, please refer to the text in my No. 997 (not received). Further, discuss with GERMANY whether the formal signing should be made public after GERMANY and ITALY have joined in the war and telegraph your reply.

Please repeat to ROME.

*Far Eastern War: Question of German and Italian Participation*

RJ/92.

No: 008722

Date: 9th DECEMBER, 1941.

Japanese Ambassador, BERLIN.

Foreign Minister, TOKYO.

1432. Most immediate.

8th December, 1941.

(de Mission cypher).

1 p. m. to-day, the 7th, I received a radio report that hostilities had broken between JAPAN and AMERICA, and at once called an RIBBENTROP. He said that from reports which he too had received he thought this was true, and therefore, although he had not yet secured HITLER's sanction, the immediate participation in the war by GERMANY and ITALY was a matter of course. The secret agreement had in consequence already become —?—, and I had decided] to drop it \* \* \* [if portion is lost here] \* \* \* Form German and Italian participation. RIBBENTROP said he would discuss the same to-morrow, the 8th, about the time of publication of this declaration on.

RIBBENTROP rang up CIANO then and there and notified him of the same.

Director (23. P. O. (3). P. I. D. Admiralty. War Office (3). India Office Colonial Office. Air Ministry. Sir H. Bridges. Dominions Office.

*Far Eastern War: Text of Japanese-German-Italian Agreement*

BJ/98

No. 008760

Date: 10th DECEMBER, 1941.

The Japanese Ambassador, BERLIN.

The Foreign Minister, TOKYO.

1440. Most immediate.

8th December, 1941.

Treated as Chef de Mission Cypher.

Reference my No. 1432. (Our No. 008722).

The text of the agreement, after consultation with GERMANY, is given below. Explanation follows in my separate telegram.

„Wir haben den unerschütterlichen Entschluss, die Waffen nicht niederzulegen, bis der gemeinsame Krieg gegen die Vereinigten Staaten von Amerika und England zum erfolgreichen Ende geführt worden ist, haben sich die Deutsche Regierung, die Japanische Regierung und die Japanische Regierung über folgende Bestimmungen geeinigt:

Artikel 1.—Deutschland, Italien und Japan werden den ihnen von den Vereinigten Staaten von Amerika und England aufgezwungenen Krieg mit allen ihnen zur Verfügung stehenden Machtmitteln gemeinsam bis zum erfolgreichen Ende führen.

Artikel 2.—Deutschland, Italien und Japan verpflichten sich, ohne volles gegenseitiges Einverständnis weder mit den Vereinigten Staaten von Amerika noch mit England Waffenstillstand oder Frieden zu schließen.

Director (3). F. O. (3). P. I. D. Admiralty War Office (3). India Office (2). Colonial Office. Air Ministry. Sir E. Bridges. Dominions Office.

Artikel 3.—Deutschland, Italien und Japan werden nach erfolgreicher Beendigung des Krieges zum Zwecke der Herbeiführung einer gerechten Neuordnung auf engste zusammenarbeiten.

Artikel 4.—Dieses Abkommen tritt sofort mit seiner Unterzeichnung in Kraft. Urkunde dessen haben die Unterzeichneten, von ihren Regierungen gehörig ermächtigt, dieses Abkommen unterzeichnet und mit ihren Siegeln versehen. Gefertigt in dreifacher Urschrift in deutscher, italienischer und japanischer Sprache, in Berlin am . . . Dezember 1941 im 20ten Jahre der Faschistischen Ära entsprechend dem Tage des 12ten Monats des 16ten Jahres der Ära Syowa. 1441 of 8th December, 1941.

For reference to my telegram No. 1440 [see above].

From 5 p. m. to-day myself, RIBBENTROP, KASE, USHIDA, and GAU our heads together on this matter of the declaration of the non-conclusion of a separate peace with a view to imparting to this declaration the loftiest significance, and produced the text of the agreement contained in my teletype under reference. This goes beyond the adoption of our proposal in regard to the promise of nonconclusion of a separate peace (Clause II) to the following:

(a) The Three Powers' firm intention to fight together against Anglo-American aggression until final victory is expressed in Clause II.

(b) Cooperation with a view to the establishment of a new order after the war is promised in Clause III.

Thereby the significance of this war is elucidated, while at the same time Clause III has an advantage from the point of view of obtaining German and Italian cooperation when the Great East Asia co-prosperity sphere is established after the war, this, I believe, being in accord with the views of the Japanese Government. I hope therefore that the above text will be adopted unless there are any serious objections, and that the formalities for signature may be completed promptly. I would add that in the meantime the Germans have informed me that the Italian Government is in complete agreement with this proposal.

2. Ribbentrop said that he would like the publication of this agreement to take place on the 10th and immediately afterwards hoped to stage a big demonstration. He was unable at the moment to say what kind of demonstration this would be, but it was sure to be something distinctly favourable to JAPAN, and he was very anxious that signature should be on the 10th. I therefore told him that this should not be undertaken in view of formalities in JAPAN, but as it is likely to be completed to us if we play our part in falling in with GERMANY's intention I would suggest that you push on with the formalities as fast as possible with a view to a prompt signature. Should signature on the 10th not be possible please reply immediately by telegram on what date it can be accomplished.

3. Just as this very talk was in progress RIBBENTROP received the Intelligence Headquarters report of the victory in which the American battleships were sunk and was greatly delighted and praised highly the daring of our Navy.

No: 1442 of 8th December, 1941.

Most immediate. Secret.

Reference my No. 1440. [See above.]

As the matter is urgent, I have tentatively compiled the Japanese text of the agreement below. If you have no objections I should like to take this as the Japanese text of the agreement. Please telegraph your reply at once.

The Japanese Government, the German Government and the Italian Government with the inflexible determination not to lay down their arms in the joint struggle against the UNITED STATES and the BRITISH EMPIRE until final victory is achieved have made the following agreement.

1. JAPAN, GERMANY and ITALY will conjointly prosecute the war force against them by the UNITED STATES and the BRITISH EMPIRE will all the while be at their disposal until victory is attained.

2. JAPAN, GERMANY and ITALY, except by mutual consent, undertake not to conclude a separate [Dept. Note: the Japanese word used means "arbitrary" "self-willed"] armistice and/or peace with the UNITED STATES and the BRITISH EMPIRE or with either of them.

3. JAPAN, GERMANY and ITALY, after victory is attained, will cooperate closely in the establishment of an equitable New Order.

4. This agreement will come into force simultaneously with its signature by the witnesses whereof, the undermentioned, having received competent authority from their respective countries, have set their seals this — day of the 12th month of the 16th year of the Showa Era i. e. — December 1941 or the — day of the 20th year of the Fascist Era, in BERLIN, the said agreement having been drawn up in Japanese, German and Italian.

*Japanese Instructions to Embassy, Rio, etc. to burn cyphers etc*

My telegram No. 1013. (Not received).

For your information, the following is a translation into German of the document giving you power and authority to sign:

(Übersetzung).

TOKYO, den . . . . Dezember des sechzehnten Jahres von Shōwa.

(Amtliches Insiegel).

Der Minister des Auswärtigen Amtes, Shigenori TOGO.

An den Ausserordentlichen und Bevollmächtigt— Botschafter in BERLIN, Herrn OSHIMA.

Seine Majestät der Kaiser haben nachdem die Beratung des kaiserlichen geheimen Staatsrates abgeschlossen ist, mit dem heutigen Datum den

Abschluss

Director.

F. —. (3).

P. I. D.

Abschluss des Abkommens zwischen JAPAN, DEUTSCHLAND und ITALIEN zu bewilligen geruht.

Sie sind bevollmächtigt, das oben genannte Abkommen zu unterzeichnen und zu siegeln.

(Translation of German given above is as follows:—

Translation).

TOKYO, the —th December, in the 16th year of the Shōwa Era.

Office Seal).

Foreign Minister Shigenori TOGO,

to Mr. OSHIMA, Ambassador Extraordinary and Minister Plenipotentiary at  
BERLIN.

Upon the advice of the Imperial Privy Council, His Majesty the Emperor is  
pleased to agree to the conclusion of a Pact, dated to-day, between JAPAN,  
GERMANY and ITALY.

You are empowered to sign and seal the aforesaid Pact).

*Japan and the Axis: Text of Three-Power Treaty*

Date: 12th December, 1941.

From: The Foreign Minister, TOKYO.

To: The Japanese Ambassador, BERLIN.

No. 1010.

Date: 9th December, 1941.

To be treated as Chef de Mission cypher.

At 9 p. m. to-day the German Ambassador called on me and we had a second  
interview when he submitted the new draft of the text. You will already have  
received this, I expect.

In regard to this text I said that this involved the 1st paragraph of Article 3  
of the Three-Power Treaty, and suggested the removal of Article 3. At the  
same time, I said, if GERMANY stuck to the retention of this Article, after the  
words "an equitable New Order" in that same Article should be added "in the  
Three-Power Treaty concluded on 27th September, 1940". Article 4 should  
therefore be amended to read "This pact shall come into force at the time of its  
signature and its period of validity shall be identical with that of the Three-  
Power Treaty concluded on the 27th September, 1940".

The Japanese text is given in my immediately following telegram. (See below.)

The remainder of the telegram gives instructions for telegraphing the texts  
in the three languages to enable the formalities in JAPAN to be concluded. See

Footnote. Note: at end of TOKYO-BERLIN No. 1011 of 9th December, 1941. (See  
below)].

Pact between JAPAN, GERMANY, and ITALY.

In the inflexible resolve not to lay down their arms till the joint war against  
the UNITED STATES and ENGLAND has been successfully concluded, the  
Japanese, German, and Italian Governments have jointly agreed as follows:

*Article 1.*

JAPAN, GERMANY, and ITALY will fight together with all the resources at  
their command until victory is achieved over the UNITED STATES and  
ENGLAND.

*Article 2.*

JAPAN, GERMANY, and ITALY undertake not to make a separate armistice  
or separate peace with the UNITED STATES or ENGLAND without full mutual  
understanding.

*Article 3.*

JAPAN, GERMANY, and ITALY will after the victorious conclusion of war collaborate closely in establishing an equitable New Order in the spirit of the Three-Power Treaty signed on 27th September, 1940.

*Article 4*

This Pact shall come into force at the time of signature.

As witness whereof the undermentioned plenipotentiaries etc.

Signed in triplicate in Japanese, German and Italian at BERLIN (date)

(Dept. Note: The German and Italian versions of the above were cable-  
sent from TOKYO to BERLIN as Nos. 1450 and 1453 respectively, dated 10th December, 1941).

*JAPANESE NAVAL PLANS IN SOUTH ATLANTIC AND PACIFIC*

No. 099199

Date: 22nd December, 1941

From: Foreign Minister, TOKYO.

To: Japanese Ambassador, Buenos Aires.

No. 288.

Date: 9th December, 1941.

[The first part of this telegram recounts the events that led up to the outbreak of war from the Japanese point of view—Japanese patience and A. B. C. encirclement. Part II follows].

2. The Imperial Japanese forces, however, right at the outset and in the face of a heavy attack, have achieved the following: two battleships sunk, four severely damaged, four heavy cruisers severely damaged (three are confirmed), one aircraft-carrier sunk and over one hundred aircraft destroyed. It may be said that the main strength of the American Pacific Fleet has been practically annihilated.

From now on the Imperial (Japanese) Navy will be able to extend the scope of its (? activities) little by little to the South Atlantic and South Pacific and it is clear at least that we shall obtain command of the seas in the South Atlantic before long. Even, therefore, if economic intercourse between JAPAN and the South American States bordering the Pacific be cut off for the time being, it will not be long before communication is restored. Not only so, but intercourse with ARGENTINA and BRAZIL by merchant ships in convoy will be urged upon

o countries, while sea communication with BRITAIN, AMERICA, and Latin  
ERICA will, on the other hand, be severed (? shortly) by the Imperial (Japa-

se) Navy.

# PROCEEDINGS OF THE HEWITT INQUIRY

## FIRST DAY

Pursuant to notice, the investigation met at the offices of the General Board, Navy Department, at 2 p. m., Monday, 14 May 1945.

Present: Admiral H. Kent Hewitt, U. S. Navy, Investigating Officer; Mr. John F. Sonnett, Special Assistant to the Secretary of the Navy, Counsel; Lieutenant Commander Benjamin H. Griswold, U. S. Naval Reserve, Aide to Admiral Hewitt; Lieutenant John Ford Lecher, U. S. Naval Reserve, Assistant to Mr. Sonnett; and Ship's Clerk Ben Harold, U. S. Naval Reserve, Official Reporter.

The precept, convening the investigation, was read and is appended hereto as "Exhibit 1."

Admiral Hewitt made the following opening statement:

The precept of the Secretary of the Navy appointing Admiral H. Kent Hewitt, USN, to conduct further investigation into the facts concerning the Japanese attack on Pearl Harbor, 7 December 1941, will be marked "Exhibit 1" in the record of this investigation.

The Secretary's precept forwarded:

(A) Report of Commission appointed by Executive Order, dated 7 December 1941, to investigate the attack made by Japanese armed forces upon the Territory of Hawaii, 7 December 1941.

(B) Copy of Examination of Witnesses, ordered by the Secretary of the Navy, 12 February 1944.

(C) Copy of record of proceedings of Court of Inquiry, convened by order of the Secretary of the Navy, 13 July 1944.

The Secretary's precept provides, in part:

"You are hereby detailed to make a study of the enclosures and then to conduct such further investigation, including the examination of any additional persons who may have knowledge of the facts pertinent to the said Japanese attack, and to re-examine any such person who has been previously examined, if it may appear to be necessary, and to record the testimony given thereby. You are authorized to obtain such documents relating to said attack as may be required for inclusion in the record.

A study has been made of the enclosures. In this connection, a narrative statement of the previous Navy investigations has been prepared by counsel and is designated "Exhibit 2" in these proceedings. I find that further investigation is necessary in order:

(A) to obtain the information now available concerning the composition and movements of the Japanese forces which attacked Pearl Harbor on 7 December 1941;

(B) to obtain the information which was available at Pearl Harbor, Cavite, and at Washington, during the period 14 October 1941 to 7 December 1941, concerning the location, composition and movements of Japanese naval forces, including: (1) examination as to the activities of the Combat Intelligence Unit at Pearl Harbor and the information obtained by it, with particular reference to the location

of the major portion of the Japanese carriers, to the loss of radio contact with units of the Japanese Fleet on or about 1 December 1941 and to the apparently erroneous belief that on 7 December 1941 the attacking force was located south of Hawaii; (2) examination as to the preparation of ONI bulletins, such as the bulletin of 1 December 1941; (3) examination as to the information furnished by the Navy to the Army, at Washington and at Pearl Harbor, concerning Japanese naval movements and loss of radio contact with Japanese units; (4) examination as to information of Japanese naval units obtained by Army reconnaissance, with particular reference to the War Department's directions to General Short, about 26 November 1941, to conduct reconnaissance to Jaluit, to the action taken, and to the question whether Admiral Kimmel was advised of this;

(C) to determine whether or not Japanese submarines operated in and around Pearl Harbor prior to 7 December 1941, including: (1) whether a captured Japanese map, as indicated in the Army Pearl Harbor report, establishes that such submarines were in Pearl Harbor before that date, or, as indicated in the book entitled "Battle Report," that the map was [3] made on that date and erroneously fixed the positions of United States ships in the harbor; (2) what submarine contacts were made in or around Pearl Harbor prior to 7 December 1941; (3) according to "Battle Report," at about 0500 on 7 December 1941, a naval radio station on Oahu intercepted and logged a conversation between the WARD and CONDOR concerning the sighting of a submarine at approximately 0350. It should be determined what was done about this and why were the net gates allowed to remain open from 0445 until 0800;

(D) to obtain the information received in Hawaii through the interception of Japanese telephone and cable messages by the office of Naval Intelligence, or so obtained by other agencies of the United States Government or of other governments and communicated to the Naval Intelligence at Hawaii;

(E) to determine who obtained the intercepted Japanese messages concerning ship movements, sent to and from Honolulu, which are set forth in Exhibit 63 of the Naval Court's Record, and how, where, and where they were obtained and decoded;

(F) to determine the basis for the statement at page 6 of "Battle Report" that "There were two powerful task forces sent against Pearl Harbor, the major elements of one lurking just over the horizon from its companion force to overwhelm any American attempt to engage the invaders. The United States, too, had two task forces at sea, and Japanese espionage had so informed Tokyo."

(G) to determine whether or not there was a "winds code" message relating to the United States. In connection with the "winds code" message, it should be noted that according to Captain Safford the last time he saw the message was when it was sent to the Robt. Commission. It should be determined whether or not the message was there or is there now;

(H) to interview Admiral Wilkinson generally and with particular reference to combat intelligence and to the "winds code";

(I) to interview Captain McCollum generally and with particular reference to the "winds code";

(J) to determine what the original records show concerning: (1) Admiral Kimmel's approval of Annex VII to the Joint Coastal Defense Plan and the "Bellinger" estimate; (2) Admiral Kimmel's receipt and evaluation [4] of copies of the Secretary of the Navy's letter of 24 January 1941, and the Secretary of War's reply; (3) Admiral Kimmel's receipt and evaluation of the second letter from the Chief of Naval Operations concerning air torpedo attack; (4) the date when Admiral Kimmel approved the aircraft schedules which were submitted covering employment of planes during the period 15 November 1941 to 31 December 1941;

(K) to determine what were the reasons for the air reconnaissance which Admiral Kimmel directed on or about July, 1941, toward the Philippines.

In accordance with the Secretary's precept, having found that such further investigation is necessary, the purpose of this proceeding will be to examine persons having knowledge of the facts in question and to obtain such documents as may be relevant thereto.

Counsel in this investigation will be John F. Sonnett, Special Assistant to the Secretary of the Navy. Also assisting in the investigation are Lieutenant Commander Benjamin H. Griswold, USNR, and Lieutenant John Ford Baecher, USNR. The reporter at this meeting is Ship's Clerk Ben Harold, USNR.

A witness entered, was read the precept, and was duly sworn.

Admiral HEWITT. Will you give your name and rank?

Captain SMEDBERG. William R. Smedberg, III, Captain, U. S. Navy.

Admiral HEWITT. What is your present duty?

Captain SMEDBERG. I am the Assistant Combat Intelligence Officer, Staff, Commander-in-Chief, United States Fleet.

Admiral HEWITT. Will you give me the information that you now have available and can testify to concerning the Japanese forces which attacked Pearl Harbor on December 7, 1941?

Captain SMEDBERG. A Japanese prisoner who was captured on Okinawa [5] during the Marianas Campaign has given a very complete account of the preparations and movements of the Jap Fleet from the Fall of 1941, up to and including December 7, 1941. This prisoner was a chief yeoman in the Japanese Navy, attached to the Staff of the Commander-in-Chief, Combined Fleet, Admiral Yamato. He has reconstructed the events preceding and leading up to the Pearl Harbor attack. Much of the information given by this chief yeoman has been substantiated and verified by other information which we have received, and we believe the reliability which can be placed on this information to be very high.

The best reconstruction can be found in the Commander-in-Chief, Pacific Ocean Areas, Weekly Intelligence Bulletin, a confidential bulletin dated 8 December 1944, volume 1, number 22. This gives a very complete story of the preparations for the attack and also gives a reconstruction of the Operation Order, as I remember it, on which the attack was based.

Admiral HEWITT. Can you submit a copy of this as an exhibit?

Captain SMEDBERG. Yes, sir.

(The Weekly Intelligence Bulletin referred to was received and marked "Exhibit 3.")

This secret Operation Order is dated 1 November 1941 and starts off with the statement that "The Japanese Empire will declare war on the United States, Great Britain and the Netherlands," that "War will be declared on X-day," and that "This order will become effective on Y-Day."

It gives the composition of the striking force, which sortied from Etorofu To in the Kuriles on or about 27 November (all times and dates here are East Longitude times and dates) and headed eastward with a heavy front before turning south to the attack.

[6] The late Vice Admiral Nagumo, who was then CinC 1st Fleet, was in command and his force consisted of the six carriers, KAGA, AKAGI, SORYU, HIRYU, SHOKAKU, and ZUIKAKU; two battleships, the HIYEI and KIRISHIMA; three cruisers, TONE, CHIKUMA, and ABUKUMA; elements of Destroyer Squadron One, and about twenty submarines.

This document tells of the plan to coordinate midget submarine unit attacks with the Main Fleet attack and states that the Sixth Fleet will attempt to use them in attacks within Pearl Harbor. The Sixth Fleet was the Japanese submarine fleet. The submarine fleet, according to the chief yeoman prisoner of war, had almost its entire strength off the mouth of Pearl Harbor, with the object of attacking those ships which attempted to escape from the plane attacks of the carrier divisions one, two, and five.

One of the documents which the prisoner previously referred to and reconstructed from memory was a Combined Fleet Secret Operation Order Number 2, dated 5 November, which stated that Y-Day will be 23 November. He also reconstructed Combined Fleet Secret Operation Order Number 3, dated 10 November, which stated, "X-Day will be 8 December." (It should be noted that 8 December is 7 December Pearl Harbor date.)

From the prisoner's reconstruction of the original Secret Operation Order Number 1, it was his belief, and he so stated, that the striking force (carrier task force) would depart its naval bases or operating areas about X minus 16 days and will proceed by way of Tanabaru Bay, Etorofu Island in the Kuriles for Pearl Harbor, where it would deliver a surprise attack.

It further stated that the commander of the surprise attack force (submarine force), having the Sixth Fleet (submarine fleet) as his main element, will have most of the submarines leave the western part of the [7] Inland Sea on X minus 20 day to attack Pearl Harbor.

It is interesting to note here that the commander of this surprise attack force was charged with carrying out reconnaissance before the attack and also carrying out surprise attacks on enemy warships with midget submarines. The prisoner states that the time for surprise attacks was to be after the flights of planes have attacked Oahu.

There is on page 16 of the Intelligence Bulletin which we have been discussing a copy of a captured track chart of the Japanese carriers covering the period, showing, among other things, the departure of the carriers from their home bases, departure from Etorofu Island on November 27th, arrival to the northwest of Oahu on December 8th (East Longitude time), and a retirement initially to the northwest and then to the southwest. This indicates that the Jap aircraft

took off from their carriers about 200 miles due north of Oahu, and this information checks with the document recovered from a crashed enemy plane shortly after the raid.

Admiral HEWITT: There is reference in the exhibit just introduced, and in other publications concerning the Pearl Harbor attack, to a map which was recovered from a Japanese midget submarine, showing courses and the location of ships inside Pearl Harbor. Can you produce the original or a copy of this map and discuss it?

Captain SMEDBERG. I cannot produce the original, Admiral. My vision had not been formed up to the time of Pearl Harbor, and I have asked that the records of the Japanese Section of the Far Eastern Division of the Office of Naval Intelligence be checked to see if it can be located—without result. I have here, however, a copy, which, I am assured by Captain E. S. Pearce, present head of the Japanese Section of the Far [8] Eastern Division of ONI, was made from the English translation of the Japanese chart taken from the captured midget submarine. This chart indicates to me the courses and times which the submarine captain laid down beforehand and hoped to follow. He hadn't gotten into Pearl Harbor, as he later testified after his capture, so that the chart could not have been prepared by him either while in Pearl Harbor or after his emergence from Pearl Harbor.

I leave you a copy of this chart as exhibit 4.

(The chart referred to was received and marked "Exhibit 4.")

Admiral HEWITT. What information can you give as to the characteristics of the midget submarine?

Captain SMEDBERG. There are several descriptions of Jap midget subs which have been developed from captured documents and prisoner of war interrogations, one of the best being found in Commander-in-Chief, Pacific Ocean Areas, Confidential Intelligence Bulletin of 20 October 1944, volume 1, number 15, a copy of which I will bring to you for use as an exhibit.

(The Intelligence Bulletin referred to was received and will be marked "Exhibit 5.")

The sum of the information on the midget sub used at Pearl Harbor is that it was carried by and launched from a mother submarine. The sub at Pearl Harbor was 41 feet in length and had a reported cruising range of 175 to 180 miles maximum at its most economical speed of 4 to 6 knots. The full details are available in an Office of Naval Intelligence publication known as "ONI 220-J, Japanese Submarines." I will obtain this document and bring it to you for use as an exhibit.

[9] (The publication referred to was received and will be marked "Exhibit 6.")

Admiral HEWITT. Do you know any information about whether these two-man midget submarines were equipped with radio?

Captain SMEDBERG. The best information that I can recall on this submarine which was used at Pearl Harbor is that it had no radio. A much larger type midget submarine which Japan used one year later had a high frequency radio with a range of about fifty miles, but this sub was twice as long as the type used at Pearl Harbor.

Admiral HEWITT. Exhibit 60 from the Naval Court of Inquiry record will be marked as an exhibit in this investigation.

(The document referred to was received and marked "Exhibit  
Admiral HEWITT. Have you anything further, Captain?

Captain SMEDBERG. No, sir.

Admiral HEWITT. Then, that will be all. Thank you very much.

(The witness was excused.)

Admiral HEWITT. That is all for today.

(The investigation was then, at 3:15 p. m., adjourned until  
the next day.)

## [0] PROCEEDINGS OF THE HEWITT INQUIRY

---

SECOND DAY

Pursuant to notice, the investigation met at the offices of the General Board, Navy Department, at 2 p. m., Tuesday, 15 May 1945.

Present: Admiral H. Kent Hewitt, USN; Mr. John F. Sonnett; Lieutenant Commander Benjamin H. Griswold, USNR; Lieutenant John F. Baecher, USNR; and Ship's Clerk Ben Harold, USNR.

A witness entered, read the precept, and was duly sworn.

Admiral HEWITT. State your name and rank.

Captain McCOLLUM. Arthur H. McCollum, Captain, U. S. Navy.

Admiral HEWITT. Will you state the duties to which you were assigned in December, 1941, and the period preceding that?

Captain McCOLLUM. I was Officer-in-Charge of the Far Eastern Section of the Division of Naval Intelligence, Navy Department, Washington.

Admiral HEWITT. Will you please give us the details of your duties in that connection?

Captain McCOLLUM. My duties consisted of evaluating all forms of intelligence received concerning the Far East, correlating it, and advising the Director of Naval Intelligence and through him the Chief of Naval Operations on political developments in the Far East and all forms of information concerning the Japanese Navy and other countries in the Far East and their defenses and state of preparation for war.

Admiral HEWITT. What was the relationship of your unit with P-20-G, Captain Safford's unit?

Captain McCOLLUM. Captain Safford's unit produced a source of intelligence. Intelligence from that source was shown to me and was one of our most valued sources of intelligence concerning the Far East. Briefly, the intelligence [11] received from that source consisted of decryptions of secret Japanese code despatches, inferences drawn from the analyses of Japanese radio traffic, and inferences drawn from changes in procedure of Japanese radio traffic. There was from time to time intelligence of this same general nature received from non-Japanese sources, but the bulk of it was from Japanese sources.

Admiral HEWITT. Concerning the location, composition, and movements of the Japanese forces in general, what information or estimate was received from and sent to the Pearl Harbor unit and to Cavite?

Captain McCOLLUM. By the end of November we were almost wholly dependent upon radio intelligence for information concerning the location of Japanese naval forces, except those that were sighted by our observation posts along the China coast.

The system for serving radio intelligence consisted of a three-point system, one serving the Commander-in-Chief, Asiatic Fleet; one serving the Commander-in-Chief, Pacific Fleet; one serving the Chief

of Naval Operations at the Navy Department in Washington. All intelligence derived from radio intelligence means in either one of these three centers was passed through and back to these three centers. In other words, information from radio intelligence sources available in Manila were also available at Pearl and also available at Washington, and vice versa. That was passed as a matter of routine back and forth among the three radio intelligence centers serving between the three major command centers, Asiatic, Pacific, and Washington.

Admiral HEWITT. That applies not only to the information but also to the inferences that they drew from them?

Captain McCOLLUM. Definitely. I am not so definite about decoding of diplomatic traffic. I am not certain whether items concerning the Japanese [12] diplomatic traffic, that is, traffic in diplomatic cyphers, was invariably available to all three or not. The volume of that was very great, and, if I remember correctly, the principal headquarters for that type of traffic was here in Washington and, to my mind, it is doubtful that all decodes of Japanese diplomatic traffic were ever sent back out again. I don't think it was. I don't think it could have been with the existing radio facilities.

Admiral HEWITT. I have here a series of photostatic copies of certain dispatches, which I submit to you for your identification.

Captain McCOLLUM. I identify these. I have seen them.

(The photostats referred to were received and marked "Exhibit 8.")

Admiral HEWITT. Will you give us your comment on the salient points of this exhibit?

Captain McCOLLUM. As I have indicated before, in general radio intelligence consists of three distinct procedures. One is an actual translation of the enemy's code despatch; another is inferences drawn from the volume of enemy radio traffic and its divergence from normal.

Admiral HEWITT. What you call traffic analysis?

Captain McCOLLUM. That is traffic analysis. Another is from study of call signs, the ships' radio call, and so on.

Before Pearl Harbor we never had very good intelligence on Japanese naval type messages from decryption. With the disappearance of means which we had devised for keeping Japanese naval vessels and naval movements under observation, such as reports by merchant ships, reports by agents located in various ports in Japan and on the Asiatic continent, reports by our consular authorities, which all had been set up and was functioning—these sources [13] whereby our radio intelligence could be confirmed from time to time by actual visual sighting had disappeared by early November due to a number of natural causes. One was the enforcement of our embargoes against Japan, which in a very short period of time swept normal merchant traffic out of the North Pacific so that by mid-November it is hardly too much to say that there were no ship movements of any nature to and from Japan in the North Pacific. One other point that we watched and carefully checked, had a world-wide system for observing, was the world-wide movement of Japanese merchant shipping in all the ports of the world. Due again to the operation of our embargoes, the Japanese merchant shipping in the Americas was gone. Due to the war in Europe, the Japanese merchant shipping lines had been disrupted; so that source of intelligence had disap-

appeared. One other point, the Japanese progressive closing in of security measures made it almost impossible for agents in Japan to get information out of Japan that would be timely in a tactical situation. So that by the middle of November it was apparent that so far as observing and locating the Japanese fleet were concerned, our major dependence was perforce based on radio intelligence without the benefit of check by visual observations from time to time.

As a result of this situation, this dispatch of the 24th of November was sent out. It was intended to point out to our major commanders that our information was unsatisfactory and that every effort had to be made by using the one remaining instrument we had to determine the location and direction of movement of Japanese naval forces.

As a result of this dispatch, we got the benefit of estimates of the situation as it applied to the location and possible movements of the Japanese fleet from both ComFOURTEEN and ComSIXTEEN. These two addresses and the code system which was sent indicates that this estimate was made [14] by the radio intelligence organizations which went under that cover call in both of these places. The estimates are virtually the same. They differ only in minor degree. You will find that you had two task forces being organized under the over-all command of Commander Second Fleet. One was thought to be fairly well located in the general Formosa-Southern Japan area; another was possibly in the Mandated Islands. There was some discussion as to whether carriers were present with this latter force or not. That was one of the points of disagreement between these two here.

Greater reliance was placed on ComSIXTEEN's dispatch because physically he was in a much better position to intercept a larger volume of Japanese radio traffic than ComFOURTEEN was and his radio intelligence organization was stronger in numbers and in continuity of operation than that of ComFOURTEEN.

Admiral HEWITT. Now, then, will you read the part of the ComFOURTEEN message which relates to the possible task force in the Mandates and then give me SIXTEEN's comments on that?

Captain McCOLLUM. This is ComFOURTEEN's:

There is believed to be strong concentration of submarines and air groups in the Marshalls which comprise AIRON TWENTY FOUR at least one carrier division unit plus probably one third of the submarine fleet.

Evaluate above to indicate strong force may be preparing to operate in South Eastern Asia while component parts may operate from Palao and Marshalls.

Now, ComSIXTEEN in referring to that states as follows:

Cannot confirm supposition that carriers and submarines in force and are in Mandates X our best indications are that all known first and second fleet carriers still in Sasebo-Kure area.

[15] Admiral HEWITT. What were the dates of those?

Captain McCOLLUM. The 26th, sir; the 24th, which was our outgoing, and ComFOURTEEN's is 260110, November, sir, and ComSIXTEEN's is 261331.

Admiral HEWITT. Which would be 27 our time?

Captain McCOLLUM. Which would be about 27 our time. These are all GCT, sir.

Admiral HEWITT. Those are all GCT?

Captain McCOLLUM. Yes, sir. ComSIXTEEN added to his general evaluation of the situation that he considered the evaluation reliable.

Admiral HEWITT. What further information on this subject was received in Washington during the period from November 27th to December 7th?

Captain McCOLLUM. Pursuing the directive issued, there ComSIXTEEN from day to day issued fragmentary reports concerning the movement of such Japanese naval units as became apparent to him. There was never received in Washington, to my knowledge, anything that changed the general view of fleet organization and concentration areas as set forth in those dispatches of the 26th.

Admiral HEWITT. It appears from prior investigations that on about December 1st radio contact with the Japanese forces was either greatly diminished or was lost. Can you tell us anything about that?

Captain McCOLLUM. If I might presume, sir, I don't think it exactly accurate to say that radio contact was lost. What occurred was a change in the call signs and frequency allocations of the fleet. In other words, presumably the communication plan of the Japanese fleet was changed at that time, which meant that a period of time must elapse before we could build up identifications of specific naval units based on call signs, and so on. In other words, the actual radios were still going out, but we [16] couldn't get anything out of them very much.

Admiral HEWITT. Then there was no perceptible diminution in traffic?

Captain McCOLLUM. Not that I know of. There are other people possibly better qualified to advise you on that score than I am, but my impression of what had occurred was what is generally known as a general call sign change. In other words, the old call book went out and a new one was effective that date. There may have been some differences in frequencies; there probably were some two or three new allocations. But some time would have to elapse before a radio intelligence organization would be able to draw inferences from messages intercepted.

Admiral HEWITT. That was a situation which had occurred previously, was it not?

Captain McCOLLUM. It had occurred from time to time previously.

Admiral HEWITT. Do you remember the approximate date of the previous change?

Captain McCOLLUM. No, sir, I do not. Normally in peacetime things do not change often, possibly every six months or every year or so, but we had had partial changes from time to time as new task organizations developed presumably in Japanese forces, sir. It was a shorter period of time since the last change to this change than had occurred normally before.

Admiral HEWITT. As far as you know, had a change of that sort ever previously accompanied a major movement by the Japanese such as a movement to French Indo-China?

Captain McCOLLUM. No, sir. There had been minor changes, but that, but a wholesale change hadn't occurred for some time previous to that that I remember now.

[17] Admiral HEWITT. As far as you know, there was no discussion or concern about apparent radio silence of any major part?

Captain McCOLLUM. There was concern not of the radio silence but the fact that we had lost at this particular time an exceedingly valuable source of intelligence which for the time being was going to be much less valuable than it had been before. It wasn't possible to connect at the time that particular change with that specific movement, except that which had been outlined. We were certain at that time there were reorganizations and regroupings of forces going on. We knew that the Japanese fleet was ready for action. We knew that it had been called home, docked and extensively repaired and was looking for action. Therefore, it was interpreted, along with this other stuff, as a possible indication of action to come.

Admiral HEWITT. Am I correct in stating, then, that as the intelligence unit in Hawaii would have this same information as ComFOURTEEN, therefore CincPac would be as well informed as to these changes of radio calls and frequencies, and so forth, as you were in the Navy Department?

Captain McCOLLUM. Yes, sir.

Admiral HEWITT. The ONI Bulletin of 1 December 1941 stated as to Japanese naval forces: "Major capital ship strength remains in home waters as well as the greater proportion of carriers."

(The ONI Bulletin referred to was received and marked "Exhibit 9.")

Was that statement correct?

Captain McCOLLUM. This statement is correct, based on the best intelligence available at the time. It was based on the intelligence then available. At this late date I can't make a specific statement as to the [18] exact time lag, but as I remember it, this statement was based on intelligence that would be at least three to four days prior to the date of the document itself.

Admiral HEWITT. What was understood by the term "home waters" as used in that bulletin?

Captain McCOLLUM. This paper developed out of a scheme for keeping track of the Japanese fleet which had been followed for a number of years in the Far East Section of ONI, and the term "home waters" was generally understood to mean the normal cruising grounds of the Japanese fleet. That would roughly be west of the 180th meridian of longitude and north of the southern end of Formosa and included the Kurile Islands but not the Aleutians.

Admiral HEWITT. In your opinion, would the recipients of this bulletin, such as the Commander-in-Chief, Pacific, interpret the term "home waters" in the same way? In other words, was that definition of "home waters" generally known?

Captain McCOLLUM. Admiral, this paper was originally designed for circulation within the Department alone. At various times from 1939 on Commanders-in-Chief of the Pacific Fleet had visited the Department and on two occasions had expressed a desire for this document. The general basis on which the document was prepared, and the charts showing the delimitation of areas, was discussed with these officers at that time, including both Admiral Richardson and Admiral Kimmel. Whether the term was ever formally defined and a defini-

tion issued to the fleet, I doubt. If the term was ever formally defined and issued to the fleet, I doubt. However, it was well understood here in the Department and in discussions with officers from the fleet at various times, the term was understood to mean the normal cruising grounds of the Jap fleet. That is, north of southern Formosa [19] west of the 180th meridian, and including the Kurile Islands.

Admiral HEWITT. In this particular case, the information on which the estimate was apparently based, Exhibit number 8, was that the forces under discussion were generally in the Sasebo-Kure area.

Captain McCOLLUM. The major battleship and carrier strength was in the Kure-Sasebo area.

Admiral HEWITT. So that, really in this case the term apparently meant home waters in the home islands?

Captain McCOLLUM. That is right, sir.

Admiral HEWITT. What information, if any, was sent out to the fleet after December 1st concerning the location and movements of Japanese fleet units?

Captain McCOLLUM. The fleet, as I explained to you, had information from radio intelligence as to fleet locations, had the same information available to them as we had here in the Department. So far as I am aware, no dispatch was sent from the Department specifically to the fleet, calling attention to the location and movements of the Japanese fleet. Such messages as they would have received would have been common not only to the Pacific Fleet but to the Asiatic Fleet and to the Department, and they consisted, after the 1st of December, of reports of our observers on the China coast and of our naval forces which had contacted a Jap task force moving south of Formosa in the direction of Hainan and from there on farther south towards the Kra Peninsula.

Admiral HEWITT. Can you tell me what was the system or whether any one was specifically charged with the duty of dissemination of information which was necessary to the major fleet commands?

Captain McCOLLUM. I can't answer that question specifically, [20] The radio intelligence organization, as I have pointed out, the main part of their information was passed automatically to the three commandants. The system in the Department at the time was that the Intelligence Division, with the information it had available to it, prepared statements of intelligence which were presumed to be factual, without making an estimate of enemy intention. This statement of fact, or presumed fact, was submitted then by the Intelligence Division to the Plans Division and to the Chief of Naval Operations, who made the decision as to what, if anything, was to be disseminated to the fleet.

Admiral HEWITT. What would be your own action in the case of receipt of information which you considered to be of serious importance? Would you attempt to call special attention to it?

Captain McCOLLUM. I would. My responsibility was definitely to bring that to the attention of my Director of Intelligence immediately and to recommend most strongly to him that he take such action as he deemed necessary further up, and in almost every case we had direct access to both Admiral Turner, Director of the Plans Division, and to the Chief of Naval Operations himself.

I might remark in that connection that on the 1st or December 2nd I prepared an analysis of the situation as it looked to me at that time, which I submitted to Admiral Wilkinson, the Director of Naval

intelligence, on the morning of December 1st. I had actually prepared this the day before and had slept over it overnight. He took this up and made an appointment for us to see Admiral Stark, and about noon on the 1st Admiral Wilkinson took me into Admiral Stark's office and I read this statement and made verbal comments on my views on it, and both Admiral Wilkinson and I urged that a dispatch of warning be sent to the fleet at [21] that time. We were assured at that time that such a dispatch had been sent on the 27th of November which definitely included the term, "This is a war warning".

Subsequent to this, the situation further deteriorated and I recommended to Admiral Wilkinson and we did send dispatches out to our naval attachés and various naval agencies throughout the Far East, directing that they destroy all their codes and ciphers, and so on and so forth, and to affirmatively report when these had been destroyed. That dispatch was sent so that the fleet commanders on the chain going out and coming back would have the information that that order had been issued. Some time after the 1st, possibly around the 4th, I prepared this—

Admiral HEWITT. That is a copy of the memorandum to which you refer?

Captain McCOLLUM. Yes, sir.

(The document referred to was received and marked "Exhibit 10.")

Captain McCOLLUM. I took that, coupled with additional information, and drafted the general situation up in dispatch form, which I presented to Admiral Wilkinson with the recommendation that it be sent. Whether that was sent or not, I do not know.

Admiral HEWITT. What information regarding the Japanese naval forces was furnished to the Army during the period from October 7 to December 7?

Captain McCOLLUM. The Far Eastern Section of the Military Intelligence Division had full information on the situation. We were in daily consultation. I saw Colonel Bratton or one of his assistants daily. They usually came to my office in the afternoon. They had full access to my charts showing the location and movements of ships, and they had full [22] access to all of the radio intelligence information available in the Navy Department. That was given by me personally and verbally and the situation discussed from day to day with officers of the Far Eastern Section of the Military Intelligence Division in the War Department, and that had been true for some months past. We made no major move, for instance, such as withdrawing our naval language officers from Japan or sending a dispatch out to destroy all codes and ciphers, and so forth, as we did to the naval attaches and other places, without notifying my opposite number in the War Department what we intended to do.

Admiral HEWITT. That was Colonel Bratton?

Captain McCOLLUM. That was Colonel Bratton, or his assistant, who, I believe, at the time was Colonel Pettigrew. The people who had access to that stuff in detail were Colonel Bratton, Colonel Pettigrew, and Colonel Dusenberry, I believe.

Admiral HEWITT. Would the like apply to the information which the Army received from their sources? Was that made available to you?

Captain McCOLLUM. Yes, sir, so far as I know, sir.

Admiral HEWITT. What, in general, sources of information did the Army have?

Captain McCOLLUM. The Army had information from their military attaches and observation posts such as they had in the Far East. The Army also had a radio intelligence organization which produced certain information along this same line.

Admiral HEWITT. Which confirmed, in this case, your own information?

Captain McCOLLUM. The Army had nothing to do with the Japanese systems. They didn't touch the Jap Navy systems. They were doing work on Japanese diplomatic ciphers at that time and some on the Japanese Army system. They [23] weren't so well developed or anywhere near as good as our naval radio intelligence service at the time. But any information that they got through their service as far as I am aware, was made available to me through Colonel Bratton's office in the War Department.

Admiral HEWITT. As I understand it, there was no particular organization or system for effecting cooperation between your organization and the Army organization other than the mutual unofficial relations you established?

Captain McCOLLUM. Those relations were unofficial, but they had the official sanction and approval of both the Director of Naval Intelligence and of the Director of Military Intelligence, Assistant Chief of Staff, G-2, I think he is called, who were both not only glad of that mutual confidence and trust and exchange of information, but thoroughly encouraged it.

Admiral HEWITT. What information have you concerning the movements of Japanese submarines? What information can you give me concerning the movements of Japanese submarines in and around Pearl Harbor on or prior to December 7th?

Captain McCOLLUM. I remember nothing specific, except we were suspected for some time that Japanese submarines were keeping our fleet based in Pearl Harbor under observation. At various times through the preceding six months there had been reports of contacts by our destroyers on Japanese submarines. At one time, I think it was in July or August, we actually suggested a search of a certain spot in the ocean to the north of Midway where we believed that a Jap provision ship and tanker might be rendezvousing with Japanese submarines who were observing our fleet movements. It was felt that and I feel that it was felt in the fleet, that our movements [24] were under Japanese submarine observation.

Admiral HEWITT. What was the nature of these contacts? Underwater sound by destroyers?

Captain McCOLLUM. They would be underwater sound by destroyer and sighting of a periscope and that sort of thing.

Admiral HEWITT. Sighting of a periscope?

Captain McCOLLUM. Yes, sir. Whether it was actually a periscope or not, I don't know.

Admiral HEWITT. Were any of them well authenticated?

Captain McCOLLUM. One or two seemed to us at the time to be fairly well authenticated.

Admiral HEWITT. Do you remember the general location of these contacts?

Captain McCOLLUM. Most of them weren't close in to Honolulu, but the contact, if I remember correctly, was made in Molokai Channel somewhere off Lahuna Roads—most of this is memory—in the approaches to and from the drill grounds of the fleet from Pearl Harbor. Admiral HEWITT. I have here two charts which have been submitted as exhibits which purport to be reproductions in translated form of a chart which was taken from a Japanese midget submarine which was stranded on the north side of Pearl Harbor. One is in a Pacific Fleet Intelligence Bulletin and the other one came from another source. They appear to be generally the same, except that as to the captions in English, if you will notice, off Ford Island to the eastward, one of them says, "Attack and sink enemy ship"; in the other one it says, "Enemy ship sunk," and there are similar differences.

I would like to have you examine those and from your knowledge of the Japanese language give us your ideas on that. What I have in mind [25] generally is whether this is a record of an actual attack by a submarine or whether it might have been an attack plan with points marked at which certain actions should be taken. The original is not available to me.

Captain McCOLLUM. This, in the Pacific Fleet Bulletin dated 8 December 1944, I don't remember having seen before. This other chart, marked "secret" here, is a translation of a photostat, later backed up by the original, of a Japanese chart which, to the best of my belief, was recovered from a Japanese midget submarine that was sunk in the East Loch. I remember the original quite well and went over it personally, together with the best translators in the Far East Section of the Division of Naval Intelligence, and it was my opinion at the time, and it is my opinion now, that this was an attack plan. In other words, this thing here was the planned scheme that the submarine commander was going to utilize in making his entry to Pearl Harbor.

(A copy of the book "Battle Report" was received and marked Exhibit 11.)

Captain McCOLLUM. Take, for instance, the four Japanese ideographs appearing in the photostat in the book "Battle Report." I point out these four ideographs here. In the Japanese language the use of verbs is shown in general—there are exceptions—by appending the *kana* symbols which indicate the tense. Where the ideograph alone is used it is not possible to determine the tense of the verb. Here you have only four ideographs, which might be translated present, past, future, or imperfect as the situation might warrant, because there are no *kana* symbols here showing the tense of the verb. It is not possible to infer from this as to whether this is past tense or future tense. The words "attack and sink enemy ship" [26] in Exhibit 4 are a literal translation. It is impossible to make a literal translation in English without an English indication of tense. The best you can do is to take each word for its value and put it down. In this particular instance (referring to Exhibit 4), the word "and" is interpolated.

Admiral HEWITT. You stated that to the best of your knowledge this came from a submarine which was sunk inside the Loch. The other exhibit, the Pacific Fleet Intelligence Bulletin, makes the statement that this was taken from a midget submarine which was stranded on the north coast of Oahu. Could there have been two charts?

Captain McCOLLUM. Yes, sir.

Admiral HEWITT. One from one submarine and the other another?

Captain McCOLLUM. Yes, sir, I think so, but it would have most unusual had they been exactly the same.

Admiral HEWITT. Unless they were attack plans.

Captain McCOLLUM. That is true.

The stuff that is run in circles is stuff that was pencilled notation if I remember correctly. In other words, there was a distinction here (referring to Exhibit 4). In other words, what I am calling your attention here is you will notice certain of these things are circled like this (indicating). It is circled on this other chart (referring to Exhibit 11). I think that those circles represent pencilled notation by the submarine commander. In other words, he had his plan and these notations were aid memoirs in assisting him in carrying out this plan.

Admiral HEWITT. I notice here (referring to Exhibit 11) some characters appearing in heavy black—

Captain McCOLLUM. Well, sir, that may be the way they are reproduced. These are hand-written characters here (indicating), written in by hand and [27] not by printing. They are both printed and typewritten stuff. Now this stuff here (indicating) is handwritten by the man himself.

Admiral HEWITT. Can you tell me what this (indicating) is about?

Captain McCOLLUM. I am not much good at this translation more, sir. I wouldn't venture a translation of that for you, sir. I can get it done for you and check it, but I am not very good at this more. This first two is Hawaii. It is something about ships anchoring off at certain times in Hawaii, I think, sir. In other words, they are sometimes anchored off in this general area or general direction (indicating). That is not shown on this (referring to Exhibit 4).

Admiral HEWITT. One more question on this exhibit (referring to Exhibit 4). With respect to the times which are noted, the time of point and arrival and so forth, there is a question in my mind what it relates to some zone time or whether it may be based on an H-hour for an attack, if it is an attack plan. Can you give me any comment on that? If it were a dawn attack, it wouldn't be Honolulu time.

Captain McCOLLUM. No, sir. If it were any one of the standard times at all, it would be Item time. All the Japanese Navy run on Item time, which is Tokyo time. That is standard or has been standard in the past. The impression that I have from this is that it is based on a zero hour.

Admiral HEWITT. Have you any information as to the probable source of the other map, in the Intelligence summary, which differs?

Captain McCOLLUM. No, sir, I haven't.

Admiral HEWITT. Now we go back to the communication question. We have here Exhibit 63 of the Naval Court record, which contains certain decrypted communications. Can you tell us how they were obtained, decoded, evaluated, and distributed?

[28] Captain McCOLLUM. These that I see here are decrypted copies of Japanese diplomatic and consular dispatches. These dispatches were received in the Navy Department from the intercept stations in a variety of ways, some by direct transmission in the c

l by radio, others telegraph, and others by mail. When they arrived the communication intelligence center, Navy Department, they were coded and translated. A number of copies of the translations were made, and books containing these translated dispatches were made up. Those books were distributed by officer messenger to the Chief of Naval Operations, Secretary of the Navy, Director of War Plans, Director of Intelligence, Chief of Far Eastern Section of Naval Intelligence, within the Navy Department, and the Naval Aide to the President. A complete book was also taken by officer messenger to the Secretary of State. Another complete books was taken over and down to the Far East Section of the Military Intelligence Division the Army and by them was distributed to the Secretary of War, Under Secretary, and Chief of Staff, War Plans Division of the General Staff, and to the Assistant Chief of Staff, G-2, and, I think, to the head of what they called the Intelligence Branch of G-2, which was the Foreign Intelligence Section. The book, in whole or in part, went to the President, depending on what the Aide to the President thought out it.

Admiral HEWITT. Now will you discuss the question of the "winds" code and the messages using that code, the dispatch which previous testimony indicates you prepared and which was allegedly not sent?

Captain McCOLLUM. I don't quite understand your question.

Admiral HEWITT. I would like to have you discuss the subject of the "winds" code, what it was, the messages that were received using the code.

[29] Captain McCOLLUM. All right, sir. If we may lead up a little bit, by the latter part of November it was apparent that the Japanese were doing a great many things, that they expected that war with the United States, Great Britain, or both might possibly break out at any time, and that they were taking every possible step to make sure that their intelligence organization and their diplomatic representatives would be well advised. One of the schemes for this was to use a Tokyo weather broadcast, which was normally with the ordinary voice news broadcasts that came out from the commercial or so-called commercial radio stations at Tokyo from time to time. There was a message setting forth that by arrangements of using this weather code and for having the thing repeated in certain sequence in broadcast, that in one instance it meant war with Russia; in the next instance it meant war with England, and another one was that it meant war with the United States. Those were the three possibilities.

Admiral HEWITT. Was that war or a break in diplomatic relations?

Captain McCOLLUM. Well, a break in diplomatic relations. Instead of war, the term used was, "In case relations are in danger," "danger of cutting off our diplomatic relations." There is the verbatim translation; in Japanese this says, "In case there is danger of cutting off our diplomatic relations." The system followed that they used, a term which was a smooth translation and in important cases the exact condition followed that in parenthesis. That was the Navy's system. The Navy translators did that, in general.

Admiral HEWITT. Read that here (indicating), for instance.

Captain McCOLLUM. (Referring to Document 15 of the Exhibit) In case of emergency (danger of cutting off our diplomatic relations) and the cutting off of international communications, the following

warning will be [30] added in the middle of the Japanese guage daily short-wave news broadcast."

There is another dispatch (referring to Document 13 of the Exhibit This (indicating) is circular 2353; this (indicating) is circular 2 It was another code. He coded it differently. It is a different mess This says, "When our diplomatic relations are becoming danger we will add the following at the beginning and end of our gen intelligence broadcasts."

Admiral HEWITT. In your opinion, that is merely a different translation of the same phraseology?

Captain McCOLLUM. No, sir, I think it is different phraseology the Japanese. In other words, I think that two different messages were sent out, and possibly more, by the Japanese Foreign Office, which may have been and probably were phrased differently in the original which gave differing translations on this answer.

Admiral HEWITT. Do you know whether the actual message containing the phrase which indicated the emergency with any particular country was actually transmitted?

Captain McCOLLUM. About the middle of the week 1-7 December the Federal Communications Commission reported the occurrence of one of the words in a Japanese news broadcast from Tokyo which indicated war with Russia. In studying the message at the time it did not appear that this was a bona fide warning in the terms as set forth. It did not appear in the proper sequence and proper number of times in the broadcast, as I remember it, and it was thought at the time that this was a bona fide weather report which happened to be the code word for Russia. I know of no message received prior to the attack on Pearl Harbor on 7 December which indicated [that diplomatic relations with the United States would be ruptured]. After the attack on Pearl Harbor had been made, either late afternoon of the 7th, Washington time, or some time on the 8th, a dispatch was translated which indicated war with England. I think you have some exhibits on that point there.

(Exhibit 65 of the Naval Court of Inquiry record was received and marked "Exhibit 12.")

This is the Federal Communications Commission dispatch which was referred to. It is Document number 2 Exhibit number 65.

Admiral HEWITT. That, in your opinion, is a bona fide weather report?

Captain McCOLLUM. Yes, sir, I think so. We don't have the verbatim Japanese of this thing about Russia here, but the translation would indicate that it was other than as given here. For instance, all this in here [indicating] is exact. Now, this translation indicates that "Tokyo today, north wind slightly stronger, may become cloudy. You see, there is too much in there. This is an abbreviated sort of an imperative form used here. And besides, the announcer in the thing starts out by saying, "This is in the middle of the news, today especially I will give a weather broadcast at this point." I mean this is what he says in this [indicating].

The Document number 2 is from the Federal Communications Commission, which came verbally to me and later on the thing written out, which was from a plain language broadcast and it was our opinion at the time; considering all of the facts, that this was probably

bona fide weather broadcast and not the warning signal. If it were the warning signal, it [32] would have applied to Russia.

The Document number 4 of Exhibit 65, which was transmitted between 0002 and 0035 GMT, December 8, 1941, was the "winds" code message announcing dangerous diplomatic relations with England. The wording used in there meant Japan-British relations.

That is what is shown on Exhibit 12.

Admiral HEWITT. You have no knowledge of any message transmitted which indicated the breaking of diplomatic relations with the United States?

Captain McCOLLUM. Not in the "winds" code, no, sir.

Admiral HEWITT. Did you have it in any code?

Captain McCOLLUM. Yes, sir. By afternoon of Saturday, December 6th, a very long diplomatic dispatch was coming in to the Japanese ambassador at Washington. On the morning of—that is Washington time—December 7th, I was on duty in my office in the Navy Department when the last parts of this very long diplomatic note were translated. Following this, a dispatch was translated, instructing the Japanese ambassadors to present this note to the Secretary of State at 1 o'clock, Washington time, December 7, 1941. The context of the diplomatic note as contained in the dispatch which the Japanese ambassador was directed to present to the Secretary of State indicated a discontinuance of the negotiations between Japan and the United States, with the strong inference that diplomatic relations would be ruptured.

(Referring to Documents 38 and 39 of Exhibit 63 of the Naval Court of Inquiry record). This first one doesn't make any particular impression. There had been so many of these things along this line, including telephone conversations backward and forward, that we knew something was coming. And on the fourteen-part message, all hands were up all night, working on it to [33] get it through.

Admiral HEWITT. That was the night of the 6th-7th?

Captain McCOLLUM. That was the night of the 6th-7th, yes, sir. By late Saturday night, we had, if I remember correctly, thirteen of the parts. They were transmitted, almost as soon as received, to the Secretary of State, to the President, to the Chief of Naval Operations, and to people over here in the War Department.

Early Sunday morning, when I arrived to take over the duty in my office, where we had a special watch set since early November, the fourteenth part was coming in; and while Admiral Wilkinson and I were discussing the situation about 9 o'clock Sunday morning, or possibly earlier, nearer 8:30, with Admiral Stark, the instruction which directed the delivery of the note to the Secretary of State was brought in, shown to Admiral Stark, who immediately called the White House on the telephone, and the draft was taken over to the Secretary of State and to the White House. At the time, the possible significance of the time of delivery was pointed out to all hands.

Admiral HEWITT. You are referring to the 1 p. m. delivery time?

Captain McCOLLUM. Yes, sir. In other words, it was pointed out that 1 p. m. Washington time would mean about 8 o'clock in the morning Honolulu time.

Admiral HEWITT. 7:30.

Captain McCOLLUM. 7:30, yes, sir, and very early in the morning out in the Far East, that is, out in the Philippines and those places, and that we didn't know what this signified, but that if an attack were coming, it looked like the timing was such that it was timed for operations out in the Far East and possibly on Hawaii at the time. We had no way of knowing, but because of the fact that the exact time for delivery of this note had [34] been stressed to the Japanese ambassadors, we felt that there were important things which we had to move at that time, and that was pointed out not only to Admiral Stark, but I know it was pointed out to the Secretary of State.

I was present and assisted in pointing it out to Admiral Stark and was taken over, with instructions to point that out, to the Secretary of State. I was not present at that. I do not know. I would add, however, that the Secretary of State was not available at the time that the Japanese ambassador desired to deliver their note, and it is my recollection in the discussion at the time with the Chief of Naval Operations and his admirals in there that that was a deliberate move on our part.

Admiral HEWITT. Do you remember who it was delivered the message to the Secretary of State and the White House?

Captain McCOLLUM. No, sir, I do not, but it was probably Lieutenant Commander, now Captain, Kramer. I can't say that for sure because some of these things Admiral Turner himself would run over to see the Secretary, or Captain Schuirman would run over. The normal route would have been for Kramer to have delivered it.

Admiral HEWITT. Do you recall who was present when—

Captain McCOLLUM. Yes. May I elaborate a little bit?

Admiral HEWITT. Yes.

Captain McCOLLUM. By mid-November the situation in the Far East had appeared so acute that in addition to the usual duty watch in the Division of Naval Intelligence, one of the three regular officers assigned to the Far East Section—that is, Commander Watts, Colonel Boone and myself—was constantly on duty in our offices, with adequate office help, on a twenty-four hour basis.

I arrived at the Navy Department about 7:30 or a quarter of eight [35] Sunday morning, December 7th, to take over the watch from Commander Watts. Shortly after my arrival in the Navy Department, Admiral Wilkinson, the Director of Intelligence, arrived and sent for me and we had a discussion concerning the situation in the Far East. After fifteen or twenty minutes of the discussion, we received word that Admiral Stark had arrived in the Navy Department and that Admiral Wilkinson and myself went down to talk to Admiral Stark. At that time he was alone. While we were in there discussing the situation with Admiral Stark, various officers of the Division of Operations came into the office. I believe Admiral Ingersoll was present, Admiral Brainard, Admiral Noyes, Admiral Turner, and possibly Captain Schuirman. There may have been others; I don't know. Certainly, Admiral Turner and Admiral Ingersoll were present. Whether they were present all the time, I do not know. There was considerable going in and out at that time.

About 9 o'clock or a little earlier, I received word from the outer room that one of my officers wished to see me urgently and I stepped outside and received the last part of the message, concerning the note to be delivered on the United States by the Japanese ambassador.

Admiral HEWITT. The last part of the long message?

Captain McCOLLUM. The long message. And the dispatch directing presentation on the Secretary of State at 1 o'clock Washington time. I held a short discussion with Lieutenant Commander Kramer as to the significance at the time, and he it was who pointed out the times at Honolulu as 7:30 and in the Far East as dawn, and so on.

Admiral HEWITT. Before dawn. Wouldn't that be before dawn?

Captain McCOLLUM. Before dawn, yes, sir. That would be about 1 o'clock in the morning out there.

[36] I took that in to Admiral Stark and pointed out the possible significance of the time in conjunction with the note, and it was also pointed out to other officers of the Division of Operations who were present at the time. Admiral Stark talked over the telephone, I think, with the Chief of Staff of the Army, who presently came over with Colonel Bratton. I was not there the whole time, and later on I came back in and by 10 o'clock that morning we were given to understand that a warning message had been sent to the Commander-in-Chief, Pacific Fleet, via Army channels. In other words, the warning was to go to the Commanding General of the Hawaiian Department, with instructions to transmit it to the Commander-in-Chief of the Pacific Fleet.

Admiral HEWITT. Now, to go back to the "winds" code message, there has been other testimony in prior investigations that you, about the 4th of December, prepared a long warning message to CincPac and CincAsiatic, summarizing the significant events up to that date and quoting the "winds" message. Can you tell us anything about that?

Captain McCOLLUM. I did draft in dispatch form a general summary of the Far Eastern situation, indicating the probability that diplomatic relations might be ruptured at almost any time. I do not remember specifically quoting any "winds" message or referring specifically to a "winds" message in that dispatch. Normally I should not have done it as that would have been passed over all radio intelligence channels rather than the type of dispatch I had formulated, which was in effect a cumulation of the situation, the moves made by the Japanese and an estimate of the probable enemy reaction or probable Japanese action to the situation.

Admiral HEWITT. It embodied—

Captain McCOLLUM. Yes. In effect it embodied the contents of my [37] memorandum of the 1st of December, plus such additional factors, such as the sighting of the Jap task force, and so on, which we had at the time.

Admiral HEWITT. You say you submitted that draft. What happened to that? Was the message sent?

Captain McCOLLUM. Well, sir, that draft, I don't know. That draft was submitted to Admiral Wilkinson and before a thing of that sort left the Navy Department, it had to be passed on by higher authority. I do not believe that it was sent, but time passed and I am not certain to what became of it.

Admiral HEWITT. You say you submitted that to Admiral Wilkinson?

Captain McCOLLUM. That is correct, sir.

Admiral HEWITT. Do you remember what his comment or reaction to it was?

Captain McCOLLUM. I think he tried to get it out. As a matter of fact, hindsight now, or recollection, I am quite sure that he tried to get it out.

Admiral HEWITT. Did you have any particular conversation with Captain Safford with respect to that?

Captain McCOLLUM. I don't remember having a conversation with him on the subject of the "winds" code. Safford and I discussed certain aspects of radio intelligence from time to time because when I was not clear on the possible meaning or interpretation to be placed on something from the radio intelligence viewpoint, I made it a custom to go down and see Safford and talk to him about it.

And as I say again, this "winds" message was a definite message and it was only one of various other communications we had. For instance, we had a message directing the Japanese intelligence chief for the Americas [38] to clear out of the country. We had another message directing the consuls to burn all their papers. We had constant messages regarding the presence of our ships in West Coast ports. All of those we had. The Japanese had for some years, until the dissolution of Naval Intelligence had been successful in breaking it up, a system of reporting United States naval movements out of the West Coast ports. That was done through the consuls, and starting in November the number of messages coming in showed in effect, "For goodness sake get these reports in promptly," and caused some note to be taken of them.

(Referring to Document 40) This was a sample of a routine report made by Japanese consuls throughout the Americas on the location and movement of United States warships.

(Referring to Document 46) This document wasn't available before December 7th, nor, to my memory, was one couched in quite as urgent terms transmitted to any other consulate in the United States.

However, it was evident from a study of general messages sent to Japanese consuls, particularly in our West Coast ports, that the Japanese were particularly anxious to learn the location and movements of our naval forces on the West Coast.

Admiral HEWITT. How about Hawaii?

Captain McCOLLUM. Hawaii we didn't have in that detail yet. We had some, but the general instruction covering Hawaii would cover the rest of it. The general instruction went out in a general circular and Hawaii would be included.

These dispatches were to come—the one referring to ship movements and location is under date of 18 November 1941. It is a routine ship report from the Consul General at Honolulu to Tokyo, probably intercepted [39] by the radio intelligence organization which translated it. It was translated on the 6th of December. This message must have been transmitted by the Japanese Consul General in Honolulu and therefore originated at that station. It is not possible to tell from the exhibit whether this dispatch was locally acquired in Honolulu or at one of the various intercept stations located in other parts of the world.

Admiral HEWITT. What information can you give me on the interception in Hawaii of Japanese telephone and cable messages to ONI and the FBI or otherwise?

Captain McCOLLUM. I know very little about that subject, sir. ONI had been making an effort to get a workable arrangement

the telephone and cable companies, which, as I remember it, was only partially successful. Both the Federal Communications Commission, as far as I am aware, and the Federal Bureau of Investigation came much later into this field than we were, and, so far as I am aware, made no serious effort to obtain this type of intelligence until a very brief time before the outbreak of war with Japan.

Admiral HEWITT. Isn't it a fact that there was a law which forbade the commercial companies from furnishing that information?

Captain McCOLLUM. Yes, sir.

Admiral HEWITT. Are there any other facts bearing on this question that have not been previously mentioned, that you think would be of assistance to me?

Captain McCOLLUM. I think, Admiral, that you have all the facts. I would like to venture some observation of the general organization of intelligence as it operated in the Navy before the war with Japan and substantially as it is operated today that I am not certain in my own mind [40] are quite clear to people that might read the records.

The ONI was not an omnipotent and over-all intelligence center for the fleet as a whole. It operated primarily as an intelligence center for the Chief of Naval Operations in the Navy Department; equipped to supply combat type of intelligence, which prior to outbreak of war is nearly always closely related with diplomatic negotiations. Each of our major commanders in the Pacific was equipped with a staff of intelligence and with a radio intelligence staff which served him directly. With the exception of more static types of intelligence, such as the design of a Japanese battleship, and so on, our combat intelligence was designed to function in the Navy Department to advise the Chief of Naval Operations, at Pearl Harbor to advise the Commander-in-Chief, Pacific Fleet, through his fleet intelligence officer, and out in the Philippines—

Admiral HEWITT. May I interrupt you for a moment? You say at Pearl Harbor to advise the Commander-in-Chief of the fleet. I think you have mentioned before it was attached to the Commandant of the FOURTEENTH Naval District.

Captain McCOLLUM. It was attached to him, sir, but actually the function was to advise CincPac. Similarly, such personnel were administratively attached to ComSIXTEEN, but they worked operationally directly under CincAsiatic.

Admiral HEWITT. All right. Go ahead.

Captain McCOLLUM. And in the Asiatic Fleet, which in some respects, from an intelligence point of view, was our strongest organization, to keep the CinC, Asiatic Fleet, advised.

The Division of Naval Intelligence, in addition to that, did try to set up certain over-all intelligence agencies in foreign countries which could [41] produce intelligence. In each case in the Asiatic theatre those intelligence agencies operating out there were made known to the CinC, Asiatic Fleet, and their reports in every case were funneled to him and to the Commander-in-Chief, Pacific Fleet. Our naval attaches, for instances, were under orders to submit copies of every report that they made both to the Commander-in-Chief, Asiatic Fleet, and to the Commander-in-Chief, Pacific Fleet, as well as to the Department. So, you had in effect a three point system

in which combat intelligence common to any one of them was common to all the others, with each Commander-in-Chief supreme in his own area. And that is essentially the way it was functioning throughout the war.

Admiral HEWITT. What would be the responsibility of the Asiatic Fleet, for instance, to insure that intelligence which they received was disseminated to the other commands?

Captain MCCOLLUM. They would be guided in that by the policy of the Commander-in-Chief, Asiatic Fleet, as in turn they would be guided by the over-all policy of the Chief of Naval Operations. In general, that was for the Asiatic Fleet to keep CincPac and the Department informed. In other words, they went right up the chain of every one in the Pacific into the Department and it worked back the other way.

Admiral HEWITT. The Office of Naval Intelligence was well organized apparently for the collection and evaluation of intelligence. What means were used to disseminate the intelligence?

Captain MCCOLLUM. Reports were disseminated by letter, in book form, and by dispatch. In February, I think it was, of 1941 the Division of Naval Intelligence, if it had ever had the authority, didn't have it after that date of issuing estimates to the fleet of probable enemy intentions. [42] That was considered to be a function of a higher echelon of command within the Department, and the Division of Naval Intelligence was restricted to presenting what appeared to be the facts of a situation for determination of what a prospective enemy might do by higher authority within the Navy Department.

I might add, sir, some time prior to that, to be perfectly frank with you, we had here from time to time issued a memorandum of what we thought about the situation. About February, 1941, that was done away with and that stuff had to be cleared through Plans and I think, through Admiral Ingersoll.

Admiral HEWITT. 1941?

Captain MCCOLLUM. Yes, sir. Now, we continued from time to time to prepare stuff, but a lot of things there, who prepared it and what was put out estimates of probable enemy intentions weren't clear to the Division of Intelligence.

Admiral HEWITT. Thank you very much.

(The witness was excused.)

(The investigation was then, at 4:20 p. m., adjourned until 2 p. m. the next day.)

43] PROCEEDINGS OF THE HEWITT INQUIRY

THIRD DAY

Pursuant to notice, the investigation met at the offices of the General Board, Navy Department, at 2 p. m., Wednesday, 16 May 1945.

Present: Admiral H. Kent Hewitt, USN; Mr. John F. Sonnett; Lieutenant Commander Benjamin H. Griswold, USNR; and Ship's Clerk Ben Harold, USNR.

A witness entered, read the precept, and was duly sworn.

Admiral HEWITT. State your name and rank.

Captain ROCHEFORT. Joseph J. Rochefort, Captain, U. S. Navy.

Admiral HEWITT. From about 15 May 1941 to about the end of 1941 you were in charge of communication intelligence, assigned to the FOURTEENTH Naval District?

Captain ROCHEFORT. Yes, sir.

Admiral HEWITT. As we understand it, there were two other communication intelligence units, one in the Far East at Cavite and the other in Washington, D. C.

Captain ROCHEFORT. Yes, sir, insofar as the Navy is concerned.

Admiral HEWITT. Yes, I am speaking of the naval communication intelligence units.

Captain ROCHEFORT. Yes, sir.

Admiral HEWITT. Who was in charge of the other units?

Captain ROCHEFORT. The unit in Washington was in charge of Captain E. F. Safford, and the unit in Cavite was in charge of R. J. Fabian.

Admiral HEWITT. Can you tell me what in general was the mission and scope of each?

[44] Captain ROCHEFORT. Yes, sir. The mission of all three stations was in general to exploit all cryptographic systems employed by foreign powers and to develop what was then known as radio intelligence but is now known as traffic intelligence organizations, and to develop radio direction finder nets.

Admiral HEWITT. That was the general mission?

Captain ROCHEFORT. Yes, sir.

Admiral HEWITT. What was the scope of each of those units? What was each one supposed to cover in area or in type of traffic or what?

Captain ROCHEFORT. During the latter part of 1941, the station at Pearl Harbor was assigned the specific tasks of attacking personnel code, administrative code, the code in use in the Marshalls Islands area, and to exploit those systems. They were also directed to conduct research on all Japanese naval systems except the five-numbered system. Cavite was charged with the exploitation of information contained in diplomatic systems and in five-numbered system.

The station in Washington was charged with the general control of all three plus Japanese diplomatic systems and such other systems as might have been directed by higher authority.

Admiral HEWITT. As head of this unit, to whom were you responsible for your work, the Navy Department, the FOURTEENTH Naval District, or the Commander-in-Chief, Pacific Fleet?

Captain ROCHEFORT. My orders to that duty read to report to the Commandant of the FOURTEENTH Naval District. I assumed that he was my immediate superior and I made all reports, other than purely technical reports, to the Commandant.

Admiral HEWITT. What in general was the relation of your unit [45] the District Intelligence Officer and the Fleet Intelligence Officer?

Captain ROCHEFORT. The relationship with the District Intelligence Officer was on the basis of a frank and over-all exchange of information and views on a personal basis other than any information obtained from ultra sources. The relationship with the Fleet Intelligence Officer was to exchange all information available and to endeavor to obtain information as desired by him.

Admiral HEWITT. You have stated in your previous testimony that your unit consisted of an interception unit, direction finder unit, and cryptographic research group. You will explain what each of these are and how it functioned and who was in charge of each.

Captain ROCHEFORT. The station at Pearl Harbor consisted in the main of an interception unit which was stationed at Aiea radio station in charge of Chief Radioman Langford; a mid-Pacific direction finder net with stations at Dutch Harbor, Samoa, Pearl Harbor, and Midway. These were controlled in Pearl Harbor under the supervision of the then Lieutenant Commander Huckins. The decryption unit was responsible for the attack, exploitation, translation, and dissemination of all intercepted traffic. I was in direct charge of this section as well as directly in charge of all sections.

Admiral HEWITT. Now, you stated in your previous testimony that your sources of information, in addition to the work of your own unit, were the other two combat intelligence units and other government agencies, such as the FBI, the Army, and the FCC at Honolulu. You also stated that the information furnished by these latter agencies was of no value prior to December 7th, and stated before the Court of Inquiry that the collaboration of these agencies was on a personal basis. Will you explain what the [46] relationships were with the FBI, the Army, the FCC, and the other intelligence agencies with whom you dealt?

Captain ROCHEFORT. Yes, sir. With regard to the FBI, I met with Mr. Shivers, the agent in charge, on frequent occasions and discussed the general situation, particularly pertaining to Japanese in Hawaii, but did not discuss any ultra matters. Mr. Shivers on his part kept me informed as to what he was doing, possibly with some limitations.

The relationship with the Army dealt primarily with the G-2, Colonel Fielder, and was similar in nature to that carried out with the FBI.

The relationship with the FCC was limited to technical matters, particularly those pertaining to direction finding, location of unauthorized stations, and other similar matters.

Admiral HEWITT. Your relationship with the Federal Communications Commission, did that include matters concerning getting information from commercial transmissions, telephone and cable?

Captain ROCHEFORT. No, sir. The reason for that was, sir, that the FCC was not authorized to handle any ultra and I knew from personal experience that all matters pertaining to the acquisition of traffic were handled by the Washington unit.

Admiral HEWITT. You stated before Admiral Hart that any message originating in one of the communication intelligence centers was automatically sent to the other two, and before the Naval Court that at Pearl Harbor they received all information of a technical nature from Washington. I would like to ask you what information was so received during October, November, and December, that is, from the other combat units and from Washington.

Captain ROCHEFORT. I could not state in detail, sir, every message because I do not have the files, but a typical message would be the receipt [47] of the so-called "winds" message from Cavite on or about November 27th and the receipt from Washington of the frequencies then employed by the Japanese in making voice broadcasts. By "winds" message, I mean the message which established the procedure for indicating war.

Admiral HEWITT. Do you know of any intercept of any message using that so-called "winds" code?

Captain ROCHEFORT. What we referred to as the execute or the message indicating war based on the code established in the "winds" message has not been seen by me and I have made an exhaustive search into all available records and can find no trace of any execute of the "winds" message prior to the evening of 7 December Washington time.

Admiral HEWITT. That message related to war with England, did it not?

Captain ROCHEFORT. Yes, sir.

Admiral HEWITT. Was Pearl Harbor monitoring for that execute?

Captain ROCHEFORT. Yes, sir. Shortly after the receipt of the message from Cavite previously referred to, we received a dispatch from Washington directing us to establish a listening watch on the most likely frequencies. I thereupon sent four language officers to the intercept station at Aiea, where they covered on a twenty-four hour basis one or more frequencies in addition to all the known broadcasts from Tokyo. Results were nil.

Admiral HEWITT. With respect to your estimate of the location of the Japanese fleet on November 26th, you stated before Admiral Hart that it was your opinion that at least two Japanese carriers were at that time in the Marshalls area. What was the basis of that estimate?

Captain ROCHEFORT. The estimate was arrived at after mature consideration by the three or four officers best qualified in the Pearl Harbor unit and embraced their considered opinion, considering all the traffic which they had studied and including the results of their past experiences with the Japanese in such operations as the Hainan occupation the previous year. It was based entirely on radio intelligence.

Admiral HEWITT. I hand you Exhibit 8. Will you identify those?

Captain ROCHEFORT. Yes. I don't recall this one (referring to the first dispatch). I do not recall the receipt of this message from OpNav to CinCAF, ComSIXTEEN, Chungking, Shanghai, Tokyo,

and CincPac, 242239. I might have seen it, but I can't recall. This (referring to the second dispatch) I identify as the so-called estimate by ComFOURTEEN, 260110, and I recognize the dispatch from ComSIXTEEN, 261331.

Admiral HEWITT. Now, with respect to ComFOURTEEN's patch of the 26th, which was based on your estimate, you testified before Admiral Hart that the Commander-in-Chief and Commander FOURTEENTH Naval District came to your office and discussed the matter at great length, at least for an hour and a half, and answered to a question from Admiral Hart as to whether you recalled the disagreement which came to you from the other unit in the area and was likewise communicated to the Commander-in-Chief, stated that you were almost positive that it was by reason of the fact that all messages of that type were given to the Commander-in-Chief. What was said during the discussion between the Commander-in-Chief, ComFOURTEEN, and you at that time in discussing this situation?

Captain ROCHEFORT. In general terms, the Commander-in-Chief wished to know the basis for the estimate, why we placed certain units in certain areas, wished to know the distinction or difference between the estimates of ComFOURTEEN and ComSIXTEEN, and what our opinion was regarding the [49] location and direction of movement of the various Japanese forces. ComFOURTEEN inquired about the same information. Each point, as I recall, was discussed in some detail by both admirals in my office. To the best of my belief, that would be the 27th of November.

Admiral HEWITT. Was that before or after the war warning?

Captain ROCHEFORT. I am quite sure it was after the receipt of the war warning. My reason for saying that was, as I recall, the Commander-in-Chief wanted to know what Washington's reaction was and my reply was apparently the war warning or something of that nature, but that was their reply.

Admiral HEWITT. I assume, then, you saw the war warning.

Captain ROCHEFORT. Yes, sir, I did see the war warning. That was the war warning of the 27th, sir.

Admiral HEWITT. How many carriers did the Japanese have at that time?

Captain ROCHEFORT. They were generally considered as having seven, sir.

Admiral HEWITT. What was your estimate as to the location of the other Japanese carriers, that is, after you placed two in the Mandan Sea?

Captain ROCHEFORT. We did not know, sir, where they were.

Admiral HEWITT. And that lack of knowledge was communicated to Admiral Bloch and Admiral Kimmel?

Captain ROCHEFORT. Yes, sir.

Admiral HEWITT. What conferences, Captain, did you have with Admiral Kimmel after November 27th and prior to December 7th, when he was present and what was said at those conferences?

Captain ROCHEFORT. There were several conferences in my office [50] at which the Commander-in-Chief and the Commandant were present to discuss what information our unit had available and to elaborate upon our daily summaries of location and disposition of Japanese forces.

Admiral HEWITT. Can you summarize in general terms the information and deductions that were made as to the movements of the Japanese fleet during the period 27 November to 6 December?

Captain ROCHEFORT. The communication intelligence summaries as prepared by the ComFOURTEEN unit during the period 27 November to 6 December, inclusive, contained the following information:

(A) The fact that a large task force commanded by the CinC Second Fleet and whose composition was fairly definitely established and whose destination was likewise fairly well established.

(B) Several other items, including on 27 November the fact that there was no further information regarding the presence of CarDiv Five in the Mandates and that an air unit in the Takao area addressed a dispatch to the SORYU and SHOKAKU.

It was further stated on November 27th that carriers are still located in home waters.

On 28 November it was stated that there was no indication of movements of any combined fleet units and that CinC Second Fleet was particularly attentive in his dispatches to CarDiv Five and Seven.

On 30 November it was stated that the only tactical circuit heard was one that the AKAGI and several Marus, and that CinC Second Fleet sent a dispatch which included the HIYEI as an addressee, which indicated that that vessel was a member of the Second Fleet task force.

It was also stated on 30 November that the presence of a unit of plane guard destroyers in the Marshalls indicated at least one carrier in [51] the Marshalls, although this was not confirmed.

On 1 December all service radio calls were changed, and that this indicated an additional progressive step in preparing for active operations on a large scale.

On 1 December, referring to carriers, a notation was made "no change."

On 2 December from inconclusive evidence it appeared as if there might have been a split or division in the normal or combined fleet staff and that these might be two supreme commanders with staffs; also a complete lack of information in regard to carriers, and that despite the partial identification of 200 service calls, not one carrier call had been located, which was a new low ebb.

On 3 December there was no information on submarines or carriers.

Also, on 5 December it was stated that there was no traffic from the commander carriers or commander submarine force.

On 6 December it was noted that CinC combined fleet sent several messages to the carriers, to the Fourth Fleet, and other major commanders. Commander submarines originated two messages, which were his first since 1 December. He was believed to be definitely in the Marshalls.

Admiral HEWITT. Captain, referring to Exhibit 3, which is a U. S. Pacific Fleet Weekly Intelligence Bulletin of 8 December 1944, at page 13 you will find a statement of the composition of the Japanese forces which attacked Pearl Harbor. Is that description of those forces accurate, to the best of your knowledge?

Captain ROCHEFORT. It is accurate, to the best of my knowledge.

Admiral HEWITT. It was a fact, Captain, that the AKAGI was one of the carriers in the force which attacked on December 7th, was it not?

Captain ROCHEFORT. Yes.

[52] Admiral HEWITT. And also the SHOKAKU?

Captain ROCHEFORT. Yes.

Admiral HEWITT. And the battleship HIYEI was also in that force was it not?

Captain ROCHEFORT. Yes.

Admiral HEWITT. Referring to the daily summaries of intelligence information in your unit at Pearl Harbor during the period 27 November to 7 December 1941, Captain, what references do you have to those three ships?

Captain ROCHEFORT. On 27 November the communication intelligence summary stated that an air unit in the Takao area addressed a dispatch to the SORYU and SHOKAKU. Carriers are still located in home waters.

On 30 November the statement was made in the above-mentioned summary that the only tactical circuit heard was one that the AKAGI and several Marus.

On 30 November it was stated that the CinC Second Fleet sent a dispatch which included the HIYEI as an addressee and which placed the HIYEI as a member of his task force.

Admiral HEWITT. In the light of later information, to what extent are the statements made in that intelligence bulletin correct?

Captain ROCHEFORT. In the light of later information, it appears that the statements made in the answer above were correct or close to correct, except the one in regard to the HIYEI.

Admiral HEWITT. Captain, what is the significance to be given to the tactical dispatch which was, according to your information, addressed to the AKAGI on the 30th of November 1941?

Captain ROCHEFORT. Normally whenever tactical circuits are established within units of the fleet, it signified that an operation, as [53] a fleet problem or a maneuver, was about to begin and had already commenced.

Admiral HEWITT. What was your procedure, Captain, for disseminating this type of information between 27 November and 7 December and who received the information?

Captain ROCHEFORT. Copies were airmailed to the other communication intelligence units. Information considered to be of great importance was sent by radio to the other communication intelligence units. A copy of the communication intelligence summary was sent to the Fleet Intelligence Officer daily during the early afternoon accompanied by a trained RI officer for any discussions which the Intelligence Officer had wish to conduct.

Admiral HEWITT. You stated before Admiral Hart that between November 26 and December 7 very little radio information was obtained by means of radio intelligence due to the lack of traffic. The lack of traffic, as I understand it, was not over-all, but was lacking in traffic from ships at sea. Is that correct?

Captain ROCHEFORT. Yes, sir, except as noted in the communication intelligence summary, the volume of total traffic remained about the same or increased, but the traffic which contained as an addressee as an originator one of the major units or major vessels was almost non-existent.

Admiral HEWITT. And some of the actual traffic, as I understand it, consisted of repetitions of old messages which might, in the light of other information, have been padding, is that correct?

Captain ROCHEFORT. Yes, sir. There was perhaps a certain amount of padding or repeating of messages, but in our opinion at the time, and our opinion today, of all of the trained RI personnel, there was no attempt on the part of the Japanese to practice radio deception in any of its forms.

Admiral HEWITT. You also stated in your previous testimony that [4] your unit did not assume that because you did not hear from the large Japanese ships or units that they were all in port and that it occurred to your unit that this silence definitely presaged another offensive movement and that this was called to the attention of the Commandant and the Fleet Intelligence Officer. That is correct?

Captain ROCHEFORT. Yes, sir.

Admiral HEWITT. What information was received concerning this lack of traffic and its significance from the Far Eastern unit?

Captain ROCHEFORT. I do not recall any specific message or messages from the Far Eastern unit and therefore believe that any messages they may have sent us in all probability added nothing to the picture.

Admiral HEWITT. What was the reaction of the Commandant and the Fleet Intelligence Officer to this question of lack of traffic?

Captain ROCHEFORT. Both officers were concerned and enjoined us to make every effort to at least estimate or ascertain the location of the missing units.

Admiral HEWITT. Can you recall on what date this was brought to their attention?

Captain ROCHEFORT. I would say, sir, it was brought to their attention almost daily. It was brought to their attention daily by means of the communication intelligence summary and in addition to that telephonic conversations.

Admiral HEWITT. Did Admiral Bloch or Admiral Kimmel or Captain Leighton know that on a prior occasion when similar traffic conditions existed it preceded the advance and occupation of Hainan?

Captain ROCHEFORT. Yes, sir.

Admiral HEWITT. Did they make any comment to the effect that it is [55] might indicate another offensive movement?

Captain ROCHEFORT. Yes, sir, I think it was generally agreed that there was a definite offensive movement by every one connected with the fleet or with my organization. The only error made was in the direction.

Admiral HEWITT. In other words, they probably connected that with the other indications of a large movement to the south?

Captain ROCHEFORT. Yes, sir.

Admiral HEWITT. There was an air reconnaissance toward Jaluit which was ordered by Admiral Kimmel in July, 1941. Have you any information about that?

Captain ROCHEFORT. No, sir, I have no information about any air reconnaissance on Jaluit.

Admiral HEWITT. What was the relative period of silence prior to the Hainan operation as compared with the period of silence which occurred prior to December 7th and how was the first period of silence evaluated by the intelligence unit?

Captain ROCHEFORT. About the same, and the evaluation at the time of the Hainan occupation included the statement of occupation of Hainan.

Admiral HEWITT. The ONI Bulletin of 1 December 1941 stated that the major portion of the Japanese carriers was in home waters. Do you see this between December 1st and December 7th?

Captain ROCHEFORT. No, sir, I did not see any ONI estimate of 1 December prior to 7 December.

Admiral HEWITT. Apart from the information of the movement of Japanese naval forces and apart from the information from Japanese telephone or cable messages, what other intelligence did you receive during the period 1 December to 7 December 1941?

[56] Captain ROCHEFORT. Apart from telephonic, sir?

Admiral HEWITT. Excepting the Japanese telephone or cable messages.

Captain ROCHEFORT. We received several messages from the Warrenton and Cavite units pertaining to the destruction of Japanese cryptographic systems. We also received a report through the District Intelligence Officer that the Japanese consulate in Honolulu was burning its papers and presumably cipher systems. This information was passed on to all concerned.

Admiral HEWITT. The book "Battle Report" states that the United States shortly before 7 December 1941 had two task forces at sea and that Japanese espionage had so informed Tokyo. What do you know about that?

Captain ROCHEFORT. To the best of my knowledge, Tokyo was not informed of the presence at sea of the two task forces?

Admiral HEWITT. Now, with relation to the communications which the Japanese consul general at Honolulu was concerned with, you previously testified you had received about 1 December and others, which some, which you were able to decode prior to the attack, were unimportant, and others were decoded after—how did you receive those communications?

Captain ROCHEFORT. They were received from an officer messenger from the District Intelligence Officer's office. I did not know, nor did I inquire, as to how he had obtained them.

Admiral HEWITT. What communications were they? Do we have copies of those?

Captain ROCHEFORT. I do not have copies and do not know where they happened to the copies received from the DIO, FOURTEEN Naval District, but believe that duplicates will be in the Washington file but unable to identify the same.

(A certified collection of dispatches supplied by Naval Communications, Navy Department, Washington, was received marked "Exhibit 13.")

Admiral HEWITT. There are three dispatches to which I direct your attention, Captain, in that exhibit and request that you examine them and explain whether or not you have ever seen them, and give us your comments concerning them.

Captain ROCHEFORT. I do not recall having seen Honolulu to Tokyo, dated 6 December, number 253. I do not recall having seen Honolulu to Tokyo, December 6, number 254. I do recall having seen Honolulu to Tokyo, dated 3 December, number 245. This last message

of the group of messages received by the Pearl Harbor unit from the District Intelligence Officer and due to the difficulties inherent in the system, involving research, it was not deciphered until the night of 10 December by the Pearl Harbor unit. It was shown to the Commandant, who gave it to the Secretary of the Navy, who had just arrived. At the Secretary's direction, it was shown to no one except the Commander-in-Chief and the District Intelligence Officer, who was dictated verbally to take whatever action was necessary with the local officials, including the FBI.

This message referred to above prescribed a set of signals to be made, indicating the types of ships in the Hawaiian area, the types of American vessels in the Hawaiian area, and their activities, and included arrangements for various lights in houses, on beaches, signals on boats, want ads in Honolulu radio stations, and signals on Maui and.

Admiral HEWITT. What was the source of that message?

Captain ROCHEFORT. The source, sir?

Admiral HEWITT. Yes, of that message you just discussed.

Captain ROCHEFORT. From Honolulu to Tokyo.

Admiral HEWITT. The source from which you received it.

[58] Captain ROCHEFORT. The District Intelligence Officer, sir.

Admiral HEWITT. Captain, that was one of the group of messages which, I believe, you said you received on or about December 2nd or 3rd, is that correct?

Captain ROCHEFORT. That is correct.

Admiral HEWITT. Do you recall the substance of any of the other messages of that group of messages?

Captain ROCHEFORT. I do not.

Admiral HEWITT. Did you at any time before December 7th receive copies of any Japanese reports concerning American ships in Pearl Harbor or American preparations in Pearl Harbor to meet attack?

Captain ROCHEFORT. Not to the best of my knowledge. I have here the messages we could dig up on the subject and it is not there.

Admiral HEWITT. In addition, Captain, to the message concerning the signals which you have just discussed, you examined, did you not, a message of December 6th from Honolulu to Tokyo, number 253, and a message from Honolulu to Tokyo of December 6 bearing the number 254? Would you read the two messages into the record and call attention to the date of translation?

Captain ROCHEFORT. The message number 253, dated 6 December 1941, from Honolulu to Tokyo in system PA-K2, reads as follows:

1. On the American Continent in October the Army began training barrage balloon troops at Camp Davis, North Carolina. Not only have they ordered four hundred balloons, but it is understood that they are considering the use of these balloons in the defense of Hawaii and Panama. In so far as Hawaii is concerned, though investigations have been made in the neighborhood of Pearl Harbor, they have not set up mooring equipment, [59] nor have they selected the troops to man them. Furthermore, there is no indication that they are making the maintenance of balloons is being undertaken. At the present time there are no signs of barrage balloon equipment. In addition, it is difficult to imagine that they have actually any. However, even though they have usually made preparations, because they must control the air over the water and land runways of the airports in the vicinity of Pearl Harbor, Hickam, Ford Island, and Ewa, there are limits to the balloon defense of Pearl Harbor. I imagine that in all probability there is considerable opportunity left to take advantage of in a surprise attack against these places.

2. In my opinion the battleships do not have torpedo nets. The details are not known. I will report the results of my investigation.

A notation on the bottom of this dispatch indicates that it was translated on the 8th of December 1941 by the Army.

The message number 254, from Honolulu to Tokyo on December 1941, also in system PA-K2, states as follows:

1. On the evening of the 5th, among the battleships which entered port \_\_\_\_\_ and one submarine tender. The following ships were observed at anchor on the 6th:

9 battleships, 3 light cruisers, 3 submarine tenders, 17 destroyers, and in addition there were 4 light cruisers, 2 destroyers lying at docks (the heavy cruisers and airplane carriers have all left).

2. It appears that no air reconnaissance is being conducted by the fleet air arm.

This message was translated on the 8th of December 1941 by the Army.

Admiral HEWITT. Do you know how the Army secured those messages?

Captain ROCHEFORT. No, sir, I do not know how they secured the messages or [60] when. Safford can answer that question, sir.

Admiral HEWITT. There has been testimony to the effect that both the Office of Naval Intelligence and the Federal Bureau of Investigation tapped telephone wires of the Japanese Consul General in Hawaii. What do you know about this?

Captain ROCHEFORT. I know nothing about it, sir.

Admiral HEWITT. Now, concerning the movement of Japanese submarines in and around Pearl Harbor on or prior to 7 December, what do you know of the captured Japanese map which apparently shows either the actual or proposed movement of a Japanese submarine?

Captain ROCHEFORT. I have a copy of a chart in four sections.

Admiral HEWITT. Photographic copy?

Captain ROCHEFORT. Yes, sir, photographic copy of a chart in four sections, which is a copy of the chart removed from the Japanese submarine which went aground off Bellows Field, Oahu, shortly after 7 December. This chart indicates courses and distances into Pearl Harbor and around Ford Island counterclockwise and also contains several notations written in pencil.

It is my considered opinion that the submarine from which the chart was obtained did not transit Pearl Harbor on 7 December 1941, that the marks in pencil, which had been erroneously translated as "begin firing" and "attack and sink enemy ship" or "enemy ship sunk", were actually notations made by the submarine commander prior to his arrival in the Hawaiian area and were merely his plan of approach and entry into Pearl Harbor (referring to Exhibits 1 and 4).

(The four photostatic sections referred to were received and marked respectively "Exhibit 14A," "Exhibit 14B," "Exhibit 14C," and "Exhibit 14D.")

[61] I had received a copy of the original chart from which this photographic copy has been made shortly after its being obtained from the submarine in question and did study the chart in its original form on or about 8 December. It is impossible to state with regard to the Japanese characters referring to "begin firing" and "attack and sink enemy ship" whether they are in the past, present, or future tense.

However, in view of the fact that the submarine when obtained did have its two torpedoes aboard, it would appear that the vessel did not at that occasion sink or fire any torpedo at American vessels in Pearl Harbor.

Admiral HEWITT. What is your deduction as to the meaning of the times indicated at the different points that the courses have?

Captain ROCHEFORT. My deductions as to the times at the various turning points are that they were the submarine commander's proposed times for arriving at such points, all times being minus 9 or Tokyo time.

Admiral HEWITT. Which is how many hours different from Honolulu time?

Captain ROCHEFORT. Which is four and one-half hours ahead of Honolulu local time, which is plus 10½.

He would have been off the entrance to Pearl Harbor at 0510 Sunday morning Honolulu time and he would have arrived at the gate on or about 0530 Honolulu time.

Admiral HEWITT. Do you recall at about what time the actual midget submarine was sunk in Pearl Harbor and at about what part of the harbor?

Captain ROCHEFORT. A midget submarine was sunk in the vicinity of East Loch during the forenoon of 7 December. The exact time I do not recall.

Admiral HEWITT. Was there a similar map recovered from the submarine [62] that was sunk inside Pearl Harbor?

Captain ROCHEFORT. If so, I have never seen it, sir.

Admiral HEWITT. On the original map (Exhibit 14A) were the locations of ships plotted in pencil or in ink?

Captain ROCHEFORT. They were plotted in ink.

Admiral HEWITT. And what were the notations as to the——

Captain ROCHEFORT. The notations adjacent to each ship marker were the names of the ships.

Admiral HEWITT. Were those in pencil or in ink?

Captain ROCHEFORT. I don't remember that. There they looked to be in ink.

Admiral HEWITT. And the times of the turning point are in ink?

Captain ROCHEFORT. The times of the turning point are in ink.

Admiral HEWITT. And the remarks "prepare to fire" and "attack and sink" are in pencil?

Captain ROCHEFORT. Pencil, yes, sir.

Admiral HEWITT. That is not the photograph of the original chart, but it is a photograph of a copy of it (referring to Exhibit 14A)?

Captain ROCHEFORT. No, sir, this is a photograph of the original, I am pretty sure about that.

In connection with the track of the submarine on course 295 between times 0500 and 0510, both Tokyo time, it would appear impossible for the submarine to have steered such a course due to the fact that at that time United States vessels were anchored or moored in the area traversed by that course.

Admiral HEWITT. What do you know about submarine contacts that were made prior to December 7th?

[63] Captain ROCHEFORT. During my service in the fleet immediately preceding my detail to the FOURTEENTH Naval District, we

had at least several submarine contact reports in the immediate vicinity of the entrance to Pearl Harbor. None of these contacts developed actual submarines.

Admiral HEWITT. Do you mean by that that they were never actually determined to be submarines?

Captain ROCHEFORT. Yes, sir. I was trying to avoid the use of the word "negative" there because we didn't know.

Admiral HEWITT. They weren't positively determined to be submarines?

Captain ROCHEFORT. Yes, sir.

Admiral HEWITT. Is that what you mean?

Captain ROCHEFORT. Yes, sir. None of these contacts were positively determined to be submarines.

Admiral HEWITT. According to this book "Battle Report," at 0500 on 7 December a naval radio station on Oahu intercepted and logged a conversation between the WARD and CONDOR concerning the sighting of a submarine some time earlier. What do you know about that?

Captain ROCHEFORT. I haven't heard of such a conversation prior to this, sir.

Admiral HEWITT. Now, it appears from previous testimony that it was believed on 7 December after the initial air attack that the attacking force was located to the south of Pearl Harbor and that certain orders were sent out to search for and intercept Japanese forces in that direction. What information do you have on that?

Captain ROCHEFORT. When the attack commenced, the unit at Pearl Harbor lost all communication with the direction finder stations, of which was located at Lualualei and the other at Aiea; consequently no [64] bearings were received from the direction finder stations at these two locations by the communication intelligence unit. The direction finder at Lualualei, being unable to deliver its bearings, finally broadcast by radio a bearing obtained of one of the attacking units. This bearing was allegedly received by the Commander-in-Chief, being an alternate bearing, either 357 true or 178 true. The direction finder station stated later to me that they had transmitted the bearing as 357. If a reciprocal bearing was given to the Commander-in-Chief by radio, it was the first instance, to my knowledge, that that particular type of direction finder, namely, a CXK, gave a reciprocal bearing.

Admiral HEWITT. In other words, that type was capable of obtaining a unilateral bearing?

Captain ROCHEFORT. Yes, sir. That was the number one direction finder that we had at that time in the Navy.

Admiral HEWITT. And that is all the information on that particular occurrence that you have?

Captain ROCHEFORT. That is all that I have on that, sir.

Admiral HEWITT. What was your system of communication with Lualualei?

Captain ROCHEFORT. The system of communication with Lualualei was by telephone which utilized short stretches of wire between Pearl Harbor and Lualualei, partly Army cable and partly commercial telephone lines. It was claimed at the time that the communication systems failed because of sabotage, but after considerable study and search on our part, we believed it was due to actions of our own people.

sonnel, that is, United States personnel, whereby in setting up new circuits, telephone and otherwise, our circuits were discontinued.

Admiral HEWITT. That action, then, would have been by the Army?

[65] Captain ROCHEFORT. Yes, sir.

Admiral HEWITT. Now, concerning relationship with the Army in Oahu, what information, to your knowledge, was furnished to the Army, particularly during the critical period 27 November to 7 December?

Captain ROCHEFORT. The war warning was given to the Army, as was stated in the dispatch to the Commander-in-Chief. In my several talks with Colonel Fielder subsequent to the 27th, in which we exchanged opinions, I gathered the impression that he was as well informed on current affairs as we were in Pearl Harbor. I did not give the Army G-2 any ultra information, first because the only ultra that was available pertained to destruction of cryptographic material and had no bearing on the local G-2 situation; secondly, because the Army G-2 in Honolulu was being furnished such ultras as was considered necessary by the War Department. It is my recollection that the Army received the information regarding burning of papers in the Japanese consulate in Honolulu at the same time that we received it.

Admiral HEWITT. Did they receive any information as to your estimates of the location and movements of the Japanese fleet?

Captain ROCHEFORT. Not from me, they did not, sir. If they received such information, they would have received it from the Commander-in-Chief.

Admiral HEWITT. May I ask who Colonel Fielder was?

Captain ROCHEFORT. Colonel Fielder was G-2, sir, to General Short, the opposite number to Layton.

Admiral HEWITT. The relationship with the Army, as I understand, was entirely on a personal basis? There was no official system set up for joint operations?

Captain ROCHEFORT. No, sir, there was not.

Admiral HEWITT. Do you know whether any reconnaissance was conducted [66] by Army planes at any time?

Captain ROCHEFORT. No, sir, I do not know of any air reconnaissance conducted by the Army, except that which was being conducted during 1941 at the direction of the Commander-in-Chief, which was an inshore patrol.

(Exhibit 63 of the Naval Court of Inquiry record was received and marked "Exhibit 15.")

Admiral HEWITT. I would like to ask you what information you had on the messages in that exhibit prior to 7 December.

Captain ROCHEFORT. The only ones that I have seen, sir, are these here because these are the only ones transmitted by Washington to CincPac and ComFOURTEEN (indicating those of 1 and 3 December). It tells London, Hongkong, Singapore, and Manila to destroy the purple machine, and one on 1 December about giving plans to entice the British to invade Thailand; one on 26 November covering the Tokyo voice; and one on 13 November which went to ComSIXTEEN, but it doesn't say whether it went to CincPac or not, giving the U. S. military situation in the Philippines. That is all we got.

The messages referred to above were received by the Pearl Harbor unit from the Navy Department.

In addition, I have seen the gist of the message of November 1 (contained in Exhibit 15).

Other than the above, I haven't seen any, to the best of my knowledge, of the messages contained in this exhibit.

Admiral HEWITT. There has been previous testimony relating a commercial telephone conversation between Tokyo and a Japanese resident at Hawaii some time during this critical period between 1st and 6th of [67] December. It has been termed the "M conversation" and it was more or less unintelligible. Do you know anything about that?

Captain ROCHEFORT. No, sir, I do not.

Admiral HEWITT. Now, as you know, the purpose of this investigation is to supplement previous investigations in order to obtain the facts. Is there any fact bearing on this matter, of which you have knowledge, which hasn't been mentioned?

Captain ROCHEFORT. No, sir.

Admiral HEWITT. That is all.

(The witness was excused.)

(The investigation was then, at 4:40 p. m., adjourned until 2 p. m. the next day.)

## [68] PROCEEDINGS OF THE HEWITT INQUIRY

## FOURTH DAY

Pursuant to notice, the investigation met at the offices of the General Board, Navy Department, at 2 p. m., Thursday, 17 May 1945.

Present: Admiral H. Kent Hewitt, USN; Mr. John F. Sonnett; Lieutenant Commander Benjamin H. Griswold, USNR; Lieutenant John F. Baecher, USNR; and Ship's Clerk Ben Harold, USNR.

Two witnesses entered, each read the precept, and each was duly sworn.

Admiral HEWITT. Will each of you state his name and rank.

Captain MASON. Redfield Mason, Captain, U. S. Navy.

Commander FABIAN. Rudolph J. Fabian, Commander, U. S. Navy.

Admiral HEWITT. Captain Mason, for the benefit of the record, will you state what your duties were during 1941?

Captain MASON. I was Fleet Intelligence Officer on the staff of Commander-in-Chief, Asiatic Fleet, sir.

Admiral HEWITT. Will you do the same, Commander?

Commander FABIAN. I had been the Officer-in-Charge of the radio unit on Corregidor and had been relieved in September, but my orders were, by the Commander-in-Chief, Asiatic Fleet, to remain there and to assist as much as I could.

Admiral HEWITT. That was in view of the situation existing at the time?

Commander FABIAN. Yes, sir.

Admiral HEWITT. Commander Fabian, what was the mission of the radio intelligence unit at Corregidor?

Commander FABIAN. Our mission, Admiral, was to maintain a unit for [69] study of enemy fleets and communications in order, first, to keep track of their peacetime intentions; second, to prevent against a surprise attack, insofar as possible, or an attack without a declaration of war; and, third, to keep as well up as possible on the organization, methods, and so forth, sir.

Admiral HEWITT. Of the Japanese fleet?

Commander FABIAN. Yes, sir.

Admiral HEWITT. What equipment did you have there?

Commander FABIAN. I had twenty-six radio receivers, ranging from low frequency to high frequency, had a set of business machinery and the appurtenances necessary for the interception of both high speed and low speed enemy transmissions.

Admiral HEWITT. Did you have a direction finder?

Commander FABIAN. Yes, sir. In addition to that, we had a direction finder.

Admiral HEWITT. And what about decrypting?

Commander FABIAN. For the decryption of naval traffic, we had seven officers and nineteen men, sir.

Admiral HEWITT. What, in general, were the arrangements for dissemination of radio intelligence information to the Asiatic Fleet, Commander-in-Chief of the Pacific Fleet, and to the Army out there?

Commander FABIAN. The American Navy radio intelligence organization had a private cryptographic system which was held by ComSIXTEEN, which was our unit, Commander-in-Chief, Asiatic Fleet, CincPac, ComFOURTEEN, and OpNav, sir. Now, as to dissemination to the Army, locally all of our information was handled to the Fleet Intelligence Officer in Manila, who provided for liaison with the Army. Insofar as the Army in Washington, [70] was all carried on by OpNav, sir.

Admiral HEWITT. Did you have any specific tasks which were assigned by the Navy Department, any particular types of traffic watch, and so forth?

Commander FABIAN. No, sir. In general, we were assigned the mission that I indicated previously, and in carrying out that mission we covered certain circuits from which we could get most of the information we desired, sir, and the greatest volume of material. In addition to that, we provided for intercept of diplomatic traffic. In connection with the diplomatic traffic, sir, certain types were immediately enciphered and sent back to Washington as soon as it was intercepted.

Admiral HEWITT. Did that go to Pearl Harbor also, the Pearl Harbor unit?

Commander FABIAN. No, sir. To the best of my knowledge, they weren't performing any cryptanalysis or reading of diplomatic systems.

Admiral HEWITT. Captain Mason, have you got anything to add to that?

Captain MASON. I can add a little bit about the dissemination to the Army locally. The Army was furnished daily a copy of all diplomatic translations that had been made by the unit at Corregidor. The purely naval matters, when our intelligence came from pure naval traffic, inasmuch as there wasn't any translating going on as a matter of fact, they weren't furnished any copies of either dispatches that we sent to CincPac or Washington or received from them, but conferred quite frequently with the head of the intelligence department in the Philippine Army Department and always provided at least—I can't be too specific on the point of how frequently, but quite frequently—our estimate of the locations of the Japanese fleet. As I recall now, I didn't give him the source of this [71] information but graded it as "doubtful" or "possible" or whatever we thought of it.

Admiral HEWITT. Did the Army out there have any similar source of information?

Captain MASON. No, sir. That is correct, isn't it?

Commander FABIAN. They had an intercept unit, but they made no local attack, I believe, sir.

Captain MASON. It was copying Army and diplomatic traffic.

Commander FABIAN. That is right.

Admiral HEWITT. Was the exchange of information between you and the Army complete? I mean did you receive all the information they had as well as giving them all the information you had?

Captain MASON. So far as I know, yes, sir.

Admiral HEWITT. You were in close contact most of the time?

Captain MASON. Yes, sir.

Admiral HEWITT. What diplomatic codes were assigned to the unit in the Philippines for reading?

Captain MASON. There were assigned the machine cipher known as purple, machine cipher known as red, and the diplomatic code known as J with the current one being 19.

Admiral HEWITT. What was the relative order of importance of those codes?

Captain MASON. You mean as we deemed it?

Admiral HEWITT. As you deemed it.

Captain MASON. Well, we considered that the information of the greatest value would more likely be obtained from the purple. It should be made clear, I think, in the record that the exploitation of this traffic [72] was for the purpose of local information chiefly, seeing that we might be the first to intercept the message and that the unit was not responsible for the recovery of the keys necessary to read it. That was done in Washington and forwarded back to it. And all purple traffic intercepted and certain other traffic in the red and J-19 codes were immediately enciphered and sent to Washington. That is whether we read it later or not.

Admiral HEWITT. What, in general, was the information obtained from the Japanese diplomatic codes during the period 27 November to 7 December?

Captain MASON. Well, we knew from purple dispatches that negotiations then being carried on in Washington between the Japanese and ourselves were not progressing satisfactorily and would probably be broken off. I think that is as general as I can make a statement.

Admiral HEWITT. You saw the war warning dispatch from OpNav on November 27th?

Captain MASON. Yes, sir.

Admiral HEWITT. Did that contain any information which was new to you or surprising?

Captain MASON. Not of a surprising nature, no, sir.

Admiral HEWITT. I have here a file of dispatches which has been previously submitted in evidence and marked "Exhibit 15." I would like to have both of you look them over and let me know which, if any, you saw. They are a file of diplomatic and consular dispatches.

Captain MASON. I have seen this file, Admiral, both Commander Fabian and I. The only message which we specifically remember having received or seen was number 15 of Exhibit 15, which we received from the British unit at Singapore and sent to OpNav, information to ComSIXTEEN, CinCPac, and [73] ComFOURTEEN, in CinCAF dispatch 281430 of November, 1941.

Admiral HEWITT. What was the gist of that?

Captain MASON. That was the setting up of the "winds" code.

Admiral HEWITT. I have here a file of Japanese dispatches which have been marked "Exhibit 13" which I would like to have you examine and state what messages, if any, you had seen.

Captain MASON. I do not recall having seen any messages in this exhibit.

Admiral HEWITT. Commander Fabian?

Commander FABIAN. Yes, sir. I can't specifically remember any of these, Admiral.

Admiral HEWITT. Do you recall having seen any messages referring to the ships or locations of ships at Pearl Harbor?

Captain MASON. I do not.

Commander FABIAN. Nor I, sir.

Admiral HEWITT. What Japanese naval codes had been broken at Corregidor?

Commander FABIAN. The Corregidor unit, Admiral, was working on the naval system known as JN-25, which was the system containing the greatest volume of Japanese dispatches.

Admiral HEWITT. To what extent were you successful in breaking the code?

Commander FABIAN. We were in the initial stages, sir. We had an established liaison with the British unit at Singapore. We were exchanging values, both code and cipher recoveries, but we had not developed either to the point where we could read enemy intercepts.

Admiral HEWITT. Is it a fact, then, that most of your information [74] as to the location and movements of the Japanese fleet were obtained entirely from traffic analysis rather than decryption?

Commander FABIAN. That is true, sir.

Admiral HEWITT. Concerning your estimates of the location and movements of Japanese naval forces from 26 November to 7 December 1941, are you familiar with the dispatches contained in exhibit number 8, which I submit to you?

Commander FABIAN. Yes, sir.

Captain MASON. Yes, sir.

Admiral HEWITT. What difference, if any, existed between the estimate of the ComFOURTEEN unit and the ComSIXTEEN unit?

Commander FABIAN. The ComFOURTEEN unit indicated a strong concentration of submarines and air groups in the Marshalls and also indicated that one CarDiv unit was present in the Marshalls. In the same dispatch in which they gave their estimate, they requested our comment, to which we replied that we could not confirm their thought that there were carriers and submarines in force in the Mandates. We believed that all the First and Second Fleet carriers were in the Sasebo-Kure area.

Admiral HEWITT. Then your dispatch was rather a statement that you were unable to confirm the FOURTEENTH District estimate rather than a positive disagreement?

Commander FABIAN. That is correct, sir.

Admiral HEWITT. What dispatches relating to Japanese movements were sent by ComSIXTEEN or Commander-in-Chief, Asiatic, to OpNav or CincPac after the 26th of November dispatch?

Commander FABIAN. From the standpoint of the RI unit on Corregidor, sir, we initiated a dispatch around the 1st of December containing the [75] movement report of the Commander-in-Chief, Second Fleet, on his departure from the Empire area and his prospective movements through the various communication zones down to the Indo-China area, sir.

In addition to the dispatch just mentioned, ComSIXTEEN transmitted to CincPac, OpNav, and ComFOURTEEN, comment on AS-TALUSNA Shanghai 270830, regarding locations of enemy ships and added information indicative of a shift of 4,000 men to the Mandates.

On 30 November we originated a dispatch indicating a change of "orange" call signs, and on 1 December a message indicating enemy fleet movements or enemy ship movements, plus indication of the CincC Second's movement from the Kure-Sasebo communication zone probably en route to South China waters.

Admiral HEWITT. Can you identify these (handing dispatches to the witness) as the dispatches which you sent?

Commander FABIAN. Yes.

(The dispatches referred to were received and marked "Exhibit 16.")

Admiral HEWITT. What other information did you have concerning the Japanese fleet movements from 26 November to 7 December 1941?

Captain MASON. Is that other than RI?

Admiral HEWITT. Yes.

Captain MASON. Information concerning Japanese fleet movements, other than that obtained from traffic analysis, consisted of one or two reports, the exact nature of which I am not certain, from the Assistant Naval Attache, Shanghai, and in addition a number of sighting reports obtained from our reconnaissance planes. There was one on 2 December from CincAF to OpNav, information CincPac, dispatch 020345, reporting the sighting of nine [76] submarines. I don't remember just where they were now, but it will be contained in that dispatch. Another on 2 December at 0730, the same originator and the same addressees, reporting the sighting of three submarines and twenty-one transports and the presence of enemy patrol planes over Camranh Bay. One on 6 December, same originator, same addressees, at 1255, reporting a convoy in Camranh Bay. Those are all the messages that have been found and to which I can positively testify.

I have a fairly clear recollection of another one or two, and one made by the British which included the sighting of the heavy fleet units, the battleships and the cruisers, after they had turned westward around Poulo Condore, French Indo-China, which was probably about twenty-four to forty-eight hours prior to the attack on Pearl Harbor. I can't recall positively, but I feel certain that our own reconnaissance planes had sighted at least the cruisers of that task force about twelve hours or more previously, which we reported also. I don't recall any other information that we had on movements during that period, sir.

Admiral HEWITT. During the critical period from 26 November to 7 December, did you have any information, by deduction or otherwise, as to the location and movements of any Japanese carriers?

Commander FABIAN. Our estimate summarized in ComSIXTEEN's 261331 indicated that we believed all carriers, all known carriers, were in the Kure-Sasebo area.

Admiral HEWITT. You mentioned the aerial reconnaissance, your own aerial reconnaissance. Can you give me an idea of the extent of that and approximate dates?

Captain MASON. I can't give the exact dates, Admiral, except that I know some of it was going on before we received the war warning and that [77] it was intensified thereafter. We flew such aerial reconnaissance so as to insure that no surface force could approach Luzon from any of what might be termed the expected directions and escape detection. Chiefly, as I recall it now, we put most stress on the lines from slightly eastward of the east coast of Formosa down through Bako, where they had a naval base, and Hainan, where they also had a naval base, and also towards Comranh Bay in the later days after the sighting of these various units moving south. We also had in the late days some sort of an agreement with the Dutch about reconnaissance toward Palau, thinking that perhaps an attack on the Mindanao and Davao area would come from that direction. I am not prepared to try to give exact details of that because I can't recall that, sir. The Dutch were flying, I am certain, something up from the general Halmahera area towards Palau and, I think, we were flying something along the general Davao-Palau line. And the British, too, in the final days were flying reconnaissance out of Singapore towards

Camranh Bay and over the Gulf of Siam. I think that is about as much as I can really recall about the reconnaissance.

Admiral HEWITT. Do you recall receiving any information from the British and Dutch sources?

Captain MASON. From the British, yes, sir. I have mentioned previously. They sighted the task force that was to eventually invade Malaya somewhere in the general Poulo Condore area.

Admiral HEWITT. I have here an exhibit which is a Pacific Area Intelligence Bulletin. It gives information obtained from a Japanese prisoner of war as to the composition of the task force which attacked Pearl Harbor. Will you look at that and see if you had any reliable intelligence concerning any of those ships in the period 26 November to 7 December?

Commander FABIAN. No, sir. I feel sure our last definite information [78] about carriers was summarized in the dispatch I referred to which was originated on the 26th.

Admiral HEWITT. Concerning the "winds" code in the dispatch of 28 November which you recalled having seen, what steps were taken to monitor for the use of this code and what were the results?

Commander FABIAN. We assigned one receiver to cover the Tokyo voice broadcasts and each broadcast was listened to by a linguist. In addition to that, we assigned one receiver on a twenty-four hour basis to the Navy Morse press broadcast. The materials therefrom were copied constantly and delivered to the linguists and no indication of any of the phrases set up in the "winds" message appeared.

Captain MASON. The British unit at Singapore was also monitoring the same circuits and it was agreed that anything received by either unit would immediately be exchanged.

Admiral HEWITT. Nothing was received?

Captain MASON. Nothing was received from that.

Admiral HEWITT. This book called "Battle Report," which I showed you, contains a statement that the United States had two task forces at sea shortly before the Pearl Harbor attack and that the Japanese espionage had so informed Tokyo. Have you any information as to the basis for that statement?

Captain MASON. I have none, sir.

Commander FABIAN. Nor I, sir.

Admiral HEWITT. Did you receive any information by means of interception of Japanese cable or telephone messages?

Captain MASON. None, sir.

Commander FABIAN. No, sir.

Admiral HEWITT. Have you any information concerning the operation [79] of Japanese submarines in and around Pearl Harbor?

Commander FABIAN. None, sir.

Captain MASON. None, sir.

Admiral HEWITT. As you know, the purpose of this investigation is to supplement the previous investigations in order to obtain all the facts. Are there any facts bearing on this matter of which you have knowledge which have not previously been mentioned?

Commander FABIAN. None that I recall, sir.

Captain MASON. No, sir.

(The witnesses were excused.)

(The investigation was then, at 2:50 p. m., adjourned until 2 p. m. the next day.)

[80] PROCEEDINGS OF THE HEWITT INQUIRY

FIFTH DAY

Pursuant to notice, the investigation met at the offices of the General Board, Navy Department, at 2 p. m., Friday, 18 May 1945.

Present: Admiral H. Kent Hewitt, USN; Mr. John F. Sonnett; Lieutenant Commander Benjamin H. Griswold, USNR; Lieutenant John F. Baecher, USNR; and Ship's Clerk Ben Harold, USNR.

Two witnesses entered, each read the precept, and each was duly sworn.

Admiral HEWITT. Will each of you state his name and rank.

Commander KARIG. Walter Karig, Commander, U. S. Naval Reserve.

Lieutenant KELLEY. Welbourn Kelley, Lieutenant, U. S. Naval Reserve.

Admiral HEWITT. You gentlemen were the authors of "Battle Report," a book published in 1944?

Commander KARIG. Yes, sir.

Lieutenant KELLEY. Yes, sir.

Admiral HEWITT. Turning to page 6 of that book, what was the basis of the statement that, "There were two powerful task forces sent against Pearl Harbor, the major elements of one lurking just over the horizon from its companion fleet to overwhelm any American attempt to engage the invaders," and, "The United States, too, had two task forces at sea, and Japanese espionage had so informed Tokyo"?

Commander KARIG. That question, Admiral, was in several parts. Can we work at it backwards? Can we take the last part of that question first?

Admiral HEWITT. Yes.

Commander KARIG. "That Japanese espionage had so informed Tokyo"?

Admiral HEWITT. Yes.

[81] Commander KARIG. That was made in the form of a declarative sentence, and is not the most cautious kind of writing. It was based on the Robert's Report, and I would like to read two paragraphs of that report into the record, if I may.

Admiral HEWITT. Go ahead.

Commander KARIG. (reading):

It was believed that the center of Japanese espionage in Hawaii was the Japanese consulate at Honolulu. It has been discovered that the Japanese consul sent to and received from Tokyo in his own and other names many messages on commercial radio circuits. This activity greatly increased toward December 7, 1941. The contents of these messages, if it could have been learned, might have furnished valuable information. In view of the peaceful relations with Japan, and the consequent restrictions on the activities of the investigating agencies, they were unable prior to December 7 to obtain and examine messages transmitted through commercial channels by the Japanese consul, or by persons acting for him.

It is now apparent that through their intelligence service the Japanese had complete information. They evidently knew that no task force of the United

States Navy was anywhere in the sector northeast, north, and northwest of the Hawaiian Islands. They evidently knew that no distant airplane reconnaissance was maintained in any sector. They evidently knew that up to December no inshore airplane patrol was being maintained around the periphery of Oahu. They knew, from maps which they had obtained, the exact location of vital fields, hangars, and other structures. They also knew accurately where certain important naval vessels would be berthed. Their flyers had the most detailed maps, courses, and bearings, so that each could attack a given vessel or fleet. Each seems to have been given a specified mission.

Lieutenant KELLEY. May I say something also, sir? In conversation [82] with Secretary Knox he gave us the background of the Japanese attack as he knew it—how he knew it, we don't know, and he said that his belief was there were two Japanese task forces, we have it here.

Admiral HEWITT. That was the basis for your statement, then?

Commander KARIG. Our conclusions were drawn as a deduction from the Robert's Report although there was no specific proof that the Japanese espionage had so informed Tokyo.

Admiral HEWITT. Relative to the conversation between the WARD and CONDOR on pages 13-14 relative to a submarine contact, would you tell me where you obtained that information?

Commander KARIG. I will let Lieutenant Kelly answer that, Admiral, please sir.

Lieutenant KELLEY. Sir, from the skipper of the WARD, then Lieutenant W. W. Outerbridge, USN, who went to the station on Bishop's Point and got a transcript of that conversation as intercepted by the naval radio station on Bishop's Point, the conversation between the CONDOR and WARD. At approximately 0500, the following conversation between the USS CONDOR and the USS WARD was intercepted by the naval radio station on Bishop's Point:

WARD. What was the approximate distance and course of the submarine sighted?

CONDOR. The course was about what we were steering at the time, 020 magnetic and about 1,000 yards from the entrance.

WARD. Do you have any additional information on the sub?

CONDOR. No additional information.

WARD. When was the last time approximately that you saw the submarine?

CONDOR. Approximately 0350 and he was apparently heading for the entrance.

[83] Admiral HEWITT. Concerning the Japanese map, Plate 1, and this diagram, Figure 3, you take the position, I believe, that the Japanese submarine from which this map was obtained was in Pearl Harbor on December 7 and inaccurately charted the position of other ships in the Harbor that day. Will you tell me on what you base that belief?

Commander KARIG. Again I'll ask Mr. Kelley to answer that because he interviewed Admiral Furlong here in Washington.

Lieutenant KELLEY. Admiral, that map as contained in Plate 1 was quite widely published and was released officially by the Navy Department some time after Pearl Harbor. I don't remember the exact date. A news story widely printed at that time was to the effect that this chart was made by a submarine in the harbor. I discussed this chart with Admiral Furlong on a visit to Washington. I discussed the whole Pearl Harbor attack with Admiral Furlong at great length. I don't remember specifically saying to Admiral Furlong "Do you think this was made by the submarine?" I couldn't say that.

he said that to me. He did describe how the chart was brought into the submarine base and spread out on the deck. They all looked at it. I am sure he told me that it was from a submarine. That is, I think, pretty well known and my memory is that it came from the submarine which was sunk by the MONAGHAN and the CURTISS inside the harbor.

Admiral HEWITT. But you wouldn't be positive?

Lieutenant KELLEY. We cannot prove that.

(A photograph of a captured Japanese chart, showing courses and location of United States ships in Pearl Harbor, from which Plate V in "Battle Report" was taken, was received and marked "Exhibit 17.")

Commander KARIG. Shall we read into the record the official title of the picture?

[84] Admiral HEWITT. Will you please?

Commander KARIG. "CHART OF PEARL HARBOR FOUND IN CAPTURED JAP SUBMARINE.—This Japanese map is an excellent example of subversive Japanese activities mentioned by Secretary Knox upon his return from Hawaii. Japanese symbols drawn on the chart indicate the anchorage of ships and details of military establishments around the inner harbor of Pearl Harbor, U. S. Naval Base in Hawaii. Note misspelling of 'Southeast Loch' (lower right)."

WASHINGTON, D. C.

Admiral HEWITT. Did you see the translation with notations on that chart?

Lieutenant KELLEY. Yes, sir.

Admiral HEWITT. I have here two Exhibits, 3 and 4, of reproductions of the chart with the English translations. If you will note, the notations are different. You will notice off the position of the TENNESSEE one says, "Attack and sink enemy ship," and the other one says, "Sunk enemy ship." For your information, that confusion may be because they are translations of the Japanese ideographs, which have no tense and could mean either past or future.

Commander KARIG. They don't even have a number. It could be "enemy ships."

Lieutenant KELLEY. We haven't seen this translation.

Admiral HEWITT. You haven't seen either?

[85] Lieutenant KELLEY. Not this one, no, sir.

Commander KARIG. No, sir. The translations we supplied in the book were made by a civilian. The only translations that were made for us anyhow were made in the so-called syllabic, and not ideograph.

Admiral HEWITT. On page 26 of "Battle Report" there is the following: "At one point on his chart, and as if to bolster the evidence

of his own vision, he wrote in Japanese, 'I saw it with my own eyes. You don't know what part of the chart that was?'

Lieutenant KELLEY. It was the southeast, as I remember it, also here (indicating) about the cruisers.

Commander KARIG. That is just trusting to memory—where the cut was penciled into the chart from which the cut was made.

Admiral HEWITT. Concerning the times noted on the chart, what was your opinion as to the zone time that they were in?

Commander KARIG. Honolulu time was our assumption, sir.

Admiral HEWITT. Will you read the statement on page 23 as to source of the submarine map?

Commander KARIG. On page 23, Chapter Two, part two:

At 0430 on the morning of December 7th a Japanese two-man submarine inside Pearl Harbor just off Hospital Point.

From the log of this submarine, subsequently beached outside Pearl Harbor and recovered intact, it is not difficult to reconstruct its survey of the harbor leg by leg.

Admiral HEWITT. By the "log" of this submarine, do you mean the chart which has been under discussion?

Commander KARIG. Yes, sir. The only copy of the Japanese chart from which we worked in preparing the text of chapter two was Exhibit 17, supplied [86] by the Pictorial Section, Office of Public Relations.

Lieutenant KELLEY. That is not a complete chart as taken from the submarine.

Commander KARIG. Nor did it show that part of the chart shown below—

Lieutenant KELLEY. Below the Hospital Point entrance.

Admiral HEWITT. The Army Pearl Harbor report, apparently based on testimony of an FBI agent, states that the difference between the charted positions of the United States ships and the actual positions on December 7th shows conclusively that a submarine had been in the Harbor prior to December 7th. Did you investigate the location of ships in the Harbor prior to December 7th?

Commander KARIG. No, sir.

Lieutenant KELLEY. No, sir, we did not. The information was not available to us.

Admiral HEWITT. Do you know the location of the original map?

Commander KARIG. No, sir.

Admiral HEWITT. If you have anything else or any other information or any leads that you can give that would permit me to obtain additional information about this affair, I would be very glad to have it.

Commander KARIG. We have nothing further. That is, first-hand information.

Admiral HEWITT. Thank you very much.

(The witnesses were excused.)

(The investigation was then, at 2:40 p. m., adjourned until 10 a. m., Monday, 21 May 1945.)

[87] PROCEEDINGS OF THE HEWITT INQUIRY

SIXTH DAY

Pursuant to notice, the investigation met at the offices of the General Board, Navy Department, at 10:30 a. m., Monday, 21 May 1945.

Present: Admiral H. Kent Hewitt, USN; Mr. John F. Sonnett; Lieutenant Commander Benjamin H. Griswold, USNR; and Ship's Clerk Ben Harold, USNR.

A witness entered, read the precept, and was duly sworn.

Admiral HEWITT. State your name and rank.

Captain OUTERBRIDGE. William W. Outerbridge, Captain, U. S. Navy.

Admiral HEWITT. You were the Commanding Officer of the WARD on the morning of 7 December 1941?

Captain OUTERBRIDGE. Yes, sir.

Admiral HEWITT. And during the early hours of that morning, you had several actual contacts with submarines? Is that so?

Captain OUTERBRIDGE. Several actual contacts?

Admiral HEWITT. Well, reported contacts.

Captain OUTERBRIDGE. Yes, sir. We had one alert and one actual contact and then later, after the attack, we had several outside.

Admiral HEWITT. There has been reported and logged the conversation which you had with the CONDOR along about 0520 Honolulu time and later there is in evidence the report of your actual attack on the submarine. Will you give me your story of the events of the morning, beginning with the report from the CONDOR about 0400?

Captain OUTERBRIDGE. That doesn't appear on this record, but she signalled us by flashing light that she believed she had seen an object that looked like a submarine proceeding to the westward, and I believe she [88] had just come out and was sweeping, magnetic sweep out in the channel, but she said, "The submarine is standing to the westward."

Admiral HEWITT. What was her location?

Captain OUTERBRIDGE. She was in the channel, sweeping with her magnetic sweeps.

Admiral HEWITT. The approach channel to Pearl Harbor?

Captain OUTERBRIDGE. Outside of the actual channel, between the reefs, but on the approach channel to Pearl Harbor.

Admiral HEWITT. Swept channel?

Captain OUTERBRIDGE. Swept channel, yes, and we went to General Quarters and proceeded to her position, as close as we could get to her without fouling her sweeping gear, and then we stood to the westward, slowed to ten knots, and searched. It was a sonar search. We couldn't see anything.

Admiral HEWITT. About what time did you get that signal?

Captain OUTERBRIDGE. We got that signal about 0358, visual signal about 0358, and we searched for about an hour and didn't find a thing; so I got in contact with her again and asked her for a verification. Then she said—this is in the record here. We asked her for "What was the approximate distance and course of the submarine that you sighted?" and she said, "the course was about what we were steering at the time 020 magnetic and about 1000 yards from the entrance, apparently heading for the entrance." Well, I knew then that we had been searching in the wrong direction. We went to westward and, of course, there was still doubt as to whether she had actually seen a submarine because there hadn't been any other conversation except by flashing light with us, and I wondered whether they were sure or not; so I did ask them, "Do you have any additional information on the sub?" and they said, "No additional information." I then asked them, "When was [89] the last time approximately that you saw the submarine?" and they said, "Approximately time 0350 and he was apparently heading for the entrance." Then we thanked them for their information and asked them to notify us if they had any more information and then we just kept on searching in our area, in the restricted area outside of the buoys. That was the end of this incident for the first search.

Admiral HEWITT. You made no report of that to higher authority.

Captain OUTERBRIDGE. No, sir, I didn't make any report of that.

Admiral HEWITT. What was your evaluation of that?

Captain OUTERBRIDGE. Well, at the time I thought perhaps it was a submarine, because they didn't report it. This conversation was taken over another circuit entirely. This is not in either his log or mine. They didn't report it and I thought if he didn't report it, I must not think it is a submarine. It was his initial report and I thought it may not be. It may have been anything; it may have been a buoy. Since then, I don't believe it was a buoy. I believe the Commanding Officer of the CONDOR saw a submarine. I don't know where he is. I think he was killed, killed in action. But at that time I didn't know whether or not it was a submarine.

Admiral HEWITT. You say you think the Commanding Officer of the CONDOR was killed?

Captain OUTERBRIDGE. I believe he was killed.

Admiral HEWITT. Do you remember his name?

Captain OUTERBRIDGE. No, sir, I don't know, but I met some people who told me about him.

Admiral HEWITT. Well, now about the later contact.

Captain OUTERBRIDGE. The later contact—I turned in again and was sleeping in the emergency cabin, as usual, and Lieutenant Goetz [90] had the deck. He was a j. g. He called me and said, "Captain, come on the bridge." The helmsman was the first one to see this object and he saw this thing moving. It looked like a buoy or him, but they watched it and after they had watched it for a while they decided probably it was a conning tower of a submarine, although we didn't have anything that looked like it in our Navy, and they had never seen anything like it. I came on the bridge as fast as I could and took a look at it. I don't know where it appeared to them at that time but at that time it appeared to me to be following the ANTARES. The ANTARES had been reported to me and at that time I thought

the ANTARES had been heading into the harbor. She also had a tow, towing a lighter, and it appeared to me the submarine was following astern of the tow.

Admiral HEWITT. Astern of the tow?

Captain OUTERBRIDGE. Yes, sir. It may or may not have been. I think other people can testify it was standing in to Honolulu. To me it appeared to be following the ANTARES in and I thought, "She is going to follow the ANTARES in, whatever it is." It was going fairly fast. I thought she was making about twelve knots. It seemed to be a little fast to me. I was convinced it was a submarine. I was convinced it couldn't be anything else. It must be a submarine and it wasn't anything that we had and we also had a message that any submarine operating in the restricted area—not operating in the submarine areas and not escorted—should be attacked. We had that message; so there was no doubt at all in my mind what to do. So, we went to General Quarters again and attacked. That was 0740-0640.

Admiral HEWITT. And you attacked and you reported, I believe that—

Captain OUTERBRIDGE. Yes, sir, we reported.

Admiral HEWITT. Will you identify those exchanges of messages? Will [91] you identify the messages on the radio log?

Captain OUTERBRIDGE. Yes, sir. The Executive Officer was on the bridge at the time. We made the attack and we dropped depth charges in front of the submarine. The first report was, "We have dropped depth charges upon sub operating in defensive sea area." I thought, "Well, now, maybe I had better be more definite," because we did fire and if we said we fired, people would know it was on the surface, because saying it was a sub and dropping depth charges, they may have said it might have been a blackfish or a whale. So I said, "We have attacked fired upon and dropped depth charges upon submarine operating in defensive sea area," so they would feel, well, he shot at something. We sent the message at 0653, the second one.

(The radio log of the Naval Radio Station, Bishop's Point, Oahu, containing the conversation between the WARD and CONDOR and the WARD's report of attack upon a submarine, was received and marked "Exhibit 18.")

Admiral HEWITT. What do you feel was the effect of your attack?

Captain OUTERBRIDGE. I think we sank the submarine.

Admiral HEWITT. What do you base that on?

Captain OUTERBRIDGE. On the gun hit, only on the gun hit.

Admiral HEWITT. There was a gun hit on it?

Captain OUTERBRIDGE. There was a gun hit on it, and I looked these submarines over and there is no hatch between the conning tower and the tube of the submarine, where I believe it was hit, right at the waterline, the base of the conning tower.

Admiral HEWITT. And the submarine disappeared after that?

Captain OUTERBRIDGE. Yes, sir, it disappeared.

Admiral HEWITT. That was before you made the depth charge attack?

[92] Captain OUTERBRIDGE. Yes, sir, we fired at the submarine before we made the depth charge attack, and as she was going under the stern, we dropped over the depth charges.

Admiral HEWITT. Your depth charges were close to her?

Captain OUTERBRIDGE. Yes, sir.

Admiral HEWITT. Definitely?

Captain OUTERBRIDGE. Definitely, they were there. I didn't make a kill—

Admiral HEWITT. Whom were those reports addressed to?

Captain OUTERBRIDGE. I believe it was Commander Inshore Patrol. We were working for inshore patrol, but the interpretation is here.

Admiral HEWITT. You got the calls?

Captain OUTERBRIDGE. Yes, sir, we got the calls.

Admiral HEWITT. Do you remember what they mean?

Captain OUTERBRIDGE. No, sir.

Admiral HEWITT. Those were the only reports of that attack made?

Captain OUTERBRIDGE. Yes, sir, two messages on that.

Admiral HEWITT. What was your action after the completion of attack?

Captain OUTERBRIDGE. Well, I saw one of these large white sampan lying to out there in the defensive area.

Admiral HEWITT. Was that against regulations?

Captain OUTERBRIDGE. That was against standing rules. They were supposed to be in the defensive area, but he was in there. So, I turned around and went after him and we chased him out towards Barber's Point. He was going pretty fast.

Admiral HEWITT. He tried to get away from you?

[93] Captain OUTERBRIDGE. It appeared that way to me. I could have stopped much sooner, but he appeared to be going around Barber's Point. When we did catch up to him, he came up with a white flag. I thought that was funny. I thought, "We will send for the Coast Guard." That was what we always did when we caught a sampan in the defensive area. We sent for the Coast Guard and they were very prompt. They sent a cutter out to take him.

Admiral HEWITT. Will you identify for the record those two messages you sent about the sampan, which are on the Bishop's record?

Captain OUTERBRIDGE. "We have intercepted a sampan into Hahaione. Please have Coast Guard send cutter to relieve us of sampan. And, "We have intercepted sampan and escorting sampan into Hahaione. Please have cutter relieve us of sampan." We sent that. That is a little garbled, but that looks like it.

Admiral HEWITT. What was the time of it?

Captain OUTERBRIDGE. That was 0833 and 0835.

Admiral HEWITT. Well, then, I understand that several days ago you saw a midget submarine which was recovered off Bellow's Field. Is that correct?

Captain OUTERBRIDGE. Yes, sir, that is correct.

Admiral HEWITT. Was the appearance of the conning tower similar to the one that you saw?

Captain OUTERBRIDGE. Yes, sir.

Admiral HEWITT. What was the condition of that submarine off Bellow's Field? Did it have its torpedoes?

Captain OUTERBRIDGE. Yes, sir, it was in good condition and I was inside and there was a torpedoman—I believe he was a chief torpedoman— [94] working on the torpedoes, trying to get them out without exploding them, and I saw the torpedoes inside.

Admiral HEWITT. Well, I think, that is all I had planned to ask you. I am naturally interested in any information you can provide on this Pearl Harbor attack. Is there anything that you might think would be pertinent to this investigation that you can volunteer?

Captain OUTERBRIDGE. Well, I suppose it would be a matter of opinion, which probably wouldn't do you much good, but I was even a little surprised at the attack which followed. I mean I had no idea that the air attack was going to follow. We brought the sampan in and we got another submarine attack. We dropped four depth charges on another submarine in the area. We got depth charges that morning and at 11 o'clock we ran out. When the attack started, we were still at General Quarters. We hadn't secured from the attack. We were still at General Quarters and we saw the planes coming in, but not until after the bombs began to fall, because the bombs were falling on Pearl Harbor, and the Exec and I were standing on the bridge. Lieutenant Commander Dowdy was the Exec and he said, "They are making a lot of noise over there this morning, Captain." I said, "Yes, I guess they are blasting the new road from Pearl to Honolulu." He said, "Look at those planes. They are coming straight down." I looked at them, and he said, "Gosh, they are having an attack over there." I said, "They certainly are," and that was the time the attack actually began.

Admiral HEWITT. That was about 0750?

Captain OUTERBRIDGE. 0750, yes, sir.

Admiral HEWITT. That must have been about the time, judging from this report here, that you were engaged in bringing the sampan in.

Captain OUTERBRIDGE. Yes, sir, we were still standing in with the sampan.

[95] Admiral HEWITT. You mentioned just then several other submarine attacks that you had the same morning.

Captain OUTERBRIDGE. Yes, sir.

Admiral HEWITT. That was after the ones you have already discussed. What were they?

Captain OUTERBRIDGE. They were good metallic contacts, although I was a little surprised at them at first, before things began to pop. I didn't think we would get so many, but we did get a lot of them. We got good metallic contacts and the only thing to do was to bomb them. They gave us a good sharp echo. We bombed them until we ran out of depth charges and went in and got some more.

Admiral HEWITT. That was in the same general area?

Captain OUTERBRIDGE. Right in that defensive area.

Admiral HEWITT. Off the entrance to the swept channel?

Captain OUTERBRIDGE. Yes, sir. There was another thing we saw. That was a lot of explosions along the reefs. I thought that they were explosions of torpedoes fired into the reefs. I didn't see any other submarines the whole morning. We didn't actually see any, but we did see a lot of explosions that looked like shallow water explosions of torpedoes.

Admiral HEWITT. What would make you think they were torpedoes rather than bombs?

Captain OUTERBRIDGE. They were right along the coast, along the reef, and I didn't see any planes overhead. They were inside the coast

in Pearl Harbor, bombing Pearl Harbor, and I didn't think they would all miss that far. I thought they would do better than that. They did do better than that in general.

Admiral HEWITT. Do you recall approximately how many different [96] contacts you bombed?

Captain OUTERBRIDGE. I think we had three or four that morning, sir.

Admiral HEWITT. After the one—

Captain OUTERBRIDGE. In the first ten days we had eighteen contacts, day and night, but we didn't actually see any more submarines. I heard that they were there, but we didn't actually see any more. We don't know what the effect of the attacks were on the submarines. There was one other one, on the 2nd of January. We were with the division, making the attack, and the ship astern of us, after I got the report, told us that she saw a submarine come up under our starboard depth charge. I hadn't, up until then, claimed any hit for it. We had a pretty good contact. It was our turn to make the run. We made the run and kept on going, and that is what the Commanding Officer of the ALLEN said. That was the 2nd of January. But we didn't actually see that from the ship.

Admiral HEWITT. That is of general interest to show the probable submarine activity out there on the first day.

I think that is about all I have, then. Thank you very much.

(The witness was excused.)

[97] A witness entered, read the precept, and was duly sworn.

Admiral HEWITT. State your name and rank.

Captain SAFFORD. Laurance F. Safford, Captain, U. S. Navy.

Admiral HEWITT. Will you state your duties during 1941?

Captain SAFFORD. 1941, I was the Chief of the Communications Security Section, Office of Naval Communications, Navy Department.

Admiral HEWITT. What was the mission of that activity?

Captain SAFFORD. Our mission was twofold: Intelligence, intelligence on foreign nations, particularly Japan—in fact, almost exclusively Japan; and security, to furnish our own codes and ciphers and to supervise the security of our own communications of the U. S. Navy.

Admiral HEWITT. What was the relation between that activity and the Commander, now Captain, McCollum's unit, which, I believe, was known as Op-16-FE?

Captain SAFFORD. We were furnishing intelligence or information to Op-16-F2, who evaluated the information and combined it with other intelligence and were responsible for its dissemination. My section had no authority or responsibility for the dissemination of anything except what we called technical information; that is, the codes and ciphers, Japanese frequencies, and so forth, which would aid us in our work, which would aid the organization in its work, rather.

Admiral HEWITT. It appears from your testimony before Admiral Hart that there were three main radio intelligence units, one in the Navy Department, which was concerned with intelligence relating to naval operations in the Atlantic and to the plans and intentions of foreign governments; the second at Pearl Harbor, with subsidiary intercept stations at Oahu, Midway, Samoa, and Dutch Harbor, which dealt with the dispositions and plans of naval forces [98] the Pacific and surveillance of naval Japanese communications, exclu-

sive of diplomatic communications; and the third at Corregidor, which early in 1941 had been concerned primarily with diplomatic communications, but which, in the fall of 1941, shifted its main attention to Japanese naval communications.

The so-called Japanese "purple" code was a diplomatic code, was it not?

Captain SAFFORD. It was a machine, sir, a very complicated electrical machine.

Admiral HEWITT. But it was used for—

Captain SAFFORD. It was used for diplomatic purposes to the higher embassies, or more important ones, such as Washington, London, and they also held it at Singapore and Batavia, Tsinking, and a few other places which I would hesitate to say from memory; also Berlin and Tokyo.

Admiral HEWITT. The unit at Pearl Harbor was assigned the problem of intercepting Japanese communications using the "purple" code?

Captain SAFFORD. It never was, sir. They hadn't been assigned any diplomatic circuits since about 1932.

Admiral HEWITT. Was the unit at Corregidor ever assigned the problem of intercepting communications in the "purple" code?

Captain SAFFORD. The unit at Corregidor had been intercepting messages in the Japanese "purple" code and other diplomatic systems for several years and continued to do that up to and including December 7, 1941. Their main attention was on the local Asiatic circuits for the information of the Commander-in-Chief, Asiatic Fleet, but very late in November, 1941, they were given the additional duty of covering the Berlin-Tokyo circuit because we couldn't get adequate coverage from all other stations combined. [99] These were forwarded to Washington and weren't touched locally.

Admiral HEWITT. What in general were the arrangements for the exchange of information among the three units, that is, Corregidor, Pearl Harbor, and Washington?

Captain SAFFORD. If Corregidor translated a message which they thought important, they would encipher the translation and forward it to Washington. Everything they intercepted on the Tokyo-Berlin circuit was enciphered; that is, the intercept was enciphered and forwarded to Washington by radio. Corregidor also had liaison with the British unit at Singapore and anything of interest or importance received from Singapore was forwarded to Washington. In like manner, any translations of particular importance to the Commander-in-Chief, Asiatic Fleet, were sent out from Washington. We also had a very free and continuous exchange of technical information between the two units, by which I mean the keys for the "purple" machine and keys for another system which we called Jig-19, and any other information which would help either unit in its performance of duty.

With regard to communications between the Navy Department and our unit at Pearl Harbor, there were comparatively few. Pearl Harbor's main mission was in attack on the Japanese flag officers system. This particular code and cipher had been in effect since about 1 December 1940 and remained in effect for some time after Pearl Harbor. We were also attacking this code with another group in the Navy Department and, I believe, the British were working on

it. We never succeeded in a solution. From about 1926 to December, 1940, most of our knowledge about the Japanese Navy came from this code. We thought it the most important system the Japanese Navy was using and we had our most skilled and most experienced officers and men working on it. After the attack on Pearl Harbor about December 10th, the Hawaiian unit [100] discontinued their attack on this code and put all their attention on to a less system which used numerals and was held by all ships, or practically all ships, of the Japanese Navy. We continued attack on the Jig-19 officer cipher back in the Navy Department until the system went out of use.

Will you repeat the question so I know what I am answering?

Admiral HEWITT. I can ask another amplifying question here. Was there free exchange of intelligence information between the Corregidor unit and the Pearl Harbor unit?

Captain SAFFORD. There was in so far as it pertained to the projects they were assigned. Corregidor and the Navy Department changed by radio information on the "purple" machine and on what we called the Jig-19 system and other diplomatic systems, but Pearl Harbor was not addressed in these messages.

Admiral HEWITT. What about the information gained from breaking the code, information as to enemy movements and locations?

Captain SAFFORD. The information gained from breaking enemy messages, dissemination was a function and responsibility of Naval Intelligence. We were bending over backwards not to try to take over the functions of Naval Intelligence in this respect, and at the same time we were insisting that Naval Intelligence keep out of the communications field of activity and disband the amateur intercept stations which various ambitious District Intelligence Officers had set up without authority from the Navy Department. We insisted that both parties adhere strictly to approved war plans.

Admiral HEWITT. Well, then, am I correct in stating that enemy intelligence, intelligence as to movements or locations of enemy ships which was gained by the Corregidor unit would necessarily be passed by them to the Pearl Harbor unit?

[101] Captain SAFFORD. It would normally be passed to the Commander-in-Chief, Asiatic Fleet, or to the Fleet Intelligence officer, and they would make further dissemination.

Admiral HEWITT. Before Admiral Hart, you testified that on November 26th estimates were received from Pearl Harbor and from ComSIXTEEN relating to the organization and disposition of the Japanese fleet. Can you identify this exhibit number 8 as—

Captain SAFFORD. These are the messages referred to.

Admiral HEWITT. Is it correct, as Captain Layton testified, that the principal difference between the estimate was that ComSIXTEEN's unit couldn't confirm the supposition by ComFOURTEEN's unit that Japanese carriers and submarines in force were in the Mandates?

Captain SAFFORD. To my mind, the chief difference between the two reports was that ComSIXTEEN gave a great deal of supplementary information which was not available to ComFOURTEEN. The only respect in which ComSIXTEEN disagreed with ComFOURTEEN was in his statement, "Cannot confirm supposition that carriers and submarines in force are in Mandates. Our best indications are that

all known First and Second Fleet carriers still in Sasebo-Kure area."

Admiral HEWITT. Is it correct that both units believed that the major portion of Japanese carriers was in home waters?

Captain SAFFORD. It is correct for that particular date.

Admiral HEWITT. Is it also correct that, as you previously testified, ONI sent a dispatch on November 24th to CinCAF, indicating that the SIXTEENTH District intercepts were considered most reliable, and requesting that future reports be submitted from ComSIXTEEN to OpNav with copies to CinCPac for information?

Captain SAFFORD. That is correct.

[102] Admiral HEWITT. Is it also correct that ONI did not advise the FOURTEENTH Naval District that they, ONI, considered ComSIXTEEN's report to be more accurate because of the geographical location of the ComSIXTEEN unit?

Captain SAFFORD. That was not stated in the dispatch.

Admiral HEWITT. It has been testified previously that on or about December 1, 1941, radio contact with the Japanese forces was either lost or greatly diminished. Did you know about this at the time and, if so, when did you learn it?

Captain SAFFORD. I do not believe that statement is correct. We received an immediate report from one of the two stations that the Japanese had changed their call sign system for forces afloat at midnight on December 1, 1941, and until they made a reasonable number of identifications, any information on the "Orange" fleet through radio alone would be rather limited. The Daily Communication Intelligence Summary which was submitted to the Commander-in-Chief, Pacific Fleet, by our unit in Pearl Harbor contained detailed information as to not hearing messages from various ships and particularly the Commanders-in-Chief, Second and Third Fleet, but that an unusual number of messages were being broadcast or otherwise addressed to these forces, and that they believed that these fleets had already commenced or were about to commence their southward movement. This information was not forwarded to the Navy Department at that time, so far as I know, and we did not get the details until copies of these summaries were received by air mail some time after the attack on Pearl Harbor.

Admiral HEWITT. Will you introduce such information as you have on those communication summaries that you mentioned?

Captain SAFFORD. Yes, sir. This exhibit, we have copies of Communication Intelligence Summary at Pearl Harbor for the period 1 November 1941 [103] to 6 December 1941, inclusive. The Navy Department copy could not be located in 1944. When Commander Rochefort reported for duty in 20-G shortly before the Navy Department Court of Inquiry under Admiral Murfin, he made a thorough search personally throughout the records of 20-G and could find no trace or record of this paper; so he sent a dispatch out to Pearl Harbor and had them prepare copies out there, which they forwarded to him for use with that investigation. I signed for one of those copies and prepared additional copies for the use of this investigation. It is obvious that there are two or three clerical errors or typographical errors in copying because some of the sentences seem to be incomplete or else somebody used a very queer style of English. I

think they tell the story, with one or two exceptions where we to guess.

Admiral HEWITT. We will receive that copy and mark it as an exhibit, subject to correction when the originals are obtained.

(The document referred to was received and marked, "Exhibit 1")

Admiral HEWITT. We have here Exhibit 63 of the Naval Communication record, which concerns a series of decoded Japanese diplomatic consular dispatches. Will you look at those and tell me, if you know how they were obtained, decoded, evaluated, and distributed?

Captain SAFFORD. They were initially obtained from intercepted Japanese diplomatic messages between Tokyo and foreign points, mostly radio intercepts and occasionally land wire or cable. Some were photographs of station copies as they passed through the various commercial communication facilities, but roughly ninety-five per cent were obtained by radio intercept of the U. S. Army and U. S. Navy at various points. They were all decoded by means of reconstructed Japanese systems. The principal was the "purple," [1918] which is a complicated electrical machine solved by the Army and Navy machines made both by the Army and the Navy and two machines in fact, sent to London for the use of the British. The Jig-19 at that period was solved by cryptographic analysis. That had to be done over again each day, and it really took more time and effort to keep abreast of the Jig-19 than it did the "purple" once we had the machine reconstructed. In all these systems, "purple," Jig-19, and minor systems, we had an exchange between Washington, Singapore, Corregidor, and London. We pooled our efforts on that.

Admiral HEWITT. How were these messages evaluated as to their importance and what distribution was made?

Captain SAFFORD. They were translated in the translation section of the Navy Department unit and the War Department unit and a senior translator decided which were of relative unimportance, not worth writing up smooth, mostly connected with financial matters and visas and things like that; and the others were all typed smooth and turned over to Military Intelligence and Naval Intelligence, respectively. Originally the two intelligence organizations had prepared briefs or memorandums giving a summation or a paraphrase of the messages and they were distributed to the higher officials in the War and Navy Departments and to the Secretary of State and to the President. [1918]

In the Navy Department the people that saw them were, specifically, the Chief of Naval Operations and his aide usually saw them; the Assistant Chief of Naval Operations, the Director of Naval Intelligence, the Director of Naval Communications, and the Director of the War Plans Division. The Secretary of the Navy also saw them and usually his aide saw them. The Naval Aide to the President saw them and took them in to the President.

In the War Department they went to the Military Intelligence, Chief Signal Officer, Director of the War Plans Division, and the Chief of Staff, War Department, and also to the Secretary of War.

Later on, in November, when things became critical, at the request of the President and after conference agreement between Military Intelligence and Naval Intelligence, the system of summaries and briefs was dropped and the original messages were prepared in folders and each day the folder was taken through. By agreement, all dissemination to the White House was handled through the Navy Department, and in return all dissemination to the State Department was handled through the Army, but the two things were duplicates. Anything the Navy was sending around, the copy was sent to the Army, and anything the Army was sending around, a copy was sent to the Navy; and they put on a serial number. Ours were JD-1 and the Army's were SI-X, with a serial; so they were substantially duplicates unless something went wrong.

In addition, it was the habit to put notations on the bottom as to references, and Kramer, when he took his stuff around, everything that was referenced to anything bearing on this subject was put on the off side of the page, so that you had the message on one side and the references on the other side, the left hand side, of the folder. Then, anybody seeing them had a complete picture. And Kramer went with them and stood in the [106] doorway or outside and if there was any doubt, he could be called in to explain further to anybody who was interested in the subject. Kramer also went to the White House, I believe twice. Normally he would explain things to the Naval Aide to the President and the aide would depend on his memory to answer any questions the President might want to ask. The President insisted on seeing the original messages because he was afraid when they tried to condense them, some one would change the meaning.

Admiral HEWITT. If the information contained in these messages was disseminated to naval agencies outside the Navy Department, that was the responsibility of the Director of Naval Intelligence or the Chief of Naval Operations himself, is that true?

Captain SAFFORD. Yes, sir. Well, Kramer was serving under me and had space in my section. He was officially attached to the rolls of the Far Eastern Section of Naval Intelligence and our foreign translators were paid from ONI funds. I think Naval Communications furnished one officer and two or three yeomen because Intelligence couldn't furnish enough people to help them out. We did that as a favor in cooperation. Kramer had to do a job. But when any information was passed over to Kramer or Op-20-GZ, Naval Communications' responsibility was finished. From that time on it was the clear responsibility of Naval Intelligence and we were very careful not to cross the line.

One thing I would like to add. There was only one copy of it sent around. It made the rounds and everybody took a look at it. The one exception was on the night of December 6th, when the mes-

sage was so important and time so short that Kramer made individual copies for each person who was to see it.

Admiral HEWITT. Here are some additional messages, which have been introduced as Exhibit 13, also relating to Japanese movements and the [107] "winds" code.

Captain SAFFORD. These are the same as the others, except they are mostly, I notice, in the minor systems.

Admiral HEWITT. Will you examine the messages which are marked relating to ship movements, and give me your comment as to how they were translated, how they would have been translated, and appear to be a reason for the delays in effecting translation?

Captain SAFFORD. The JD serial 7029 was an Army translation. I believe the long delay is due to the fact that the Army forwarded it from Honolulu by air mail, but only the Army can give the positive answer to that. Number 7029, dated November 20, 1941, was translated on December 4, 1941, by the Army.

The next is JD serial 7179, dated 6 December 1941, translated December 8, 1941, by the Army. That message was in one of the minor systems, which is known as PA-K2. The notation shows it intercepted at Station 2, San Francisco, and forwarded by teletype. The War Department unit at that time was observing normal office hours and secured from work at noon on Saturday, December 6, 1941, with the intention of doing no work until 8 o'clock on Monday, December 9, 1941. The Army unit received an urgent call from the Navy about 3 p. m., Saturday afternoon, December 6, 1941, and there were certain officers over there, working overtime to get back work caught up. They telephoned and got some of the Army people back and they assisted the Navy throughout the night of December 6th in translating the very long and very important fourteen-part message which has been referred to in earlier investigations. I believe that this message, JD 7179, simply laid in the basket until they got all these urgent messages over and then it was decrypted and translated as a matter of routine. We had a rigid system of [108] priorities, first by systems and second by the priorities the Japanese assigned to their own messages, and a message like this in the normal course of events would only be looked at after the most urgent messages had been caught up to date.

The JD serial 8007, dated December 2, 1941, and translated by the Army on December 30, 1941, was intercepted at Station 5, which is at Honolulu. This is an Army translation and I believe the Army was investigating this themselves to see if they can determine what was the trouble. Superficially, it was intercepted at Station 5, which is at Fort Shafter, and I think it was forwarded by air mail and just delayed in the excitement. The Army gave instructions to encipher and forward by radio Japanese diplomatic messages intercepted at Fort Shafter, beginning December 3rd or December 4th, as I remember. This order was faithfully complied with, but the messages of an earlier date went by air mail as in the past. That is how I account for this delay, though it is only my supposition. May I add, that there was a notation on the message which said, "This message was received here on December 23."

Referring to Exhibit 63, JD serial 7086, message was sent from Tokyo to Honolulu on 29 November 1941 and translated by the Navy.

Department on December 5, 1941. This message was intercepted at Station 2, San Francisco, and forwarded by air mail or ordinary mail, because it doesn't have the "TT" which means teletype. Station 2 is an Army unit at the Presidio. Seven days is about the average time of solution or translation of Jig-19 messages. They normally weren't forwarded by teletype and also got second priority in translation. This delay is average and not unusual.

The next is JD serial 7063, dated November 18, 1941, translated December 5th by the Army. Again, I can't account or give the exact reason for the delay. It was intercepted at the Navy station at Bainbridge Island, [109] Station S, was not forwarded by teletype. Part of the delay was caused in transmission; part possibly by delay in solving the message or solving the Jig-19 key. This was one of the longest delays we had in the Jig-19 system, but it was by no means unique.

The next is JD 7111, dated November 19, 1941, translated December 6, 1941, by the Army. This message was intercepted by the Army station at San Francisco and was not forwarded by teletype. It is my estimate that the long delay in this message was waiting for enough messages or a long enough message in this particular system to be received so that we could solve the cipher. Sometimes we would get Jig-19 key in a day and sometimes we would have to wait a week or ten days until we were able to break it.

We have one more, JD 7381, dated December 6, 1941, and translated December 12, 1941. This was also an Army translation; so I can only guess at the reason for the delay. It was intercepted at Station 5, Army station, Fort Shafter. It is in the PA-K2 system, which probably had the last or next to the lowest priority in decipherment and translation. The system had been in effect for several years and there was no difficulty at all in reading messages in it. But with one or two exceptions, the message was so unimportant they were never typed smooth for distribution.

Incidentally, if I may look through, there was one other message about the same time which I would like to look for, because there were two messages—the only two messages to or from Honolulu at that time went on the air twelve hours and eighteen hours respectively before the attack on Pearl Harbor and there simply wasn't time enough to get those messages into the War and Navy Departments and have them translated and get any information out. So, though they may have been several days late, we couldn't have possibly made the grade on it. This (indicating) may be one [110] of the messages I am thinking about. I am not certain of it. I looked that up way way back. It is possible that the other message I referred to hasn't been submitted in evidence.

An additional fact was this: As I said before, the Army were covering the even days and the Navy the odd dates; that is, the filing date. And if the Army had been standing continuous watches, the way the Navy had been since the 1st of February 1941, they might have picked up these messages in time to have done something with them, but when they came back on the Navy's call, they only handled the messages the Navy was looking at and the other messages didn't get looked at until Monday at best. However, I do not believe we

could have handled these messages in the minor systems within a few hours of the time they were on the air.

Admiral HEWITT. Were any of the codes used by the Japanese reports on United States ships being read at Pearl Harbor?

Captain SAFFORD. They weren't, sir, and if they were, it was known to us.

Admiral HEWITT. Do you know whether or not Pearl Harbor had any of these Japanese reports?

Captain SAFFORD. I did not know at the time and I only have a second-hand now and would prefer not to attempt to answer that question. If I might add for my own answer, we had at Pearl Harbor a copy of the old keys in what we called our radio intelligence publication on Japanese diplomatic systems. We had two or three spares there and we sent them all out the printed changes, but we didn't keep them up to the minute and they did not get the daily changes by radio which went out to ComSIXTEEN and they went out to London, and therefore, if they got into those and were to read anything, it was only one some of the minor systems, such as the [111] LA system which had been in effect since 1925, the PA-K2.

Admiral HEWITT. Do you know whether or not any of these patches which indicated interest in locations of ships in Pearl Harbor and which were translated before December 7th were ever sent to CinCPac?

Captain SAFFORD. To the best of my knowledge, none of them were. That would have been Naval Intelligence's province and they would know better than I would, but I have no personal knowledge of ever sending them, and I did look through the outgoing messages files once and do not recall seeing anything like that.

Admiral HEWITT. Concerning the so-called "winds" message which appears from your previous testimony that in all the Navy received four reports of the establishment of that code and that two reports said that the use of the code would signify a break in diplomatic relations and the other two said that it would signify war; that efforts were immediately made to monitor for a message using that code; that the FCC intercepted some messages, set forth in Exhibit 65, which did use the words relating to the United States; that you said that at 10:00 on December 4th, Lieutenant Murray or Lieutenant Commander Kramer came in with a pencilled message which used the words relating to the United States; that you said that you had not seen a copy of this message since December 15, 1941; that at that time you checked the various papers which were being assembled by Kramer, which included the "winds" message relating to the United States, and you turned the messages over to the Director of Naval Communications for use as evidence before the Robert's Commission; that you are certain that the "winds" message had been distributed both in the Navy and to the Army; that no copy could be found in the Navy's files and that the Army had been unable to furnish a copy; that on the afternoon of December 4th, Commander McCollum prepared a patch [112] summarizing the situation to date with direct reference to that "winds" message, and which said that it was considered to be the signal to execute Japanese war plans; that you said that you were present when Admiral Wilkinson and Admiral Nimitz

discussed the advisability of sending McCollum's dispatch; that Admiral Wilkinson wanted to send it but Admiral Noyes did not want to send it; that you understood that Admiral Wilkinson was going to try to get the dispatch cleared; and that you believed, until you read the Robert's Report, that the dispatch had been sent. You further indicated that you had conducted some investigation into this matter; that Lieutenant Commander Brotherhood told you that he knew the disposition of the copies of the message but did not care to tell you; and that you, through very second-hand and devious sources, learned what happened to the Army copies.

What investigation into this matter did you conduct?

Captain SAFFORD. The statements there are substantially correct. In the fall of 1943 it appeared that there was going to be a trial or court martial of Admiral Kimmel. It was hinted in the newspapers and various people in the Navy Department were getting testimony ready for it. I realized I would be one of the important witnesses, that my memory was very vague, and I began looking around to get everything that I could to prepare a written statement which I could follow as testimony. That was the time when I studied the Robert's Report carefully for the first time and noted no reference to the "winds" message or to the message which McCollum had written and which I had seen and I thought had been sent. And then I began talking to everybody who had been around at the time and who I knew had been mixed up in it to see what they could remember to straighten me out on the thing and give me leads to follow down to where I could put my hands on official messages and things so that it would be a matter of fact [113] and not a matter of memory. I also talked the thing over with whatever Army people were still around at the time and had anything in this thing, and bit by bit these facts appeared to come together. The investigation was conducted, if you call it that, for the purpose of preparing myself to take the stand as a witness in a prospective court martial of Admiral Kimmel.

Admiral HEWITT. When and where did you have the conversation with Lieutenant Commander Brotherhood as to the disposition of copies of that message?

Captain SAFFORD. That was not a conversation. I wrote him a letter about the thing because that was looked for throughout a period of six months repeatedly. Various people looked for it in the Army and finally couldn't find it, and I asked him if he knew anything about it. He said yes, but he didn't care to tell me about it then; but when he came back to the States, I asked him about it and found out he hadn't understood. We were working at cross purposes. I found out he was referring to the false "winds" message which we had thrown in the wastebasket. This is document number 2 of Exhibit 65, which was telephoned from the FCC to Lieutenant Brotherhood, who was on watch. Kramer identified that as being not what we were looking for and threw it in the wastebasket.

Admiral HEWITT. Is that the message, then, which Lieutenant Commander Brotherhood referred to when he said that he did not care to tell you what the disposition of it was?

Captain SAFFORD. That was the one.

Admiral HEWITT. It was the result of a misunderstanding?

Captain SAFFORD. That was the result of a misunderstanding. We were talking about different things. He didn't want to get particularly [114] unofficially, he didn't want to get Kramer any trouble on the thing. He didn't mind telling me first-hand what he got back here.

Admiral HEWITT. Then you have no information that the Army ever got copies of the "winds" message relating to the United States to which you testified?

Captain SAFFORD. I have no information which would be acceptable as evidence before this Court. I heard the story and I believe it true, but it is very third-hand.

Admiral HEWITT. The information that you have, even though second- or third-hand, may be of assistance in furnishing a lead. You tell us your information?

Captain SAFFORD. The information that I got was that when copies of the "winds" message had been destroyed in the War Department by then Colonel Bissell on the direct orders of General Mars.

Admiral HEWITT. You don't recall the direct source of that information?

Captain SAFFORD. I would prefer not to give the direct source, but I think it may be confirmed in the testimony of Colonel Sadler before the Army investigation.

The investigation then, at 12:27 p. m., recessed for lunch until 1 p. m., at which time it reconvened.

Present: The same parties as during the morning session.

Captain Laurance F. Safford, USN, resumed his seat as witness.

Admiral HEWITT. Before proceeding any further, I would like to make sure that the message now under discussion was actually a message relating to the breaking of diplomatic relations or war with the United States [115] rather than the false message which indicated war with Russia.

Captain SAFFORD. I am certain that Colonel Sadler did not make them confused.

Admiral HEWITT. In order to clear this matter up and to permit further investigation of the allusions to high officers in the Army, I feel that you should give me the complete story of the source of this information.

Captain SAFFORD. That story came through Mr. W. F. Friedman, Principal Cryptanalyst in the War Department, the man who was responsible for the solution and reconstruction of the "purple" machine, although at the time of Pearl Harbor he was working on German systems rather than Japanese and was not directly concerned with anything that took place at that time, but he did have a faint interest in the Japanese section.

Admiral HEWITT. Can you give me his name?

Captain SAFFORD. William F. Friedman, Principal Cryptanalyst, War Department. I have only answered half that question, incidentally. The other is more direct.

Admiral HEWITT. Yes. Will you go ahead?

Captain SAFFORD. There is another angle, which is very much different than this destruction. When Colonel Bratton first learned of the "winds" execute message, he was not entirely satisfied in his mind and telephoned to Admiral Noyes, requesting to be furnished

original intercept so that he could verify the translation. This was customary in highly important messages because the Japanese language was very tricky and sometimes the translations varied, in which case both translations were sent to higher authority and they could have their choice. Admiral Noyes refused to comply with this request, told Colonel Bratton that the Navy translation was correct and the Army would not be given a copy of the original message. For this reason, [116] Bratton did not take very much stock in the "winds" execute message; at least, he did not take it as seriously as Colonel Sadler and the officers in SI-X.

Admiral HEWITT. You are speaking again of this execute "winds"—

Captain SAFFORD. I am talking of the "winds" execute.

Admiral HEWITT. For the United States?

Captain SAFFORD. For the United States. And that story should appear in Colonel Bratton's testimony before the Army investigation. I might add, furthermore, Captain Schukraft knew that the "winds" execute had been received and that it meant the United States, although he may never have seen the original message or known the exact wording.

Admiral HEWITT. Who was that?

Captain SAFFORD. Captain Robert F. Schukraft. He is now a Colonel, U. S. Army.

Admiral HEWITT. What were the names of the four watch officers in your section through one of whom this or any similar message must have passed?

Captain SAFFORD. They were Lieutenant—do you want their then ranks or present ranks?

Admiral HEWITT. It is immaterial as long as we can identify them.

Captain SAFFORD. Lieutenant Commander George W. Lynn, U. S. Navy; Lieutenant Commander Francis M. Brotherhood; Lieutenant Commander A. V. Pering; and Lieutenant Commander Allan A. Murray, U. S. Naval Reserve. The first three are in Washington. Murray is with the Allied Military Government somewhere in the Pacific.

(The witness desired to augment his testimony relating to the question beginning on page 111 and continuing on page 112.)

[117] Captain SAFFORD. To supplement the very long summary in the previous question, Lieutenant Commander Kramer of Murray or both came in with a teletype message on which was noted in pencil the translation and meaning of the Japanese words which constituted the war warning. Kramer has informed me within the past month that a copy of the "winds" message and other papers relative to the break in diplomatic relations with Japan were not turned over to the Robert's Commission but were given to Assistant Secretary of the Navy Forrestal about 9 December 1941 while he was Acting Secretary in the absence of Mr. Knox, who had flown to Hawaii. So far as Kramer knows, this folder was never turned over to the Robert's Commission. I had stated it was my impression—not that it was a fact, but it was my impression. Kramer said that he went over this folder with Mr. Forrestal and spent about two hours explaining the significance of the various messages. Kramer did not recall the "winds" execute specifically.

Admiral HEWITT. What did Kramer tell you about his recollection of the "winds" message?

Captain SAFFORD. Kramer's recollection of the "winds" message now is that it came in, that he and the watch officer, whom he is certain of, came up to my office and showed it to me, and then the watch officer took it upstairs to deliver it to Admiral Noyes in accordance with instructions that the Admiral had given Kramer. There were posted in writing at the watch officer's desk at that time, though I had forgotten that point. Kramer says that we walked down the corridor together to his office, discussing the message. It was the custom to talk over ultra secret matters with Kramer, walking up and down the corridor. We were so horribly overcrowded. His office had about five people in it and his had an equal number. He had to go out in the corridor to get any privacy. I recall that the message was [118] fouled up somehow and did not contain the exact form which we expected and Kramer remarked, "You always count on those monkeys to do something that you don't expect." That is a little off from what he told me. That is my recollection getting mixed up in that. And Kramer now is not certain whether the United States was specifically mentioned or not, but it is certain there was a "winds" execute message which we were expecting and that it came in the middle of the week before Pearl Harbor. I wouldn't say exactly what date. In fact, I had to check up some outgoing messages to make sure whether it was Thursday or Friday and Kramer couldn't remember whether it was Wednesday or Thursday.

Kramer informed me that no written copy was furnished the Admiralty and no written copy was distributed in the Navy Department in the customary manner because Admiral Noyes had given specific orders not to do so and that he would handle dissemination of this message himself.

I would like to add, McCollum's message of warning was very long. The part referring to the "winds" message was very short but was the last item in the message.

That covers all the discrepancies on that I had any reason to correct.

Admiral HEWITT. You testified before Admiral Hart that:

The Director of Naval Intelligence requested that special effort be made to monitor Radio Tokyo to catch the "winds" message when it should be sent. This was done. From November 28 until the attack on Pearl Harbor, the broadcast schedules were monitored by about 12 intercept stations, as follows: N. E. I. at Java; British at Singapore; U. S. Army at Hawaii and San Francisco; U. S. Navy at Corregidor, Hawaii, Bremerton, and four or five stations along the Atlantic seaboard. All Navy intercept stations in the [119] continental United States were directed to forward all Tokyo plain language broadcasts by teletype, and Bainbridge Island ran up bills of sixty dollars per day for this material alone. The "winds" message was actually broadcast during the evening of December 3, 1941 (Washington time), which was December 4 by Greenwich and Tokyo time. The combination of frequency, time of day, and radio propagation was such that the "winds" message was heard only on the East Coast of the United States, and even then by only one or two of the Navy stations which were listening for it.

Now the question is: What was the frequency and time of day and the condition of radio propagation which resulted in the message being received only by one or two of the Navy stations on the East Coast of the United States?

Captain Safford. That is a question I cannot refer to, having no station log available. It now appears more likely that it was received early in the morning of December 4th, Washington time, rather than late the night before, because the watch officers who were on at that time only recollect the false "winds" message and not the true "winds" message. There is a possibility that it was heard by the Dutch at Java, although such information as I had available indicated the Dutch did not get it, and it also could have been heard by the Australians and may have been the basis of the story that was told to Senator Ferguson by the Australian Minister to this country, who was, I believe, Minister of National Defense in Australia at the time of the attack on Pearl Harbor.

I can illustrate some of the vagaries of high frequency radio by two or three actual examples of about that time, if I may refresh my memory here.

Before giving these examples, I would like to state that radio communications over long distances in a north-south direction is much easier and more reliable than in an east-west direction, and our reception of the [120] Tokyo radio was always in an east-west direction.

The long fourteen-part Tokyo serial number 902 or JD serial 7143 was intercepted solid at Bainbridge Island, Washington. This message, incidentally, was received by Radio San Francisco. Part 2 of this message and the message immediately before, which was Tokyo serial number 904 or JD serial 7144, were also copied at Cheltenham, Maryland, were forwarded to the Navy Department by telegraph, and were used for the actual description of those messages. This is verified in the GY log for 6 December 1941. The other thirteen parts of Tokyo serial number 902 were uncopiable at Cheltenham, that is, they were either not heard or were failing so hard they couldn't make an intelligible message. Part 2 of the very important part 3 Tokyo to Berlin, number 985, JD serial 6943, that was dated around the 1st of December, were missed, but the first and third parts were copied solid. Incidentally, this came from England and not from this country.

As I have stated earlier in my testimony, we had to call on Corregidor to cover the Tokyo-Berlin circuits as the combined efforts of intercept stations on the East Coast, West Coast, Hawaii, and England could not provide better than about fifty per cent coverage.

I would like to add that all hands had been very nervous about our ability to receive this "winds" execute when it should come in, because we were not certain of the power or the frequency, of the time or anything, and every day I would come in and I would ask Welker, in charge of GX, or the watch officer, if we had it and we would call the Army or they would call us to see if we had it, and I think on one occasion Kramer came down and said that Admiral Wilkinson wanted to know if there was any chance of our missing it and I told him then I didn't see how we could because there were so many stations, so widely scattered, listening for it. When the message first came [121] in to me, my heart sank like an elevator to think that the Japs really had the nerve to attack the United States, because as soon as I saw it, to me it was war and nothing else. And then later, particularly when I talked with Welker, we had a great sense of relief because the

thing had come in and we hadn't missed it. We had done our part properly. We had gotten the warning to higher authority and we were very thankful that we had put these East Coast stations on it, though it seemed like a wild goose chase. It was like the center fielder backing up the second baseman. It was a wild chance, but it paid us dividends. That was our feeling on the thing.

Admiral HEWITT. Have you any record at all of what East Coast stations the message could have come in from or did come in?

Captain SAFFORD. We were intercepting foreign transmissions from Winter Harbor, Maine, which was a main intercept station and always attempting to copy Tokyo; Cheltenham, Maryland, which was also a main intercept station and guarding it regularly at that time; Jupiter, Florida, which is primarily a direction finder station but had an intercept unit attached; and Amagansett, Long Island, also a direction finder, but with an intercept unit attached.

Admiral HEWITT. You have no knowledge, then, of what station this message came in from?

Captain SAFFORD. I have no knowledge which station it came from, though I would give first guess to Cheltenham and second guess to Winter Harbor, because they had much better facilities than the others.

Admiral HEWITT. Do you know whether the logs of these stations have been searched for any record of this message?

Captain SAFFORD. We searched for the logs of those stations and the Navy Department they had been destroyed during one of their numerous moves [122] and no record kept of them. They simply couldn't be found.

Admiral HEWITT. When was that search made?

Captain SAFFORD. This search was made in November or December 1943, and again in the spring of 1944—I wouldn't place that any closer—after we got notice that Admiral Hart would conduct his investigation. The logs of Winter Harbor, Maine, were destroyed in the spring of 1943 simply to make room; they destroyed everything for about six months back. Cheltenham's logs were destroyed when the intercept unit left Cheltenham and moved up to Chatham, Massachusetts, which was some time earlier than that. I cannot say offhand what happened to the logs of the other two stations, but they could produce nothing.

Admiral HEWITT. We have here in exhibit 65 four documents which are copies of weather messages which were intercepted by the FBI. They indicate war with Russia rather than war with the United States. What is your explanation of that?

Captain SAFFORD. I never saw these documents until the day or day before I went on the stand before the Navy Court of Inquiry under Admiral Murfin. The document number 1 was the information which Major Guest gave the FCC in requesting their cooperation. I did not know about this request or else had forgotten it completely. Welker might know something about it. Document number 2 was obviously a part of a true weather forecast and bears no relation to the "winds" execute we were expecting. However, it was telephoned in to Brotherhood and this is what he was referring to by the "win" message. Not having a copy of the message before our eyes, we were working at cross purposes there.

Admiral HEWITT. In other words, one of you was referring to one message and the other to the other message, the one about Russia?

[123] Captain SAFFORD. Yes, sir, to this one here.

Admiral HEWITT. Yes.

Captain SAFFORD. Brotherhood said he called Admiral Noyes and Admiral Noyes said, "That is a funny direction for the wind to blow from, isn't it?" and Brotherhood said, "Yes," and the Admiral said, "I don't think there is anything in it. Don't take any further action until tomorrow morning," and then Kramer took one look at it and said, "That is not what we want," and threw it in the wastebasket.

For the sake of the record, this was received—it was intercepted at approximately 2200 GMT, December 4, 1941, and was telephoned to Brotherhood at 9:05 p. m., Eastern Standard Time, from the Washington office of the Federal Communications Commission. This message came in twelve hours or more after what I referred to as the true "winds" execute had been intercepted and received.

Now, document number 3 was intercepted by the FCC and telephoned to Colonel Bratton at his residence at 7:50 p. m., Eastern Standard Time, December 5, 1941. That also is apparently a part of a true weather forecast because it mentioned south and south did not come in as part of the "winds" code. We only had the three directions: north, east, and west. If it had been a "winds" code message, it would have referred to Russia because it does specifically mention north.

Admiral HEWITT. But does it follow the form which was specified for the "winds" code message in the dispatch which established that code as to the location of the reference in the broadcast, and so forth?

Captain SAFFORD. In document number 3 the reference to north wind does not follow the form or location specified in their set up, but, for that matter, neither did the true "winds" message. The Japanese followed that [124] one up, though I can't remember just how it was. I know in discussing it afterwards, Welker and I congratulated ourselves that we had required all plain language to be forwarded to Washington to be looked over here instead of telling the stations what to look for and relying on them to segregate true from false.

Admiral HEWITT. What is your recollection of the wording of the true message?

Captain SAFFORD. May I get into number 4 before I get into that?

Admiral HEWITT. Oh, yes.

Captain SAFFORD. Document number 4 is a true "winds" execute message, the way we expected to see it, but mentions England only. It was sent about twelve hours after the attack on Pearl Harbor.

Admiral HEWITT. Now, what is your recollection of the wording of the so-called true "winds" message?

Captain SAFFORD. My recollection was that they sent the voice form by Morse code and made some other departure from what was expected. Murray says that in addition they sent the negative form of "north wind cloudy."

Admiral HEWITT. That isn't quite clear to me. What do you mean there? You say they sent the negative form of the north wind. If that was south wind—

Captain SAFFORD. No, it wasn't south. The three winds were specifically named; that is, *Kita*, north, or Russia; *Nishi*, west, or England;

that included the Netherlands East Indies; and *Higashi*, east, or the United States. They had the other expressions in Japanese which accompanied these words in the voice form of the message.

The "winds" execute message as translated gave east wind, war with the United States; west wind, war with England, including N. E. and the [125] negative form of north wind, meaning no war with Russia, or which could have been interpreted as no war with Russia.

Admiral HEWITT. Exhibit 65 of the Naval Court record indicates that a "winds" code execute message relating to England was received and transmitted to Lieutenant Commander C. C. Dusenberry, U. S. Army Service Corps, at approximately 8 p. m., Eastern Standard Time, December 7, 1941. If a "winds" code execute message relating to the United States and England had been sent on December 4th, as previously testified, why was a "winds" code message relating to England alone sent on December 7th?

Captain SAFFORD. This message was broadcast about twelve hours after the attack on Pearl Harbor, which had been announced on the radios of the world. It may have been to remind the Japanese consulates, and so forth, that Japan was still going to attack England, British possessions and it may have been to amplify the hidden word message received in Washington a little before 11 o'clock, Eastern Standard Time, December 7, 1941, which was translated differently by the Army and Navy but seemed to stop short of war. I am referring to Tokyo circular number 2494 or JD serial 7148.

Admiral HEWITT. Will you describe to me what is meant by hidden word code?

Captain SAFFORD. The hidden word code was set up by Tokyo circular number 2409, dated 27 November 1941, JD serial 6985, and subsequently added to by three or four other messages. It provided a means of sending out secret information in ostensibly plain language, certain words being given as a secondary or hidden meaning constituting the true message. This system was designated or indicated by adding the word "stop" in English as the last word of the message, whereas the rest of the message was in Japanese. The hidden word message of December 7th referred to had thirteen [126] words of text, exclusive of the indicator "stop" and the signal "Togo." Three of these words constituted the true message, namely *Koyanagi*, *Hattori*, *Minami*. This message was translated in such a hurry Sunday morning, December 7, 1941, that the third word, *Minami*, was overlooked and the message delivered to the Chief of Naval Operations and the President merely said, "Relations between Japan and England aren't in accordance with expectations." The Army translation was considerably stronger and added "America." We did not get this information until 1944. I do not know when the Army discovered that *Minami* had been omitted.

Admiral HEWITT. And the significance of *Minami* was United States?

Captain SAFFORD. United States. In fact, we didn't know it until the Army pointed it out to us. I would like to add one thing more. While the Japanese set up a very elaborate system for reporting military movements, declarations of war, smuggling of critical materi-

and so forth, this one message is the only time that I recall that they ever used the hidden word code.

Admiral HEWITT. It was not used, then, so far as you know——

Captain SAFFORD. So far as I can recall offhand, it was never used again. If it were, it was nothing important and it was just lost in the maze.

Admiral HEWITT. Well, thank you very much, Captain.

Captain SAFFORD. May I add one more thing to this hidden word?

Admiral HEWITT. Yes. Add anything that you think would be pertinent and of value.

Captain SAFFORD. I would like to add this: The hidden word set up was translated by the Navy on December 2, 1941, and from that time on we could not be certain whether the Japanese decision as to peace or war would come in the hidden word code or in the "winds" message, and apparently [127] they used them both. As a matter of fact, they did use them both.

Admiral HEWITT. That is all. Thank you very much, Captain.

(The witness was excused.)

(The investigation was then, at 2:30 p. m., adjourned until 12:30 p. m. the next day.)

[128] PROCEEDINGS OF THE HEWITT INQUIRY

SEVENTH DAY

Pursuant to notice, the investigation met at the offices of the General Board, Navy Department, at 12:30 p. m., Tuesday, 22 May 1945.

Present: Admiral H. Kent Hewitt, USN; Mr. John F. Sonnett; Lieutenant Commander Benjamin H. Griswold, USNR; and Ship's Clerk Ben Harold, USNR.

A witness entered, read the precept, and was duly sworn.

Admiral HEWITT. State your name and rank.

Captain KRAMER. Alwin D. Kramer, Captain, U. S. Navy.

Admiral HEWITT. What was your duty or assignment in 1941?

Captain KRAMER. I was attached to Op-16, Far Eastern Section, but working in Op-20-G.

Admiral HEWITT. Under Captain Safford?

Captain KRAMER. Yes, sir.

Admiral HEWITT. And you were the head of the Translation Section?

Captain KRAMER. Yes, sir, Op-20-GZ.

Admiral HEWITT. And on some occasion you evaluated messages as well as translated them, evaluated them as to their possible importance?

Captain KRAMER. For information I expressed my opinion on them, yes, sir, which can be construed as an evaluation. The evaluation was normally done by Commander McCollum, the head of the Far Eastern Section, or Admiral Wilkinson, but I gave them the benefit of my opinion about it, too.

Admiral HEWITT. You were in this section that was headed by Captain Safford, but you were also responsible, I believe, to Captain McCollum of ONI?

[129] Captain KRAMER. I was primarily responsible to Captain McCollum of ONI, yes, sir. That arrangement may seem a little unusual, but it was one that had been in effect since the early 20's for several reasons. One was since all the language talent available in the Navy at that time were language officers who had been to Tokyo in that three year language course and as a result were well known to the Japanese and were normally in social contact with the Japanese in town here, naval attaches and assistants and the embassy people, it was felt preferable to have them attached to the office of Naval Intelligence than to a section of Naval Communications. That was one reason. There were a number of others.

Admiral HEWITT. Yes. Well, that is very logical. Exhibit 63, 64, and 65 of the Naval Court's record and exhibit 13 of this record—have you had an opportunity to examine those?

Captain KRAMER. I looked at them briefly yesterday afternoon, yes, sir.

Admiral HEWITT. I would like to ask you if you can identify messages in exhibit 63 and exhibit 64 which establish or give the name of the code called "winds" code.

Captain KRAMER. There are two messages in 63, numbers 13 and 15. Both concern the setting up of that plain language so-called "winds" code, one applicable to Morse code transmission, the other to voice broadcast. In exhibit 64 there is also one that I saw in 1941, namely, number 2. The dispatch marked number 3 from ALUSI, Batavia, I do not recall having seen.

Admiral HEWITT. Can you tell me what steps were taken to listen for and monitor any message using the "winds" code?

Captain KRAMER. I was familiar only in a general way with [130] allocations of circuits to be monitored by our intercept system and the Army intercept system. I do know that because of considerable interest in this particular "winds" code message, an unusually wide coverage was directed; but regarding the details of which stations were so ordered to watch for it, I cannot give any testimony from first-hand knowledge.

Admiral HEWITT. Are you familiar with the messages in exhibit 64 setting up the so-called hidden word code? If so, will you explain what this code was?

Captain KRAMER. Yes, sir, I am familiar with these messages marked number 6 in exhibit 13. As the messages themselves indicate, it was a system set up by the Japanese Foreign Office where, in the case of disruption of encoded traffic, they could make use of plain language words to get across hidden meanings as set forth in the code. We were very interested in seeing any of this traffic at the time the thing was set up, which was about the end of November, but traffic did not appear in this system until the 7th of December, and the latter part of December, '41.

Admiral HEWITT. How was the use of the hidden word code indicated in a message?

Captain KRAMER. That we did not know until the first traffic appeared. Based on experience, we assumed that it would be an innocuous sounding Japanese Romaji message.

Admiral HEWITT. I think in one of those messages, at least, if my recollection is correct, it says look for the hidden meaning if the English word "stop" is used at the end of the message instead of the Japanese word.

Captain KRAMER. That is correct. That refreshes my memory now. I remember, now that you remind me of it, that these reams of plain language traffic that we were getting in several weeks before Pearl Harbor were searched [131] for that indicator. They were, however, I didn't recall specifically because I didn't do the searching. It was done by the GY watch officers.

Admiral HEWITT. I believe that about the middle of the first week of December there was a teletype message which, to the best of my recollection, one of the watch officers had in his possession and which was subsequently delivered to Admiral Noyes. Will you tell me about that, to the best of your recollection?

Captain KRAMER. I previously testified on that matter at Pearl Harbor, Admiral. I would like to go over that previous testimony again in the light of thinking it over since that time. I had no recollection of that message at the time it was first mentioned to me in the spring of '44. However, after being given some of the details of the circumstances surrounding it, I did recall a message some days before 7 December '41, I believe about the middle of the week 1-7 December, and I do recall definitely being shown such a message by the GY watch officer and walking down with him to Captain Safford's office and being present while the GY watch officer turned it over to him. A brief conversation ensued and Captain Safford then took it, I assumed, to Admiral Noyes, since that message we had all been on the *qui vive* about for a week or ten days. That is the last I saw of such a message.

Admiral HEWITT. Can you recall what the general subject of the message was?

Captain KRAMER. It was, as I recall it, a "winds" code message. The wording of it I do not recall. It may have been, "*Higashi no kaze ame*," specifically referring to the United States, as I have previously testified at Pearl Harbor, but I am less positive of that now than I believe I was at that time. The reason for revision in my view on that is the fact that [132] in thinking it over, I have a rather sharp recollection in the latter part of that week of feeling there was still no overt mention or specific mention of the United States in any of this traffic, which I was seeing all of and which also was the only source in general of my information since I did not see, as a rule, the dispatches from the fleet commanders or going out to them from Operations.

Admiral HEWITT. Then it is still your belief, the best you can recall in view of that, there was no indication—

Captain KRAMER. I would like to continue that statement, Admiral, by saying: For that reason, I am now at least under the impression that the message referred to England and possibly the Dutch rather than the United States, although it may have referred to the United States, too.

Admiral HEWITT. Or possibly it may have referred to Russia?

Captain KRAMER. I just don't recall.

Admiral HEWITT. Reference to one or more of the messages supplied by the FCC is in exhibit 65. Can you recall whether any of those may have been seen by you?

Captain KRAMER. This document 1 is not a message and document 4 is the one of the 8th of December about midnight GMT. I may have seen these specific messages. I cannot be certain, however, because we saw a great many messages of this kind in looking for this particular type of "winds" code message. When we started monitoring all Japanese plain language some weeks before Pearl Harbor, the volume of material coming in was simply tremendous, swamping. We had only three linguists at the time for translation purposes, with a pretty heavy volume of coded traffic concerning the negotiations. Consequently, we felt the extra burden or having to scan all this Japanese plain language stuff and there were many instances of [133] weather occurring in that, but because of the fact that the particular code thing we were looking for, we felt it was incumbent on us to ex-

amine it all. The reason I cannot state specifically that these particular ones were ones I had seen, but they were of the same nature as many I did see.

Admiral HEWITT. Do you recall any message which arrived in the forenoon of 7 December using the hidden word code?

Captain KRAMER. I didn't recall it until I looked over these exhibits yesterday afternoon. I had been under the impression since the beginning of last summer that it was a "winds" message.

Admiral HEWITT. The one you saw, this hidden word, you decided that was the message—

Captain KRAMER. Yes, sir. Now that I have reexamined the exhibits, I recognize that as being a hidden word message.

Admiral HEWITT. My understanding is that when that was decoded, the word *minami*, which related to the United States, was overlooked, so that the translation merely referred to England. Is that your recollection?

Captain KRAMER. Last summer when that question of the morning of 7 December had come up at Pearl Harbor, my recollection had been that it was a "winds" message. It wasn't until I saw the exhibits yesterday afternoon that my recollection was refreshed to the extent that I thought it was one of these hidden word messages rather than the "winds." I do recall on that that after my return from the State Department near 10:30 the morning of 7 December, we had had translated a message specifying the time of delivery of the fifteen-part note from the Japanese Government to the United States. That item, together with several other minor messages, one thank you to the Ambassador for his services and another to the embassy staff for another directing final destruction of codes, all added up in my mind to a crisis to take place at 1 o'clock. Consequently I was in very much of a hurry to get the word out. The books were made up in the course of a couple of minutes and as I was leaving the office, I looked at another short plain language message that had just come in, had just been brought in, and I recognized, as I recall it now, the first word in there as being a code word in this plain language text, a code word referring to estranged relations or breaking relations. As I recall it now, I dictated to a chief yeoman the sense of the message, glancing through the entire message, spotting another code word referring to England, and then two minutes after that was my way. It wasn't until I returned to the office approximately an hour later and was looking over the morning's traffic again that I again examined more closely this particular plain language message which was one of many in the traffic that morning, and noted the omission referring to the United States.

Admiral HEWITT. I show you a copy of a Tokyo dispatch dated 7 December and ask if you can identify it.

Captain KRAMER. I believe this is the one I saw that morning, yes, sir.

Admiral HEWITT. Will you read it for the benefit of the record?

Captain KRAMER. It is a message from Tokyo to the legation in Panama, classified urgent, serially numbered as a circular number 2494, the initial 9 in that figure group indicating circular, and reading

*Koyanagi rifiyori seirinotugoo arunituki hattori minami kinebunko seturitu ktkino kyokaingaku sikyuu denpoo aritast stop—Togo.*

It is to be noted that this is a "stop" message; therefore of the hidden word code. My recollection of the handling of this particular message that morning was as I have earlier indicated and on seeing this message now, my recollection tends to [135] be confirmed in that the initial word of the message referred to England. The fifth word of the message referred to estranged relations. May I have my previous answer read.

(The former answer referring to this message was read.)

Now on seeing the message, I can see that the initial word refers to England and the seventh word of the message, at the beginning of the second line, refers to the estranged relations. It was on the basis of those two words that I hastily dictated something to go along with the folder I was already on my way out with and did not note the omission in translation of an additional code word appearing in this message until return to the office and reexamination of the morning's traffic an hour or more later. My recollection is not clear cut as to the time when the discrepancy was noted. I do, however, have a rather vague recollection of making two or more phone calls at the time the discrepancy was noted, which, if correct, would indicate that that discrepancy was noted perhaps a quarter of one or 1 o'clock. I do definitely recall, however, that no retranslation of that message was made for distribution because of the fact that before it could be delivered to the recipients of this traffic, who had left meetings respectively in the State Department and Chief of Naval Operations' office for lunch, that it would be well after the time of delivery, 1 o'clock, about which there had been so much excitement late in the morning. I might further add that when the attack was first learned, I recall definitely feeling that there was no point in making the delivery at that time. That was perhaps 1:30.

Admiral HEWITT. Referring back to document 11 of exhibit 13 there, can you identify that as the original translation which you made that you dictated hurriedly?

[136] Captain KRAMER. Yes, sir, I do. In this connection, however, I might add that I do have a recollection of making an insertion in, I believe, the file copy of this message of the words "United States," with a view to making a distribution of a corrected copy, but that no actual corrected copy was distributed because of the attack taking place about 1:30.

Admiral HEWITT. Do you recall, during the latter part of December, '41, during the absence of Secretary Knox, assembling a collection of intercepted traffic bearing on Pearl Harbor and discussing this with Mr. Forrestal?

Captain KRAMER. Yes, sir, I do.

Admiral HEWITT. Can you recall whether or not this message of 7 December, this hidden word message of 7 December, was among that group of messages?

Captain KRAMER. I cannot specifically recall, Admiral, but I am almost certain that it was. We broke out a sizeable folder of that

traffic for Mr. Forrestal, and I recall going through it rather hastily in the course of three-quarters of an hour or so, giving him the general tenor of the way the things shaped up from this traffic because of the fact that Mr. Forrestal hadn't normally seen this material before that time.

Admiral HEWITT. Referring to the so-called one p. m. message document 41 of exhibit 63, which you have previously mentioned, would you tell me what you remember about delivery of that message?

Captain KRAMER. I have already touched on what took place in my office as regards the haste of getting this out to recipients on my return from the State Department about 10:30. While the folders for recipients were being made up, I recall drawing a navigator's time circle to see if this one p. m. Washington time tied up at all with the developments in the [137] Malay area, which we had been following in considerable detail the previous week. I recall being impressed with the fact that one p. m. here was several hours before sunrise in the Kra Peninsula area, where we knew the Japanese had been contemplating an attack on Kota Bharu with the connivance of the Thaiian Chief of Staff. That further tied up with the movement of a large Japanese convoy down the coast of China the previous three or four days. For that reason, I felt that on the way over to the State Department it might be well to point that out for Mr. Knox's benefit, and when the folder for Mr. Knox was turned over to Mr. Hull's private secretary, I did point that out and repeated that material to Colonel Bratton, who was also in Mr. Hull's outer office with a similar folder for Mr. Stimson as well as Mr. Hull.

Admiral HEWITT. Then you knew the fact that this particular time was before daylight in the Far East but shortly after daylight in the Hawaiian area was significant?

Captain KRAMER. My mention of the time 7:30 at Pearl Harbor was incidental in passing this explanation on for Mr. Knox's benefit. I mentioned that point too because of the fact that I had just completed two years sea duty operating out of Pearl Harbor, was thoroughly familiar with the 10½ time zone, and more or less automatically inserted Hawaiian time into that time circle.

Admiral HEWITT. Did you call the attention of any one else to the significance of this time?

Captain KRAMER. Yes, sir, I think that I repeated that item perhaps to eight or ten different people, including people in my office, I believe Commander McCollum, and I am not certain but possibly to Admiral Wilkinson; several people in the State Department, Colonel Bratton, and, I think, Captain Safford. But I don't believe that I mentioned it specifically, [138] although again I may have, on delivery to the CNO's office.

Admiral HEWITT. I would like to refer you now to the intercepted Japanese messages which referred to ships and the location of ships in Pearl Harbor, in particular documents 14, 15, 22, and 24 of exhibit 13. The notations on those messages indicate whether they were intercepted by the Army or the Navy and give the times of translation.

Captain KRAMER. Yes, sir.

Admiral HEWITT. Can you explain or discuss the time lag between the dates of the interception and the dates of translation of these messages?

Captain KRAMER. Numbers 14, 15, and 24 are Army translations. Number 22 was a Navy translation which, however, was intercepted by an Army intercept station, station number 7. Date of origin was 3 December; date of translation 11 December. I recall seeing this message for the first time Monday morning, the 8th of December. In view of what had happened the previous day and further in view of the rather badly garbled and partly unrecovered form of the message we had, it took about two days before this translation was completed. At that time, namely, when the translation was completed, a message giving the essential points in it was sent to Pearl Harbor or was sent to CinCPac, suggesting that it be passed on to the District Intelligence Officer. Even in this form here, there are several gaps and undecipherable spots, after having worked on it for a couple of days and comparing additional copies of this message with the one we were working on.

Admiral HEWITT. Would some of the time lag possibly have been due to the volume of traffic which was being intercepted and decoded?

Captain KRAMER. I will refer specifically to number 22 again, but I think it applies to all four of those. The time lag in the case of message number 22, the so-called "lights" message, between the date of origin [139] and the date we got it I cannot account for specifically, but can give this background on this type of code. The machine systems, when the key had been recovered and was being used again, were usually very promptly decoded, a case in point being the previous afternoon, when between 3 o'clock in the afternoon and about 8:30 in the evening thirteen parts of that fourteen-part note were coming in at intervals and the whole job was completed, as regards decrypting, translation, and typing, by 9 o'clock, when I commenced delivery after calling Admiral Wilkinson. In the case of the codes, however, as compared with these machine ciphers, it depended on the volume of traffic whether or not a key for that day's traffic was broken. Sometimes, with luck, a day with a small amount of traffic could be broken. Many days, however, never were broken. This particular exhibit 22, I can't state from first-hand knowledge whether such factors entered into the delay or whether the delay was due to lag between time of origin and transmission by the Japanese consulate or lag between time of intercept and delivery here.

Admiral HEWITT. Have you any other information which has not been brought out before which you think would be interesting or pertinent to this investigation.

Captain KRAMER. I think that I have covered my part of this thing fairly completely, Admiral.

Admiral HEWITT. All right. Thank you very much.

(The witness was excused.)

[140] A witness entered, read the precept, and was duly sworn.

Admiral HEWITT. State your name and rank.

Lieut. Comdr. LINN. George W. Linn, Lieutenant Commander, U. S. Naval Reserve.

Admiral HEWITT. What duty were you assigned during 1941?

Lieut. Comdr. LINN. I was in OP-20GY, which was a decrypting section of the Communications Intelligence Section, and I was assigned, I think it was probably about February or March—a watch was started, a twenty-four hour watch started, and I was assigned to

that watch and later became the senior officer of that watch. At that time, maybe a month or so, before December 7th, I was taken off the watch list and put on days, principally for decrypting reasons. I have more experience than most of the others and Captain Safford was to be sure we would get the keys in this machine cipher as soon as possible during the night so that we would have them the next morning. So that took me off the watch list. Then—I am not sure of this date—a couple of days before the 7th of December we started Christmas leaves and one of our watch officers started his leave. I went on the watch list in his place, and that put me on watch from 1600 to 2400 on the 6th.

Admiral HEWITT. How many watch officers were there stationed at that watch during the first week in December?

Lieut. Comdr. LINN. Well, at the early part of the first week there were the four watch officers, including the one that I replaced. I was about the 4th or 5th on—I am not sure about this date—there were three others besides myself.

Admiral HEWITT. Can you give me their names?

Lieut. Comdr. LINN. Lieutenant Commander F. M. Brotherton [141] Lieutenant Commander A. V. Pering, and Lieutenant Commander A. A. Murray, all Naval Reserve.

Admiral HEWITT. Did you know of the existence of the "winds" code at the time?

Lieutenant Commander ETA shrdl

Lieut. Comdr. LINN. Well, I saw the translations of the document that set up the "winds" code and I knew that steps were taken to get the raw material in and the watch was assigned the task of looking over that raw material outside of normal working hours. Lieutenant Commander Kramer, who was in Op-20GZ at that time, handled himself during the day, anything that came in during normal working hours. At night the watch looked over this raw material. It came in mainly from the West Coast, plain language Japanese; came in by teletype.

Admiral HEWITT. Then if anything came in on that subject, it would have been seen by you or one of the officers that you have mentioned.

Lieut. Comdr. LINN. Yes. If it had come in outside of normal working hours, some one of the officers should have seen it. I myself have no knowledge of it. I will say this, that we wouldn't of necessarily know about it—

Admiral HEWITT. But one of you—

Lieut. Comdr. LINN. If it did come in. But the man who received it would.

Admiral HEWITT. What I am trying to bring out is it must have gone through one of the officers that you mentioned, one of those watch officers, outside of working hours; is that right?

Lieut. Comdr. LINN. That is right.

Admiral HEWITT. And Commander Kramer during the day?

Lieut. Comdr. LINN. Yes. Well, he was in during the evening shift. [142] It is pretty hard to draw the line. Commander Kramer worked sometimes as late as 9 o'clock. It is pretty hard to draw the line at 1630.

Admiral HEWITT. What I am trying to bring out is if an executive message having to do with that "winds" code had come in, it would have been seen by at least one of those officers?

Lieut. Comdr. LINN. Yes, if Commander Kramer wasn't there at the time. We were the GY watch and we had the responsibility for anything that came in if it came in through Naval Communications or anything else. The only way in which they might not would be if something came in at 8 o'clock and he just took the raw material and handed it to Commander Kramer without looking it over.

Admiral HEWITT. Then Commander Kramer would have seen it?

Lieut. Comdr. LINN. He would have had it himself. That is right.

Admiral HEWITT. Are you able to state positively that you never saw any intercept which used the code words indicating the breaking of relations with the United States or war with the United States?

Lieut. Comdr. LINN. Prior to December 7th, yes. I have seen the one from the FCC, but that was afterward. That was a part of the previous investigation. I didn't see anything before that I remember. My memory in some phases of this is good and others not too good at all. I knew nothing about the FCC being mixed up in this until at the time of the inquiry, when I saw that copy.

Admiral HEWITT. That is all. Thank you very much.

(The witness was excused.)

[143] A witness entered, read the precept, and was duly sworn.

Admiral HEWITT. State your name and rank.

Lieut. Comdr. BROTHERHOOD. Francis M. Brotherhood, Lieutenant Commander, U. S. Naval Reserve.

Admiral HEWITT. It appears from previous testimony that during 1941 you were connected with the security section of Naval Communications in Washington and that you have some knowledge of the so-called "winds" code. What were your duties in 1941?

Lieut. Comdr. BROTHERHOOD. Admiral, I was one of the watch officers in charge of the decryption and preparation of diplomatic dispatches, especially the Japanese.

Admiral HEWITT. Will you tell us what you know about the "winds" code and the efforts to monitor for the "winds" code? State what your understanding of the "winds" code is and what steps were taken to listen for a message using that code.

Lieut. Comdr. BROTHERHOOD. Some time in the month of November, Admiral, we got a dispatch which we succeeded in breaking out, that told us that the Japanese were planning to inform their consular officials around the world by voice radio from Tokyo to the effect that they intended to break relations with certain countries, among them the United States, Russia, and Great Britain. I don't remember whether any one else was included. It would be in the way of a weather broadcast. A certain weather expression was to indicate that Japan planned to break diplomatic relations with the United States, and another expression meant that they planned to break with Great Britain, and still another that they planned to break with Russia. As one of the watch officers through whom they hoped to have the message transmitted to the authorities at the Navy Department, I had been [144] drilled as to what to watch for and had very specific instructions as to how to handle any such dispatch that was intercepted.

In connection with the intercept facilities, I wasn't a part of the people that set up the intercept organization, but it was my understanding at the time that whatever facilities the Navy had that could be diverted to the reception of voice signals as against conventional

radio telegraphic signals had been diverted and had been set up for the purpose. We regarded the possible intercept of such an exercise order as being of great importance. We had been instructed further that the FCC had been informed of what we were looking for, that under certain circumstances we might hear from them, and the Army, who was working this diplomatic project with us jointly, and my understanding at the time was that they were also diverting certain facilities in an effort to get this broadcast. That is the background, as I understand it.

Admiral HEWITT. Do you recall what, if any, messages were received using this "winds" code?

Lieut. Comdr. BROTHERHOOD. I was on duty there the evening I believe it was, the 4th of December—I rightly don't remember this moment whether it was the 4th or the 5th—when the FCC called and asked for some one to whom they could deliver a certain dispatch and the officer of the FCC at the other end indicated to me something that I understood what he was driving at, and I said, "I am authorized to take it," and I did so and it was an expression that just didn't quite fit the code. In other words, it was not what we were looking for. I would say not what we were looking for. In other words, it did not indicate that we might expect a break in relations on the part of Japan with the United States, but it was suggestive of a break in relations with Russia. However, as I remember the [145] dispatch in question, without refreshing my memory here, it was accurate in its fitting the formula insofar as Russia was concerned. At the time, I myself was not in position to evaluate the value of the dispatch. I had only my orders to pass it on, which I did. However, I did so with a reservation in my own mind that it was not fitting the formula setting up this dispatch.

Admiral HEWITT. Will you examine this exhibit number 65 of the Naval Court of Inquiry and see if any of those fits the message which you just described?

Lieut. Comdr. BROTHERHOOD. This one (indicating) is somewhat like the message that I have just described, although this is in English a translation of what I actually received.

Admiral HEWITT. That is document number 1?

Lieut. Comdr. BROTHERHOOD. This is document number 1.

Admiral HEWITT. Look at the others also. What about document number 2? Could that have been the message to which you referred?

Lieut. Comdr. BROTHERHOOD. That doesn't strike me, Admiral Hewitt, as being the one.

Admiral HEWITT. Number 1 to which you refer is not a message but it might be the code?

Lieut. Comdr. BROTHERHOOD. Yes, sir, but that was the point made, Admiral.

Admiral HEWITT. I will rephrase the question. Document number 2, then, as I understand it, refers to the north wind, but in referring to the north wind, it did not follow the form which had been more or less specified in the message that set up the "winds" code, is that correct?

Lieut. Comdr. BROTHERHOOD. Yes, sir. That was the impression I had at the time.

[146] Admiral HEWITT. Will you discuss to whom this message was delivered?

Lieut. Comdr. BROTHERHOOD. Admiral Hewitt, my instructions were to first get in touch with the communication watch officers upstairs and pronounce the words that I had heard from whoever sent them to me, in this case the FCC, and I would receive further instructions. The communication watch officer instructed me in these words: "You want to see the Admiral." I called the Admiral on the telephone directly and without delay got him on the other end of the wire and told him verbally what I had received. The reaction on the part of Admiral Noyes, who was then the Director of Naval Communications, was that he thought the wind was blowing from a funny direction, and he used words to that effect. As I said, when I telephoned this thing through, I didn't think personally, although I was not supposed to think in the matter—I didn't think it was in the nature of an execute. Admiral Noyes further gave me to believe from what I heard him say over the telephone—I can't quote his words, but the impression I got was, however he would pass the information on for what it was worth.

Admiral HEWITT. Do you recall what conversation you had with Captain Safford concerning this?

Lieut. Comdr. BROTHERHOOD. Admiral Hewitt, I haven't had my memory refreshed on that conversation, although Captain Safford says that I called him that morning and told him such a dispatch had arrived. That was in accordance with my instructions, too.

Admiral HEWITT. But you can't remember now actually whether you did it or what was said?

Lieut. Comdr. BROTHERHOOD. No, sir. If I hadn't seen Captain Safford here a half hour ago, I wouldn't be able to say that I had called him, but Captain Safford said I did and I believe I had called him.

[147] Admiral HEWITT. Do you recall ever seeing any message which referred to the United States?

Lieut. Comdr. BROTHERHOOD. No, Admiral, I do not.

Admiral HEWITT. Can you give me the names of the other officers who stood the same watch that you did?

Lieut. Comdr. BROTHERHOOD. Yes, sir. I relieved Lieutenant Commander Linn, Lieutenant Commander George Linn, at midnight—well, 1201, December 7th—and I was relieved in turn by Lieutenant Commander A. V. Pering some time after 7 the same morning, and the other officer, whom I did not see that day, was Lieutenant Commander Murray. I don't remember his initials.

Admiral HEWITT. Were there any officers who stood watch earlier?

Lieut. Comdr. BROTHERHOOD. Well, sir, we had another member of the group. There were five of us. The other member of the group managed to get in his Christmas vacation that week—I mean his annual leave—so he was not present, and that was Lieutenant Commander Brown.

Admiral HEWITT. The only other officer besides those you have mentioned who would have direct knowledge of such messages or through whom such messages would pass would be Commander Kramer, is that right?

Lieut. Comdr. BROTHERHOOD. Well, Commander Kramer should certainly be considered, yes, sir.

Admiral HEWITT. As I understand it, he would have the message that came in during the day and one of these watch officers, or you watch officers, would be sure to see any messages that came during the night outside of working hours. Is that correct?

Lieut Comdr. BROTHERHOOD. Yes, sir. That would also be true during the day time. We had a teletype set up there in which all this if it was intercepted by any of the outside stations, was being transmitted to us.

[148] Admiral HEWITT. I think that is all then. Thank you very much.

(The witness was excused.)

A witness entered, read the precept, and was duly sworn.

Admiral HEWITT. State your name and rank.

Lieut. Comdr. PERING. Alfred V. Pering, Lieutenant Commander USNR.

Admiral HEWITT. What were your duties during 1941?

Lieut. Comdr. PERING. I was the watch officer in Op-20G.

Admiral HEWITT. And you were carrying out that duty during the first week in December, 1941?

Lieut. Comdr. PERING. Yes, sir.

Admiral HEWITT. Who were the other watch officers?

Lieut. Comdr. PERING. Lieutenant Commander Brotherhood, Lieutenant Commander Murray, Lieutenant Commander Linn. At that time there was a four section watch.

Admiral HEWITT. You knew of the existence of the "winds" of communication?

Lieut. Comdr. PERING. Yes, sir. We had instructions to look for a certain set of conditions in plain language Japanese which was intercepted.

Admiral HEWITT. Did you ever see any intercept using that which referred to the breaking of relations with the United States?

Lieut. Comdr. PERING. I did not, sir.

Admiral HEWITT. Did you see any referring to breaking relations with any other nation?

Lieut. Comdr. PERING. No, I saw none.

Admiral HEWITT. Thank you very much.

(The witness was excused.)

[149] A witness entered, read the precept, and was duly sworn.

Admiral HEWITT. State your name and rank.

Lieutenant FREEMAN. Frederick L. Freeman, Lieutenant, US Navy.

Admiral HEWITT. What were your duties during 1941, Mr. Freeman?

Lieutenant FREEMAN. I was in the section that was identified as section GI of Intelligence, which was a correlating section and disseminating section. We disseminated intelligence received by us from field radio intelligence units to ONI. We wrote up our own reports on the basis of information sent to us and delivered them to ONI.

Admiral HEWITT. Did you stand a watch in connection with your duties?

Lieutenant FREEMAN. We had been on a watch basis, sir, for a month, I would say—I don't recall exactly how long, but it was about that long—before Pearl Harbor.

Admiral HEWITT. What other officers shared that watch with you during the first week of December, 1941?

Lieutenant FREEMAN. Lieutenant M. W. Lyon, Chief Yeoman—he is Ensign now—Nine, and Chief Yeoman Stalter.

Admiral HEWITT. You were acquainted with the so-called “winds” code then?

Lieutenant FREEMAN. Yes, sir, I was.

Admiral HEWITT. What do you know about the efforts made to monitor, intercept, a message referring to that code or in that code?

Lieutenant FREEMAN. Well, I am aware that we made every effort. We were expecting the signal to execute and I know that every effort was made, all stations were alerted to listen for it; but from personal knowledge I don't know that we ever actually got the signal.

[150] Admiral HEWITT. You never knew personally of any intercept?

Lieutenant FREEMAN. No, sir.

Admiral HEWITT. Can you recall what discussions you may have had with Captain Safford concerning this?

Lieutenant FREEMAN. I had a discussion with Captain Safford some time last year about it and he was requesting me as to my memory of the circumstances, as to whether or not we had gotten such a message. I was standing duties adjacent to the section that was responsible for decrypting, and so forth, at that time and we worked fairly closely with them and he thought that I might personally recall having seen the message executing.

Admiral HEWITT. But you never did?

Lieutenant FREEMAN. I never did, no, sir.

Admiral HEWITT. That is all. Thank you.

(The witness was excused.)

(The investigation was then, at 4:10 p. m., adjourned until 2 p. m. the next day.)

[151] PROCEEDINGS OF THE HEWITT INQUIRY

EIGHTH DAY

Pursuant to notice, the investigation met at the offices of the General Board, Navy Department, at 2 p. m., Wednesday, 23 May 1945.

Present: Admiral H. Kent Hewitt, USN; Mr. John F. Sonnett; Lieutenant Commander Benjamin H. Griswold, USNR; and Ship's Clerk Ben Harold, USNR.

Admiral HEWITT. Careful consideration has been given to the evidence concerning the so-called "winds" message with a view to determining whether or not Rear Admiral Leigh Noyes, USN, formerly Director of Naval Communications, should be called as a witness. It appears from the testimony of Captain Safford that he *thought* that a "winds" message relating to the United States was received about 4 December 1941 and was shown to him by Captain Kramer and a watch officer and then delivered to Admiral Noyes. It appears from the testimony of Captain Kramer that he believes that there was some such message at about that time, but that he cannot recall whether or not it referred to the United States, and he is under the impression that it referred to England and possibly to the Dutch rather than to the United States, although it *may* have referred to the United States also. Captain Kramer believed that the message in question was delivered to Admiral Noyes. There is yet no other evidence to the effect that a "winds" code message relating to the United States was received.

Upon review of the sworn testimony of Admiral Noyes, given before the Naval Court of Inquiry, it appears that he recalled no such message and that he did not believe that any such message relating to the United States had ever been received by the Navy, although he had some recollection of a "false alarm." Accordingly, I find that no useful purpose would be served [152] by calling Admiral Noyes as a witness in this investigation, and direct that the portions of his previous testimony relating to this subject be incorporated in this record. This decision will be reconsidered should further evidence be developed indicating that a useful purpose would be served by reexamining Admiral Noyes.

(The extracts of testimony of Rear Admiral Leigh Noyes, USN, before the Naval Court of Inquiry, follow.)

[153] EXTRACTS OF TESTIMONY OF REAR ADMIRAL LEIGH NOYES BEFORE NAVAL COURT OF INQUIRY

37. Q. I would like to show you document 15 of Exhibit 63, which has been familiarly termed the "winds message" and ask you to examine it and state whether you had seen this document on or after the date of its translation, which is noted in the right-hand corner as being 28 November 1941?

A. Yes.

38. Q. What action did you take with reference to this document when it was brought to your attention?

A. We took steps to get immediate notice from our intercept stations at this point.

39. Q. Subsequent to the date of your having taken these steps to get intercepts from your stations, will you state whether any of the code words appearing in document 15 were received in the Navy Department, either in Japanese or plain English?

A. They were not.

40. Q. I show you Exhibit 65, and refer you to Document No. 2 and Document No. 3. These are intercepts by Federal Communications Commission. I want to know whether you were ever acquainted with the information contained in the intercepts prior to the Japanese attack on 7 December 1941.

A. I have no recollection of ever having seen this document.

41. Q. Either 2 or 3—either document?

A. No, sir.

42. Q. Had you ever been informed of the contents of either 2 or 3 prior to the Japanese attack on Pearl Harbor on 7 December 1941?

A. Not to the best of my knowledge.

43. Q. Can you recall whether or not an officer in your Division made any telephone calls to you with reference to any subject matter contained in the intercepts of document 15, that you have previously been shown?

A. No.

44. Q. Do you recall at any time prior to the Japanese attack on Pearl Harbor on 7 December 1941, having been informed by some officer in the Navy Department that there had been received in the Navy Department certain information about winds, and that your reply was, "The wind seems to be blowing in a certain direction," or words to that effect? Do you have any recollection of such a conversation?

A. I do not."

78. Q. At any time prior to the Japanese attack on Pearl Harbor on 7 December 1941 was there brought to your attention a dispatch that had been prepared by Commander McCollum in the Office of Naval Intelligence of the Eastern Division in which there was a summary or resume of intelligence information to be transmitted to the Commander-in-Chief of the Pacific Fleet?

[154] A. I believe that Admiral Wilkinson discussed such a message with me which was an estimate of the situation based on purely communication intelligence coming from the Director of Naval Intelligence. I told him that in my opinion estimates of the situation should come from the Chief of Naval Operations.

79. Q. Do you have any knowledge of whether or not that message was transmitted to the Commander-in-Chief of the Pacific Fleet?

A. I do not.

80. Q. Can you state what action was taken in the Navy Department in regard to releasing this dispatch?

A. I cannot. I exercised no censorship in regard to dispatches except that they were properly released.

The interested party, Admiral Harold R. Stark, U. S. Navy, stated that he did not desire to cross-examine this witness.

Cross-examined by the interested party, Rear Admiral Husband E. Kimmel, U. S. Navy (Ret.):

81. Q. At the time that you saw this McCollum dispatch that was prepared and being considered for transmission to the Commander-in-Chief of the Pacific Fleet, do you remember whether any reference was made to the winds code system?

A. I do not.

82. Q. What special circumstances or procedures were set up in your office in the handling of the execution signal of the winds code system if and when the execution signal was received?

A. We had a special 24-hour watch for all communication intelligence messages.

83. Q. Were there any special cards prepared giving the Japanese words and phrases which were expected and these cards, six sets of them, delivered to persons in the Navy Department who would be particularly interested upon the receipt of the execution of that signal?

A. I couldn't say.

84. Q. As a possible refreshing of your memory, there has been testimony before this court that prior to the receipt of the execution signal you had prepared a series of six cards and these had been delivered to officials in the Navy Department who would be particularly anxious to know of this execution signal.

earliest moment it was received. Do you now recall that any such system was established?

A. No, I couldn't say.

85. Q. There has been testimony before this court to the effect that the execution of the winds code system was received and that a thorough search in the Navy Department files had failed to receive a copy of the execution signal. Would the Director of Naval Communications files be the normal place in which the record would be kept?

A. If it was received by naval means, yes; if not, no.

86. Q. Will you please answer the question. Are not the files of the Director of Naval Communications the normal repository of such messages?

[155] A. If received by naval means, yes. Otherwise, the Office of Naval Intelligence.

87. Q. The testimony before this court was that it had been received by naval intercepting means and therefore the record of this message would naturally be kept in the files of the Director of Naval Communications, would it not?

A. Yes.

88. Q. Can you explain why this document is missing from the files of the Director of Naval Communications?

A. I don't think that your assumption is correct. I don't think that any such message was received by naval means.

89. Q. Then at no time did you learn from anyone of the execution of the winds message in any form, and at no time did you tell anyone of the execution in any form of the winds message? Is that the way you want to leave your testimony on that subject?

A. That is right; yes.

136. Q. Referring to this "Winds Message" and the execute of the "Winds Message": Have you any recollection whether Lieutenant Commander Kramer came in with the execute of the "Winds Message" and said, "Here it is"?

A. As I remember it, we received some outside information which afterwards turned out not to be correct. That information was taken to mean that an execute of this "Winds Message" had been received. It turned out not to be correct.

141. Q. In my previous examination I asked you, "At no time did you learn from anyone of the execution of the 'Winds Message' in any form and at no time did you tell anyone of the execution in any form." I ask you if that is the way you wish to leave your testimony on that subject? I now invite your attention to the fact that you have just testified that you received some information. From where did this information come?

A. I beg your pardon. I said, to the best of my recollection, that there was a false alarm about it.

142. Q. But that was information about the "Winds Message", was it not? The mere fact that it turned out to be false afterwards did not take it away from that particular subject, did it?

A. I would be very glad to give you a better answer if I could.

143. Q. Then, you did hear from some source about the execution of the "Winds Message"; is that right?

A. I can only say that to the best of my remembrance no execution of the so-called "Winds Message" was finally received.

Reexamined by the court:

144. Q. Did you ever discuss this "Winds Message" or the receipt of it with the Chief of Naval Operations?

A. When the message came in, as I remember it, we considered it more important than a later study of it indicated. The message only said that relations were strained.

[156] 145. Q. I asked you whether you discussed it?

A. With the Chief of Naval Operations personally?

146. Q. Yes.

A. No.

147. Q. Did you give him any information?

A. He got a copy of it.

Recross-examined by the interested party, Rear Admiral Husband E. Kimmel, U. S. Navy (Ret.):

148. Q. I show you document 3 of Exhibit 64, which is a message from Alusna Batavia to OpNav, No. 081080, and ask you whether or not you have seen that dispatch, or whether you recognize it, and if so, at what time did you see it?

A. I couldn't say the time I saw it. I did see it.

149. Q. Will you read the first part of the dispatch to the court, please?

A. (Reading) "From Thorpe for Miles, War Department."

150. Q. And continue for the first three lines.

A. (Continuing) "Code intercept. Japan will inform her consuls of war decision in her foreign broadcasts as weather report at end."

151. Q. Does that not indicate more than just strained relations?

A. It was his interpretation apparently of the same message that had already been received.

152. Q. Was it not entirely possible that the translators in the War Department of the Japanese code would have reached about the same conclusion, in that they had the same words to work from?

A. This was not necessarily—

The interested party, Admiral Harold R. Stark, U. S. Navy, made the following statement: I call the court's attention to the fact that this was not a translation made in the War Department. This came from Batavia that way.

The witness made the following statement: Somebody in Batavia had given that information.

153. Q. But the dispatch represents the translation of the same code system which was sent out by Japan, does it not, namely, the "Winds Code" system?

A. Probably. We discussed it with the War Department. They did not have much confidence, as I remember it, in the information from there as against rechecking that was done in Washington.

154. Q. Can you state from where this false report on the "Winds Message" was received; that is, who gave it to you?

A. No.

155. Q. But you do recollect that you did hear about the execution of this broadcast 7 December 1941?

A. It has been stated and it has been testified to that there were six copies made of this dispatch, and also I won't trust my recollection for three years back as against my assistants. These people who handled the details were subordinates, and their recollection of details is probably better than mine.

Reexamined by the judge advocate:

156. Q. Will you state, exactly as you remember having seen it, what this report of the execution of the "Winds Message" was?

A. I can only say that, in the phrasing of the questions, I believe there have been some discussion about it. I am convinced that it was not finally found to be correct.

157. Q. What I am trying to ascertain, Admiral, is the wording of the report which you received and which later you determined to be false?

A. I don't know.

158. Q. Do you know from whom it was received?

A. I don't.

[158] Two witnesses entered and each was duly sworn.

Admiral HEWITT. Will each of you gentlemen state his name and rank.

Lieut. Comdr. REIERSTAD. Leo Reierstad, Lieutenant Commander USNR.

Lieutenant (jg) CONANT. Joseph M. Conant, Lieutenant (jg) USNR.

Admiral HEWITT. Lieutenant Commander Reierstad, what are your duties?

Lieut. Comdr. REIERSTAD. I am in charge of the translating unit Op-16FE.

Admiral HEWITT. That involves translating Japanese?

Lieut. Comdr. REIERSTAD. Yes, sir.

Admiral HEWITT. What are your qualifications in Japanese?

Lieut. Comdr. REIERSTAD. Well, I am a graduate of the Naval School of Oriental Languages and Japanese language and then I had nine years of residence in China, during which time I studied Chinese, which, of course, has some relation to the Japanese language as far as the written form is concerned.

Admiral HEWITT. Lieutenant Conant, will you answer the same questions with regard to your duties and qualifications?

Lieutenant (jg) CONANT. I am a translation sub-section head under Lieutenant Commander Reierstad and my qualifications are solely that I graduated from the Boulder Language school.

Admiral HEWITT. Have you examined this exhibit number 14, which I present to you?

Lieutenant (jg) CONANT. Yes, sir.

Lieut. Comdr. REIERSTAD. This looks like the one that we had and actually examined.

Admiral HEWITT. Will you examine it closely enough to tell whether this is the same one or a copy of it? This is a photographic copy.

[159] Lieut. Comdr. REIERSTAD. Yes, sir.

Admiral HEWITT. Can you state whether this is the one that you looked over to translate?

Lieutenant (jg) CONANT. Yes, that is the one.

Lieut. Comdr. REIERSTAD. Yes, sir.

Admiral HEWITT. I present you with exhibit number 4 and ask you to testify if the printed part of the exhibit, with the additional pencil notations, is your translation of the exhibit number 14?

Lieut. Comdr. REIERSTAD. It is.

Lieutenant (jg) CONANT. Yes, sir.

Admiral HEWITT. How does your translation compare in general with this exhibit number 3?

Lieut. Comdr. REIERSTAD. This (referring to exhibit number 3) we haven't examined prior to this time, sir. Admiral, I point out here, sir, that this translation, which is a possibly correct one, also might be translated "establish position." I should like to make clear that the time element, whether it is past, present, or future, is not definitely ascertainable from the characters as appearing here.

Admiral HEWITT. That would also be true where this caption is "enemy ship sunk" in exhibit 3 and in exhibit 14 it is "attack and sink"?

Lieut. Comdr. REIERSTAD. That is also true. Simply on the basis of the original Japanese it is not possible to say definitely whether it is past or future action. "Attack and sink enemy battleship" could be correct, or "enemy ship attacked and sunk" would also be correct, in our opinion.

Admiral HEWITT. I call your attention to the fact that the entrance channel is marked here by rings through a lighthouse here and through the Sugar Mill stack at Waihapu, that a vessel entering the channel at these [160] outer buoys should be on this range (indicating). Will you confirm my idea that possibly this notation "position established" could be a note to get on that range at that point?

Lieut. Comdr. REIERSTAD. I would say definitely. Wouldn't you, Conant?

Lieutenant (jg) CONANT. Yes, I would say that.

Admiral HEWITT. Will you state the date on which you last looked over exhibit 4 and added the pencil notations?

Lieut. Comdr. REIERSTAD. 22 May was the last time we handled this chart and put our final remarks on.

Admiral HEWITT. Are you willing to certify as to the accuracy of this translation within the limitations of tense which you have already expressed?

Lieut. Comdr. REIERSTAD. And we would like to add within limitations of this being a photostatic copy and certain parts of being impossible for us to accurately discern.

Admiral HEWITT. But to the extent that there is a translation on exhibit 4 it is accurate?

Lieut. Comdr. REIERSTAD. Yes sir.

Admiral HEWITT. In other words, your translation is not complete but what you have translated is correct?

Lieut. Comdr. REIERSTAD. Yes, sir, with the further qualification of course, that the Admiral just made, that we cannot undertake to state whether this is past or future tense.

Admiral HEWITT. In the book "Battle Report" on page 26 there is a statement, referring to this chart or another photographic copy of the same chart: "At one point on his chart, and as if to bolster the evidence [161] of his own vision, he wrote in Japanese, 'I saw with my own eyes!'" Could you find anything on this chart which might be the basis for that statement, any notation on this chart?

Lieut. Comdr. REIERSTAD. In this connection, sir, all we can say is on the basis of the photo copy made available to us for examination there is no evidence we have been able to locate of any Japanese writing that could be so translated.

Admiral HEWITT. Calling your attention to the notations which are in ink near the times 0115 and 0410, one is translated as "fight". Could that possibly refer to the initiation of a general attack at zero hour for an attack?

Lieut. Comdr. REIERSTAD. In my opinion, it definitely could.

Lieutenant (j. g.) CONANT. Yes, sir.

Lieut. Comdr. REIERSTAD. It is very possible, but again there is the way of saying whether that is a future action or a past action.

Admiral, there is just one idea that occurred to me, whether it might not be worthwhile in connection with this project to get the original and to also make from the original a study of the calligraphy which appears here in different places to establish first of all whether it was all written by the same man, if possible, whether some of it might not have been written in considerably greater haste. A good deal of information could be obtained from a study of that kind. Don't you think so, Joe?

Lieutenant (j. g.) CONANT. Yes, sir.

Lieut. Comdr. REIERSTAD. The interesting thing here is, Admiral, that all of these signals appear to have been written in pencil. If anything had been fixed up in advance, I think that that happened would have been written on in ink, if we assume that these other things were also written [162] on in ink, well in advance. Also the question of the effect of what damage on some parts of the document as against the others which would make some of these stand out more clearly.

Admiral HEWITT. That is all. Thank you very much.

(The witnesses were excused.)

The investigation was then, at 2:30 p. m., adjourned until 11 a. m. Friday, 25 May 1945.

[163] PROCEEDINGS OF THE HEWITT INQUIRY

NINTH DAY

Pursuant to notice, the investigation met at the offices of the General Board, Navy Department, at 11 a. m., Friday, 25 May 1945.

Present: Admiral H. Kent Hewitt, USN; Mr. John F. Sonnett; Lieutenant Commander Benjamin H. Griswold, USNR; and Ship's Clerk Ben Harold, USNR.

A witness entered, read the precept, and was duly sworn.

Admiral HEWITT. State your name and rank.

Rear Admiral DELANY. Rear Admiral Walter S. DeLany, U. S. Navy.

Admiral HEWITT. You were Assistant Chief of Staff in the Operations Office of CinCPac?

Rear Admiral DELANY. Yes, sir.

Admiral HEWITT. Prior to 7 December 1941?

Rear Admiral DELANY. Yes, sir.

Admiral HEWITT. You are, of course, familiar with exhibit number 8 of the Naval Court's record, Pacific Fleet Confidential Letter 2CL-41 on the security of Pearl Harbor. One of the assumptions is—

That a declaration of war may be preceded by (1) a surprise attack on ships in Pearl Harbor, (2) a surprise submarine attack on ships in the operating areas, (3) a combination of the two.

And also at the end of the letter a statement was made that—

It must be remembered, too, that a single submarine's attack may indicate the presence of a considerable surface force probably composed of fast ships accompanied by a carrier.

Is that correct?

Rear Admiral DELANY. Yes, sir.

Admiral HEWITT. Exhibit 52 of the Court of Inquiry's record, which [164] is Pacific Fleet Confidential Letter 14CL-41, established the task groups then in effect?

Rear Admiral DELANY. Task forces, yes, sir.

Admiral HEWITT. You can identify that?

Rear Admiral DELANY. Yes, sir.

Admiral HEWITT. Also we have exhibit 69A and B of the Court of Inquiry, which purport to be memoranda gotten up for the Commander-in-Chief by Captain, now Admiral, McMorris. Can you identify those from your recollection?

Rear Admiral DELANY. Yes, sir.

Admiral HEWITT. Now, that exhibit, those two memoranda, as I understand it, were somewhat in the nature of a check-off list of steps to be taken—

Rear Admiral DELANY. Yes, sir. They were given to the Duty Officer.

Admiral HEWITT. —a running check-off list of steps to be taken in case war was declared?

Rear Admiral DELANY. Yes, sir.

Admiral HEWITT. Now, before the Roberts Commission you stated that as far as you recalled, the question of an air raid on Pearl Harbor was not discussed between 27 November and 7 December. Is that in accordance with your memory?

Rear Admiral DELANY. You mean a surprise attack—

Admiral HEWITT. It says:

The possibility of an air raid on Pearl Harbor was not discussed between November and 7 December.

Rear Admiral DELANY. I take it that you mean a joint discussion as a matter within the Staff or personal discussion. "Never from the point of view of what happened"; yes, sir, I confirm that statement.

[165] Admiral HEWITT. The question was:

Had you any discussions between November 27 and December 7 as to the possibility of Japanese naval action or air action?

Never from the point of view of what happened.

Then the next question was:

The possibility was not discussed, the possibility of an air raid?

Rear Admiral DELANY. Yes, sir, that is still my—

Admiral HEWITT. But it was not specifically discussed after the rival of the war warning on November 27th?

Rear Admiral DELANY. No, sir. The same answer there; not in the light of what happened, an attack of that nature.

Admiral HEWITT. What I was trying to bring out was whether the possibility of what actually did happen was discussed during that critical period from November 27th to December 7th in the Staff or Admiral Kimmel.

Rear Admiral DELANY. Yes, sir, within the Staff, even before that time, and when this order was formulated, it was stated in there that the possibility of an air raid existed; but with the information we had, it wasn't discussed as a matter that was actually going to happen. There always was a possibility of it.

Admiral HEWITT. About that time was an estimate of the Pacific situation made?

Rear Admiral DELANY. Yes, sir.

Admiral HEWITT. In which various enemy courses of action were considered?

Rear Admiral DELANY. Yes, sir.

Admiral HEWITT. Was that in written form or was it just a mental estimate made by the Commander-in-Chief or some of the members of the Staff?

[166] Rear Admiral DELANY. Well, Admiral, I think that the war plans that came out of the Pacific Fleet, and I think must have been filed here, gave consideration to that.

Admiral HEWITT. The Pacific Fleet war plans.

Rear Admiral DELANY. There was a Rainbow plan and ship raid plans.

Admiral HEWITT. Let's refer to that.

Rear Admiral DELANY. I can't give you the contents of those plans after all this time, but I know there was a running estimate of the situation and plans based on those estimates.

**Admiral HEWITT.** You expect it to appear in the assumptions to the war plan, do you not?

**Rear Admiral DELANY.** Yes, sir.

**Admiral HEWITT.** Looking at this Pacific Fleet Operating Plan, Rainbow Five (Navy Plan O-1), they are general assumptions:

That the Associated Powers, comprising initially the United States, the British Commonwealth (less Elre), the Netherlands East Indies, the Governments in Exile, China, and the "Free French" are at war against the Axis powers, comprising either:

1. Germany, Italy, Roumania, Hungary, Bulgaria, or
2. Germany, Italy, Japan, Roumania, Hungary, Bulgaria, and Thailand.

*Note:* As of 22 June war exists between the European Axis and Russia, and the latter may be tentatively considered as an ally against that part of the Axis but not necessarily against Japan.

b. That even if Japan and Thailand are not initially in the war, the possibility of their intervention must be taken into account—

and other general assumptions of that nature, and one special assumption—

That the [167] Pacific Fleet is virtually mobilized and is based at Pearl Harbor, but regular navy yard overhauls are in progress which would reduce forces immediately available by about one-fifth.

Now, I might read the following into the record, I think. In Chapter III, paragraph 1331, of this reference, the Estimate of Enemy Action includes the following:

1331. It is believed that German and Italian action in the Pacific will be limited to commerce raiding with converted types, and possibly with an occasional pocket battleship or heavy cruiser.

1332. It is conceived that Japanese action will be as follows:

- a. The principal offensive effort to be toward the eventual capture of Malaysia (including the Philippines) and Hong Kong.
- b. The secondary offensive efforts to be toward the interruption of American and Allied sea communications in the Pacific, the Far East and the Indian Ocean, and to accomplish the capture of Guam and other outlying positions.
- c. The offensive against China to be maintained on a reduced scale only.
- d. The principal defensive efforts to be:
  1. Destruction of threatening naval forces.
  2. Holding positions for their own use and denying positions in the Central and Western Pacific and the Far East which may be suitable for advanced bases.
  3. Protecting national and captured territory and approaches.

1333. To accomplish the foregoing it is believed that Japan's initial action will be toward:

a. Capture of Guam.

[168] b. Establishment of control over the South China Sea, Philippine waters, and the waters between Borneo and New Guinea, by the establishment of advanced bases, and by the destruction of United States and allied air and naval forces in these regions, followed by the capture of Luzon.

c. Capture of Northern Borneo.

d. Denial to the United States of the use of the Marshall-Caroline-Marianas area by the use of fixed defenses, and, by the operation of air forces and light naval forces to reduce the strength of the United States Fleet.

e. Reenforcement of the Mandate Islands by troops, aircraft and light naval forces.

f. Possibly raids or stronger attacks on Wake, Midway and other outlying United States positions.

1334. The initial Japanese deployment is therefore estimated to be as follows:

a. Troops and aircraft in the Homeland, Manchukuo, and China with strong concentrations in Formosa and Hainan, fairly strong defenses in the Carolines, and comparatively weak but constantly growing defenses in the Marshalls.

b. Main fleet concentration in the Inland Sea, shifting to a central position (possibly Pescadores) after the capture of Guam and the reenforcement of the Mandates.

c. A strong fleet detachment in the Mindanao-Celebes area (probably main in Halmahera).

d. Sufficient units in the Japan Sea to counter moves of Russian Naval force in that area.

[169] e. Strong concentration of submarines and light surface patrol craft in the Mandates, with such air scouting and air attack units as can be supported there.

Those are the essential ones. Take this sub-paragraph "f" here: "Raider and observation forces widely distributed in the Pacific, and submarines in the Hawaiian area."

That would seem to indicate that a raid on the Hawaiian area by forces other than submarines was not seriously contemplated then.

Rear Admiral DELANY. That is right; to the extent that it actually happened, that is correct, and I think it might be pertinent to say that I believe that that plan was submitted to the Navy Department, and approved by the Navy Department. I don't know the date because I am not familiar enough with the thing three years from then to now, but I know that those things were submitted to the Navy Department.

Admiral HEWITT. I read from the letter of distribution of this book:

From: Commander-in-Chief, U. S. Pacific Fleet.

To: Distribution List for WPPac-46.

Subject: WPPac-46.

1. The subject publication is distributed herewith. This Plan has not been approved by the Chief of Naval Operations but may be placed in effect pending the receipt of such approval.

You don't remember whether that—

Rear Admiral DELANY. I don't know that the thing was actually approved, but the concept of the whole thing was that it was to be approved by the Chief of Naval Operations, because it is intimate in that letter that approval hadn't yet been received and if the occasion arose before the approval was forthcoming, it would be placed in effect anyhow.

[170] Admiral HEWITT. So as to have something ready?

Rear Admiral DELANY. Yes, sir.

Admiral HEWITT. Well, I gather a picture of this, from reading your testimony and so forth, that you had a great many warnings of different sorts. You knew about that time that the relations were strained—there was a good deal in the papers about it, as I recall, and you had the messages of November 24th, particularly, and November 27th. The message of November 24th, with which you are undoubtedly familiar, was from OpNav to Commander-in-Chief, Asiatic, Commander-in-Chief, Pacific, and the Naval Districts concerned. The one of the 24th was: "Chances of favorable outcome of negotiations with Japan are very doubtful. This situation coupled with statements of Japanese Government and movements their naval and military forces indicate in our opinion that a surprise aggressive movement in any direction including attack on Philippines or Guam is a possibility." This says any direction but puts emphasis on attack on the Philippines or Guam.

Do you recall what discussion was held of that and what other directions besides those indicated, the Philippines or Guam, were considered?

Rear Admiral DELANY. Yes, sir. I think that the fact that the aircraft carriers were sent out to place planes on both Midway and Wake

and that patrol strength at Midway was increased is indicative of the fact that we thought that the attack would not probably be limited to the Philippines and Guam but it would extend farther to the eastward as far as Midway and Wake.

Admiral HEWITT. What made you feel that it might not be extended farther east or probably wouldn't be?

Rear Admiral DELANY. Well, Admiral, I think Intelligence indicated that there weren't any forces in that area.

Admiral HEWITT. Will you glance over these intelligence summaries [171] (exhibit 19) and see if you can recall whether those or something like that were the ones that were available to you?

Rear Admiral DELANY. Yes, sir, these are summarized in the daily conferences in which the Intelligence Officer of the fleet presented the—

Admiral HEWITT. The general tenor of those was that there was considerable movement of forces in the direction of Indo-China and the Kra Peninsula and to the south and southeastward generally but there might be some forces in the Mandates, particularly submarines.

Rear Admiral DELANY. Yes, sir.

Admiral HEWITT. There was a question whether or not there might be a carrier unit there, is that correct?

Rear Admiral DELANY. Yes, sir.

Admiral HEWITT. And that the main body of the carriers was in home waters?

Rear Admiral DELANY. Yes, sir.

Admiral HEWITT. What did you generally understand out there by "home waters"?

Rear Admiral DELANY. Generally to the westward and southern of the Philippines and in the homeland itself.

Admiral HEWITT. Close to the homeland?

Rear Admiral DELANY. Yes, sir.

Admiral HEWITT. Now, then, you got this war warning dispatch on November 27th which contained the words, "Thit dispatch is considered a war warning," and went on, "The negotiations have ceased and an aggressive move by Japan is expected in the next few days," and went on to mention these forces to the southeast. What was the general feeling out there as to what that dispatch meant? That was considered a war warning. Was that [172] taken particularly seriously?

Rear Admiral DELANY. Very definitely so, Admiral.

Admiral HEWITT. I mean it meant more than the other warning dispatches that they had had before?

Rear Admiral DELANY. Yes, sir, and the operating forces at sea were all put on condition watches, darken ship, required to steam continuously in anti-submarine defense dispositions.

Admiral HEWITT. As a matter of fact, that had been the case for almost—

Rear Admiral DELANY. Yes, sir, but it had been tightened up after this thing here.

Admiral HEWITT. Now as to the message addressed to both the Commander-in-Chief, Asiatic, and the Commander-in-Chief, Pacific, "Execute defense deployment preparatory to carrying out tasks assigned in WPL 46." You had at that time two carrier task forces out there delivering planes?

Rear Admiral DeLANY. Yes, sir.

Admiral Hewitt. So that you did have some forces to the ward?

Rear Admiral DeLANY. Yes, sir.

Admiral Hewitt. But, as I understand it, there was nothing done in the matter of defensive deployment which was considered possible or necessary. Am I correct in that?

Rear Admiral DeLANY. Well, so far as the relations between Army and Navy were concerned, there were conferences and I believe that the same concept existed then as existed previously, that the greatest danger in the Hawaiian area lay from submarine attack and sabotage in view of the intelligence information that we had.

Admiral Hewitt. Do you know whether an attack of the nature which [173] actually was carried out was ever investigated carefully as a possible course of action? Was there an investigation which you figured out the distances and times necessary to cover the distance of a carrier running from the home waters—

Rear Admiral DeLANY. As I recall, it wasn't possible, between the time of the attack and the receipt of the war warning, in the event that the intelligence was correct about the fleet being in home waters.

Admiral Hewitt. Well, the home waters would have been anywhere in the home islands?

Rear Admiral DeLANY. Yes, sir.

Admiral Hewitt. Well, the evidence indicates that that force actually left the harbor up there at Etorofu Island on the 27th, which was the date of the war warning. I haven't laid this thing out myself yet to figure out the speeds and so forth, but apparently it demonstrated that it could be done. I just wondered if they had been laid down and thought of—

Rear Admiral DeLANY. Yes, sir, I am sure—well, I know that the Operations Section and with the plans that had been put on a piece of paper.

Admiral Hewitt. That would have been McMorris's job, wouldn't it? He would have known the details of that and what study was made of it?

Rear Admiral DeLANY. Yes, sir.

Admiral Hewitt. Speaking of the conferences and so forth between the Army Staff and the Commander-in-Chief's Staff, also with C-14, FOURTEEN's I suppose, as to courses of action and defensive measures, did you have a staff command post or communications center or an operations room which was to be put into effect in case of strained relations, or was there ever an exercise, joint exercise carried out?

[174] Rear Admiral DeLANY. In all the exercises that were conducted prior to this, there was a joint setup as much as was possible with the facilities and communications and other requirements in effect, because as required by the Commander-in-Chief out there, there had been numerous air raid exercises and the Army's installation was fairly well complete, as I recall it, for their own particular control of planes, but the hookup into a central joint operational room had not been made.

Admiral Hewitt. Was it planned?

Rear Admiral DeLANY. Yes, there were complete plans for the installation of a complete warning net on the island and the joint

rangement up there in the caves in the hill was all down on paper and the thing was definitely an accomplished plan.

Admiral HEWITT. Did that include a command post, or whatever you want to call it, for ComFOURTEEN?

Rear Admiral DELANY. Yes, sir.

Admiral HEWITT. And CinCPac, too, if he was there?

Rear Admiral DELANY. Yes, because the whole joint defense of the island was planned in those arrangements.

Admiral HEWITT. But it had never actually been tried out in an exercise?

Rear Admiral DELANY. Not with that installation as existed subsequent to the 7th of December, because there just weren't any materials available to establish this radar warning set hookup or anything like that. I think all the material was ordered according to plans, but it never had been delivered, never had been set up, by the 7th of December.

Admiral HEWITT. There is a lot of testimony through here in various places of efforts which were made to get the various things which were needed to improve the defenses. We have the letters which were written about the [175] deficiencies in defenses in the first part of 1941, the requests for planes; of course, the supply of additional planes, except in the operations, would not have been your function, but do you happen to know whether that was kept after, the importance of that was realized?

Rear Admiral DELANY. Yes, sir, I am positive of it. The Commander-in-Chief made a trip back here in the summer of '41. The thing was completely outlined in that, and I believe the records show the efforts that were made by everybody to get more planes, more anti-aircraft batteries, more communication facilities. We took pains to get officers who had been familiar with the defense of Great Britain out into the Islands to instruct and lecture and guide everybody in their island defense installations. That had been going on for months.

Admiral HEWITT. I recall a reply to the request for additional planes, made by the Navy Department, which stated in effect that the planes weren't available. Was any reason ever given for the non-availability of these planes, why they weren't available? Was it because they did not exist or because they were distributed elsewhere?

Rear Admiral DELANY. As I recall it, it is the latter case; they were being distributed elsewhere.

Admiral HEWITT. And shortly after the attack took place, additional planes were sent very promptly, is that correct?

Rear Admiral DELANY. Yes. There was no question of their ability to deliver planes to us after the 7th of December.

Admiral HEWITT. Do you recall where those came from?

Rear Admiral DELANY. They came from continental United States. I don't know where they started out from initially, sir. That same thing is true of [176] a lot of material that wasn't available before the 7th of December, that flowed out to us out here.

Admiral HEWITT. Referring to Exhibit 8 of the Naval Court's record, Assumption B, that indicates that a surprise air attack on Pearl Harbor is possible, does it not?

Rear Admiral DELANY. Yes.

Admiral HEWITT. And that letter was issued on October 14, 1941.

Rear Admiral DELANY. I believe that the letter was originally issued in March or April, 1941, because reference (a) is PacFleet let 2CL-41. "Reference (a) is revised herewith." This is a revision. The original order, which was almost identical with this, was issued, I believe, in March, 1941.

Admiral HEWITT. And this revision was issued on October 14, 1941.

Rear Admiral DELANY. That is what the date says; yes, sir.

Admiral HEWITT. So that from the date of the first letter up to and including October 14, 1941, I take it it was an assumption that a surprise air attack on Pearl Harbor was possible?

Rear Admiral DELANY. Yes, I think it is correct to say that.

Admiral HEWITT. Do you know whether there was any written estimate or assumption made after October 14, 1941, which changed or modified that assumption in any way?

Rear Admiral DELANY. No, because I think it was as correct in March, 1941, or October, 1941, as it is on the 25th of May, 1945.

Admiral HEWITT. Referring to Exhibit 19, Admiral, which contains communication intelligence summaries, and particularly to the summaries for the period November 27 to December 6, 1941, do you recall that on or [177] about December 1, 1941, there was a change in the radio call signs of the Japanese?

Rear Admiral DELANY. No, I can't answer that.

Admiral HEWITT. Would it refresh your recollection if you examined the communication intelligence summary for December 1, 1941, contained in that exhibit?

Rear Admiral DELANY. The question now was what? (The question asked was read back as follows:)

Referring to Exhibit 19, Admiral, which contains communication intelligence summaries, and particularly to the summaries for the period November 27 to December 6, 1941, do you recall that on or about December 1, 1941, there was a change in the radio call signs of the Japanese?

Rear Admiral DELANY. My answer is still that I do not remember now whether I knew it then or not. I mean this doesn't refresh my memory. I do not recall whether I knew that or not.

Admiral HEWITT. Do you recall that there was any noticeable discontinuation in radio traffic from Japanese fleet units after December 1, 1941?

Rear Admiral DELANY. I believe that the subject was mentioned at the morning conference by the intelligence officer in the fleet there.

Admiral HEWITT. Can you recall the substance of that discussion at that time?

Rear Admiral DELANY. No, I can't. I don't recall it at all.

Admiral HEWITT. But you do recall that there was some discussion of the change?

Rear Admiral DELANY. Yes, I recall there was a discussion, cause, as I say, this information here, particularly this one here about the carriers [178] are still located in the home waters, was covered by the intelligence officer out there on all the discussions around that time. Whether it was the 27th of December or the 27th of November, or the 1st of December, or anything like that, I am not prepared to say now.

Admiral HEWITT. Do you recall whether or not Admiral Kimmel was present during the conference concerning the change in Japanese radio traffic which you have just mentioned?

Rear Admiral DELANY. Yes, because the conferences that I mentioned were held in his office and included the Admiral, the Chief of Staff, Plans, Operations, and Intelligence Officers.

Admiral HEWITT. I take it, then, that both you and Admiral McMorris as well as Admiral Kimmel were present at each of those conferences?

Rear Admiral DELANY. I would say, generally, yes. I can't answer that I was there every morning.

Admiral HEWITT. There were daily conferences, Admiral?

Rear Admiral DELANY. Yes.

Admiral HEWITT. And were such conferences held daily, to the best of your recollection, during the period November 27th to December 7, 1941?

Rear Admiral DELANY. I think so, yes.

Admiral HEWITT. Now, referring, Admiral, to Exhibits 69A and B of the Naval Court record, would you examine those and give us the dates and tell us what they are?

Rear Admiral DELANY. As I recall these—this is dated the 30th of November 1941, and they are the check-off lists that were prepared to be in the possession of the duty officer out there in the event that war would occur in the next twenty-four hours.

Admiral HEWITT. And the second one, 69B, is dated what date, Admiral?

[179] Rear Admiral DELANY. 5th of December.

Admiral HEWITT. Admiral, will you point out where in those exhibits 69A or B any provision is made in light of Assumption B of the October 14th letter, namely, that a surprise attack on Pearl Harbor was a possibility?

Rear Admiral DELANY. Well, If I may be frank again, you read this the same as I can; I don't think you will find it in that. This daily reconnaissance of Task Force Two and Three all provides for reconnaissance, but it is not stated any place in here that there was going to be an attack on Pearl Harbor.

Admiral HEWITT. What reconnaissance is provided for in those exhibits, Admiral?

Rear Admiral DELANY. There is no reconnaissance provided in here until—

Admiral HEWITT. Until war has broken out?

Rear Admiral DELANY. Probably so, yes.

Admiral HEWITT. Was there any discussion of reconnaissance during the period November 27th to December 7, 1941?

Rear Admiral DELANY. The usual reconnaissance was conducted, yes.

Admiral HEWITT. Was there any discussion of increasing the reconnaissance.

Rear Admiral DELANY. Yes, the planes on Midway were increased. The planes were put on Wake.

Admiral HEWITT. What reconnaissance was being conducted during that period, sir?

Rear Admiral DELANY. The usual reconnaissance within the area.

**Admiral HEWITT.** That is, I take it, a reconnaissance of the fleet operating areas to the southward of Oahu and reconnaissance from Midway and Wake?

[180] **Rear Admiral DELANY.** Yes, sir, and partially to the northward. There was always an anti-submarine reconnaissance around the island.

**Admiral HEWITT.** How far out was that?

**Rear Admiral DELANY.** It depended on the number of planes available and the condition of the planes. The reconnaissance to the northward was usually conducted as part of the training and testing of planes that were on the roll call.

**Admiral HEWITT.** That was done by the PBY's?

**Rear Admiral DELANY.** Yes, sir.

**Admiral HEWITT.** Admiral, would you say that the information, particularly from radio intelligence, which was available from November 27th to December 6, 1941, at Pearl Harbor indicated that Japanese naval forces were on the move and that the direction of some of those forces could not be known or was not known?

**Rear Admiral DELANY.** It is perfectly possible for them to be on the move without our knowing anything about it.

**Admiral HEWITT.** Do you recall whether or not the radio intelligence indicated that they were on the move?

**Rear Admiral DELANY.** I think the intelligence indicated there was a move to the southward.

**Admiral HEWITT.** Do you recall what the intelligence indicated in the week preceding December 7, 1941, concerning the whereabouts of the major portion of the Japanese carrier fleet?

**Rear Admiral DELANY.** As I recall it, the information was that the carriers were in the home waters and the report, that was not well founded, that there was a possibility of some of the smaller carriers being around [181] Truk or some place like that.

**Admiral HEWITT.** Was there any discussion during the period November 27th to December 7th concerning the desirability of reconnaissance from Oahu in the direction of Truk?

**Rear Admiral DELANY.** There was a lot of discussion about the desirability of the reconnaissance and the reconnaissance would have been conducted had there been planes available to do it and at the same time maintain their material condition, which was considered of vital importance.

**Admiral HEWITT.** In your opinion, as far as the plane reconnaissance was concerned, if you had employed all the planes for reconnaissance, that could not have been maintained very long, and if you were to use sufficient planes, the maximum number of planes, for daily reconnaissance, the sectors to be covered would have been entirely limited and just a choice?

**Rear Admiral DELANY.** Yes, sir. There weren't enough planes for a complete 360° search around the island, and even in the limited sectors in any direction that you would have chosen, the number of planes and replacement pilots available was such that the search could not have been kept up for a very long time because of the material condition of the planes, the scarcity of relief crews, and the fact that everybody there was convinced that you had to give continued thought

to maintaining the number of planes that you had in the best material condition so that if something did break, you would have them available, and by saying "break," I mean some information coming to us that would require the use of these planes.

Admiral HEWITT. Thank you very much.

(The witness was excused.)

(The meeting was then, at 12:10 p. m., adjourned until a time and place to be set.)

[182] PROCEEDINGS OF THE HEWITT INQUIRY

TENTH DAY

Pursuant to notice, the investigation met at the Visiting Flag Officer's Office, Headquarters, Commander-in-Chief, U. S. Pacific Fleet and Pacific Ocean Areas, Pearl Harbor, Oahu, T. H., at 2 p. m., Tuesday, 29 May 1945.

Present: Admiral H. Kent Hewitt, USN; Mr. John F. Sonnett; Lieutenant Commander Benjamin H. Griswold, III, USNR; Lieutenant John Ford Baecher, USNR; and Ship's Clerk Ben Harold, USNR.

A witness entered, read the precept, and was duly sworn.

Mr. SONNETT. Will you please state your name and rank.

Captain LAYTON. Edwin T. Layton, Captain, U. S. Navy.

Mr. SONNETT. What is your present assignment, Captain?

Captain LAYTON. Staff, CincPac.

Mr. SONNETT. And what is the nature of your present duties?

Captain LAYTON. I am assigned as Combat Intelligence Officer, Staff, Commander-in-Chief, U. S. Pacific Fleet.

Mr. SONNETT. On December 7, 1941, what was your assignment?

Captain LAYTON. Fleet Intelligence Officer, United States Pacific Fleet.

Mr. SONNETT. And for how long prior to December 7, 1941, were you in that assignment?

Captain LAYTON. One year to a day.

Mr. SONNETT. Will you state, Captain, the nature of your duties as Fleet Intelligence Officer for the Pacific Fleet?

Captain LAYTON. With your permission, I will refresh my memory [183] when appropriate.

Admiral HEWITT. Yes, do.

Captain LAYTON. I will read from the Staff Instructions, Commander-in-Chief, United States Pacific Fleet, dated 1941:

214. *Intelligence Officer*—25.

(a) Directs assembly of Enemy Information and evaluates same, disseminating to various members of staff, indicating where action is required.

(b) Provides Operation Officer and War Plans Officer information essential for current estimates (monograph material).

(c) Maintains Section II (a), (b), (c), (d), (e), (f), and (g) of Estimate of Situation (Enemy Forces). Maintains location plot of Fleets of possible enemy or allies.

(d) Directs counter espionage and counter information.

(e) Maintains Intelligence Records (See Naval Intelligence Manual).

(f) Prepares Fleet Intelligence Bulletins.

(g) Evaluates Intelligence Information received of procedures or practices of other navies and prepares definite recommendations as to any action to be taken within own Fleet.

(h) In charge of censorship.

(i) Internal Security of ships.

(j) Supervises reconnaissance photographic activities.

215. *Assistant Intelligence Officer—26.*

In addition to assisting "25" in all duties of the Intelligence section, performs the following additional assignments:

- (a) Maintains Merchant Marine plot and analysis.
- (b) Prepares silhouettes of own and enemy ships and planes for dissemination to Fleet.
- (c) Assembly, evaluation and dissemination of Enemy information.
- (d) Maintenance of Current Estimate of Situation (Enemy Forces) and situation plot of Fleets of possible enemy or allies.

[184] Mr. SONNETT. Captain, in the discharge of the Staff instructions which you have just quoted, what sources of information did you have?

Captain LAYTON. Principally from the Office of Naval Intelligence, Naval Operations, Navy Department; also from communication intelligence sources, from American Naval Attaches and observers, and information obtained by them through foreign observers and masters, plus information passed to me from British intelligence sources in the Far East, and in some instances information from consuls or State Department representatives in the Far East.

Mr. SONNETT. Of those sources of information, Captain, which would you characterize as your principal source of intelligence information during the months of October, November, and up to December 7, 1941?

Captain LAYTON. Principally dispatch reports from Naval Attaches and observers in the Far East, and daily communication intelligence analyses of traffic flow and delivery, and reports from ONI on Japanese naval organizations, activity, movements, and intentions.

Mr. SONNETT. I show you a photostatic copy of a letter dated November 27, 1941, and enclosed intelligence bulletin number 45- and ask you if you can identify that.

Captain LAYTON. I can. I wrote it; I prepared it; I proof-read it and had it released by the Admiral.

Mr. SONNETT. Will you state what that document is, Captain?

Captain LAYTON. That document shows a summation of the effort made in the CincPac Intelligence Section to assemble all pertinent and timely information on the Japanese naval organization and Japanese forces and installations in the Mandated Islands.

[185] Mr. SONNETT. May we mark this as an exhibit, Admiral? Admiral HEWITT. Yes.

(The document referred to was received and marked "Exhibit 21.") Captain LAYTON. That is as of 27 November 1941.

Mr. SONNETT. Referring to Exhibit 21, which is the document we have just identified, Captain, will you state the highlights of the information therein contained concerning the Japanese carrier force?

Captain LAYTON. Previous bulletins from OpNav and previous intelligence bulletins on the Japanese fleet organization disseminated by CincPac had carried the Japanese carrier division attached to the First and Second Fleets, two divisions to each fleet respectively, plus their plane guard destroyers. Some time between April and July 1941, as I recall it, a reorganization within the Japanese Fleet took place in which a Commander of Number One Air Fleet was detached. He acted as a type commander such as our ComCarrier Division, Pacific, in those days.

From all sources available, it was believed that the Japanese Carrier Fleet, as we called it then, was organized as follows: KAGA, Flagship; Cardiv 1; AKAGI and KAGA plus Desdiv 7, plane guards of four destroyers; Cardiv 2, consisting of the SORYU and the HIRYU with Desdiv 23; (4 destroyers) as plane guards; Cardiv 3: RYUJO and HOSHO with Desdiv 17 of 3 destroyers as plane guard; Cardiv 4: ZUIKAKU and SHOKAKU with Desdiv 3 of 4 destroyers as plane guard; Cardiv —, consisting of the carriers KORYU and KASUGA (MARU)—totaling ten carriers and sixteen destroyers.

Mr. SONNETT. I show you Exhibit 3 of this investigation and ask you if you can identify the document.

[186] Captain LAYTON. I can.

Mr. SONNETT. Would you state what it is, Captain?

Captain LAYTON. It is CinPac-CincPoa Weekly Intelligence Bulletin, the successor to the previous Fleet Intelligence Bulletins I previously identified. It serves the same purpose of keeping the Fleet informed of all matters of general interest regarding the enemy, his techniques, practices, and in some cases historical examples.

Mr. SONNETT. What is the date of that bulletin, Captain?

Captain LAYTON. 8 December 1944. It is Volume 1, Number 22.

Mr. SONNETT. Referring to the contents of Exhibit 3 describing the composition and movements of the Japanese task force which attacked Pearl Harbor on December 7, 1941, will you state whether or not you are familiar with the information therein contained?

Captain LAYTON. I am.

Mr. SONNETT. Did you have a hand in the preparation of that bulletin, Captain?

Captain LAYTON. I did, with one exception. There is an error. It is not "Cardiv 5 less HOSHO." The HOSHO did not belong in Cardiv 5.

Mr. SONNETT. For the sake of the record, Captain, referring to page 13 of Exhibit 3, will you state exactly what the error is to which you have just referred?

Captain LAYTON. That states, "SHOKAKU, ZUIKAKU (Cardiv 5 less HOSHO)." That is an error in that the words "less HOSHO" should be omitted.

Mr. SONNETT. With that exception, Captain, I take it that the information contained in the exhibit concerning the Japanese forces which attacked Pearl Harbor is corrected?

[187] Captain LAYTON. Again may I suggest that the last line, stating, "elements of Desron 1; and about twenty subs" is incorrect, inasmuch as I do not believe that twenty subs ever sortied from Etorofu as was stated. I believe that a minimum of three and a maximum of six accompanied the task force in their trip from Etorofu to a position north of Oahu, arriving there the morning of December 7th.

Mr. SONNETT. The information contained in Exhibit 3, Captain, was obtained from what source?

Captain LAYTON. This came principally from the interrogation of a prisoner of war who had the position of secret yeoman to the Operations Officer of the Commander-in-Chief, Combined Fleet; also from interrogation of other prisoners of war who were a part of the task force, and from captured documents, diaries, maps, and other information.

Mr. SONNETT. Are you able to state, Captain, on the basis of the information which you have received since the attack, with the exceptions you have just noted, the information contained in Exhibit 3 is or is not correct?

Captain LAYTON. With the exceptions I have mentioned above, the information in Exhibit 3 referred to previously is correct. I have since seen in the original Japanese a photostatic copy of Combined Fleet Operation Order Number 1 from the NACHI sunk in Midway Bay, and while it does not lay down specifically each ship by name, it lays down the forces in such terms that, putting it with other unit designations and compositions, I am positive that this force was sortied from Takan Bay, Etorofu Island, on or about 27 November 1941, and is composed of the ships listed herein, with the exceptions I have named.

Mr. SONNETT. For the sake of the record, Captain, would you state [188] the information on page 13 of Exhibit 3 concerning the composition of the attacking Japanese forces correctly so that we have in the record a correct statement of the available information that you now have?

Captain LAYTON. Task title, Striking Force; Commander, Vice Admiral Chuichi Nagumo; Cardiv 1, AKAGI, KAGA; Cardiv 2, HIRYU, SORYU; Cardiv 5, SHOKAKU, ZUIKAKU; Batdiv 3, first seaplane carrier, HIYEI, KIRISHIMA; Crudiv 8, TONE and CHIKUMA; eleventh Fleet of Desron 1 headed by Desron 1 flagship, the light cruiser ABUKUMA, some submarines, five or six tankers.

Mr. SONNETT. On the basis, Captain, of the information which was available when Exhibit 3 was prepared and on the basis of other information which you have subsequently received, can you state the movements of the Japanese task force which attacked Pearl Harbor on December 7, 1941?

Captain LAYTON. To my best recollection, about 20 or 22 November the forces of the striking force departed Saeki Anchorage near Bungo Channel and proceeded to Takan Bay, Etorofu Island, where they assembled and fueled, departed on or about 27 November 1941, East Longitude date. According to the diagram on page 16 of Exhibit 3, they proceeded on an easterly course to a little east of the 155th meridian, whence they struck southeast to a point to the north of Oahu, arriving December 8, 1941, East Longitude date. A subsequently prepared map, which was on exhibit in San Francisco, incidentally, shows an easterly course to a position almost north of Oahu, with a subsequently southerly course to a position just north of Oahu.

Mr. SONNETT. Captain, do you recall on or about November 27, 1941, that a dispatch was received which has been referred to as a warning?

Captain LAYTON. I do.

Mr. SONNETT. Will you state when and how you learned of the [189] dispatch and what action was taken concerning it that day?

Captain LAYTON. In mid-afternoon I learned that such a dispatch had been received and was shown the tape copy in the communications office. Subsequently, Admiral Kimmel sent for me and told me he wanted me to take this dispatch to General Short. I asked him if he wanted me to take this dispatch, as I had done on previous occasions, and show it to him or should I give him a paraphrased copy that

He directed me to make a paraphrased copy and return that paraphrased copy with the dispatch to him for his perusal, which I did. This paraphrased dispatch was prepared and shown to the communication officer to obtain his concurrence that the phraseology did not destroy the import of the original dispatch nor change in any way its import.

When this was completed, I went outside the Admiral's office and awaited an opportunity to enter as there was a large conference with closed door, which meant no admittance. At the first opportunity, I entered and asked if the Admiral desired to see the paraphrase. He examined the paraphrase and about that time, as I recall it, the Chief of Staff of the 14th Naval District, Captain Earle, arrived in civilian clothes and requested the Admiral's pardon for being in civilian clothes, but stated in substance that he had a very urgent message which General Short had delivered to the Commandant of the 14th Naval District and to be further delivered for the perusal of the Commander-in-Chief. He presented the dispatch to the Commander-in-Chief, who showed it to the Chief of Staff and others. Their remarks were in the general tenor that, "This is the same dispatch in substance that we have just received." I should add that the Chief of Staff, 14th Naval District, stated that General Short had requested that no copies be made of their dispatch. There was some discussion then concerning this [190] dispatch and the Army dispatch, their similarity, when Admiral Kimmel turned to me, handed me the paraphrase, and said, "Get this to General Short right away." At the same time, he delivered the dispatch from General Short to the Chief of Staff, 14th Naval District, and we left the Admiral's cabin.

Outside was the officer who had brought General Short's dispatch, Lieutenant Commander Burr, USNR, the Naval Liaison Officer with Headquarters, Hawaiian Department. The Chief of Staff, 14th Naval District, urged me to give Burr the dispatch Admiral Kimmel had given me for delivery to General Short so that they could be delivered simultaneously and by the officially accredited liaison officer, to which I assented. I did not immediately check on his delivery, but I subsequently checked and was told by Lieutenant Commander Burr that it had been delivered.

Mr. SONNETT. Captain, I show you Exhibit 8 of this investigation, which consists of photostatic copies of various dispatches, and ask you if you can identify those as copies of dispatches which you saw.

Captain LAYTON. I don't have a good recollection of this, but I think we received it.

Mr. SONNETT. That is referring to the dispatch on November 24, 1941, from OpNav to CincAF?

Captain LAYTON. Info ComSIXTEEN; ALUSNA, Chungking; ASTALUSA, Shanghai; ALUSNA, Tokyo; CincPac.

Mr. SONNETT. Referring to the other two dispatches in that exhibit, Captain, will you simply state as to those whether you can identify them?

Captain LAYTON. The dispatch from COMFOURTEEN dated 26 November 1941, time date group 260110, was sent by the communication intelligence unit, 14th Naval District, at the direction of Admiral Kimmel, transmitted through [191] me to Commander Rochefort, as a result of the daily traffic analyses, intelligence reports which

the Admiral had seen, and of the discussions we had had concerning the formation of these forces and their movement to the south, amphibious warfare being noted as paramount.

Mr. SONNETT. How about the third one, Captain?

Captain LAYTON. ComSIXTEEN's dispatch of 26 November time date group 261331, I recognize as the dispatch reply by ComTEEN to the dispatch sent by ComFOURTEEN on 260110 in which they gave their estimate of the Japanese naval organization and movements as pertaining to the time in question. We specifically noted that time that the ComSIXTEEN unit could not confirm the suggestion by ComFOURTEEN that submarine and carriers in force were in the Mandates, and noted their best indications were that all First and Second Fleet carriers were still in the Sasebo-Kure area.

Mr. SONNETT. Would it be correct to state, Captain, that the dispatches to which you have just referred summarized the intelligence available to ComFOURTEEN and ComSIXTEEN concerning Japanese naval movements during the preceding month or so?

Captain LAYTON. I would say that. Additionally, I would say that the information also made available to CincPac and CincAF as of those times because those units each served the Commander of that area and all of that information was made available to the Fleet Commanders.

Admiral HEWITT. What was understood by the term "First and Second Fleet carriers" contained in the ComSIXTEEN dispatch?

Captain LAYTON. I believe that ComSIXTEEN was referring to the Japanese naval organization as promulgated by ONI on 29 July 1941, in which, as I have previously stated, there were two carrier divisions attached to each of [192] the First and Second Fleets. ONI listed Cardiv 3, ZUIKAKU, SHOKAKU, with Desdiv 34 plane guard (four destroyers), and Cardiv 5, RYUJO and HOSHO with a destroyer plane guard, division number unknown, as attached to the First Fleet. ONI listed Cardiv 1, AKAGI, KAGA, and Desdiv 23 of four destroyers as plane guards, plus Cardiv 2, SORYU, HIRYU, with Desdiv 23 of four destroyers as plane guards, attached to the Second Fleet. This would be a total of eight carriers assigned to the First and Second Fleets, with no other carriers being listed as assigned to any other fleets.

Mr. SONNETT. So that in substance, Captain, the ComSIXTEEN dispatch of November 26th, in stating that all known First and Second Fleet carriers were believed to be in the Kure-Sasebo area, was understood by you to mean that they estimated that all known Japanese carriers were in that area?

Captain LAYTON. Yes, all known operating carriers.

Mr. SONNETT. And that estimate differed with the ComFOURTEEN estimate in that ComFOURTEEN was of the opinion that at least one Japanese carrier was in the Marshalls at that time?

Captain LAYTON. Yes.

Mr. SONNETT. Subsequent to those dispatches of November 26th, Captain, it was the fact, was it not, that daily communication intelligence summaries were delivered by the radio intelligence unit to me and to Admiral Kimmel?

Captain LAYTON. They were delivered to me for my presentation to Admiral Kimmel.

Mr. SONNETT. Do you have copies of the daily summaries which were so presented through you to Admiral Kimmel?

Captain LAYTON. I have.

[193] Mr. SONNETT. I note, Captain, on the photostatic documents which you have presented, commencing with October 14, 1941, and ending with December 1941, initials in the lower right hand corner. Can you identify those initials?

Captain LAYTON. Those are Admiral Kimmel's initials.

Mr. SONNETT. And do they appear on the original?

Captain LAYTON. They do.

Mr. SONNETT. I also note that certain of these daily communication intelligence summaries have portions underscored. Can you state who underscored those portions?

Captain LAYTON. Certain of the underscoring was performed by Admiral Kimmel as he read them. Certain other marks, including marks by direction finder bearings and positions of ships, were made by myself in plotting them.

Mr. SONNETT. To the best of your knowledge, Captain, are the photostatic copies which you have presented true copies of the original daily communication intelligence summaries presented to Admiral Kimmel?

Captain LAYTON. This is the original copy. They only presented one copy and this is the original. They kept a copy in combat intelligence, 14th Naval District, but this is the original copy as prepared.

Mr. SONNETT. Referring to the document you have before you?

Captain LAYTON. Yes.

Mr. SONNETT. And the document or collection of documents which I show you and which you have supplied are photostatic copies of the original?

Captain LAYTON. They are.

Mr. SONNETT. May we mark them as an exhibit, Admiral?

Admiral HEWITT. Yes.

[194] (The documents referred to were received and marked "Exhibit 22.")

Mr. SONNETT. Referring to Exhibit 22, Captain, and to the daily communication intelligence summaries from November 27 to December 5, inclusive, 1941, will you give us in general the substance of the movements of Japanese forces therein noted?

Captain LAYTON. On 27 November 1941, there was some tactical traffic intercepted from the carriers. There was other traffic addressed to the commanders to play the leading roles in the days that followed on the Southern Expedition; that is, Chiefs of Staff, Second Fleet, Third Fleet, and Combined Air Force were addressed by Southern Theater Commands. It is to be noted that the Commander Combined Air Force commands all naval shore-based air and all naval tender-based planes. He does not have any connection whatsoever with the carriers except in inter-joint force maneuvers.

(The following was read:)

That is, Chiefs of Staff, Second Fleet, Third Fleet, and Combined Air Force were addressed by Southern Theater Commands.

(Continuing)—Bako, Pescadores, Hainan Island, and Saigon. Destroyer Squadrons 4 and 5, who were earmarked for the southern move-

ment, were also addressed, with information to Chief of Staff, S Fleet.

Direction finder net was active and it was noted that the Ma Island stations were also sending bearings in after having silenced for several days.

It was noted that Destroyer Squadron 3, earmarked for the south move, could not be positively identified in the Hainan area but believed to be in company with Cruiser Division 3 there.

[195] It was noted that there was no further detected movement from the Kure-Sasebo area.

There were four enciphered addresses noted. An enciphered address always indicates a new command who has no position in the call sign book, so that these then were placed in a fairly simple code. From these forces one was aware of newly formed units becoming active and generally in an operational or maneuver stage and administrative or routine appearance. These were the number 8 at Taihoku, Formosa; in care of the Yamashita unit addressed for delivery via the RYUJO; Koroku (Naha, Okinawa) air base commander; the military stores depot chief at Keijo, Korea.

It was also noted that there was nothing to indicate the movement yet of the CinC, Third Fleet (corresponding to our Command Amphibious Force).

It was noted that the commander of the Mandates was addressing dispatches to his defense forces there; that Jaluit was sending messages to the Commander Submarine Force and several submarine units; that there was communication between Jaluit, the Saipan Command, and the Commander of the Mandates Field; that there was still in progress there was inferred by communications seen the civil engineering units at Imieji, Jaluit and Eniwetok.

Traffic analysis located the Chitosa Naval Air "Corps" in Saipan and Naval Air Squadron number 24 in the Marshalls. It was noted that there was no further information on the presence of Cruiser Division 5 in the Mandates. It was, however, noted that an aircraft in the Formosa area (Takao) addressed the carriers SHOKAKU and KORYU. It was stated that [196] "Carriers are located in home waters." No information of further movement of the shore-based air forces to Hainan.

Of significance was the location of the Commander of the submarine forces in the Chichijima area.

The unit at Cavite informed us that they had noted Army enciphers being handled on Navy circuits for the past couple of months during which an Army officer named Oka was in communication with these naval circuits with the Combined Army Forces, Imperial Headquarters.

Mr. SONNETT. Was that by dispatch, Captain Layton?

Captain LAYTON. Yes.

Mr. SONNETT. Will you identify the dispatch?

Captain LAYTON. I don't have the time-date requirement.

Mr. SONNETT. Can you supply us with a copy of each of the patches to which you make reference in your testimony?

Captain LAYTON. Yes. Also that this officer, Oka, was associated with the Combined Army, Taiwan, and the Combined Army Force Sama (Hainan).

On the 27th of November the Naval Attache at Shanghai in his dispatch 270855 reported the sightings by master of a foreign vessel which left Hong Kong en route Shanghai of many transports proceeding south singly or in small groups—they averaged three or four ships on each watch Sunday, Monday, and Tuesday—and that the military wharves at Shanghai were abnormally empty of stores.

Dispatch from OpNav, addressed to CincPac and CincAF, information Cinclant, dispatch 272337, which was a war warning and stated that OpNav had been informed by the Chief of Naval Operations that negotiations between Japan and America regarding the stabilization of conditions in the Pacific had ended and an aggressive move by the Japanese was expected within the [197] next few days. The number and equipment of Japanese troops and the organization of Navy task forces indicated an amphibious expedition against either the Philippines, Thailand, or the Kra Peninsula, or possibly Borneo. It directed appropriate defensive deployment preparatory to carrying out the tasks assigned in WPL 46 and said to inform only the district and Army authorities. It stated the War Department was sending a similar warning, and directed continental naval districts, plus Guam and Samoa, to take appropriate measures against sabotage.

Mr. SONNETT. Captain, if I may interrupt you for just a moment, the daily communication summary to which you have just referred, that was for 27 November 1941, was it not?

Captain LAYTON. That was.

Mr. SONNETT. When was that delivered to you, Captain, and by you to Admiral Kimmel?

Captain LAYTON. As I recall it, it was delivered to me in the morning of the 28th of November, 1941, and, as was my custom, I presented it to Admiral Kimmel at about 8:15.

Mr. SONNETT. Was that presentation to Admiral Kimmel of available intelligence information done daily during this period?

Captain LAYTON. This was done daily throughout the period of my association with Admiral Kimmel.

Mr. SONNETT. And in addition to the communication intelligence summary of 27 November, to which you have referred, and to other daily communication intelligence summaries, I take it you also would present whatever other intelligence information you then had available?

Captain LAYTON. That is true.

Mr. SONNETT. Referring to the communication intelligence summary [198] of 27 November and to the statement that "carriers are still located in home waters," will you state what was comprehended by the term "home waters"?

Captain LAYTON. "Home waters" was the term used to consist of Japanese home waters, that is, the drill grounds of the Inland Sea and the approaches to Kyushu, the coastal offshore area, the Isei Bay Area; in general, the waters surrounding Honshu, Shikoku, and Kyushu.

Admiral HEWITT. Did that include Etorofu?

Captain LAYTON. No, sir. Locations in northern Japan, including northern Hokkaido and the Kuriles, were referred to as the high north area.

Mr. SONNETT. To what point east of Japan would the scope "home waters" extend?

Captain LAYTON. Forty, fifty, sixty miles perhaps; maybe more about the same distance that our fleet operations would take us west to San Clemente or San Pedro or San Diego.

Mr. SONNETT. Was that definition of "home waters" which you gave, Captain, the accepted definition in the radio intelligence and in CincPac headquarters?

Captain LAYTON. It was. It was also understood by Admiral Kimmel, who had queried me on these standard phraseology terms in writing those traffic intelligence summaries.

Mr. SONNETT. Referring to the communication intelligence summaries for 28 November and there on up to December 5th, Captain, will you give us the highlights of those?

Captain LAYTON. The highlight on 28 November was the action shown by what was believed to be the Tokyo intelligence broadcast net, plus the direction finder net, and it was stated and underscored that the Japanese radio intelligence net "is operating at full strength upon U. S. Naval [199] Communications and *IS GETTING RESULTS*."

It was noted that Tokyo originators were sending high precedence traffic to the Commander-in-Chief of the Second and Third Fleets, Combined Air Force, the three commands for the south movement. Previous indications that Palao was concerned with this south movement were shown by a typical dispatch where the Chief of Naval General Staff addressed the Chiefs of Staff (normally Chiefs of Staffs are addressed in operational matters) of the Combined Force, Combined Fleet, Fourth Fleet (Mandates Fleet), Third Fleet (Amphibious Force), French Indo-China force, Second Fleet, Resident Naval Officer, Palao.

It was noted that no Combined Fleet units movements were detected that the Commander-in-Chief, Second Fleet, was sending his radio dispatches to the Third Fleet and the Combined Air Force; and that he, Commander-in-Chief, Second Fleet, was paying particular attention in his communications to Crudivs 5 and 7, Desrons 2 and 4, Cardiv 5. It is to be noted in the original it stated "attention Cardiv 5 and 7." This was corrected in pencil to read "Crudiv 5 and 7."

Mr. SONNETT. Do you know when that correction was made, Captain?

Captain LAYTON. I do not recall, but it was either prior to sending to Admiral Kimmel or upon his noting that there was no Cardiv and therefore there was something wrong. I think it was before.

The impression was gained this date that the First Base Force, is, the first section of the Amphibious Force, consisting of about a minelayer division, two minesweeper divisions, one gunboat division, one subchaser squadron of four subchaser divisions, and twenty transports, was not present at that time with the bulk of the Third Fleet in Sasebo but could not be exactly located elsewhere.

[200] It was noted that the Army commander on Formosa was holding communications with the Commander-in-Chief of the Amphibious Force, generally a sure sign of amphibious operations.

It was noted that two Third Fleet units had arrived in the Pescadores but were apparently to return to Kure from Bako.

Nothing significant was noted in the Mandates on the 28th of November summary.

It was observed that Sama, Hainan, addressed the Omura Naval Air Corps in several messages which were for information to Saigon and Tokyo. This would indicate the future location of the Omura Air Corps to be Saigon in the near future.

Takao, Formosa, was addressing French Indo-China forces, the Combined Air Force, and the Chiefs of Staff, Combined Fleet and Second Fleet.

It was noted that the Takao Naval Air Corps was addressing the Sukugawa Air Corps and the Yokosuka Naval Air Corps.

It was noted that a representative of the Hainan office, which had moved to Saigon, was sending messages to the naval bases at Sasebo and Kure.

Additionally, the Commander-in-Chief of the China Fleet was addressing the Commander-in-Chief, Second Fleet, and the Commander-in-Chief of the Third Fleet, the two prime movers in the southern movement, indicating his assistance in some degree.

No submarine traffic of note was observed.

On the 28th of November, ComFOURTEEN addressed to OpNav, information CincAF, and stated:

Following received by British Consul from usually reliable source X Japanese will attack Krakow Isthmus from sea on one [201] December without ultimatum or declaration in order get between Bangkok and Singapore X Attackers will proceed direct from Hainan and Formosa X Main landing to be made at Songkhola X (Singora).

This dispatch from CincAF, addressed to OpNav, CincPac, ComFOURTEEN and ComSIXTEEN for action, established the "winds" code in two variations, one from Tokyo to the diplomatic net and the other from Japanese language foreign broadcasts for more generalized receipt.

ComSIXTEEN in a dispatch of the 28th addressed to CincAF, OpNav, CincPac, ComFOURTEEN, stated that an unidentified ship believed to be a light cruiser had apparently relieved the KASHII as flagship, Southern Expeditionary Fleet; that this ship was now in the Camranh Bay-Saigon area.

OpNav, in dispatch 281633, addressed CincAF, info CincPas, ComSIXTEEN, ComFOURTEEN, and supplied information from State Department, from Saigon, dated November 26th, which stated that five days previously Orange troops and supply vessels began to put in at Saigon, taking up all available quay space; that 20,000 troops had landed and that 10,000 had arrived from the north by rail during the same period; that the total troops in South Indo-China totalled 70,000. It observed that there was an estimate of some 128,000, but considered that too high. It reported that many trucks had landed and were moving troops and supplies to the interior. It observed that this movement is of large proportions and indicates hostilities against Thailand may begin soon. It also forwarded information from Hanoi, also from the State Department, dated November 26th, that said supplies and military equipment, particularly railway, rolling stock, gasoline, landing at Haiphong even recently augmented and are

being trans-shipped south. Among recently landed artillery are tank guns; that the Japanese had recently purchased a considerable number of native boats along the coast of Tongking Province. It was reported they desired to purchase 500. These were being sent south. Further reports from Hanoi, dated November 25th, said that the American Consul had received reliable information that the Governor General had ascertained from an agent around 1 December, without either declaration of war or ultimatum, that the Nippon Navy will attack Kra Isthmus. Simultaneously the Japanese would advance on Thailand; that great increased troop landing movements were noted south; that during last few days about 10,000 men have landed. On November 25th and 26th, 1,500 would go by special train; that in Tongking there were approximately 100 Jap troops and at Gillam there were approximately ninety airplanes. Dated November 26th, Hanoi, was the report that on early November 25th the Haiphong mayor had advised all interested persons that the Japanese intended to sequester all freight en route to China, that the Japanese had demanded keys to all warehouses by noon November 25th.

Mr. SONNETT. Referring to November 29, 1941, Captain, will you point out the highlights of the communication intelligence summary of that day, together with any dispatches of interest received that November 29, 1941?

Captain LAYTON. Communication intelligence summary noted Tokyo intelligence sending eleven messages during the day to commanders, both afloat and ashore, and that the radio intelligence activity at Tokyo sent four long messages to major commanders. It noted that the direction finder net controlled by Tokyo was active during the night, with much activity, and that the Jaluit radio direction finder station included Commander Submarines as an information addressee in a dispatch, indicating, as has previously been shown, that Commander Submarines was somewhere in the approaches to or to enter the Mandated Islands and likely the [203] Marshall Islands. A new air group, the 103rd Naval Air Group, was noted as originating a dispatch whose address was composed completely of enciphered calls, confirming that he was new as he had no call sign book. One of the addresses was a new organization, the 11th Air Fleet. It noted that this address had appeared before and therefore was a mistake, that the use of the word "fleet" was not a mistake. A correction was added that its composition was unknown.

The highlight from an operational point of view was the confirmation of the arrival of Air Squadron Seven in the Takao area. This unit consisted normally of three CHITOSE class seaplane tenders.

It was noted that the presence of Cruiser Division 4 in the Takao area could not be confirmed nor denied, but dispatches and their analysis indicated the following units under the immediate command of CinC Second Fleet, who, it had been shown previously, was in command of the Southern Invasion Force. The commands under his command were CarDiv 3, SubRon 5, SubRon 6, CruDiv 5, CruDiv 7, DesRon 2, DesRon 4, Third Fleet (Amphibious Force), and the First Indo China Force.

It was further noted that associated with the Third Fleet were several battleships. It was further noted that the Commander-in-

Third Fleet, sent a message to ComDesRon 5, Number Two Base Force (consisting of one minelayer division, with at least five other men-of-war, and seventeen merchant ships suspected of being transports and cargo carriers), Number One Base Force, Defense Division One, and ComDesRons 2 and 4.

It was noted also that CinC Third Fleet held extensive communication with CinC Second Fleet and Bako.

Fourth Fleet was noted as relatively inactive, and that the Commander of the Submarine Force had his traffic routed through Saipan, noting that the previous day's traffic had been routed through Chichijima, indicating [204] a southerly or southeasterly movement.

It was noted that ComCruDiv 7 made a movement report type of dispatch from the Sama, Hainan, area and the direction of this movement was not indicated.

The communication intelligence unit at Cavite sent a dispatch on the 29th of November which noted recent developments from radio intelligence: encrypted addresses noted in traffic the last two days, "Commander First Patrol Force"; headquarters this unit apparently at either Yokosuka or Palao; "Fifth Air Battalion" at Takoa; "Commander Airborne Troops," location undetermined; "French Indo-China Billeting Detachment" in Saigon area; "Third Fleet Headquarters" probably at Yokosuka. The CinC Third Fleet shifted his flag from the ASHIGARA to the NAGARA. The CinC Southern Expeditionary Fleet shifted flag from KASHII to CHOKAI (tentative identification).

New arrivals in the Takao area that may be placed in the first section of the task force he referred to in his 261331: DesRon 4, Air Squadron 7, and one command that appears to be a submarine squadron. It appears that the HIYEI and KONGO are definitely associated with these units in the first section, but no movement has been noted on these.

CinC Second Fleet told the key radio stations today and also CinC Combined Fleet that he would leave the Kure zone 0400 hours today, that he would leave Sasebo zone midnight the 1st and enter Bako zone midnight the 2nd.

On the 29th we received OpNav's 290110, addressed to Commander North Pacific Naval Frontier, Commander South Pacific Naval Frontier, information CincPac and Commander Panama Naval Coastal Frontier, which stated that the Army had sent to the Western Defense Command:

Negotiations with Japan appear to be terminated to all practical purposes with only the barest possibility [205] that the Japanese Government might come back and offer to continue X Japanese future action unpredictable but hostile action possible at any moment X if hostilities cannot be avoided the United States desires that Japan commit the first overt act X this policy should not be construed as restricting you to a course of action that might jeopardize your defense X prior or hostile Japanese action you are directed to undertake such reconnaissance and other measures as you deem necessary but these measures should be carried out so as not to alarm civil population or disclose intent X report measures taken \* \* \* should hostilities occur you will carry out the tasks assigned in Rainbow 5 so far as they pertain to Japan X limit dissemination of this highly secret information to minimum essential officers' X WPL 52 is not applicable to Pacific area and will not be placed in effect in that area except as now in force in Southeast Pacific sub area and Panama Naval Coastal Frontier X undertake no offensive action until Japan has committed an overt act X be prepared to carry out tasks assigned in WPL 46 so far as they apply to Japan in case hostilities occur.

He referred in this dispatch to OpNav's 272337, but in error it as referring to his 272338, which was the war warning.

Mr. SONNETT. Referring to the communication intelligence summary for 29 November 1941 and to the dispatches just mentioned to you, Captain, is it correct that the only reference to carriers was reference in the communication intelligence summary to the effect that CarDiv 3 was under the immediate command of the Commanding Officer, Second Fleet?

Captain LAYTON. That is correct.

Mr. SONNETT. What was the composition of CarDiv 3 at that time, Captain? At that time we believed CarDiv 3 to be composed of the RYUJO and HOSHO plus three plane guard destroyers.

[206] Mr. SONNETT. So that, aside from that information, was, on 29 November, no other information relating to Japanese carriers?

Captain LAYTON. There was no other information relating to Japanese carriers.

Mr. SONNETT. Now, referring to 30 November 1941, will you give me the highlights of the communication intelligence summaries and any dispatches received that day?

Captain LAYTON. In general the traffic volume was less, indicating less circuit activity and that back-dated traffic, some as far back as 26 November, was being transmitted. This sort of practice generally indicated a reduction in the urgency of the general over-all picture, plus the possibility of the importance of the re-transmitted dispatches. The only tactical circuit heard was one with the carrier AKAGI and several MARUS.

Mr. SONNETT. What was the significance of the use of the term "tactical" in that connection, Captain?

Captain LAYTON. The term "tactical" implies the use of radio by the vessel itself, calling up directly other vessels and working them directly rather than working vessels through shore stations via the broadcast method, which is the common practice by the Japanese communication.

Mr. SONNETT. Did it connote any operation of the carrier AKAGI?

Captain LAYTON. No. If the AKAGI had been working with other carriers, it would indicate that they were exercising or operating with them. Working with MARUS would indicate more that she was making arrangements for fuel or some such administrative function. A carrier would rarely address a MARU except an oiler or repair vessel or a transport or craft tender in matters of administration and function rather than in the tactical concept of operations.

[207] It was noted that one urgent dispatch was sent from the Chief of the Naval General Staff to the Chiefs of Staff of the following fleets: Combined, Second, Third, Fourth, Combined Air Force, First Marine Force, China Fleet, and Fifth Fleet. The last fleet, the Fifth Fleet, was a new fleet of which little or nothing was known, but it was inferred from long practice that it most likely was a minor force concerned with the northern area.

Mr. SONNETT. What was the northern area to which you referred, Captain?

Captain LAYTON. North Japan, from Ominato on Honshu northward.

Mr. SONNETT. And therefore including the Kuriles?

Captain LAYTON. Including the Kuriles. The traffic on the 30th located the Chiefs of Staff of the Combined Fleet and First Fleet at Kure. By that same message the Chief of Staff of the Second Fleet was not shown in any location, but other indications suggested he was at sea.

It was noted that the Commander-in-Chief, Second Fleet, sent a dispatch to his "usual addressees" of the Third Fleet and Combined Air Force, but he also included therein the battleships KONGO and HIYEI, which placed them as members of the CinC Second's task force.

Mr. SONNETT. Captain, if I may interrupt you for a moment at that point, the HIYEI was one of the battleships which was part of the force which later attacked Pearl Harbor, was it not?

Captain LAYTON. That is correct.

Mr. SONNETT. And on 30 November 1941 that battleship was at sea, having left Etorofu Island?

Captain LAYTON. That is correct. I believe—

Mr. SONNETT. Therefore, is the statement contained in the communication intelligence summary correct or incorrect?

[208] Captain LAYTON. I believe the statement in the communication intelligence summary is correct in this regard. It is very likely that the HIYEI is a bad identification for the HARUNA, which, with the KONGO, took part in the southern expedition. It is believed that this mis-identification, which frequently occurs with ships of one type and within one organization, is an error in fact but not an error in substance.

It is noted that the Commander-in-Chief, Second Fleet, was no longer adding the activities at Palao in his addresses and had not done so for the past two days.

It was noted that the Resident Naval Officer at Palao was holding traffic with Taiwan Army Headquarters.

Commander-in-Chief, Third Fleet, was seen addressing two messages to ComDesRon 2, ComDesRon 4, ComDesRon 5, ComCruDiv 5, First and Second Base Forces, and Defense Division One, being sent for information to CinC Second Fleet. The location of the CinC Third Fleet was not indicated, but there was a strong impression that he was underway.

It was noted that the Jaluit radio addressed the Commander Submarine Force and Naval Air Squadron 24 in one dispatch. The continued association of Jaluit and the Commander Submarine Force, plus his known progress from Japan through the Chichijima area to the Saipan zone, made his destination obviously the Marshalls. Since one of his large units had arrived in the Marshalls some time previously, the communication intelligence summary pointed out that this bore out ComFOURTEEN's unit's previous contention that there was a submarine concentration in the Marshalls, not only the small Fourth Fleet submarines, but also a good portion of the Fleet submarines of the Submarine Force.

It was stated that Naval Air Squadron 24 plus the Yokohama Naval Air [209] Corps, being in the Marshalls, pointed toward air-submarine operations from the Marshalls.

It was also noted that the presence in the Marshalls of a unit of plane guard destroyers would indicate the presence of at least one

carrier in the Mandates, although the presence of that carrier not confirmed.

Continued activity was observed with dispatches to the Second and Third Fleets from the Pescadores, activities including also the combined Air Force and Hainan as addressees; also that the Commander-in-Chief of the China Fleet was becoming more and more an originator of dispatches to the task force, which was then believed southbound. The CinC China Fleet made a movement report to the South China Fleet as an information addressee, indicating intention to proceed south.

Mr. SONNETT. I note, Captain, that on the original of the communication intelligence summary of November 30, 1941, which you have before you, that various portions are underlined in red and in pencil. Can you state who made the underlining?

Captain LAYTON. I believe that I did. I am not positive.

Mr. SONNETT. Was that made before or after the submission of the summary to Admiral Kimmel?

Captain LAYTON. I believe it was made after the submission, although it may have been before.

Mr. SONNETT. I note also on the November 30th communication intelligence summary that in the left-hand lower corner of the summary there are other initials. Would you state whose initials they are?

Captain LAYTON. They are Admiral McMorris' initials. He was at that time head of the War Plans Section.

[210] We received a dispatch late the 30th from ComCincPac, addressed to OpNav, information CincAF, CincPac, ComFOURTEEN, to the effect that a reassignment of all Japanese naval calls had occurred at midnight, that they followed the same garble table pattern as before, and that the shore addressees' signs hadn't changed.

We received a dispatch, time 301709, from OpNav, addressed to CincAF, information CincPac, referring to his dispatch 3004, which he had directed CincAF to cover by air search the Manila-Camranh Bay on three days commencing upon receipt of this dispatch in order to ascertain the destination of the overseas extensions, based on the information that Japan was about to attack Japan on the Kra Isthmus. He was told in this dispatch that if the condition was approaching Thailand, he was to inform MacArthur.

In this dispatch, 301709, he referred to the above dispatch and requested priority dispatch of any contacts, and in case of no contacts being made, to report once a day if the information was all negative.

Mr. SONNETT. Captain, I show you an original memorandum, December 1, 1941, from the Fleet Intelligence Officer to Admiral Kimmel. Can you ask you if you can identify it.

Captain LAYTON. I do.

Mr. SONNETT. Will you state what that document is?

Captain LAYTON. This document was prepared by me late the afternoon of Sunday, 30 November 1941, at the direction of Admiral Kimmel. As my yeoman was absent, the write-up of this memorandum was delayed until December 1st. Admiral Kimmel's directions recall them, were that he wanted the following day, Monday, December 1, a list of Japanese fleet [211] locations, and Monday thereafter. After this was written up, certain substant

and additional information was obtained from the officer who wrote the daily communication intelligence summary as to any future indicated movements and these changed movements were made in red pencil prior to being submitted to Admiral Kimmel. There was, however, one typographical error that was not found until Admiral Kimmel read the paper, in which a typographical error meaning "2 OCL" became "20 CL," which Admiral Kimmel pointed out to me and in his handwriting wrote, "2-OCL" at the side on page 4.

Mr. SONNETT. Admiral, may we mark this document as an exhibit?

Admiral HEWITT. Yes.

(The document referred to was received and marked "Exhibit 23.")

Mr. SONNETT. Captain, referring to Exhibit 23, which is the memorandum you have just identified, do I understand your testimony to be that it was delivered to Admiral Kimmel on December 1, 1941?

Captain LAYTON. That is correct.

Mr. SONNETT. Did you have a discussion with Admiral Kimmel concerning this memorandum after he had read it?

Captain LAYTON. That is correct.

Mr. SONNETT. I note on page 1 of the exhibit the word "Japan" written in pencil opposite certain ships listed under Yokasuka area and similarly the word "Japan" written in pencil opposite certain ships listed under the Kure-Sasebo area. In whose handwriting are those words?

Captain LAYTON. Admiral Kimmel's.

Mr. SONNETT. Referring to Exhibit 23, Captain, will you state the information therein contained concerning the location of Japanese carriers?

Captain LAYTON. On page 3, under the Bako-Takao area, was carried [212] Cadiv 4: 2 CV plus 4 DD; and Cardiv 3: 2 CV and 3 DD. On the last page the supposed carrier KORYU(?) plus plane guards, 1 CV, 4 DD, was carried under the Marshalls area. On page 2 under the Bako-Takao area was carried the KASUGA MARU, 1 XCV.

Mr. SONNETT. Summarizing the information, then, Captain, in this exhibit concerning the whereabouts of Japanese carriers, it appeared that there were Carrier Division 3 and Carrier Division 4 plus the KASUGA MARU thought to be in the Bako-Takao area and the KORYU thought to be in the Marshalls area, is that correct?

Captain LAYTON. That is correct.

Mr. SONNETT. There is no reference in this memorandum, Captain, to Carrier Divisions 1 and 2. Was there any discussion between you and Admiral Kimmel concerning the whereabouts of those carrier divisions?

Captain LAYTON. There was. Admiral Kimmel noted almost immediately that neither Carrier Division 1 nor Carrier Division 2 was listed in this memorandum, and asked me where they were. I said that I had no recent good indications of their locations, but that if I had to guess, I would estimate them in the general Kure zone.

Mr. SONNETT. Did he inquire whether it was possible that those carriers weren't in that zone but were in the Hawaiian area?

Captain LAYTON. Not in those words.

Mr. SONNETT. Will you state the substance of what he said and what you said, as best you recall it?

Captain LAYTON. As best I recall it, Admiral Kimmel said, "You don't know where Carrier Division 1 and Carrier Division 2 are?" and I replied, "No, sir, I do not. I think they are in the waters, but I do not know where they are. The rest of these units feel pretty confident of [213] their location." Then Admiral Kimmel looked at me, as sometimes he would, with somewhat a countenance and yet partially with a twinkle in his eye and said you mean to say that they could be rounding Diamond Head and we wouldn't know it?" or words to that effect. My reply was that I hope they would be sighted before now," or words to that effect.

Mr. SONNETT. Referring to Exhibit 23, Captain, it appears on each of the pages, at the bottom, there is an X mark. Can you explain that?

Captain LAYTON. That X mark was not on this memorandum until the morning prior to its being photostated. I presume that it was placed there by the photostat personnel, as it appeared when brought from them.

Mr. SONNETT. Referring to the communication intelligence summary for December 1, 1941, Captain, was that received after the delivery of your memorandum of December 1, Exhibit 23, and your discussion with Admiral Kimmel, to which you have just testified?

Captain LAYTON. It is my recollection that the 1 December summary was delivered prior to the submission of my location Exhibit 23.

Mr. SONNETT. Will you examine the communication intelligence summary for 1 December 1941 and give us the highlights of that document?

Captain LAYTON. The summary, dated 1 December 1941, confirms previous information from ComSIXTEEN that all service radio forces afloat of the Japanese Navy had changed promptly at 1 December, minus 9 time. Previously service calls had changed a period of six months or more. Calls having last changed on November 1941, it was noted that service calls lasting only one month indicated progressive steps in preparing for active operations on a large scale. The latter part of this [214] sentence is underlined in red pencil and, to my best recollection, was underlined by Admiral Kimmel at the time.

It was noted that the Japanese were adopting more and more radio security provisions by passing old traffic for a period of two or three days prior to the change of calls to defeat the traffic analysis and to attempt to match in a previous call with a new call. This could be done on a series of passing old dispatches.

They had noted also that the Japanese Navy was adopting more and more radio security provisions. It was also noted that there had been made to deliver all dispatches using the old calls prior to the change so that there would be a minimum of undelivered dispatches and resultant confusion and compromise of new call signs. To clarify this, I would say that if your call sign is A and it is changed to Q and a message addressed to you as A, which we knew to be sent to Q, we know that your new call sign is Q. Also it was observed that the large volume of old messages may have been used to pad the total volume of traffic to make it appear as if nothing unusual was pending. This is an old Jap trick.

Traffic analysis showed nothing to indicate that the First Fleet was outside of Empire Waters. I should say that "Empire Waters" is synonymous to "Home waters." The Second Fleet was believed to be proceeding from the Kure-Sasebo area towards South China and Indo-China, and certain units of the Second Fleet task force were already in the Indo-China area. Specifically prominent were Cruiser Division 7 and Destroyer Squadron 3. The Third Fleet traffic showed nothing new in the way of associations, but its associations with South China and Indo-China forces continued. There were no changes in the Mandates or in the Fifth Fleet or in the Combined Air Force.

[215] It was noted that large numbers of the submarines of the Submarine Force were believed to be to the eastward of Yokosuka-Chichijima-Saipan line, and that the flagship of the Submarine Force was somewhere in that general area.

Under "Carriers" it was stated there was no change. This was presumed to mean no change since the previous report, since there had been no report of carriers recently and the last report said in the Empire area, with the exception of Cardiv 3, with the possibility of one carrier in the Mandates.

Mr. SONNETT. Before you go into the dispatches, Captain, I have one question on this. What, if any, discussion do you recall, Captain, with Admiral Kimmel concerning the significance of the change in Japanese service radio calls referred to in the summary of 1 December 1941?

Captain LAYTON. Our discussion merely reviewed what I have previously read in testimony, that it was an unusual step, that it was an advance in radio security, that they were doing everything they could to defeat our radio intelligence, that they were apprehensive that we would know of the move that was underway. Unfortunately, we didn't know the extent of the move completely. But under the conditions obtaining there, we discussed radio intelligence, its faults and its promises, its inexactities and yet the overall picture that it will produce. Whether then or at other times, we discussed the fact that a force can take sealed orders, proceed under radio silence and never be detected except by visual or other sighting.

Mr. SONNETT. Referring again to the communication intelligence summary for 1 December 1941, concerning the Fifth Fleet it was stated, "Nothing to report." I believe you testified that the Fifth Fleet was the [216] fleet in the northern area of Japan.

Captain LAYTON. I don't believe I said the fleet in the northern area. The Fifth Fleet was a new organization of which nothing was known, but from past indications it was believed that the Fifth Fleet was a force assembled for operations in northern waters, as had been done in previous years. There had been a Fifth Fleet prior to that during a maneuver, which was based in the Ominato-Hokkaido area, but, as I recall it at this time, there was no positive information on the Fifth Fleet; and further, Admiral Kimmel had asked me several times to check with the communication intelligence people to see if there wasn't something that we could ascertain regarding this force, its intentions or its composition. You go way back in here and you will find there was considerable discussion when this first came up, but we did not know anything about that fleet.

Mr. SONNETT. Then, the statement "nothing to report" concerning the Fifth Fleet meant that you had no information concerning the fleet and did not mean that you had information indicating no change.

Captain LAYTON. It would mean that there was no information rather than that the information showed no change. If you will, he said under "Combined Air Force" "No change." It would mean that the normal traffic pattern was followed and there were no unusual associations. And also recall that this was a day of call sign change when the identification of these units would be most difficult and an analyst cannot on a flood of new call signs really make any comments; so he was satisfied with the words "no change" and satisfied with the words "nothing to report" as meaning we had nothing to report.

Mr. SONNETT. Do you have any dispatches for 1 December from Captain?

Captain LAYTON. We had a dispatch from OpNav, dated 1 December, [217] addressed to CincAF, ComSIXTEEN, inform CincPac and ComFOURTEEN. It referred to the intrigue in the land, on which conferences in progress in Bangkok—Japanese conferences in Bangkok were considering plans aimed at forcing the Japanese to attack Thai at Padang Bessa near Singora as a countermeasure to Japanese landing at Kota Bharu. Since Thailand intended to consider the first invader as her enemy, the Japanese believed this move in Malaya would force the British to invade Thai at Padang Bessa. Thai would then declare war and request Jap help. This plan apparently had the approval of the Thai Chief of Staff, King. It observed that Thai Government circles had been sharply divided between the pro-Japanese and the pro-British factions until 25 November, but now Wanitto and Shina, who favored joint military action with Japan, had silenced the anti-Jap group and intended to force the Premier, Pibul, to make a decision. The Japanese ambassador in Bangkok expected early and favorable developments if possible.

On 1 December, ComSIXTEEN informed CinC, Asiatic Fleet, which readdressed it for information to CincPac, ComFOURTEEN and OpNav, that Japanese radio station JVJ press tonight in Tokyo at 1700 hours (presumably minus 9 time) stated: "All listeners be sure and listen in at 0700 tomorrow morning since there may be important news." ComSIXTEEN suggested frequencies 7327, 9432, 12275. All times Tokyo, minus 9.

ComSIXTEEN also sent a dispatch on 1 December that radio intelligence had showed that among the arrivals in the Takao area during the past two days were Comdesron 5 in the NATORI, and the NAKA was to join Desron 4 there; units of number Two Fleet and CHOGEI, the latter being considered a tender for submarine divisions, had arrived in the Takao area, and that all units were under command of the CinC Third Fleet. ComSIXTEEN noted that the CinC Second Fleet in the ATAGO had shifted from Kure to the Sasebo [218] communication zone, apparently en route to South China waters.

Referring to ComSIXTEEN dispatch in which Japanese radio station JVJ requested all listeners to "be sure and listen in at 0700 tomorrow morning since there may be important news," the imp

received was that the "winds" code was about to go on the air, meaning by that the fake weather broadcast at the beginning and end of news broadcasts to signal the rupture of relations between either Japan and America or Japan and Britain or Japan and Russia. The monitors were told of this and placed on the double alert, but nothing came of it.

**Mr. SONNETT.** Referring to the communication intelligence summary for December 2nd, Captain, will you give us the highlights of that?

**Captain LAYTON.** Of interest was the Japanese were having difficulty in routing their traffic due to the change of calls and the probable unfamiliarity of operators with the new calls and the location of the units thereof.

Also it was noted that ComSIXTEEN had reported the Second and Third Fleets to be in the Takao area and that Takao radio was broadcasting traffic for these fleets. The broadcast was not heard in Hawaii, but it was observed here in ComFOURTEEN that there was one indication that these two fleets weren't close to Takao. For instance, in several instances Takao forwarded traffic to Tokyo for these fleets. It was summarized as the belief that a large fleet, made up of Second, Third, and First Fleet units, had left the Empire waters and was either not close enough to Takao for good communications or was proceeding on a course not close to Takao.

It was noted that Radio Shanghai handled considerable amounts of traffic which obviously were originated by and destined for units in the Takao area.

[219] It was noted that the Chief of Staff, South China area, continued to appear in Shanghai. It was observed that ComSIXTEEN had reported nine submarines proceeding south of Camranh Bay. These were assessed to be Subrons 5 and 6, which units normally operated with the First Fleet, but which had been repeatedly shown to be included in the Second Fleet task force for southern operations.

Despite the lack of positive identifications, the First Fleet appeared to remain relatively quiet. Inconclusive evidence suggested there may have been a split in the original or normal Combined Fleet Staff and that there may be two supreme commanders with staffs. Lack of identifications was noted as precluding precise information on the Second Fleet, but it contributed to the belief that a large part of the Second Fleet was underway. Cruiser Division 7 and Destroyer Squadron 3 were unlocated since the change of calls.

There was nothing to report concerning the Third Fleet, but the association of the Submarine Force with the Mandates Fleet, that is, the Fourth Fleet, continued. Some traffic for the Fourth Fleet was still seen going through Truk.

Under "Carriers" it was stated:

Almost a complete blank of information on the carriers today. Lack of identifications has somewhat promoted this lack of information. However, since over two hundred service calls have been partially identified since the change on the first of December and not one carrier call has been recovered, it is evident that carrier traffic is at a low ebb.

It was noted that the Combined Air Force, the shore-based air force, continued to be closely associated with the Second, Third, and Indo-China Fleets, and that some units of the Combined Air Force, which previously [220] had been shown in the Takao area, had de-

parted. The direction was not given, but it was inferred as south from their previous associations had been south.

Mr. SONNETT. Do you recall what, if any, discussion you had with Admiral Kimmel concerning the lack of information concerning carriers?

Captain LAYTON. I don't believe that there was any amount of discussion at this time, because in the past when call sign changes had been made, there was a blank—

Mr. SONNETT. Was the fact, as stated in the communication intelligence summary, evident, that the failure to identify one carrier indicated that carrier traffic was definitely at a low ebb?

Captain LAYTON. Admiral Kimmel read that. Whether he commented on it, I do not recall.

Mr. SONNETT. If so, he did no comment to you?

Captain LAYTON. I do not recall that he commented, but, if so, he would have commented to me, I presume.

Mr. SONNETT. What was your own analysis or evaluation of the fact, Captain?

Captain LAYTON. At that time, as best I can recall it, I laid out the fact that there was a lack of identifications and in the past there had been many times when carrier calls didn't appear, as you know, on previous days carrier calls didn't appear when there was identified traffic. There have been many times and sometimes over a considerable period when the carriers just did not appear because they weren't operating. When they are tied at the buoy in Yokosuka, Kure or other naval ports that have wire communications to the mainland, they receive their traffic by land line or on the teletype. They would use high power. They wouldn't be called on broadcasts because their operations were all local. They would also receive and pass considerable local traffic.

[221] Mr. SONNETT. Do you recall whether the previous Japanese advance into Hainan was preceded by a similar lack of carrier traffic?

Captain LAYTON. No. On the contrary—do you mean Hainan or French Indo-China?

Mr. SONNETT. French Indo-China.

Captain LAYTON. On the contrary, in the French Indo-China operations of January and July, 1941, Carrier Division 2 appeared in the traffic, and also at this occasion of the formation of this Southern invasion force under CinC Second Fleet, with the amphibious forces under CinC Third Fleet, plus the shore-based air force and other major commands, it was noted definitely that Cardiv 3 and possibly Cardiv 4 were associated with this force, Cardiv 4 being much more associated and some lack of close association seen. It was also noted that prior to the apparent formation of this task force, Cardiv 3 had been in the Takao area, or Nansei Shoto area, and that Cardiv 3 had returned to the Empire. Having been in that area, and Cardiv 3 was definitely southbound and since Cardiv 4 was likewise suggested as possibly being associated, it was on this basis that I placed Cardiv 3 and Cardiv 4 in my estimate as in the Southern Force. It was believed that had the carriers been intending to operate they would likely have appeared in the traffic.

Mr. SONNETT. That is, you are speaking now of December 2, 1941.

Captain LAYTON. Had other carriers, other than those I have

tioned, other carrier divisions, intended to operate, it would have been suggested in traffic. It is to be noted here that Commander Carriers is not associated in any of these dispatches.

Mr. SONNETT. What I am getting at, Captain, is when you say it was believed, do you refer to December 2, 1941?

[222] Captain LAYTON. Correct.

Mr. SONNETT. And at that time you believed that were the carriers thought to be in home waters in operation, that would have shown up in the traffic?

Captain LAYTON. If the carriers had been operating in active status in home waters, they would have been shown in traffic.

Mr. SONNETT. That was your belief at that time?

Captain LAYTON. That was my belief at that time.

Mr. SONNETT. Referring to the communication intelligence summary of December 2, 1941, referring to the Second Fleet, it stated, "No units have stood out prominently the last two or three days. This is partly due to lack of new identifications but contributes somewhat to the belief that a large part of the Second Fleet is underway in company." Was the lack of traffic concerning the Second Fleet, therefore, a reason for believing that the fleet was underway?

Captain LAYTON. There was no lack of traffic; there was lack of identification. The amount of traffic handled in the rough on Second Fleet circuits, the presence of the call signs on the frequencies used by those people, indicated that they were underway. It wasn't a case of radio silence. Certain units used certain frequencies, just as our Navy does, and the Second Fleet, and certain of its units, was using certain frequencies and traffic was on these frequencies. We had no identification of calls, but the fact that the traffic was on the circuits would suggest that the Second Fleet was underway and probably in company since they weren't handling it by broadcast methods. I would have to talk to the men who wrote this to know what he thought when he wrote it.

Mr. SONNETT. What I am getting at is your evaluation of the radio silence or complete blank of information as it was stated in the December 2, [223] 1941, summary as to carriers.

Captain LAYTON. The difference between the statement here and the statement as it reads, "No units have stood out prominently the last two or three days"; this is referring to the Second and Third Fleets.

Mr. SONNETT. Will you compare this with the statement concerning the carriers, "Almost a complete blank of information on the carriers today"?

Captain LAYTON. I took that to mean that he had no information on the carriers that day.

Mr. SONNETT. In the one case did you believe that the Second Fleet units were underway and in the other case did you believe that the carrier units were not underway and for the same reasons?

Captain LAYTON. I will repeat. The Second Fleet units were using their radios. They were using their radios on known frequencies. They were handling a normal pattern of traffic. A normal number of unidentified calls on these circuits appeared. It was my belief that even though these people were not identified as names, they were units operating normally and at sea. Under "Carriers" there was a complete blank of information, meaning since there had been no identified calls, there was a complete blank of information. The carrier circuits

were definitely not up, that is, there were no calls identified on carriers that would be called carriers. The difference between a unit operating at sea and a unit operating in home waters under an umbrella of broadcasts. The things on broadcast can go to shore stations and shore landing forces and air forces and carrier forces and everything else, and there is no way of identifying who they are, but if a unit is identified under its tactical circuits at sea, that is a force. If a unit is operating under a broadcast, you wouldn't hear them. [224] If units are operating in local waters and using only their local circuits of power or voice, for instance, you cannot hear it at the intercept station. You cannot hear it at Cavite. It is too far away. Whenever they come into local waters, they have always gone to local maneuvering circuits which applies to all vessels in that area. That is the impression I received from reading this, as best I recall it, on 2 December.

Mr. SONNETT. Did you, on or about December 2, 1941, have the impression that the operations of carriers or any other types of ships of war might be conducted in a period of radio silence?

Captain LAYTON. Radio silence is a means that can be used by a force at any time, and that fact had been known to me for a considerable period. It was not particularly apparent to me on December 2 any more than it was on July 16th, for instance, but that fact had been discussed. I don't believe there was any thought of radio silence in my mind in reading this paragraph, nor do I think that the paragraph was written to imply that there was any radio silence of carriers. I know, in fact, now that there was, but at that time, in trying to explain, as best I can, the reaction that I obtained in reading this summary and discussing it with Admiral Kimmel was, for one thing, that it was only the second day of a change of call signs which will run through somewhere around 20,000 calls. It is beyond the capabilities of our organization at this time to be able to tabulate and fit these all in one day. You never could do it if you had all the men in the world, but there isn't any way of doing it. It is only after many days of work that you can lay the traffic down and identify it. Even in those days you see, commanders had several call signs, but the ships had only one.

Mr. SONNETT. Captain, was it not the fact that on December 2, 1941, the radio intelligence unit here had identified over 200 service calls [225] partially since the change on December 1, 1941?

Captain LAYTON. They stated that they had identified partially over 200 service calls.

Mr. SONNETT. Was it not further the fact that the radio intelligence unit said that in view of that fact and the further fact that they hadn't recovered one carrier call, it was evident that carrier radio was at a low ebb?

Captain LAYTON. That is true.

Mr. SONNETT. Did that signify something unusual, then, that day concerning carrier radio traffic?

Captain LAYTON. Not at all, because in the previous days, summaries, there was no significant carrier traffic noted or no remark about that effect. You see, the summary brings out things that are significantly noted, new associations, or if there is undue activity, if people are heard, they put them down, because with this I kept a location sheet. This was the only way that anyone could try to keep track of the Japanese Navy. We had no espionage system that

tell us when they went in and out of Kure or Sasebo or anywhere else. This was the only way we had of doing it; so when they had the identification for one of the Jap ships, if he was working with Yokosuka, they would say so, just as they had the AKAGI in there working with MARUS, so that we could keep track of as many major ships as possible.

The fact that they didn't appear tended to indicate that they were in an inactive status as they had returned in late October from operations in the Nansei Shoto. It was sometimes the custom of the Japanese after operations to take their carriers into the general Inland Sea area, put their air groups shore-based and you wouldn't hear from the carriers for [226] a considerable period of time.

Admiral HEWITT. Did you interpret this note on the carriers, then, as meaning that there was lack of traffic on the carrier frequencies?

Captain LAYTON. Yes, sir, lack of traffic on the carrier frequencies and lack of carriers' call signs appearing on any frequencies even in administrative types of dispatches about paymasters or personnel changes.

Mr. SONNETT. Do you recall, Captain, whether or not you had any discussion with Admiral Kimmel concerning that fact specifically?

Captain LAYTON. I believe I said before that I do not have any recollection that it was brought up, and I have not.

Mr. SONNETT. Do you have any dispatches for December 2nd, Captain?

Captain LAYTON. ComSIXTEEN on the 2nd of December reported to OpNav, CincPac, CincAF, and ComFOURTEEN that the CinC Second and CinC Third Fleets were in the Takao area and Commander Southern Expeditionary Force was in the Sama area. The Commander Southern Expeditionary Force, incidentally, was the Commander who had taken charge at the demonstration off French Indo-China and had remained back in that area as a Fleet Area Commander. ComSIXTEEN noted that broadcasts to fleet units were now being sent by Takao or Bako Radio in addition to Tokyo. ComSIXTEEN also said in this dispatch that the Japanese Ambassador at Bangkok had on the 8th requested permission to destroy all but a limited number of codes.

On 2 December we received a dispatch from CincAF, timed 020345, addressed to OpNav, info CincPac, that a patrol plane had spotted nine submarines, speed 10, course south, at 0230 Greenwich, latitude 13-10 north, longitude 110-00.

And in a dispatch at 020730 CincAF reported to OpNav, info CincPac, that bearing 070 from Saigon, distant 180 miles, three I-61 class [227] submarines had been sighted in cruising formation, headed south at 15 knots; that twenty-one transports were anchored at Camranh Bay with six planes patrolling overhead.

At 012200 the Assistant Naval Attache, Shanghai, reported to OpNav, info CincPac, CincAF, ComSIXTEEN, Naval Attache, Chungking, Naval Attache, Tokyo, as follows: that between Wednesday and Saturday there had arrived there (Shanghai) 14,000 troops plus others on two special trains. He was unable to get an accurate check on numbers. "Equipment with arrivals include field artillery and tanks. Those (troops) sailing from Shanghai week ending 22nd believed to have included Fourth Division."

Mr. SONNETT. Referring to the communication intelligence summary for December 3, 1941, Captain, will you give us the highlights of it?

Captain LAYTON. Highlights were that the volume of traffic normal, with the receiving conditions good. It was observed that "present state of call recovery does not permit much detailed information to be obtained." It noted the extensive use of alternate calls by the major commands and stated that it slowed up the identification of these units, stating that very few units had been positively identified so far.

It was noted that the Chief of the Naval General Staff originated three navy dispatches to CinC Combined, CinC Second, CinC Third Fleets. Tokyo Intelligence originated nine dispatches to the same commanders.

It was observed that the presence of the CinC Second Fleet in the western waters was not revealed in the radio traffic, but the impression was gained that both the Second and Third Fleets were underway, that was not verified by radio intelligence means.

It was noted that some of the Fourth Fleet units were in the Marshall Islands area and included some of the Fourth Fleet staff. [228] stated that the identity of these units was not known.

It was noted that the Sixth Base Force at Jaluit addressed several messages to CinC Fourth Fleet.

It was also noted that some Swatow units were addressed at Saigon, indicating movements south of certain of the South China units at Saigon.

It was noted that Bako Radio originated many dispatches to the Resident Naval Officer at Taihoku, Formosa, and the Task Force Commander.

It stated, "No information on submarines or carriers."

Mr. SONNETT. Do you have any dispatches of December 3rd?

Captain LAYTON. On December 3rd, OpNav addressed CincAF, ComSIXTEEN, information CincPac and ComFOURTEEN, and Tokyo had ordered London, Hong Kong, Singapore, and Manila to destroy their purple machines. The Batavia machine had already been sent to Tokyo. On December 2nd Washington had been directed to destroy their purple machine and all but one copy of other systems. It stated that the British Admiralty that date had reported that the Japanese Embassy in London had complied with its orders to destroy it.

Mr. SONNETT. What was the purple machine, Captain?

Captain LAYTON. It was an electric coding machine.

Mr. SONNETT. Did you have any discussion with Admiral Kimmel concerning the destruction of the purple machine by the Japanese?

Captain LAYTON. All I recall of it is that Admiral Kimmel sent me when he received this dispatch I have just mentioned, or one similar to it, and asked what was the purple machine. I told him that I did not know, that I would find out. I then approached Lieutenant Colonel the Fleet Security Officer, who had come from Washington, and asked him, and he told me it was the Japanese diplomatic electrical coding machine.

[229] Mr. SONNETT. Did you communicate that to Admiral Kimmel?

Captain LAYTON. Which information I communicated to Admiral Kimmel.

Mr. SONNETT. What, if any, evaluation was made of the fact that the Japanese were going to destroy the purple machine?

Captain LAYTON. It indicated that the Japanese were preparing for any or all eventualities and most of the addresses were in the southern area, with the exception of Washington and London.

Mr. SONNETT. Would you know whether or not the Japanese Consul in Hawaii had a purple machine?

Captain LAYTON. I did not know, but I have subsequently discovered that he did not.

Mr. SONNETT. Did you know at this time whether or not the Japanese Consul in Hawaii was destroying or burning papers?

Captain LAYTON. He was not at that time.

Mr. SONNETT. On December 3, 1941?

Captain LAYTON. I don't believe it was the 3rd. I thought it was a little bit later. It may have been the 3rd. I don't recall which day I was informed that he was burning his papers, and I said, "That fits the picture that the Japanese are preparing for something, destroying their codes."

Mr. SONNETT. Was it brought to Admiral Kimmel's attention that the Japanese Consul in Hawaii was burning papers?

Captain LAYTON. Yes, sir.

Mr. SONNETT. Do you know, Captain, whether or not the Army in Hawaii was advised of the information concerning the Japanese destruction of the purple machine or of the Japanese destruction of records in Hawaii?

[230] Captain LAYTON. As I recall it, Commander Rochefort told me that he had informed his opposite number in the Army the Japanese were destroying their secret and confidential papers not only in Hawaii but in other places. I don't know whether he told them that they were destroying the purple machine. As a matter of fact, I wouldn't think that he would. I don't know. It is my best recollection that I told Colonel Raley that the Japanese were destroying their important papers and code books and everything else not only here but everywhere else. I didn't want to mention the purple machine because I didn't want to explain what I meant.

Mr. SONNETT. Do you have any other dispatches, Captain?

Captain LAYTON. OpNav sent another dispatch, containing the same information, time 031850, addressed for action to ComSIXTEEN, CincPac, ComFOURTEEN, CincAF, and it said:

Highly reliable information has been received that categoric and urgent instructions were sent yesterday to Japanese diplomatic and consular posts at Hong Kong X Singapore X Batavia X Manila X Washington X and London to destroy most of their codes and ciphers at once and to burn all other important confidential and secret documents.

We received a dispatch from the Naval Attache, Singapore, time 020335, on the 3rd, which stated that CinC China had issued the following to British and Allied merchant ships in that area: All ships north of Hong Kong proceed south thereof, Crown Colony's and all ocean-going ships to Singapore, proceeding to Singapore,

and bring such shipyard equipment as possible X except for coast Malaya and West Borneo no vessels leave near northbound without permission XX Dutch issued orders none their ships go north their islands without authority.

Mr. SONNETT. Referring to the intelligence summary for December 4, 1941, Captain, will you give us the high lights of that?

[231] Captain LAYTON. It was noted that Takao Radio instituted a Fleet broadcast using the same prefix indicator that Radio Tokyo used. This was rather an important move from a communication point of view in that you had two complete broadcasts which carried the same indicators but had different serial numbers. It also indicated that Takao had now assumed the position that Tokyo had been in two weeks before of handling major fleet traffic on high frequency circuits. It was noted, however, that only few messages had been placed on that broadcast. Moreover, it was noted that there was a large number of urgent messages, most of these from Tokyo to naval commanders, and, among others, there was a Tokyo intelligence patch in seven parts addressed to the Chiefs of Staff, China Fleet, Combined Fleet, the Third Fleet, the South China Fleet, the French Indo-China Force, and Sama, Hainan. In all, Tokyo radio intelligence sent out twelve dispatches to the major commanders.

It was noted that the outstanding item of the day's traffic was the lack of messages originating from CinC Second Fleet and CinC Third Fleet. It was noted that these were previously very talkative but were now very quiet. While the fleet calls were not as yet identified, the lack of traffic from these commands could not be ascribed to that. They are still prominent as addressees. It was believed now that the CinC Second Fleet was in the vicinity of Takao and that the conflicting evidence before was due to the lack of broadcasts that had been brought up. CinC Combined Fleet sent one message to an unidentified unit for action and for information to the Third Base Force at Palao, CinC Second Fleet, and CinC Third Fleet, thereby renewing Palao's association with the South Sea Invasion Force.

CinC Fourth Fleet sent a message to the Chief of Staff Combined Air Force, information Eleventh Air Corps, China Fleet, Air, and Air Squadron Twenty-four, the Third Base Force at Palao and the Fourth Base Force at Truk. This undoubtedly had to do with air movements or preparations. They couldn't find any further in the day's traffic to check on the present of Fourth Fleet units in the Marshalls, as has previously been stated. Jaluit Radio was associated with the Commander Submarine Force and with the Radio and with an unidentified call which was believed to be a tanker.

There was an impression, a definite impression, as I recall it, from this summary that these commanders, who had previously been active in originating dispatches, from the dispatches which tied their groups, suddenly now became quiet, but they were still addressees of many intelligence reports; they were the addressees of many other dispatches from Empire and shore-based originators.

Now you do get the impression they are at sea and maintaining radio silence. They are in the traffic, but they don't send the traffic themselves. I would like to state here that the Japanese then hadn't found out the hidden little trick of putting it from no originator. We told them that in the war, which they dutifully followed thereafter, not to our chagrin.

Mr. SONNETT. Do you have any dispatches for December 4, Captain?

Captain LAYTON. Assistant Naval Attache, Shanghai, dispatch, time 0304, received on 4 December, stated that an unidentified modern ton cargo ship converted as a seaplane tender. It had a flush raised forecastle, raked bow, cruiser stern, armed with one 4.7 inch gun on an elevated platform forward and one also on the poop. Also Japanese naval craft sighted were as follows: On the 15th off Shanghai were seven transports; on the 20th northeast of Amoy was a 1,000 ton seaplane carrier, having eight [233] catapults. Assistant Naval Attache's dispatch from Shanghai, 020702, received 11 December, in general stated that local Nazis of military age were being sent to Japan for training and believed to be for duty on German vessels interned there. Eighty men, average age thirty, were known to have departed the past ten days; also that the officials in the Shanghai area were exerting pressure on the French Concession to discharge Anglo-American volunteer members of the police forces, who were to be replaced by Germans and Italians. He confirmed previous movements of the large liners KAMAKURA MARU, KITA MARU, and the ARGENTINE MARU, had been carrying building material, personnel, oil, and supplies to the Caroline Islands; that 3,000 laborers had landed at Jaluit, and that the following three islands were being specially developed: Katherine, Koro, and Mejit.

Received from the Naval Attache, Tokyo, time 030630, received 11 December, a dispatch to the effect that two escort vessels had recently completed in the Yokohama dockyard; that one trans-loaded with aircraft plus another one carrying naval personnel departed Yokohama 27 November.

SONNETT. Referring to the communication intelligence summary for December 5, 1941, Captain, will you give us the highlights of it?

Captain LAYTON. It was noted that the traffic volume was extremely heavy and all circuits were overloaded. There were several new intercept schedules heard, and Ominato Radio was working with Otsu and Bako, and that the Takao broadcast was handling traffic for the Second and Third Fleets, and that the Tokyo broadcast was handling traffic for those units. It was observed that some traffic for the broadcast was several days old. It was adduced that this indicated uncertainty of delivery [234] existing in the radio operation. It was also seen that there were many messages of high intelligence which appeared to have caused a jammed condition on the circuits. They quoted a plain language dispatch sent by Captain, OKAWA, from Tokyo to Takao, probably for further relay, and which was addressed to Fujihara, Chief of the Political Affairs Bureau, which

in reference to the Far Eastern Crisis, what you said is considered important and but proceed with what you are doing, specific orders will be issued.

SONNETT. Captain, what was the OKAWA? Do you know?

Captain LAYTON. I do not know.

It was noted that neither the Second Fleet Commander nor the Third Fleet Commander originated any traffic. They were still frequently addressed and are receiving their traffic over the broadcasts. It was believed that they were undoubtedly in the Takao area or

farther south since the Takao broadcast handled nearly all their traffic.

It was stated that no traffic from the Commander Carriers of Submarine Force had been seen either.

Third Fleet. It was noted that the Commander Fourteenth Army was aboard the RYUJO MARU in the Third Fleet and that a number of MARUS had been addressing the CinC Third Fleet.

Mr. SONNETT. What was a MARU, Captain?

Captain LAYTON. A MARU is any Japanese merchant vessel. Rather than saying merchant vessel or Japanese merchant vessel you say MARU, because all Japanese merchant vessels have MARU at the ends of their names; so that is another little standardization that we use.

The Flag Secretary of the Fourth Fleet and the Staff Communication Officer of the Fourth Fleet were addressed in Jaluit, strengthening the [235] impression that the CinC Fourth Fleet was in the Marshalls. Again we had an association between the Palao Radio, the Resident Naval Officer at Palao, and Commander Second Fleet by being addressed by the Commander South China Fleet.

Sama, Hainan, addressed much traffic to CinC Second Fleet, and Bako in the Pescadores sent considerable traffic to the Second and Third Fleets. The Commander of the Combined Air Force appeared to be busy with the movement of his air corps. Shiogama Air and at least two other unidentified air corps appeared to be moving, probably to Indo-China.

On December 5th we received no intelligence traffic from any source whatsoever.

Mr. SONNETT. Referring to the communication intelligence summary for December 6, 1941, Captain, do you know whether that was delivered to Admiral Kimmel before or after the attack on December 7th?

Captain LAYTON. It was delivered to me after the attack on December 7th and Admiral Kimmel did not see it and was too busy to read it. It contained no positive information of anything we didn't already know and, in fact, contained nothing of what we then did know.

Mr. SONNETT. Did you have any dispatches received prior to the attack on December 7th?

Captain LAYTON. On 7 December there was a dispatch and I believe it was received after the attack, but I am not positive. It may have come in in the early morning and I didn't see it until afterwards. It was a dispatch which ComSIXTEEN sent to OpNav, information CinCPac, CinCAF, and ComFOURTEEN. They estimated the South China Air Force Headquarters were now in the Saigon area; at least four groups of planes, strength unknown, were at that station; that heavy concentration of aircraft were at Formosa and [236] based at Takao, Taichu, and Kagi naval air stations; that eight MARU air tenders, that is, converted ex-merchant marine, probably freighters to seaplane tenders, were in the South China area, five of them being in the Takao general zone, one near Saigon, and two near Sama, Hainan; that the direction finder bearings indicated the AKAGI was moving south from the Empire and now was in the Nansei Shoto, Okinawa, area. "Estimates based on call recoveries

since 1 December and may be considered conservative." This estimate is based on call sign recovery since 1 December and may be considered conservative. The large volume of high precedence traffic from air activities in the Saigon area indicates extensive air operations may be imminent.

Mr. SONNETT. Were there any other dispatches received before the attack?

Captain LAYTON. These are dispatches I have in my file, and whether they came in to us before, I don't know. A dispatch, time 060550, from Assistant Naval Attaché, Shanghai, and dated 7 December 1941, reported that approximately 14,000 troops who had arrived in Shanghai by rail the latter part of the week before had embarked and departed south; that the equipment included ninety armored cars, and that the Japanese gendarmerie force in Shanghai had been augmented by a thousand persons brought from Nanking and Hanchow. The Assistant Naval Attaché, Shanghai, remarked that there was "no apparent reason for this increase unless policing of additional local areas is contemplated."

A dispatch received on 6 December 1941 from CinC Asiatic Fleet, addressed to OpNav, information CinCPac, ComSIXTEEN, and ComFOURTEEN, stated that the CinCChina reported:

25 Ship convoy with escort 6 cruisers and 10 destroyers lat 8 north 106 east at 0316 GCT today X Convoy 10 ships with [237] 2 cruisers and 10 destroyers 7-40 north 106-20 east 2 hours later X All on course west X 3 additional ships 7-51 north 105 east at 0442 course 310 X This indicates all forces will make for Kohtron X By scouting force sighted 30 ships and 1 large cruiser anchored Camranh Bay X

A dispatch from the Naval Observer, Wellington, time 050600, received on 6 December 1941, which said that the naval intelligence, New Zealand, had informed our Naval Observer there in confidence and not for transmission that the Jap Consul in Wellington had received orders to destroy his codes. A reply, using the code word set up for that, indicating compliance therewith, had been sent to Tokyo. Also he reported that the Japanese consuls in Australia and New Zealand had been directed to forward all possible geographical data. He enjoined secrecy in this matter to keep the source still available to the British.

Admiral HEWITT. We will adjourn at this time until 9:15, tomorrow morning.

(The investigation was then, at 5:30 p. m., adjourned until 9:15 a. m., 30 May 1945.)

## [238] PROCEEDINGS OF THE HEWITT INQUIRY

## ELEVENTH DAY

Pursuant to notice, the investigation met at the Visiting Flag Officer's Office, Headquarters, Commander-in-Chief, U. S. Pacific Fleet and Pacific Ocean Areas, Pearl Harbor, Oahu, T. H., at 9:15 a. m., Wednesday 30 May 1945.

Present: Admiral H. Kent Hewitt, USN; Mr. John F. Sonnett; Lieutenant Commander Benjamin H. Griswold, USNR; Lieutenant John Ford Baecher, USNR; and Ship's Clerk Ben Harold, USNR.

Captain Edwin T. Layton, USN, entered and, after having been warned that his previous oath was still binding, resumed his seat as witness.

Mr. SONNETT. Captain, I show you Exhibit 15 of the Naval Court of Inquiry, which is a certified copy of an OPNav dispatch of November 24th, and ask you whether you recall having seen that.

Captain LAYTON. Yes, I recall it.

Mr. SONNETT. May we mark that as an exhibit, Admiral, before this investigation?

Admiral HEWITT. Yes.

(The dispatch referred to was received and marked "Exhibit 24.")

Captain LAYTON. I believe that is the dispatch that Admiral Kimmel had me take and show to General Short in person the day it was received. I gave it to Admiral Short for his perusal shortly after 12:15, as he was then listening to the news, which, I believe, ran from 12 to 12:15, at his headquarters. He read it and asked me what naval air strength we had at Guam [239] and I replied that as far as I knew, we had no naval air strength unless there was a transient patrol plane or so passing through. He asked me concerning the former landing field at Guam and I told him that while I did not know at first hand, it was my impression that some time after 1930 and probably before 1932 the shore-based Marine observation group that was stationed at Guam had been withdrawn and the airfield had been allowed to revert to its original state, that is, unimproved and not kept up. General Short then asked about the defenses of Guam. I told him again I did not know at first hand, but when in Tokyo on duty at the American Embassy, I had seen a copy of a memorandum or *aide memoire* submitted to the Japanese Government, informing them that all coast defense guns on Guam had been withdrawn and that Guam was to be considered thereafter as an undefended island. While I do not recall the date of this note, it is my impression it was somewhere around 1933, possibly 1934. General Short made some remark to the effect about appeasing Japan both in the past and in the present and returned the note to me and thanked me for bringing

it. I returned the note to CincPac Headquarters and reported that I had completed the mission sent on.

Mr. SONNETT. Referring to the sentences in exhibit 24 of this investigation, which is the OpNav dispatch of November 24th, follows:

Chances of favorable outcome of negotiations with Japan very doubtful. This situation coupled with statements of Japanese Government and movements of their naval and military forces indicate in our opinion that a surprise aggressive move in any direction including attack on Philippines or Guam is a possibility.

will you state, Captain, what conversation you had with Admiral Kimmel concerning your evaluation or estimate of that portion of the dispatch?

[240] Captain LAYTON. I don't recall that Admiral Kimmel asked me specifically for my evaluation of that special part of the dispatch. I do recall that in general a statement was made to the effect that that was borne out by the present information we had in hand; an aggressive move was then under way. I believe that the fact the Philippines and Guam were mentioned was given particular attention, although I do not believe it was stressed in my presence. I know that when dispatches of this nature or other important dispatches having to do with fleet movements or dispositions were received, the Admiral, the Chief of Staff, War Plans Officer, Operations Officer, and the Aviation Officer were closeted with the Admiral for sometimes hours at a time. During these conferences, I was seldom, if ever, present.

Mr. SONNETT. Did the opinion of the Chief of Naval Operations expressed in this dispatch, namely, that the movements of the Japanese naval and military forces and statements of the government indicate a surprise aggressive movement in any direction, including attack on the Philippines or Guam, coincide or agree with your own estimate of the situation at that time?

Captain LAYTON. As I recall it, and it is more than three and half years since then, and it is very difficult to recall what you thought after this period, and particularly when I have been engaged in fleet intelligence work daily since then—I believe that my impression was that they have the same information we have; they note this southern movement as we do, and they have found in their judgment that the Japanese may not leave us on their flank either. That had been the subject of conversation, as to whether the Japanese would proceed with the indicated movements, leaving us on their flank, or would they have to take us out on the way down. It was my personal impression, and I so stated, that Japan had never yet, with [241] the conception of Russia, left a strong enemy on a flank.

Mr. SONNETT. It appears from the exhibit, Captain, that an attack on American territory, namely, the Philippines or Guam, was regarded as a possibility by the Chief of Naval Operations. Was that in accord with your estimate at the time?

Captain LAYTON. The possibility of a Japanese attack on the Philippines or Guam was in accord with my belief at that time.

Mr. SONNETT. Did you express that belief to Admiral Kimmel?

Captain LAYTON. I don't believe that my belief was specifically requested as you have so stated it. I believe he asked me to the extent that, didn't this bear out what we were thinking at the time, namely,

would they or would they not leave us on the flank when they moved south? By the possibility of the Japanese leaving us on their flank, I meant, and it was understood, I believe, that the Japanese in their move into French Indo-China and Thailand or even across into Burma to cut the Burma Road, as was conjectured by some observers, would consider our position in the Philippines as a direct menace and threat on their immediate flank; that should they leave us on their flank, our position in the Philippines would be a threat to their line of communications should we decide to take action in assistance to Great Britain or French Indo-China or the Thai operations, as the case might be.

Mr. SONNETT. By that, Captain, do you mean that you expected an attack on the Philippines or Guam in the event of Japanese war with the United States?

Captain LAYTON. I did not expect the attack, but I was not unaware of its possibilities. In other words, the whole problem was would the Japanese leave us on their flank? If they would leave us, they wouldn't [242] attack. On the other hand, if they left us there, we would be a threat. So, since the Japanese have rarely left a strong enemy in an immediate flank, they might attack so as to protect their own wing, their own line of communications, as a measure of security.

Mr. SONNETT. What directions of movement were considered in your estimate other than Japanese movement or attack on the Philippines or Guam?

Captain LAYTON. My estimate was there were two task forces under CinC Second Fleet, one proceeding down south from the Formosa-Hainan-Bako area into the South China Sea and aiming at the Kra Isthmus or its vicinity, the Gulf of Siam. The other task force was proceeding via Palao in the Western Carolines with the intention perhaps of threatening Timor, Celebes, or other Dutch holdings in that general zone.

Mr. SONNETT. Did you at that time, Captain, believe or estimate that in the event of war with Japan, an attack on Hawaii was a possibility?

Captain LAYTON. I did not believe it a possibility at that time.

Mr. SONNETT. Did you know whether or not the Commander-in-Chief believed at that time that an attack on Hawaii was a possibility?

Captain LAYTON. I do not know.

Mr. SONNETT. Captain, I show you exhibit 8 of the Naval Court of Inquiry, which is a Pacific Fleet Confidential Letter number 2CL-41 (Revised) of October 14, 1941, and ask you whether you were familiar with that.

Captain LAYTON. I had seen it.

Mr. SONNETT. Referring to paragraph 2 (b) of that letter, does it not appear that the security of the fleet operating and based in the Hawaiian area was predicated at that time on two assumptions and that one of the assumptions was that a declaration of war might be preceded by [243] a surprise attack upon ships in Pearl Harbor?

Captain LAYTON. That is what this letter from the Commander-in-Chief says.

Mr. SONNETT. Now, was that not, Captain, an estimate, then, of CincPac concerning the possibility or indicating the possibility of a surprise attack at Pearl Harbor prior to a declaration of war?

Captain LAYTON. I presume it was. I was not consulted on the writing of that letter; therefore, I cannot speak at first hand. Its face value would say that that was true.

Mr. SONNETT. Did your own estimate agree with that of the Commander-in-Chief, Pacific Fleet, on that subject?

Captain LAYTON. Yes. That had been discussed in the past. As a matter of fact, that point of Japan's actions was informally discussed with Admiral Kimmel on the occasion some months before Pearl Harbor when I presented him with a translation of a Japanese novel which purported to tell for the layman what would be expected during a Japanese-American war, and in which were laid out three problems for the American Commander-in-Chief, who, they presumed, would proceed from the West Coast and be based in Pearl Harbor. One problem was the possibility of a surprise task force raid on the Hawaiian Islands. Another possibility was an expedition or raid in the Aleutian Islands. As I recall it, the third proposition was an amphibious expedition against the Hawaiian Islands. Under the first of these, the surprise raid by a task force on the Hawaiian Islands, they listed in this book the possible composition of such a task force, listing fast carriers, KONGO class battleships, and NACHI class cruisers, stating that because this force was fast and America had no fast battleships, it could run away from any superior force; because the force was strong, it could close with [244] any inferior force and destroy it.

This very point was informally discussed and the Admiral asked me what I thought concerning such a proposition. As I recall it, I stated that that was a potentiality the Japanese always had and that I hoped that our air search would find them before they got too close. He then excused me and thereafter sent for other officers. Whether they discussed this point or not, I do not know, as I was not present.

Mr. SONNETT. It was, Captain, I take it, a part of your duties to maintain an estimate of the situation so far as possible enemy action was concerned, was it not?

Captain LAYTON. It was, to maintain the enemy forces section of the estimate. In other words, an estimate of the situation is built up from all material, political, economic, military, and so forth. Particularly, an estimate regarding a nation is a very large and a very bulky document; yet it is a result of considerable information and clear thinking. My job was to keep up that part of the enemy forces, which my 1 December memorandum purports to be.

Admiral HEWITT. Does that include possible enemy courses of action?

Captain LAYTON. I don't believe so, sir. I would have to get out the War College book. Unless it has been changed—this was written when the old gray-covered book was in use. I would have to check to see.

Admiral HEWITT. It is not your recollection that it was your duty to formulate possible enemy courses of action?

Captain LAYTON. No, sir, I don't think that was part of it. This was only formulation of enemy forces. I think possible enemy courses was part of the Plans Division. I furnished them with the psychological and other things for the broad estimate of the first part

[245] Admiral HEWITT. The composition and position of the fleet?

Captain LAYTON. The composition and position of the fleet was my section, too, of the estimate. It was at best, of course, the best information that we had, but was lacking considerably in detail, particularly on land forces and certain of the air forces, although our day to day check on the intelligence, even though at times it was a little contradictory, when the end averaged out, was we knew there was a considerable concentration of air, for instance, in the Southern Formosa-French Indo-China-Hainan area, and at the same time there was a concentration of some submarines in the Marshalls. There was a concentration of considerable naval force—as a matter of fact, a large naval force—in the South China Sea area which was amphibious in nature. And my estimate showed that remaining in the Empire were only the battleships of Batdivs 1 and 2, the cruisers of Crudiv 6, which were put down as tentatively moved to the Mandates, which they did, Desron 1, and probably or possibly Cardivs 1 and 2, plus Cruiser Division 8 also. Of the Pearl Harbor task force, with the exception of the first section of Batdiv 3, that is, the HIYEI and KIRISHIMA, and the two carriers that we carried down in the Hainan area, the Pearl Harbor task force was carried as in home waters.

Mr. SONNETT. Captain, I show you exhibit 23 of the Naval Court of Inquiry record, which is the Joint Coastal Frontier Defense Plan, Hawaiian Department, Annex number VII, Section VI, Joint Agreements, dated 28 March 1941, and Addendum 1, Naval Base Defense Air Force Operation Plan number A-1-41. I refer you to the summary of the situation set forth in the Addendum and to the possible enemy action also set forth in the Addendum, and ask whether that was in accord with your estimate during the year 1941.

[246] Captain LAYTON. I don't recall ever having seen this document, as it was produced in another command. It was not submitted to me, nor was I consulted regarding it; therefore, anything I say now concerning this document would be as I learn it at this instant.

Mr. SONNETT. Do you know whether the summary of the situation as expressed in that document, Addendum 1, was in accord with your views as of October 1941?

Captain LAYTON. In general, I would say that the sub-paragraphs listed therein had been in my mind, probably not in the same phraseology but all the points listed therein had been matters that had been previously discussed and which I was well aware of.

Mr. SONNETT. Now, does that apply, Captain, as well to the statement in the Summary of the Situation contained in Addendum 1 to the effect that, "It appears possible that Orange submarines and/or an Orange fast raiding force might arrive in Hawaiian waters with no prior warning from our intelligence services"?

Captain LAYTON. I did not write that sentence and I would not write it in that way, although I would say the same thing. Since my interest was purely intelligence, my statement would be, as I have said before, any force under sealed orders can sail without any warning, unless you have an efficient espionage and spy system which can give you all the information, and it can arrive at any point, unless it is detected by visual or other sighting. That is the same language being used there, only differently phrased.

Mr. SONNETT. I refer you to the paragraph of Addendum 1 entitled "Possible Enemy Action," sub-paragraph (a), as follows:

A declaration of war might be preceded by (1) a surprise submarine attack on ships in the operating area; (2) a surprise attack on Oahu, including ships [247] installations in Pearl Harbor; (3) a combination of these two.

I also refer you to sub-paragraph (b), reading as follows:

It appears that the most likely and dangerous form of attack on Oahu would be an air attack. It is believed that at present such an attack would most likely be launched from one or more carriers which would probably approach inside 300 miles.

Do those statements accord with your estimate of possible enemy action as of October or November, 1941?

Captain LAYTON. Those statements are in accord with other considerations of possible enemy action which I had thought of. Paragraph wherein carriers would have to come within 300 miles, was not one of my thoughts. That is, the 300 miles was a matter of air operational range, and I merely thought that carriers would approach within launch range, and had expressed the hope that such a task force would be found by our air search prior to getting to within striking range.

Mr. SONNETT. Referring to the so-called war warning of November 27, 1941, Captain, which was exhibit 17 of the Naval Court of Inquiry record, is that the dispatch to which you referred in your testimony yesterday?

Captain LAYTON. Yes.

Mr. SONNETT. May we mark that, Admiral, as an exhibit in this case?

Admiral HEWITT. Yes.

(The document referred to was received and marked "Exhibit 25.")

Mr. SONNETT. Was that the dispatch, Captain, which you paraphrased and which paraphrase you were instructed to deliver to General Short, about which you testified yesterday?

[248] Captain LAYTON. This is a copy of the dispatch which Admiral Kimmel directed me to paraphrase and deliver to General Short on the late afternoon or early evening of 27 November.

Mr. SONNETT. Exhibit 25, the war warning, Captain, has as its statement the following:

This dispatch is to be considered a war warning.

What, if any, discussion of that phrase did you have with Admiral Kimmel?

Captain LAYTON. I had no discussion with Admiral Kimmel about that phrase. After Admiral Kimmel received this dispatch, he called in closed conference, as I have previously testified. He sent for me and told me to deliver this dispatch to General Short. He acquiesced to a paraphrase being delivered to General Short and I retired to make the paraphrase. When I brought the paraphrase back, the Chief of Staff of the Fourteenth Naval District brought in an urgent dispatch from General Short, which was handed to Admiral Kimmel. During my wait in the Admiral's cabin to receive the Admiral's approval of my paraphrase and receive it for delivery to General Short, I asked no questions that I recall. I did not take part in the discussion. I feel sure.

Mr. SONNETT. Did you, Captain, evaluate that dispatch as indicating that war with Japan was apt to break out in the near future?

Captain LAYTON. I felt that.

Mr. SONNETT. At that time, Captain, was it the fact that your estimate of the location of the Japanese carriers, briefly, was as follows: That one carrier was possibly in the Marshalls and that, according to ComSIXTEEN, the First and Second Fleet carriers were in home waters?

Captain LAYTON. I believe that was a fact.

Mr. SONNETT. Referring to Exhibit 8 of this investigation, Captain, and to the ComSIXTEEN dispatch of 26 November, does it appear that ComSIXTEEN [249] was of the opinion that Carrier Division 3 was expected to operate in the Mandates?

Captain LAYTON. It was my opinion on reading this dispatch where ComSIXTEEN said:

and units expected to operate in Mandates will be referred to as second section X estimated units . . . second section Crudiv Five and Cardiv Three Ryujo and one maru x Desrons two and four X Subron five X Desdiv twenty-three X first base force of third fleet X third base force at Palao X fifth base force at Saipan and lesser units unidentified XX Crudiv six and Batdiv three may be included in first and second sections respectively but status cannot be clarified yet

referred-to units to operate from the Palao area of the Japanese Mandates and not the central, northern, or eastern Mandates, that is, the Eastern Carolines, Marianas, or Marshalls.

It is to be noted that ComFOURTEEN's dispatch 260110 had stated there is believed to be a strong concentration of submarines and air groups in the Marshalls which comprise Airon twenty-four x at least one carrier division unit x plus probably one third of the submarine fleet.

I believe, and it was my interpretation at the time, that the ComSIXTEEN dispatch placing Cardiv 3 in the Mandates was in accordance with our existing information that Cardiv 3 would operate to the south with the Southern Invasion Fleet and possibly based out of Palao, while the presence of one carrier unit in the Marshalls was still a potentiality, and that while there was a disagreement on the latter point, there was no disagreement on the former point.

Mr. SONNETT. The ComSIXTEEN dispatch of November 26th, Captain, contained in Exhibit 8, states, among other things, our best indications are that all known first and second fleet carriers still in Sasebo-Kure area.

What carriers were comprehended by the description "First and Second Fleet [250] carriers"?

Captain LAYTON. I believe that the ComSIXTEEN dispatch, speaking of First and Second Fleet carriers in home waters, referred to Cardiv 1, AKAGI and KAGA, and Cardiv 2, HIRYU and SORYU, plus their plane guards, and possibly another Cardiv consisting of two carriers or possibly one carrier or, in other words, the one I called Cardiv 4 on my December 1st estimate and placed with Cardiv 3 in the Bako-Takao area.

Mr. SONNETT. Referring, Captain, to Exhibit 23 of this investigation, which is your December 1, 1941, estimate of the location of the Japanese Fleet, will you state whether, having refreshed your recollection, that was delivered on December 1st or on December 2, 1941?

Captain LAYTON. I believe, having considered this throughout the evening, that it was on December 1st that Admiral Kimmel told me to prepare a location sheet of the Japanese Fleet, and that it was that evening I prepared it and so dated it in my rough draft; that it was

most likely, and I believe most probable, the 2nd of December when the rough draft was written up into the smooth copy and the date of the day before had been written on there; and that it was on the 2nd of December and not the 1st of December that this delivery was made to Admiral Kimmel. Two dispatches which I referred to in my testimony yesterday from CinC Asiatic Fleet regarding the sighting of submarines and transports along the French Indo-China Coast and in Camranh Bay, respectively, are penciled notations on this memorandum. Their time group indicates they were written as of the late afternoon and early evening of 1 December, Honolulu time and date, and, as these corrections were made the following morning after its typing in the smooth, I am sure in my recollection that it was done when these dispatches reached my desk and prior to its submission to Admiral Kimmel. [251] So, I believe the date of the 2nd is thereby fixed and I wish to have all previous testimony corrected.

Mr. SONNETT. As of the date of the delivery of your estimate, which is Exhibit 23, just to summarize the situation as to Japanese carrier Captain, you placed Carrier Divisions 3 and 4 in the Bako-Takao area and possibly the KORYU in the Marshalls area, did you not?

Captain LAYTON. I placed Cardiv 3 and 4 plus their plane guard destroyers and the KASUGA MARU (XCV) in the Bako-Takao area, and the "KORYU (?)" plus plane guards in the Marshalls area. The "KORYU (?)" was to indicate that while this was a carrier or a converted carrier, the name might be incorrect, but it was still a carrier unit with a flight deck and planes.

Mr. SONNETT. I note that in your December 1st estimate, Captain, which is Exhibit 23, you start out by saying, "From best available information units of the orange fleet are *thought* to be located as listed below." What was the significance of underscoring the word "thought"?

Captain LAYTON. As I recall it, the tenseness of the situation could not be underestimated in my mind. The fact that all of this information, with possibly one or two exceptions of sighting of transports and light cruisers and the submarines, was based on traffic analysis of the enemy naval radio circuits, which by itself, by its very nature is inconclusive, sometimes contradictory, and very often incomplete. On the other hand, it does depict a picture, barring planned deception, and the picture, as I saw it, was as I laid it down to you. But I underscored the word "thought" because I had no direct evidence. I had kept track in the best way possible of every single unit, of every single command, and I wanted it plainly indicated that this was *thought* and that [252] somebody else in drawing an estimate with the same material might vary in small details but would not vary over the big picture.

Mr. SONNETT. Now, in your December 1st estimate, Captain, placing Carrier Division 4, which consisted of the ZUIKAKU and the SHOKAKU, in the Bako-Takao area, that was later discovered and in fact was an error, was it not?

Captain LAYTON. It was, but it was based on previous radio intelligence indications wherein it was noted that Cardiv 4 was associated with Cardiv 3 and had previously operated in the Takao area with Cardiv 3, had previously operated with Commander of the Combined

Air Force in joint operations, Commander of the Combined Air Force being the commander of the naval shore-based aircraft, and who was then an important command in the southern invasion units. Since this small indication existed and since this was not only one, but had occurred on two occasions, I felt that they possibly were there; and that again is my thought with very small indications.

Mr. SONNETT. What I am getting at, Captain, is that as to Carrier Division 4, then, on the basis of whatever information radio intelligence could provide, it was your estimate, subject to the limitations of radio intelligence, that Carrier Division 4 was in the Bako-Takao area?

Captain LAYTON. That is true.

Mr. SONNETT. Now, subsequently it has been ascertained that they were then on the high seas, heading for Pearl Harbor?

Captain LAYTON. That is correct.

Mr. SONNETT. But radio intelligence couldn't detect that fact at that time?

[253] Captain LAYTON. Nor could it detect that far in advance.

I would like to invite your attention at the present time to one phenomenon of this whole campaign. All those units that moved to the south, air submarines, carriers, cruisers, battleships, destroyers, auxiliaries, plus those commands concerned thereto, appeared in traffic, appeared in substantial traffic. They were addressed in intelligence dispatches. There were no other commands so addressed so constantly as a rule. In other words, there may be one exception. The commander of the Carrier Fleet, who became the commander of the Pearl Harbor task force, was not so addressed and hadn't been so addressed and hadn't appeared in the traffic since mid-November.

I would like to point out another fact, that in the previous Japanese naval activities in the Far East in connection with Thailand and French Indo-China, we had received substantiating information from OpNav from most secret sources which outlined exactly what was taking place. The radio intelligence picture of the fleet activities was confirmed also from newspaper accounts later published as the presence by name of various units there. In the time of which we now speak, the time of this estimate of 1 December 1941, we had what we called the framework of an intelligence picture. There are in intelligence many pieces like a jigsaw. The intelligence officer attempts to find the framework or border to find the scope of the intelligence picture and therefore to fit pieces together and form a part of the pattern or all of it if possible. In this, since we had no other source of information, we had received no dispatches that would indicate to us the possibility of the framework being larger than it was. The framework fitting into this pattern neatly, my attention was focused toward the south, and I believe that will explain why I was [254] inclined to include Cardiv 4 on the very briefest of evidence when there was no other evidence of any kind.

Mr. SONNETT. Now, the absence of evidence, Captain, concerning Carrier Divisions 1 and 2 was so noticeable, I take it, that you did not include in your written estimate of December 1st any statement as to your belief concerning their whereabouts?

Captain LAYTON. I would like to explain how this estimate was made and I think you—

Mr. SONNETT. Can you answer that question?

Captain LAYTON. To say "yes" or "no" doesn't fit the picture. I would like to explain how this estimate was arrived at. I had a list of all Japanese units and commands. I went through my tickler read scratch file where by sightings or by radio intelligence the indication of this unit or this command or of his whole command might be indicated or located. I then filled in after each unit or each ship the latest information, as it was run up day by day, of its location and then filled in the picture, as you say, but since I did not have any information on Cardivs 1 and 2, I omitted them because on all of the units, and that includes all the Japanese Fleet, there had been statements in the radio intelligence summaries as to their location or assumed location, but there had been no statements as either assumed location or their indicated location. Therefore, I left Cardivs 1 and 2 out of my thought because I really did not know. I presumed and estimated they were in the Kure area on no evidence at all.

Mr. SONNETT. Now, Cardiv 1 consisted of the AKAGI and KAGI, which was the flagship, and Cardiv 2 of the SORYU and HIRYU, did they not?

Captain LAYTON. That is correct.

[255] Mr. SONNETT. And at the time of your December 1st estimate, they, along with Cardiv 4, were on the high seas, headed for Pearl Harbor, as we have later learned?

Captain LAYTON. True.

Mr. SONNETT. Now, referring to your conversation with Admiral Kimmel, which, I take it, was December 2nd, concerning your estimate dated December 1st, you testified yesterday that Admiral Kimmel asked you a question about the fact that Cardivs 1 and 2 weren't listed in your written estimate.

Captain LAYTON. That is correct.

Mr. SONNETT. Your testimony, Captain, was not quite clear to me arising out of your description of Admiral Kimmel's twinkle in his eye when he spoke. What I am trying to get at is this: Was the discussion about the absence of information concerning Cardivs 1 and 2 a serious or jocular one?

Captain LAYTON. His question was absolutely serious, but when I said, "Where are Cardivs 1 and 2?" and I said, "I do not know precisely, but if I must estimate, I would say that they are probably in the Kure area since we haven't heard from them in a long time and they may be refitting as they finished operations only a month and a half ago," and it was then when he, with a twinkle in his eye, said, "Do you mean to say they could be rounding Diamond Head?" or words to that effect. In other words, he was impressing me on my complete ignorance as to their exact location.

Mr. SONNETT. He was conscious, therefore, of your lack of information about those carriers?

Captain LAYTON. This incident has been impressed on my mind. I do not say that I quote him exactly, but I do know that he made such a statement to me in the way to point out to me that I should know where they are but hadn't so indicated their location.

Mr. SONNETT. Now, referring to Exhibit 22, Captain, which consists of the photostatic copies of communication intelligence summaries, and the summary for December 2, 1941, that is the summary

is it not, which as to carriers indicates "almost a complete blank of information on the carriers today"; is that correct?

Captain LAYTON. That is what it states.

Mr. SONNETT. And the summary for the following day, namely, December 3, 1941, states, "No information on submarines or carriers"; is that correct?

Captain LAYTON. That is correct.

Mr. SONNETT. Do I accurately summarize the situation, then, Captain, by saying that at that time you did not have information showing you the location of the carriers, but you did have a lack of information concerning the location of the carriers?

Captain LAYTON. There was no information on the location of the carriers.

Mr. SONNETT. On December 4th and December 5th, Captain, is it true that the communication intelligence summaries made no mention of carriers?

Captain LAYTON. That is correct.

Mr. SONNETT. Captain, referring back to the war warning of November 27th, which is Exhibit 25 of this investigation, you will note the following direction contained in the warning: "Execute an appropriate defensive deployment preparatory to carrying out the tasks assigned in WPL 46." Do you note this?

[257] Captain LAYTON. I do note it.

Mr. SONNETT. Were you familiar, Captain, with the tasks assigned in WPL 46?

Captain LAYTON. I was at that time familiar with the general tasks. The task assigned the intelligence organization in WPL 46 was in general to receive the intelligence afforded us by OpNav.

Mr. SONNETT. Do you recall the tasks assigned in Pacific Fleet Operation Plan Rainbow Five and described as Initial Tasks, namely, tasks to be taken when Japan was not in the war?

Captain LAYTON. I do not recall it. It was not a part of my duties and I do not recall having been consulted regarding deployment or operation of our forces at any time, except that on occasions in the past when there had been submarine contacts off Pearl Harbor, Admiral Kimmel asked me if I thought it was a Japanese submarine and I told him I thought it was and that we had had various unconfirmed reports from unreliable observers to the effect that there had been submarines reconnoitering the approaches to Pearl Harbor, and the Naval Attache, Tokyo, reported a rumor there that a submarine had returned from a cruise of reconnaissance there of Pearl Harbor and the Hawaiian Islands and the West Coast.

Mr. SONNETT. I would like to come to that submarine matter, Captain, again in a minute. I want at this moment to—

Captain LAYTON. I merely want to point out as far as operations or plans went, I was not frequently consulted, nor was I supposed to be that I know of, but the Admiral would ask me once in a while about matters concerning the Japanese, if I thought that was a Japanese submarine or what.

Mr. SONNETT. Then, I take it, Captain, that you do not recall [258] that one of the initial tasks assigned in the Pacific Fleet War Plan was "Protect the communications and territory of the associated powers . . . and prevent the extension of enemy military

power into the western hemisphere by patrolling with light force and patrol planes and by the action of striking groups as necessary.

Captain LAYTON. I do not recall that specific paragraph. I might have seen it, but again that was not in my immediate province, though all the tasks of all the members of a staff or command are interlocking in a degree, sometimes larger, sometimes much less.

Mr. SONNETT. Captain, I refer you to the Staff Instructions, Staff of Commander-in-Chief, Pacific Fleet, 1941, paragraph 214(a), which relates to the Intelligence Officer and which reads as follows: "Dissemination of Enemy Information and evaluate same, disseminate to various members of staff, indicating where action is required." Did you indicate at any time prior to December 7, 1941, that any aerial reconnaissance from Oahu was ever required by reason of enemy information?

Captain LAYTON. I do not recall specifically telling the Admiral that he should conduct aerial reconnaissance as I was aware that reconnaissance was being conducted by Pat Wing 2.

Mr. SONNETT. What reconnaissance was being conducted by Pat Wing 2, Captain?

Captain LAYTON. It was not my duty to check on aerial reconnaissance by our own forces and therefore I did not know the extent of the degree. That was the duty of the Fleet Aviation Officer.

Mr. SONNETT. Did you ever inquire of the Fleet Aviation Officer what reconnaissance was being conducted?

Captain LAYTON. I did not.

[259] Mr. SONNETT. Did it occur to you in the week preceding December 7, 1941, that at any time during that week aerial reconnaissance might be advisable?

Captain LAYTON. Aerial reconnaissance was being conducted as far as I knew and it would have been presumptuous of me to go and check on another officer's performance of his duty. Furthermore, it would not have tended toward good staff relationship, nor good command relationships, for people to go and check on the performance of duty of other people not in their section and to whom they were not directly or indirectly responsible up or down. The Fleet Aviation Officer was a subordinate of the Operations Division whose duties were laid out in the Staff Organization as conducted by operations. May I say that the Operations Officer was shown my periodic summaries of information received and at this time I would like to introduce in evidence my photostatic copy of my original file thereof.

(The document referred to was received and marked "Exhibit 26")

This consists of reports commencing 6 October 1941 and starts with serial number 82 and ends with intelligence report dated 2 December 1941, serial number 102. I would like to describe briefly this intelligence report book was handled and disseminated. From time to time, as information was assembled or as intelligence was evaluated from assembled information, I prepared and assigned reliability to various items, which I called intelligence reports which were typewritten on a standard form. Since this material had already been seen by the Admiral and the Chief of Staff, boxes 00 and 01 were crossed out in the form when printed. The other boxes in the form consisted of staff numbers 11, 12, and

being the Operations Officer and the two Assistant Operations Officers, respectively; numbers 16, 17, 18, and 86 being the War Plans [260] Officer and his three assistants, the latter, 86, being the Fleet Marine Officer. Numbers 20, 21, 25, and 26—20 and 21 were the Fleet Communications Officer and the Fleet Security Officer, respectively; 25 was myself, the Intelligence Officer, and 26 my assistant.

It is to be noted in this exhibit that periodically staff boxes will not be filled. This was due to the habit of certain officers of only initialling the top page, having read those from his last initial up. For example, certain information from the most secret sources received at CincPac were by direction of OpNav available only to the Admiral, his Chief of Staff, Intelligence Officer, and such other officers as he designated. To insure that the Plans and Operations Divisions and the Communication Officer and the Security Officer were fully aware of information at hand and to protect sources of information from too wide knowledge of their basic source, this material was paraphrased by myself and its source sometimes disguised, but the picture remained unchanged.

For instance, on 25 November 1941, serial number 93, reliability rating A1, which meant communication intelligence, the following report was written and submitted and initialed:

(Attached as page 260A).

[260A]

INTELLIGENCE REPORT

SECRET

Reliability Rating, A-1. Serial No. 93. Date, 25 Nov 1941.

For the past month the Commander Second Fleet has been organizing a Force composed of the following:

Second Fleet—Third Fleet (including 1st and 2nd Base Forces and 1st Defense Division)—Combined Air Force—Desron Three—Airron 7—Subron 5—possibly units of Batdiv 3 (from First Fleet). These units are linked with the South China Fleet and French Indo-China Force as well as the Naval Stations at Sama, Takao and Bako. The Commander Second Fleet has intensely been interested in operations at Palao and the Third Base Force which is at Palao.

The Combined Air Force has assembled at Takao with some indications that certain units have moved on to Hainan.

The Third Fleet is believed moving in the direction of Takao and Bako.

The Second Base Force appears to transporting the equipment of air forces to Taiwan.

An unidentified Second Fleet unit and a submarine unit appears to be in the vicinity of Takao. Crudiv 7 and Desron 3 appear to be an advance unit and may be enroute South China. A strong concentration of submarines and aircraft is believed in the Marshalls comprising Airron 24, at least one cardiv and one-third of the submarine force.

Com14 believes the above indicates a strong force is preparing to operate in SouthEastern Asia while certain units operate from Palao and the Marshalls.

[261] On 26 November 1941, intelligence report, serial number 94, reliability A, as follows:

(Attached as pages 261A, 261B, and 261C.)

[261A]

TOP SECRET

## INTELLIGENCE REPORT

*Secret*

Reliability Rating, A. Serial No. 94. Date, November 26, 1941.

A reliable source of information evaluates the situation during the past few days as follows. He considers it reliable:

1. He believes that various units of the 1st, 2nd, 3rd and 6th Fleets are being directed by CinC 2nd Flt in a loosely-knit organization. He further states that the organization appears to be subdivided into two sections. And expects:

Section I to operate in South China Area.

Section II to operate in the Mandates.

2. Forces which appear to be under CinC 2nd Flt.

*Section I*

*CruDiv 7* (From 2nd Flt) 4 CA's—KUMANO, MOGAMI, MIKUMI, SUZUYA)

*Airon 6* (From Combined Air Force) (3 XAV's—KAMIKAWA MARU, FUJIKAWA MARU, KENJO MARU)

*1st Defense Division* (From 3rd Flt)

*Subron 6* (From 6th Flt) (1 CL, 2 Subdivs (4SS)) (note 4 SMs)

It is possible but not known for sure that *Crudiv 6* may be included here (From 1st Flt) (4 CA's—KAKO, FURUTAKA, AOBA, KINUGASA)

*Section II*

*Crudiv 5* (From 2nd Flt) (3 CA's (maybe 4)—MYOKO, NACHO, HAGURO)

*Cardiv 3* (From Carrier Flt) (2 CV's—RYUJO?, HOSHO)

*RYUJO and 1 Maru* 1 CV

[261B] *Desron 2* (From 2nd Flt) (1 CL, 3 Desdivs (12DD's))

*Desron 4* (From 2nd Flt) (1 CL, 3 Desdivs (12DD's))

*Subron 5* (From 6th Flt) (1 CL, 3 Subdivs (6 or 7 SS's))

*Desdiv 23* (From Carrier Flt) (4 DD's)

*1st Base Force* (From 3rd Flt)

*3rd Base Force* (At PALAO)

*5th Base Force* (At SAIPAN)

*Other lesser units* (Names not known)

It is possible but not known for sure that *Butdiv 3* may be included here (From 1st Flt) (4 BB's—HIYEI, KONGO, KIRISHIMA, HARUNA (HARUNA may be undergoing major repairs))

3. Disposition of remainder of 3rd Flt in doubt but it is assumed they will be stationed around the BAKO-TAKAO area or further south.

4. Indications are that today (Nov. 26th) *Desron 3* (1st Flt), *Crudiv 7* (2nd Flt) and *Subron 6* (6th Flt) are in the TAKAO area. Units of Combined Air Force from the Empire are at TAKAO, HOIHOW, PAKHOL, SAIGON and other bases along the CHINA COAST and in TAIWAN.

5. He cannot confirm report there being large force of SS and CV's in the MANDATES. Thinks all known carriers of 1st and 2nd Flts are still in the KURE-SASEBO area. (cont.)

[261C] 6. He believes that:

CinC Combined Flt is in NAGATO (BB)

" 1st " " " HYUGA (BB)

" 2nd " " " ATAGO (CA) (in KURE area)

" 3rd " " " ASHIGARA (CA) (in SASEBO area)

" 5th " " " CHICIJIMA area

" 6th " " " KASHIMA (CL) (in YOKOSUKA area but this is unreliable)

7. CinC 2nd Flt, CinC 3rd Flt and CinC Southern Expeditionary Force apparently have the major roles.

8. Units from North or Central appear to have joined the South China Fleet (probably torpedo boats).

9. One Base Force unit apparently being used to strengthen Southern Expeditionary Force.

(Initials) P

[262] Mr. SONNETT. Captain, referring to serial number 94 of Exhibit 26, which you have just read into the record, explain the connection between that intelligence report and ComSIXTEEN's dispatch of November 26, 1941, which is contained in Exhibit 8.

Captain LAYTON. These intelligence reports are evaluations of reports received from all sources. This specific intelligence report, number 94, is my rewrite and reterming into standard phraseology the language, as I understood it, from Com SIXTEEN dispatch 261331. Also, intelligence report serial 93, which I read previously, is my interpretation and rewrite into standard phraseology of ComFOURTEEN's dispatch of 260110.

I would like to read intelligence report number 92, dated 25 November 1941, reliability A1.

(Attached as page 262A).

TOP SECRET

#### INTELLIGENCE REPORT

*Secret*

Reliability Rating, A-1. Serial No. 92. Date, 25 November 1941

Opnav reports that the chances of any favorable result coming out of the present negotiations with Japan are very doubtful. It is his opinion that this, coupled with the statements of the Japanese government, and the movements of their military and naval forces, indicates that they may make a surprise aggressive movement in any direction, including an attack on the Philippines or Guam. The Chief of Staff of the Army concurs in this opinion. Senior Army officers in the Far East, Pacific and West Coast areas (including Panama) have been informed. Utmost secrecy is enjoined regarding this opinion in order to not further complicate the present tense situation or to precipitate Japanese action.

00 : 01 : 11 : 12 : 13 : 16 : 18 : 20 : 21 : 25 : 26 : 90 : 95 : 86

(initials) P

[263] It will be noted that these intelligence reports are in some cases merely a paraphrased version of intelligence dispatches which I read into the record in connection with the communication intelligence summaries previously and are to complete the record for the purposes of dissemination of information within the Staff, regardless of its dissemination by copies of communication messages.

I would like to read into the record serial number 97, of 28 November, 1941, reliability A1.

(Attached as page 263A.)

TOP SECRET

## INTELLIGENCE REPORT

Reliability Rating, A-1. Serial No. 97. Date, 28 Nov. 41.

Absolutely reliable reports from Singapore are that the following procedure will be carried out by Japanese news broadcasts in the event that diplomatic relations are on the verge of severance:

On ordinary Tokyo news broadcasts, the following words repeated five times at the beginning and the end will have this significance:

("EAST-EAST-etc.")

HIGASHI HIGASHI: Japanese-American  
("North-North-etc.")

KITA KITA: Russia  
("WEST-WEST-WEST")

NISHI NISHI: England (including occupation of Thai or invasion of Malaya and NEI)

On Japanese language foreign news broadcasts, the following sentences repeated twice in the middle and twice at the end will be used:

"HIGASHI NO KAZE AME" (AMERICA) "Easterly winds with rain"

"KITA NO KAZE KUMORI (Russia) "Northerly winds—cloudy"

"NISHI NO KAZE HARE" (England) "Westerly winds, clear"

The British and Com 16 are monitoring the above broadcasts.

00 : 01 : 11 : 12 : 13 : 16 : 17 : 18 : 86 : 20 : 21 : 25 : 26 :

(Initials) P C

[264] It is noted that the last intelligence report submitted was serial 102, dated 2 December 1941. Subsequent to 2 December 1941 there was a hiatus of information that could be evaluated into intelligence other than that which tended to confirm previous indication of the southern movement.

Mr. SONNETT. Captain, I believe you have a collection of paraphrased dispatches containing other intelligence during the period October to December, 1941, do you not?

Captain LAYTON. I have.

Mr. SONNETT. May we mark it as an exhibit?

Admiral HEWITT. Yes.

(The document referred to was received and marked "Exhibit 27.")

Mr. SONNETT. Will you state briefly, Captain, without reference to the contents, but generally, the nature of the documents contained in Exhibit 27?

Captain LAYTON. These are paraphrases of official dispatches received from various intelligence agencies—for instance, Naval Attache, Singapore; Assistant Naval Attache, Shanghai; Assistant Naval Attache, Pekin; Naval Attache, Chungking; Marine Detachment, Wake; OpNav, and Naval Attache, Tokyo—in which various items of intelligence information were passed to CincPac and of which I kept paraphrased copy for reference purposes to assist in making enemy location reports and other matters.

Mr. SONNETT. I take it, Captain, then, that these dispatches contained in Exhibit 27 were among the material which you considered in the preparation of your intelligence reports contained in Exhibit 26?

Captain LAYTON. That is correct.

[265] Mr. SONNETT. Do you recall that toward the end of November, 1941, there was some discussion of a proposed army reconnaissance flight over the Mandated Islands?

Captain LAYTON. I do recall conferences which I attended with then Lieutenant Colonel Raley concerning a projected army reconnaissance by B-25's over Japanese positions in the Marshalls and also Truk.

Mr. SONNETT. Will you tell us how that discussion came to take place and what happened with respect to that reconnaissance?

Captain LAYTON. Either Admiral Kimmel directed me to establish contact with the Hawaiian Air Force pertaining to this reconnaissance or my opposite number, Colonel Raley, came to me and informed me of this pending reconnaissance and requested my assistance toward delineating the appropriate objectives for the reconnaissance and to furnish the reconnaissance pilots and crews with intelligence material for briefing and to assist in the successive projected reconnaissance.

Mr. SONNETT. Will you state what happened with respect to the reconnaissance, Captain? Did it take place or not?

Captain LAYTON. The reconnaissance unfortunately never materialized because the planes, except one, did not arrive. There was a delay from time to time due to, as Colonel Raley explained to me, uncompleted camera installations in the B-24's at Hamilton Field. I was never informed that the one plane which did arrive had arrived, but I learned later it was destroyed in the attack on Hickam Field on December 7th. We were very anxious that this reconnaissance be made at the earliest possible date and the Admiral, upon receipt of my memorandum stating the conferences concerning this reconnaissance had been held, asked me how soon I thought they could hold it, and I gave him Colonel Raley's answer to [266] me; that is, it was being delayed due to non-installation or non-completed installation of cameras, and that it would be made as soon as they arrived here and were briefed but that the time was still not definitely fixed.

Mr. SONNETT. I show you a photostatic copy of a memorandum of November 28, 1941, and ask you if you can identify that, Captain.

Captain LAYTON. I can. It is my memorandum to Admiral Kimmel, relating to him the general circumstances of the conference concerning the projected aerial reconnaissance by Army planes over the Mandated Islands, particularly those in the Marshalls, plus Truk and Ponape.

Mr. SONNETT. May we mark that as an exhibit, Admiral?

Admiral HEWETT. Yes.

(The document referred to was received and marked "Exhibit 28.")

Mr. SONNETT. In your discussions with Admiral Kimmel wherein you advised him that there was some delay on the part of the Army in getting the planes ready, was there any consideration given to the use of naval planes for such reconnaissance?

Captain LAYTON. It was not discussed with me. I presume it was discussed with the Aviation Officer.

Mr. SONNETT. Do you know why such naval planes could not have been used for that reconnaissance?

Captain LAYTON. I do not know, except what I think. I think that had we used the only naval planes available, that is, PBY Catalinas, they would by their appearance over the Marshalls, the Japanese Mandated Islands, have been the overt act that the Japanese

could claim we had committed and would be a violation of the existing directives of OpNav, while the Army planes were ostensibly flying from Wake to Port Darwin, Australia en route [267] the Philippines.

Mr. SONNETT. Was it also true, Captain, that the Army planes would have special equipment for this reconnaissance that the Navy planes did not have?

Captain LAYTON. It was my personal belief that the first PB-1A got near the Marshall Islands would be shot down by the fighters that I felt positive were there, whereas the Army B-24 photographic planes would have good armament, good defensive armament, and would also be very fast and would fly very high. Its chances of successful reconnaissance flight were considered to be better than three to one. As I remember it, the Army reconnaissance planes were to be armed and they were to fire on any plane that interfered with them in the accomplishment of their mission.

I was particularly anxious, and I am sure Admiral Kimmel was anxious, that this reconnaissance be carried out because it would check on other information as to the presence or absence of air strength of carriers, also submarines, and naval concentrations, that is, Four Fleet units, in the Marshalls area, including also Truk and Pohnpei. It was felt that this was an ideal opportunity to establish the credibility of existing intelligence on Japanese naval disposition and developments in the Mandated Islands to be reconnoitered.

Mr. SONNETT. Apart from the proposed reconnaissance by the Army which you have just discussed, Captain, what other information intelligence was exchanged between the Army and Navy, to your knowledge, during the period October to December, 1941?

Captain LAYTON. The Army-Navy liaison, as I understood it, was established as a normal policy through the shore establishment, that is, the Fourteenth Naval District and the Army forces there, as a normal [268] measure. In addition, about four or five months before December, 1941, the G-2 of the Hawaiian Air Force, then Lieutenant Colonel Raley, Air Corps, U. S. Army, called on me and stated that he had come to me to establish Army liaison on a continuing basis as his superiors considered the Bomber Command of the Hawaiian Air Force and the Navy to be the offensive weapons for the execution of war plans and the Hawaiian Department as a defensive garrison, and that, therefore, the liaison should be established on the level of air force and fleet.

From that time on I furnished Colonel Raley with various items of intelligence, particularly in the early period, stressing air field facilities in the Netherlands East Indies and Australia, where the Hawaiian Air Force was the responsible agency toward ferrying planes to the Philippines via Australia. I furnished him with the confidential and secret sections of the Dutch Airways Guide we had received from Ceylon Asiatic. As the trend of events commenced to develop in mid-November, I told Colonel Raley these events in general. I also told Colonel Raley, without divulging the source and by disguising the actual existence, of the general trend of movements of naval vessels to the south. Since some of the material I gave Colonel Raley was of the utmost secrecy, I cautioned him that I would give him certain very secret matter provided he made no written record of it and would

communicate such only to his Commanding General and on the understanding that he in turn would make no written record of it. I induced him of the intrigue in Thailand, which I previously discussed, which the British were to be brought in on a false pretext and then lured the invader so that Japan could then be called upon as an ally to protect the British troops and thus facilitate their quick entry into the area.

Q59] I feel sure that I told him that we were listening for a radio broadcast from one of our spies, as I put it, which would give indication through a weather report that relations between Japan and America might be terminated, or words to that effect. I do not distinctly tell him of the destruction of the purple machine. I think that I did, but I do not distinctly recall it.

A. SONNETT. You have testified, Captain, that liaison was established with the Hawaiian Army Air Force. Was there any liaison with the Hawaiian Department, that is, directly with General Short? A. CAPTAIN LAYTON. I do not know. I took messages to General Short. General Short consulted with the Admiral, and the normal liaison with G-2 of the Hawaiian Department would be with the District Intelligence Officer of the Fourteen Naval District, they being on the same plane and echelon of command. Furthermore, the Hawaiian Air Force was a subordinate of the Hawaiian Department in those days and was directly under General Short. Therefore, when the Hawaiian Air Force came to me to establish liaison on fleet level, and I understood they were establishing the Army liaison, I presumed it was as far on that level as was intended to go.

A. SONNETT. I take it from your testimony, Captain, that you were familiar with the establishment by the Japanese of the so-called "Japs" code.

A. CAPTAIN LAYTON. I was.

A. SONNETT. Would you state when you learned of the establishment of that code and what the code was?

A. CAPTAIN LAYTON. A dispatch from CinC Asiatic Fleet, dated 28 November 1941, and addressed to OpNav, CincPac, ComFOURTEEN, ComSIXTEEN, for action, states as follows:

Q] Following Tokyo to net intercept translation received from Singapore diplomatic relations are on verge of being severed following words repeated at beginning and end of ordinary Tokyo news broadcasts will have significance as follows X Higashi Higashi Japanese American X Kita Kita Russian X Nishi Nishi England including occupation of Thai or invasion of Malaya X On Japanese language foreign news broadcasts the following sentence repeated twice in the middle and twice at the end of broadcasts will be XX American Higashi no Kaze Kumori XX England X Nishi no Kaze X Unquote X British and ComSIXTEEN monitoring above broadcasts.

This was made the subject of my intelligence report, serial number Reliability A1, dated 25 November 1941, and was shown as customary to all staff members concerned. It is noted that on the photograph of this the initials only of then Captain DeLany, then Commander DeLany, then Lieutenant Commander Collins, then Captain McCorrigan, then Commander Murphy, and then Colonel Pfeiffer, appear. It is the habit of certain staff officers not to initial each page but to sign up from their last initial and then initial the top page they had

Mr. SONNETT. What efforts were made, Captain, to monitor for any message employing the "winds" code?

Captain LAYTON. Upon receipt of this message, I contacted Commander Rochefort and asked him what measures were going to be established. He said he had already set up a monitoring procedure wherein all our Japanese language officers were placed on continuous watch on several circuits and were to cover all known news broadcasts emanating from Japan.

Mr. SONNETT. What were the results, if any?

Captain LAYTON. Almost each day thereafter I would check with [271] Commander Rochefort or he would call me and say, "Nothing so far." Up to the attack on December 7, 1941, we received no such intercept, nor did we receive any dispatch from any source stating that such an intercept had been heard.

Mr. SONNETT. You testified before Admiral Hart, Captain, in substance that on or about December 9, 1941, you received certain information from Captain Rochefort which had been secured from intercepted cables of the Japanese Consul General and that prior to December 9, 1941, you had received no such information from any source. Is that correct?

Captain LAYTON. That is correct.

Mr. SONNETT. Can you recall the substance of the information which you did receive on December 9th from Captain Rochefort?

Captain LAYTON. The information was decryption of the Japanese Consul's cypher and it laid out various procedures and signals and also reports of movements of naval vessels into and out of Pearl Harbor and also made reference to the presence or absence of aircraft carriers, as I recall it.

Mr. SONNETT. I show you document 22 of Exhibit 13, and ask you whether that is the message to which you refer, Captain.

Captain LAYTON. Yes.

Mr. SONNETT. Do you recall, Captain, what other messages of the Japanese Consul were shown to you by Captain Rochefort on or about December 9, 1941?

Admiral HEWITT. We will recess at this time.

(The investigation then, at 11:42 a. m., recessed until 2 p. m., at which time it reconvened.)

(Present: The same parties as during the morning session.)

[272] Captain Edwin T. Layton, U.S.N., resumed his seat as witness.

(The last question was read.)

Captain LAYTON. I have here a file of dispatches which are copies of consular dispatches which then Commander Rochefort delivered to me by safe hand on or after December 9, 1941. It may have been December 10th. I cannot remember exactly.

Mr. SONNETT. May we mark those as an exhibit, Admiral, and substitute a photostatic copy, when a copy is made, for that exhibit so that Captain Layton can retain his copies?

Admiral HEWITT. Yes.

(The document referred to was received and marked "Exhibit 29.")

Mr. SONNETT. I note, Captain, that the exhibit 29 just marked consists of copies of six dispatches. Were these the only intercepted Japanese consular messages or messages to the Japanese Consul in Hawaii that you received?

Captain LAYTON. These were the only ones received and they were received some time on or after 9 December 1941.

Mr. SONNETT. Do you know, Captain, what, if any, efforts were made previously by any one to secure such messages and what were the results of such efforts made?

Captain LAYTON. I don't know at first hand, but when these messages were delivered to me, I asked then Commander Rochefort the background of them, and, as I recall it, a prominent executive of RCA, I believe perhaps Mr. Sarnoff himself, visited the Hawaiian Islands sometime prior to or just about the 1st of December and that some approach had been made—by whom I was not told—to obtain the files of the [273] consular messages, which by law our intelligence service could not touch. As I understand it, this high official, possibly Mr. Sarnoff, was sympathetic but said his hands were tied by the law the same as ours were, but would inquire upon his return to the States as to his receiving immunity, Presidential or otherwise, from prosecution in order that the intelligence services could have access to these quoted dispatches and attempt to decrypt same. As I recall it, the story went he sent a special message to Honolulu, saying in effect that this immunity had been obtained and he, the holder of those in Honolulu, could turn them over to the appropriate source. I do not know who obtained them, but Commander Rochefort led me to believe that they had been worked on from the time they were received and that they could not break the cipher but were continuing and that after December 7th efforts continued and finally the cipher key was decrypted and the messages reduced to plain Japanese and translated and then delivered to me.

Mr. SONNETT. Captain, the previous investigations disclosed that ONI and the FBI were tapping the telephone wires of the Japanese Consul prior to the 7th of December, 1941. Were you aware of that fact?

Captain LAYTON. I was aware without them having definitely so informed me. Wire tapping was also against the law. I knew that they had a source of information that was what they called "inside of the horse's mouth."

Mr. SONNETT. Do you know what information was secured by them from that?

Captain LAYTON. Nothing of importance as far as fleet movements went. There were certain times when the District Intelligence Officer would inform me that the Consul General had had an urgent meeting with the representatives of the NYK Line in connection with evacuation of [274] Japanese on the TAIYO MARU. There was considerable unrest and uneasiness on the part of the Japanese about the measures being undertaken by the United States, particularly those respecting inspecting mail, and that they were considerably relieved when they learned that second class and third class would not be inspected. It was presumed from my conversations with the District Intelligence Officer that all secret communications that they had wanted to send first class, they would thereafter send parcel post.

Mr. SONNETT. Did you learn at any time whether or not as a result of tapping the wires of the Japanese Consul it was learned that Japanese agents were reporting on the location and movements of United States ships in Pearl Harbor?

Captain LAYTON. There was no such report made to me at a time.

Mr. SONNETT. Did you know whether or not as a general proposition Japanese agents were engaged in such activity?

Captain LAYTON. I did not know at first hand that they were or would have had them arrested. It was a matter of common knowledge, without legal foundation, that the Japanese were engaged in espionage. It was suspected that the Japanese Toritsuginin, or "honorary consuls," in fact, some hundreds, were recommended by the Commandant of the Fourteenth Naval District for arrest and prosecution under the federal statute for being the unregistered agents of a foreign government. I was interested in this because the District Intelligence Officer had informed me of this situation and so recommended. It seems that this measure was also accorded support by the FBI representative, Mr. Shivers, but it is my understanding that it was utterly opposed and disapproved by the Commanding General, Hawaiian Department, General Short.

[275] Mr. SONNETT. Concerning the operation of Japanese submarines in or around Pearl Harbor, Captain, what reports did you have prior to December 7th of the operation of such submarines in Hawaiian waters?

Captain LAYTON. Shortly after I joined the staff of the Commander in-Chief, U. S. Fleet, Admiral J. O. Richardson, there was a submarine reported off the Pearl Harbor entrance and the destroyer which made the contact was known to be a very efficient anti-submarine destroyer. That was late December, 1940. The McDOUGAL made the contact. There had been other contacts made, both off the west coast of the United States, and as I understand it, off Hawaiian waters. These contacts were developed on a purely underwater search basis and at no time was a definite submarine sighted, nor could any actual evidence be obtained that it was in fact a Japanese submarine. However, subsequent to this first contact, to my personal knowledge there were several other contacts, one of them again obtained by the McDOUGAL's screening group and held down by the McDOUGAL for some forty-four hours. The Captain of the McDOUGAL has told me that the first fourteen hours of this contact was a definite submarine, that the remaining hours of this contact was a temperature gradient and therefore a false contact which had permitted the supposed Japanese submarine to escape undetected by sonar search. However, during the early part of this contact, three destroyers passed over the position of the alleged submarine and obtained soundings of forty-six fathoms. The water there was thousands of fathoms deep.

There were additional reports, from unreliable sources unfortunately, that there had been rumors of Japanese submarines reconnoitering Pearl Harbor and the West Coast. The Naval Attaché in Tokyo, so reported such a rumor in which, as I recall it, a Japanese submarine was supposed [276] to have returned from reconnoitering duty off the West Coast and off Pearl Harbor.

Additionally, there were reports from, I believe, the Naval Observatory in Cuba or Naval Attaché in Cuba. It may have been South American but he reported that he had information to the effect that there were sunken submarines which could be raised and manned by crews located

off Molokai. These submarines were supposed to have been brought in and beached in not too deep water off Molokai, with a small hose leading up to a buoy, which was covered with kelp, and then led off ashore and was camouflaged, while the crews thereof were ashore disguised as fishermen on the island of Molokai; that at a given time they would proceed and connect up air leads to this hose and thereby blow the ballast of these sunken submarines and would then man them at the appropriate time. It was inferred that these were smaller than the normal type submarines.

By letter, the Commandant, Fourteenth Naval District, was directed and carried out a complete and thorough investigation of the coast line and off-shore areas of the island of Molokai and other islands. The report was negative. By direction, Commander Patrol Wing 2 was directed to make a close aerial reconnaissance of these waters under various conditions of light to detect if there was a possibility of this report being correct. Their report was also negative. This, as I recall it, may have been the summer or fall of 1941.

Mr. SONNETT. To sum it up, then, Captain, there was no actual evidence prior to December 7, 1941, of the operation of submarines in or around Pearl Harbor which established conclusively that they were there?

Captain LAYTON. There was no positive evidence beyond any shadow [277] of doubt to establish that they were in fact there, but Admiral Kimmel, I am sure from his remarks to me and his questions to me, felt, and I did also, that at least some of these contacts were true contacts; in other words, actual Japanese submarines. In fact, at one time when the cruiser AUGUSTA returned from the Asiatic Station, it was directed by Admiral Kimmel to pass through a position to the north or northwest of Oahu, I believe about 600 miles, and search out an area where a Japanese naval tanker was known to be passing at that general time and to ascertain if it was fueling submarines. I believe, although I am not sure, that a special aerial search was made in that area at that time. This was all very secret operations and I did not know it until after it was completed.

Mr. SONNETT. The previous investigations, Captain, have disclosed that on the morning of December 7, 1941, a Japanese or midget submarine was attacked and sunk in Pearl Harbor and also that another Japanese or midget submarine was grounded off Bellows Field and was subsequently recovered. Were you familiar with the recovery of those two submarines?

Captain LAYTON. I am. They were recovered under my direction, but not under my personal supervision.

Mr. SONNETT. Can you state approximately how long after December 7, 1941, the submarine recovered off Bellows Field was examined?

Captain LAYTON. The submarine grounded off Bellows Field on the morning of 9 December, as I recall it—it may have been the 8th—at which time we dispatched the Repair Officer of the Submarine Base, then Commander Eddy, to examine it and particularly to bring back any documents he could obtain from this submarine. He came back that evening and reported that it was too small a submarine for him—he was a large man—to get into and that the electrician's mate, who was rather small, too, could not get in either. He [278] said, however, that he could salvage that submarine with some assistance

and I directed him to proceed forthwith with the salvage. With the assistance of some Army engineers, I believe, and Oahu Land and Railroad Company's super heavy duty, many-wheeled, trailer trucks, the salvage was finally effected, but only after dismantling the submarine into two sections, it being too heavy in one section to be moved. It was then and throughout that time under guard and was brought to the Pearl Harbor Submarine Base, at which time a very small engineer was able to obtain all the documents and equipment remaining on the submarine. They consisted of maps, recognition pictures, a log book, and various types of equipment, such as line, palm-leaf writing, needle, morphine syringe, first aid kit, emergency rations, and including a small cuspidor type head.

Mr. SONNETT. I show you several documents, Captain, and ask you whether you can identify those.

Captain LAYTON. I can.

Mr. SONNETT. Will you state what they are?

Captain LAYTON. The first one is a series of two panoramas marked with II No. 27, entitled in Japanese, "View of Pearl Harbor from Northeast High Ground, Number 5." The lower one states in Japanese II No. 28, "View of Pearl Harbor from Aiea Northeast High Ground, Number 6." That is a rough translation.

I also recognize these panoramas as having been sold commercially in Honolulu, having been approved for publication by the Commandant, Fourteenth Naval District, at some time unbeknownst to me. I believe the Commandant at that time was Admiral Bloch.

On the reverse of this panorama view is a short log in Japanese. [279] Mr. SONNETT. Captain, you speak and understand Japanese, do you not?

Captain LAYTON. I am a qualified interpreter and translator of Japanese.

I would like to note for the record that in Japanese naval chronicles all times remain Tokyo time, minus nine, and all days remain the same. Longitude, Tokyo, dates, regardless of crossing the 180th meridian. So all times in these logs and memoranda and notebooks will always remain as minus nine, four and a half hours earlier than Pearl Harbor time.

Mr. SONNETT. May we mark this as an exhibit, Admiral, and constitute a photographic copy?

Admiral HEWITT. Yes.

(The document referred to was received and marked "Exhibit 30.") Captain LAYTON. I would like to invite your attention to the fact that there are several English words in lead pencil and in red ink on this so-called log. These were inserted by amateur translators in an endeavor to decipher it shortly after its receipt.

Mr. SONNETT. I show you a photograph, Captain, and ask you whether the photograph is a true and correct copy of Exhibit 30, is it the so-called Japanese log.

Captain LAYTON. It is.

Mr. SONNETT. May we mark the photograph as Exhibit 30A, Admiral?

Admiral HEWITT. Yes.

(The document was received and marked "Exhibit 30A.")

Mr. SONNETT. I show you a document, Captain, and ask you whether [280] it is a correct translation of the Exhibits 30 and 30A

Captain LAYTON. It is.

Mr. SONNETT. May we mark that as 30B, Admiral?

Admiral HEWITT. Yes.

(The document referred to was receiving and marked "Exhibit 30B.")

Captain LAYTON. The next document is a panorama sketch, apparently a copy of panorama photograph or sketch, taken from seaward, and looking at the mouth of Honolulu Harbor from a position five nautical miles to the south of Pearl Harbor. They have written in red, "Looking at the mouths of Honolulu and Pearl Harbors from a position five miles south of the mouth of Pearl Harbor."

Mr. SONNETT. May we mark the original as Exhibit 31 and substitute a copy thereof?

Admiral HEWITT. Yes.

(The document was received and marked "Exhibit 31.")

Mr. SONNETT. I show you two photographs, Captain, and ask you whether together they constitute a true and correct copy of the panorama sketch to which you have just referred?

Captain LAYTON. They do.

Mr. SONNETT. May we mark the photograph as 31A?

Admiral HEWITT. Yes.

(The photographs were received and marked "Exhibit 31A.")

Captain LAYTON. May I indicate two translator's errors? Where he has "Rodgers symbol symbol," which is translated "Rodgers V place," and "Hickam symbol symbol," translated "Hickam V place," the two symbols stand [287] for "airfield."

I know the third document, recovered from the midget submarine that grounded at Bellows Field, as being a Japanese chart of Pearl Harbor on which courses and times are noted, as well as certain abbreviated signals, and a course and time projected track or tracks going around Ford Island, leaving it port hand to and returning out Pearl Harbor entrance.

Mr. SONNETT. May we deem this original map marked as Exhibit 32?

Admiral HEWITT. Yes.

(The map was received and marked as "Exhibit 32.")

Mr. SONNETT. Captain, I show you a photograph and ask you whether it is a true and correct photograph of the original map, Exhibit 32.

Captain LAYTON. It is a good reproduction of that map, except for the colors. It is to be noted that the times apparently scheduled for inbound, starting at 0040 and proceeding up through the channel and around Ford Island, leaving it on its port hand, up until 0515, when he is just south of Peninsula Point, are in blue crayon; all positions plotted thereafter are in red crayon, starting at 0520 and ending at 0600. It should be noted that the speed inbound is relatively slow and the speed outbound is much faster.

Mr. SONNETT. May we mark this as Exhibit 32A?

Admiral HEWITT. Yes.

(The document was received and marked "Exhibit 32A.")

Mr. SONNETT. Captain, can you tell by examining Exhibits 32 and 32A whether this chart represents an attack plan of the submarine from which it was recovered, or does it represent a log of an actual trip of [282] the submarine from which it was recovered?

Captain LAYTON. I give as my professional opinion as a seaman that it is a projected track and not an actual logged track by bearing and distances as indicated hereon. It is too exact to be an exact track and the figures are written a little too carefully and meticulously to have been performed by the captain of this midget submarine. He had to control trim, use his periscope, and maneuver the submarine without assistance. The second member of the submarine was the machinist's mate, who closed and opened switches, cut in and out the CO<sub>2</sub> absorbent material, and in general performed the duties of an engineer and auxiliary gang.

Mr. SONNETT. Captain, I call your attention to the Japanese symbols appearing on the exhibit under the time 0450 and ask you if you can translate those for us.

Captain LAYTON. These four symbols are Chinese characters which translates "Enemy ship—the first two—and the work "sink." The word "sink" can be "sink," "sank," or "sunk," or any combination thereof because no verb suffixes are appended to show tense.

Mr. SONNETT. Did you examine this submarine after it was recovered?

Captain LAYTON. I did.

Mr. SONNETT. Did you find whether or not it had torpedoes aboard?

Captain LAYTON. His torpedoes were still aboard, although he tried to fire them.

Mr. SONNETT. How many were aboard, Captain?

Captain LAYTON. Full allowance, two, one atop the other.

Mr. SONNETT. Referring again to the symbols appearing on the exhibit under the time 0450 and bearing in mind that the submarine had two torpedoes aboard when recovered, would you say that that symbol could not [283] be translated as "Sunk enemy ship" if referred to action by the submarine?

Captain LAYTON. Based on my knowledge now from Japanese captured documents and material, I give as my professional opinion that that symbol does not represent the captain of this midget submarine recording that he himself sank an enemy ship there.

I would like further to invite your attention to this track. This track is carefully laid out both by course and by distance, course in degrees and distance in meters, and time in minutes and seconds. A close examination of this time in minutes and seconds will show that the speed was varied from point to point to be able to make his arrival at these points at a predetermined time. I point out for your attention the time 0450, which would be 0920 Pearl Harbor Time. At Honolulu Time the attacks were still taking place, salvage ships were being rushed into this area, a tremendous amount of activity was taking place, and I doubt that a midget submarine captain, as but he was navigating his ship, would be able to so meticulously follow his course all the way around, keeping track of the time spent from point to point. On the other hand, if he had been there at that time he would have moved out at a predetermined course at best speed. He would not have cared what time he rounded these points but rather that he rounded them and got away. Therefore, that is on which I base my judgment that this is a predetermined track and not a navigational track.

It is to be noted that on his track there are frequently written in Arabic numerals two different times for the same distance. The first is generally preceded by "Bi Fu" and the second one is preceded by "Bi," the second one being the greater number. It is believed that these [284] symbols and these different times represent different pole settings of his propulsion electric motors in accordance with the state of his battery, and while the track was designed for one, the other was an emergency figure so that he would know when to turn submerged were his battery lower than he had thought, due to the fact that, going slower, his battery would last longer, and also therefore the time was greater.

I would like to invite your attention to positions made on this chart both on the right-hand and left-hand sides of the Pearl Harbor channel as you enter it. Near the time 0530 position is a position I-16. South of that position along Waipio Peninsula is a symbol and the mark I-20. South of that position and still just off the Waipio Peninsula cut is a symbol which reads I-22. On the right-hand side of the channel just southwest of the fuel dock and on the channel edge and just to the north of 0410 position of the submarine track is a circular symbol which reads I-16. Just between the 0410 and the 0115 track positions is a large circle and indistinctly can be read the symbol I-24. It is my estimation—since the I-16, 18, 22, and 24 all carried midget submarines, belong to the class of submarines carrying midget submarines, and since, as I recollect it, the submarine recovered from Bellows Field was marked I-18—that these were the positions for these midget submarines to lie in wait during that period indicated as 0115 to 0410 in blue on the right-hand side of the channel and that these symbols do not represent their mother submarine, but rather the midget submarine, which apparently carried the same number as its mother.

Mr. SONNETT. Captain, will you state again the date on which you obtained Exhibits 30, 31, and 32?

Captain LAYTON. I cannot give you the exact date, but it was some [285] time between three and ten days after the 7th of December.

Mr. SONNETT. Did you receive these exhibits before the submarine sunk in Pearl Harbor was recovered?

Captain LAYTON. Yes. The submarine sunk in Pearl Harbor was not recovered, nor was any attempt made to recover it, for a considerable time after Pearl Harbor Day due to the requirements for all salvage equipment and personnel to work on damaged and sunken ships in an effort to extricate trapped personnel. As I recall it, the salvage of the midget submarine to the north or west of Ford Island was not accomplished until three weeks and possibly a month or more after December 7th. When salvaged, an attempt was made for two days to obtain intelligence material from this submarine, but as it was full of silt and all material had been completely destroyed by the effect of silt, mud, and decaying human bodies, the submarine was found to have no further intelligence value and was disposed of by burial into the submarine sea wall face as a fill.

Mr. SONNETT. So that nothing by way of documents was recovered from the submarine which had been sunk in Pearl Harbor?

Captain LAYTON. Nothing in the way of documents and nothing in the way of material because even electrical leads and pipes had been

completely disintegrated. The submarine had also been depressed and rammed, and was practically in two smashed bits.

Mr. SONNETT. Was it ascertained whether the submarine which had been sunk in Pearl Harbor had fired its torpedoes or not?

Captain LAYTON. It had. It had fired both of them. Report reached me on the 7th of December indicated that one had been fired and had exploded on the beach of Ford Island between the RALEIGH and CURTIS, as I recall it. The other, I believe, was fired and landed in the mud and [286] silt in the vicinity of the UTAH berth and didn't explode. Attempts have been made to recover that torpedo as a safety measure, but no success was achieved. In the UTAH berth area there is very, very deep mud and silt and I believe it has buried itself completely.

Mr. SONNETT. Admiral, in respect of Exhibits 30, 31, and 32, which are the original documents recovered from the submarine off Bellow Field, I understand it is your desire to leave these documents in the possession of CinCPac Headquarters.

Admiral HEWITT. That is true.

Mr. SONNETT. Do you desire further, Admiral, that any particular precaution be taken to preserve them?

Admiral HEWITT. I think that attention should be called to the condition and that special efforts should be made to preserve the documents as being of future value.

Mr. SONNETT. Referring, Captain, to the 7th of December, it was testified by Commander Wright, who was then assigned to the Communication Intelligence Unit, that radio bearings were received that day by the unit which were conflicting but that one hearing placed the attacking force as due north and that he transmitted that information to you. Will you tell us whether or not that was correct and, if so, what you recall about that report?

Captain LAYTON. On the morning of 7 December 1941, we received several bearings, commencing about 10 o'clock, from the direction finder, which gave two-way or bilateral bearings. They were in general either 357 or 178. These came from Heeia, whose communication to intelligence unit, Fourteenth Naval District, hadn't been completely disrupted. Some time in the afternoon and, as I recall it, it was about 2 o'clock, I [287] received a report to the effect that they had gotten a bearing with the CXK, the only direction finder that can make a unilateral or a one-way bearing and that that bearing was about 350 or 000. The CXK was at Lualualei, whose communications with Combat Intelligence, Fourteenth Naval District, had been completely disrupted, and although that bearing had been obtained about 10 o'clock it could not be transmitted by telephone or other means and was finally sent by officer messenger in a car to other location to be transmitted by telephone. It may have been brought all the way to Pearl Harbor by messenger; I don't know, but telephones were out all over. Even at that time we had received a series of bearings by the bilateral, that is the one from Heeia, two ways, all the way from 350 to 180. We had received conflicting and very erroneous information that the carrier had been sighted to the south. When the bearing came through from the CXK as bearing north, it tended to confirm an overlay that had been furnished me by Colonel Raley, Hawaiian Air Force. This overlay was made from a navigation chart of a Japanese fighter that had

been shot down at Hickam Field and indicated radial lines radiating out from a position to the north of Oahu. This, of course, did not prove that they were north, but indicated, along with the CXK bearing, that they were to the north of Oahu. I communicated this information to the Assistant Operations Officer, then Commander Goode, who said all I had for him was bum dope. I believe that information was used for a late afternoon search by the only remaining planes, which, as I recall it, were two or three PBY's and one B-17. No contact was made.

Mr. SONNETT. Admiral, I have no further questions for Captain Layton.

Admiral HEWITT. I would like to mention that incorrect report of the sighting of the carrier south of Barber's point.

[288] Captain LAYTON. I don't have any records on that, sir, because that came in by—there were several incorrect sighting reports that day. The Fleet Communication Officer knew that the Army command radio system was being used for sightings and combat intelligence. He designated an APD, the BALLARD, I believe, that was alongside the Sub Base dock to get on that circuit and pass to CinCPac Headquarters radio the information received on the Army command channel. It was soon apparent, although it didn't become apparent for some little time, that this was the greatest collection of erroneous, foolish, fantastic reports that was ever passed on a radio circuit, and until these were observed to be so fantastic, so exaggerated, and so imaginary—until this was discovered to be so, they were passed in plain language to our fleet at sea, and the communication log can be examined to get them in great detail. I recall they were transmitting that some six or eight transports and destroyers were off Barber's point and a cruiser and destroyer were sent over to knock them off. It was fantastic that they could get in without anybody seeing them, and they reported nothing there. They reported two cruisers, four or five transports and destroyers unloading troops, first wave now hitting the beach at Barber's Point, and again we sent the RALEIGH and some destroyers over, and again they reported nothing there, but in approaching those areas she had a torpedo fired at her, which lead to the rumor that that had been a Japanese trap. There were also reports that the Japanese had dropped paratroops on the north of the island and also that these paratroops were wearing blue coveralls with red insignia on the sleeves. I believe it was on that same circuit that we had a report that two aircraft carriers were bearing 200 degrees from Diamond Head, distant 200 and some odd miles, and ships were sent to search that area. We also had a report that was an [289] erroneous transmission from one of our vessels about the fact that he had two aircraft carriers in sight that was later corrected to have no aircraft carriers in sight. This may have been the vessel that was sent to investigate the previous report. I am not sure.

These reports are only a few of the conflicting and fantastic and highly imaginative reports that we received until they were evaluated as being what they were and we ceased to broadcast these to our fleet because it was causing them as much confusion as it was causing us. With these sorts of reports being passed into the Operations Division of CincPac, you can imagine that the Assistant Operations Officer

could well say "All you have is bum dope" when I told him that bearing of the carriers was now reported as being to the north. That was just one more report that they had.

I would like to state in this connection that I have never received from the Army then or since as to what direction these planes were picked up on the radar or which direction they went out on the radar on the morning of 7 December, as I have read in the Roberts Report that such a report was made, and had we had a radar report to confirm which direction they came from or went to, all of our uncertainty as to their exact location would have been dispelled.

Admiral HEWITT. You never had any information from radar at all?

Captain LAYTON. I didn't even know they had the radar until I read the Roberts Report, Admiral. I didn't know the Army had radar until I read the Roberts Report of the Pearl Harbor investigation.

Mr. SONNETT. Captain, I show you an original chart and ask you if you can identify it.

Captain LAYTON. This chart of the Island of Oahu, as shown is the best. [290] It shows landing beaches and gun emplacements, with their ranges, and having navigational or predicted navigational tracks with times and courses thereon, was also recovered from the midget submarine that beached itself or was beached on Bellows Field beach.

Mr. SONNETT. May we mark this as Exhibit 33, Admiral?

Admiral HEWITT. Yes.

(The document was received and marked "Exhibit 33.")

Mr. SONNETT. I show you a photograph, Captain, and ask you if you can identify it as a true and correct copy of Exhibit 33.

Captain LAYTON. It is a true and correct copy except for the reproduction of colored pencil that the Japanese used. The time 0620 to the south and west of Barber's Point is in red. The time 0621 just below the course symbol 250 is in red. The position at the extension to the northeast of that line, which is in a position southeast of Pearl Harbor entrance channel, is also in red; that position is 0621. The position just to the left of 0620 is 0621 and is in blue. Just to the left of that and in blue and smudged is a position that is actually 0-30, but could be 0230 in blue. It is badly smudged from oil. These charts were all recovered from the oily bilges of the midget submarine. Just to the south of the 0745 position in red is a 2230 position marked in blue. The translation says midget sub released at that position. Actually, it says "tube released"; so the tube may be an abbreviation or slang expression for the midget sub. The true translation, however, is "tube."

Mr. SONNETT. Referring to the photograph, may we mark it "Exhibit 33A"?

Admiral HEWITT. Yes.

[291] (The document was received and marked "Exhibit 33A.")

Captain LAYTON. Just south of Diamond Head crater is a position 0740 in blue; also marked in blue with a circle on the map is Lualaba radio towers, as is Hickam Field and Barber's Point light. There is a blue smudge just off Sand Island, but I do not believe it is a position.

Mr. SONNETT. Can you verify, Captain, the translations stated in Exhibit 33A, which is a photograph of Exhibit 99?

Captain LAYTON. With the exception noted of the word "tube" being used for a midget sub—it may be the slang expression for midget sub—the translation appears to be correct.

Mr. SONNETT. Calling your attention to the translation "got underway" appearing under the time 0745, can you state whether that is correct, or could it as well be translated "get underway"?

Captain LAYTON. My translation of this is "proceed" and it has no verb suffix, so could be "proceed," "proceeding," "to proceed."

Mr. SONNETT. That same problem of tense applies to the other translations, does it not, Captain?

Captain LAYTON. It does. Omitted near the position Kualiki is the Japanese saying "four barracks." There is some Japanese referring to a circle of the Ewa Plantation area which is badly smudged and does not lend itself to good translation. It is noted on this chart that there are four course lines laid, three approaching Pearl Harbor entrance buoys. They are 45 degrees, 40 degrees, and 331 degrees, and the retiring course from the Pearl Harbor channel buoys is shown as 151. The course to the east from the 0621 position in blue, passing through the 0740 position in blue, is 107 degrees and passes Diamond Head Peak 3,600 meters abeam.

[292] Mr. SONNETT. Captain, I note on this Exhibit 33 that there are some words in English, as well as on previous Exhibit 32. Were those words on the exhibits when you received them?

Captain LAYTON. They were. The English words written in lead pencil on this exhibit are all believed to have been written by the Japanese owner and were on there when it came in my possession. On the translation in a position just to the southwest of Barber's Point is the legend "midget sub?" This on the original is written in large characters and says "tubes five" or "five tubes," which we assumed to mean five midget subs. The 0845 position I referred to, in red, is a navigational position about a mile and a half southwest of Barber's Point light and is connected to a position near the 0745 position in red by a line in lead pencil.

Mr. SONNETT. Admiral, may the record show that Exhibits 30, 31, 32, and 33, which are the original documents obtained from the submarine, are being turned back to Captain Layton?

Admiral HEWITT. Yes.

Have you got anything further now?

Mr. SONNETT. No, sir.

Admiral HEWITT. Thank you very much, Captain.

(The witness was excused.)

(The investigation was then, at 3:55 p. m., adjourned until 1:30 p. m., 31 May 1945.)

[293] PROCEEDINGS OF THE HEWITT INQUIRY

TWELFTH DAY

Pursuant to notice, the investigation met at the Visiting Flag Officer's Office, Headquarters, Commander-in-Chief, U. S. Pacific Fleet and Pacific Ocean Areas, Pearl Harbor, Oahu, T. H., at 1:30 p. m., Thursday, 31 May 1945.

Present: Admiral H. Kent Hewitt, USN; Mr. John F. Sonnett; Lieutenant Commander Benjamin H. Griswold, USNR; Lieutenant John Ford Baecher, USNR; and Ship's Clerk Ben Harold, USNR.

A witness entered, read the precept, and was duly sworn.

Mr. SONNETT. Will you state your name and rank, sir?

Vice Admiral McMorris. Charles H. McMorris, Vice Admiral, USN.

Mr. SONNETT. Admiral, it appears from the previous investigations that from February, 1941, until the end of 1941 you were the War Plans Officer for CincPac, is that correct?

Vice Admiral McMorris. Correct.

Mr. SONNETT. I show you a pamphlet, Admiral, and ask you if you can identify what that is, and, if so, I will ask you to read certain portions of it into the record.

Vice Admiral McMorris. This pamphlet is entitled "Staff Instructions, Staff of CincPac, 1941."

Mr. SONNETT. Were you familiar with that, Admiral, at the time?

Vice Admiral McMorris. Presumably so.

Mr. SONNETT. May we mark it as an exhibit, Admiral?

Admiral HEWITT. Yes.

(The document was received and marked "Exhibit 34.")

[294] Mr. SONNETT. Admiral, I refer you to the provisions of this exhibit, which is exhibit 34, which contain the definitions of the duties of the War Plans Officer, and ask if you would read those into the record. I believe it is paragraph 207.

Vice Admiral McMorris (reading):

207. War Plans Officer—16.

(a) As head of the War Plans Section is responsible, under the Chief of Staff, for the preparation of War Plans for the Fleet and for all matters pertaining thereto.

(b) Has general custody of War Plans and secret letters relative thereto.

(c) Member of Schedule Board.

(d) Maintains liaison with War Plans representatives of subordinate Commanders.

(e) Maintains liaison with U. S. Army in War Plans matters—via District Commandant if appropriate.

(f) Makes recommendations on designs of new ships—general features—and on alterations of old ships that affect military characteristics.

(g) Makes recommendations on matters pertaining to reserves of material, particularly ammunition, mines, bombs, torpedoes, fuel, provisions, etc., and their distribution.

(h) Maintains liaison with Commandants of Naval Districts in War Plans matters.

(i) Is responsible for the review of War Plans of subordinate command and of District Commandants and Coastal Frontier Commanders insofar as these Plans may affect the Fleet.

Mr. SONNETT. Does that accord, Admiral, with your recollection of your duties as War Plans Officer for CincPac?

Vice Admiral McMorris. Yes.

Mr. SONNETT. Admiral, I show you a document entitled "U. S. Pacific Fleet Operating Plan, Rainbow Five, (Navy Plan O-1, Rainbow Five) (WPPac-46)" and ask you if you can identify that as a copy of the Pacific [295] Fleet Operating Plan Rainbow Five?

Vice Admiral McMorris. Yes.

Mr. SONNETT. May we mark that, Admiral, as an exhibit?

Admiral HEWITT. Yes.

(The document was received and marked "Exhibit 35.")

Mr. SONNETT. Referring, Admiral, to exhibit 35, which is the exhibit you have just identified, it appears, does it not, that on page 24 the tasks assigned by the Navy Basic Plan are outlined?

Vice Admiral McMorris. That is correct.

Mr. SONNETT. And among those tasks, Admiral, is sub-paragraph (h), which I would like to ask you to read into the record.

Vice Admiral McMorris (reading):

h. Protect the territory of the associated powers in the Pacific area and prevent the extension of enemy military power into the Western hemisphere by destroying hostile expeditions and by supporting land and air forces in denying the enemy the use of land positions in that hemisphere.

Mr. SONNETT. Admiral, the phrase "territory of the associated powers in the Pacific area" included Hawaii, did it?

Vice Admiral McMorris. That is correct.

Mr. SONNETT. Referring to page 25 and to page 26 of this exhibit, Admiral, it appears that the tasks formulated by the Pacific Fleet to accomplish the assigned missions are set forth, are they not?

Vice Admiral McMorris. That is correct.

Mr. SONNETT. Those tasks, Admiral, of the Pacific Fleet are divided into Phase I—Initial Tasks—Japan not in the war; and Phase II—Initial Tasks—Japan in the war. There is also a Phase II containing succeeding tasks?

[296] Vice Admiral McMorris. Correct.

Mr. SONNETT. Admiral, would you read into the record from Phase I of the Initial Tasks subdivisions (b), (g), and (m)?

Vice Admiral McMorris. (reading):

(b) Maintain fleet security at bases and anchorages and at sea.

(b) Protect the communications and territory of the associated powers and prevent the extension of enemy military power into the Western Hemisphere by patrolling with light forces and patrol planes, and by the action of strike groups as necessary. In so doing support the British naval forces south of the equator as far west as Longitude 155° East.

(m) Guard against surprise attack by Japan.

Mr. SONNETT. Does sub-paragraph (m), Admiral, contemplate that a surprise attack by Japan against Hawaii should be guarded against as a task of the Pacific Fleet?

Vice Admiral McMorris. Yes.

Mr. SONNETT. I show you, Admiral, a carbon copy of a letter dated September 9, 1941, from the Chief of Naval Operations to the Com-

mander-in-Chief, U. S. Pacific Fleet, and ask you whether you can identify it.

Vice Admiral McMorris. This is a copy of a letter which approves Pacific Fleet Operation Plan Rainbow Five, WPPac-46.

Mr. SONNETT. May we mark the letter as an exhibit, Admiral?

Admiral HEWITT. Yes.

(The document was received and marked "Exhibit 36.")

Mr. SONNETT. Can you also identify, Admiral, a letter of July 25, 1941, from the Commander-in-Chief, U. S. Pacific Fleet, to the Chief of Naval Operations on the same subject?

Vice Admiral McMorris. Yes, I identify this as a letter submitting [297] Pacific Fleet Operating Plan for Rainbow Five to the Chief of Naval Operations.

Mr. SONNETT. May we mark that as exhibit 36A, Admiral, and substitute a copy? There is a carbon annexed to that.

Admiral HEWITT. Yes.

(The document was received and marked "Exhibit 36A.")

Mr. SONNETT. Referring to paragraph 5 of exhibit 36A, Admiral, do you know the basis for the statements made in that paragraph, and, if so, would you state the basis for the statements?

Vice Admiral McMorris. The primary offensive operations as required by the Departmental Plan were for offensive operations in the Marshall Islands with a view to causing the Japanese to withhold as much of their force as possible from operations in the South China Sea. That paragraph pointed out certain handicaps that would exist in carrying out those operations. It expressed concern particularly as to the limited number of destroyers and other anti-submarine vessels. It also noted that transports weren't available to carry assault and occupying forces to the positions that might be attacked or seized, and it also pointed out a lack of suitably trained and equipped Marine forces for such operations. There was no doubt in my mind at that time that the deficiencies mentioned were very real and that while they wouldn't prevent the operations directed, they would make their execution extremely difficult and far more hazardous than would be the case if the deficiencies could be rectified.

Mr. SONNETT. Admiral, I refer you to exhibit 23 of the Naval Court of Inquiry, which consists of Annex number VII, Section VI, to the Joint Coastal Frontier Defense Plan, Hawaiian Department, and Fourteenth Naval District, 1939, dated 28 March 1941, and also consists of Addendum I to [298] Naval Base Defense Air Force Operation Plan Number A-1-41, dated March 31, 1941, and ask you whether or not you can identify those.

Vice Admiral McMorris. I feel that these can be identified as the papers which those headings purport them to be.

Mr. SONNETT. Do you recall, Admiral, whether you reviewed those papers at or about the dates which they bear or at some subsequent time?

Vice Admiral McMorris. While I now have no specific recollection that I reviewed these particular papers, by their very nature I entertain no doubt that I did review them.

Mr. SONNETT. Particularly, Admiral, I take it, in view of the fact that the review of such plans of subordinate commanders was one of your regular duties as War Plans Officer?

Vice Admiral McMorris. Those were part of my regular duties and in recollecting very definitely the duties in that connection, I know I could see a number of such papers and had many discussions of this and kindred subjects. I feel it would be virtually impossible for such a paper to have been issued without my having seen it.

Mr. SONNETT. Referring, Admiral, to the second of those two papers, that is, Addendum I, you will note that it contains a so-called "Summary of the Situation." Will you examine that and state whether your own summary of the situation at that time was in accordance with the summary contained in the exhibit?

Vice Admiral McMorris. That is substantially correct.

Mr. SONNETT. May we read that into the record, Admiral, for the sake of clarity of the record, at this point?

Admiral HEWITT. Yes.

[299] Mr. SONNETT (reading):

1. *Summary of the Situation.*

(a) Relations between the United States and Orange are strained, uncertain and varying.

(b) In the past Orange has never preceded hostile actions by a declaration of war.

(c) A successful, sudden raid, against our ships and Naval installations on OAHU might prevent effective offensive action by our forces in the Western Pacific for a long period.

(d) A strong part of our fleet is now constantly at sea in the operating area organized to take prompt offensive action against any surface or submarine force which initiates hostile action.

(e) It appears possible that Orange submarines and/or an Orange fast raid force might arrive in Hawaiian waters with no prior warning from our intelligence service.

Admiral, the reference to Orange in the Summary of the Situation is to Japan, is it not?

Vice Admiral McMorris. Correct.

Mr. SONNETT. I refer you, Admiral, to page 3 of that Addendum under sub-paragraphs (a) and (b) and (c) and (d) under Possible Enemy Action and ask if you would examine that to see whether that accords with your own estimate of the situation at or about that time.

Vice Admiral McMorris. That section indicated possible enemy actions. To that I subscribed in a greater or less degree. I did not subscribe to some of those possibilities as being probable. In fact I personally felt they might be quite improbable.

Mr. SONNETT. Again, Admiral, for the sake of clarity of the record may we read in those four?

Admiral HEWITT. Yes.

Mr. SONNETT (reading):

III. *Possible Enemy Action.*

(a) A declaration of war might be preceded by:

1. A surprise submarine attack on ships in the operating area.

2. A surprise attack on OAHU including ships and installations in Pearl Harbor.

3. A combination of these two.

[300] (b) It appears that the most likely and dangerous form of attack on OAHU would be an air attack. It is believed that at present such an attack would most likely be launched from one or more carriers which would probably approach inside of three hundred miles.

(c) A single attack might or might not indicate the presence of more submarines or more planes awaiting to attack after defending aircraft have been drawn away by the original thrust.

(d) Any single submarine attack might indicate the presence of considerable undiscovered surface force probably composed of fast ships accompanied by a carrier.

Admiral, while we are on the same subject, let me also refer to the last sub-paragraph under Possible Enemy Action and read that to you so that we may have your comments concerning that as well.

(e) In a dawn air attack there is a high probability that it could be delivered as a complete surprise in spite of any patrols we might be using and that it might find us in a condition of readiness under which pursuit would be slow to start, also it might be successful as a diversion to draw attention away from a second attacking force. The major disadvantage would be that we could have all day to find and attack the carrier. A dusk attack would have the advantage that the carrier could use the night for escape and might not be located the next day near enough for us to make a successful air attack. The disadvantage would be that it would spend the day of the attack approaching the islands and might be observed. Under the existing conditions this might not be a serious disadvantage for until an overt act has been committed we probably will take no offensive action and the only thing that would be lost would be complete surprise. Midday attacks have all the disadvantages and none of the advantages of the above. After hostilities have commenced, a night attack would offer certain advantages but as an initial crippling blow a dawn or dusk attack would probably be no more hazardous and would have a better chance for accomplishing a large success. Submarine attacks could be coordinated with any air attack.

Now, Admiral, you indicated previously that you felt that the possible enemy action as set forth in this exhibit was not probable at or about the time of this exhibit in March of 1941?

[307] Vice Admiral McMorris. That is correct.

Mr. SONNETT. Did you agree with the estimate in paragraph (a) 2 to the effect that a declaration of war might be preceded by "a surprise attack on Oahu including ships and installations in Pearl Harbor"?

Vice Admiral McMorris. I agreed with the thought there expressed, but considered such an attack more probable, much more probable, in the approaches to Pearl Harbor rather than in Pearl Harbor itself.

Mr. SONNETT. Admiral, I refer you to exhibit 8 of the Naval Court of Inquiry, which purports to be Pacific Fleet Confidential Letter number 2CL-41 (Revised), dated October 14, 1941, and ask if you can identify that.

Vice Admiral McMorris. Yes, I identify this as a Fleet Letter issued at that time concerning the security of the fleet at the base and in the operating areas.

Mr. SONNETT. I take it, Admiral, that that would have come under your official cognizance as War Plans Officer for review?

Vice Admiral McMorris. Yes, I recall reviewing this. It was prepared in the Operations Division, but a paper of this nature would unquestionably have been reviewed by myself, and while I have at this time no specific recollection of the details in preparation, I do recall that some of the earlier drafts were modified in accordance with suggestions made by myself.

Mr. SONNETT. Referring, Admiral, to the document before you, there are two assumptions set forth, are there not, upon which the plan was predicated?

Vice Admiral McMorris. Yes.

Mr. SONNETT. Will you read, Admiral, assumption 2 (b) into the record?

[302] Vice Admiral McMorris (reading):

2. (b) That a declaration of war may be preceded by:
  - (1) a surprise attack on ships in Pearl Harbor,
  - (2) a surprise submarine attack on ships in operating area,
  - (3) a combination of these two.

Mr. SONNETT. Did you, Admiral, at or about that time, name October 14, 1941, agree with assumption 2 (b), which you have just read?

Vice Admiral McMorris. Yes.

Mr. SONNETT. Admiral, I refer you to exhibit 15 of the Naval Court of Inquiry, which is a dispatch of OpNav, dated November 24, 1941, and ask whether you recall having seen that at or about that time.

Vice Admiral McMorris. I recall seeing this about that time.

Mr. SONNETT. I refer you, Admiral, to exhibit 17 of the Naval Court of Inquiry record, which is a dispatch of OpNav, dated November 27, 1941, and ask whether you recall having seen that at or about that time.

Vice Admiral McMorris. I recall seeing this dispatch about that time.

Mr. SONNETT. I refer you, Admiral, also to exhibit 19 of the Naval Court of Inquiry, which is an OpNav dispatch of November 27, 1941, and ask you whether you recall having seen that dispatch at or about that time.

Vice Admiral McMorris. I recall seeing this dispatch about that time.

Mr. SONNETT. Now, Admiral, I believe you testified before the Naval Court of Inquiry that no formal written estimate of the situation was maintained during this period of late November and early December, 1941, but that a mental estimate was maintained, is that correct?

Vice Admiral McMorris. That is correct.

Mr. SONNETT. What was your estimate of the situation and of possible courses of enemy action during the period November 27 to December 6, 1941?

[303] Vice Admiral McMorris. It is not possible now to go back with too great a degree of exactness the deductions and estimate made at that time, but substantially I estimated that the Japanese were at the point of commencing a war against Great Britain by operations in Malaysia. Somewhat earlier I had estimated that they would take such action with the expectation that the United States, unless attacked, would not enter the war in support of Great Britain, and that the Japanese were likely to proceed on the assumption that the American people would be unwilling to support a war that to them would appear primarily for the defense of Great Britain's colonies. By the time in question, however, I had come to the conclusion that the Japanese might be unwilling to leave their line of communications across the Philippines exposed to American attack in case the United States did determine to come into the war.

I estimated that heavy attacks on the Philippines had become not only a distinct possibility, but were even probable.

As our defenses at Guam were negligible and as the construction work at Wake was not very far advanced, I estimated that measures would be taken by the Japanese to seize those positions when the

initiated the war. As the defenses of Midway were markedly stronger than those at the other two places mentioned and as the Japanese were probably familiar with the details thereof, I estimated that heavy raids on that place were initially probable, but that immediate efforts towards seizure were far less likely.

I estimated that there were likely to be heavy submarine concentrations in the Hawaiian area and the approaches thereto. I believed that submarine attacks would be directed primarily at our task forces operating at sea and that there was likelihood of attempts being made to sink a ship in the Pearl Harbor channel. It seemed not unlikely that the war might be [304] initiated by an attempt to torpedo a valuable ship making ingress or egress to Pearl Harbor Channel.

I estimated that vigorous enemy submarine activity would take place in the approaches to our important Pacific Coast ports.

Those are the highlights of the estimate at that time.

Mr. SONNETT. Admiral, was it your estimate also at that time, namely, after the receipt of the so-called war warning of November 27th, that an air attack on Pearl Harbor was a possibility but not in your opinion a probability?

Vice Admiral McMORRIS. That expresses the view that I had.

Mr. SONNETT. What action, Admiral, was taken as a result of the war warning of November 27th and of your estimate which you have just stated?

Vice Admiral McMORRIS. As I now recall, there was considerable discussion between Admiral Kimmel and the key members of his staff as to action to be taken and determination was reached that the naval organization was already substantially on a war footing and no material changes would be made within the Hawaiian area. There was considerable discussion as to continuation or modification of training schedules, and the conclusion was reached that it was essential that the training continue until it was necessary to move the principal elements of the fleet for offensive operations. It had been determined before that reconnaissance in force would be made into the Marshalls as a preliminary towards seizure of positions therein with the utmost celerity when war came.

The limitations in supplies and facilities at Wake and Midway, as well as certain island outposts, had precluded stationing there requisite defensive forces until such action became virtually mandatory. This applied particularly to defensive aircraft. The only two carriers in the Hawaiian [305] area were dispatched to those places, with fighter aircraft, one going to Wake, the other to Midway. They were accompanied by cruisers and destroyers on those expeditions.

Consideration was given to sending other additional personnel to those places and consideration was also given to the withdrawal of civilian personnel who were working under contractors and developing the defenses of those two places.

It was determined, all things considered, that the best thing to do was to consider the construction work and that existing limitations of the two islands would not permit increase in personnel. It is my recollection that some small number of men and certain specialized equipment were dispatched to Wake, but it is possible that the ship carrying those elements sailed before the receipt of this dispatch.

Mr. SONNETT. What, if any, conferences or conversations were Admiral, between you and Admiral Kimmel during this period November 27th on concerning reconnaissance from Oahu?

Vice Admiral McMORRIS. I have no specific recollection in that connection, but during this period, this was a matter that was discussed between Admiral Kimmel and myself and with the two of us and other members of the staffs and with other senior naval officers present in Pearl Harbor. The details I no longer remember, but I do remember some of the considerations that were in mind and, in general, the decisions determined upon. The number of patrol planes here was small. A certain number of them were earmarked for advancement to Midway and a certain time to Wake for support and assistance in the reconnaissance of the Marshalls at an appropriate time. My recollection is that about this time there was some augmentation of the number of patrol craft at Midway.

[306] In case war should start, most of the fleet shore-based aircraft were to be moved to the island outposts, Midway, Johnston, and Wake, but since the Hawaiian Coastal Frontier had no aircraft of its own, some of the fleet aircraft were to remain under the operational control of the Coastal Frontier Command.

In order that the patrol craft might be ready for prompt movement to distant service where repair and upkeep facilities were limited, and negligible, it was deemed highly important that as many as possible be kept ready for flight on short notice and not tie up an undue number of engines requiring engine overhaul because of excessive use.

At this time the patrol wings in the Navy as a whole were increased and the operating forces were in no small measure engaged in giving essential advanced operational training. After discussion and consideration, the determination was reached to continue the training as much as possible.

It was believed by myself and, I believe, generally by other officers that entered into the discussions that it was highly important to maintain anti-submarine patrols in the operating areas.

Considering the requirements for anti-submarine patrols, the necessity for maintaining patrol aircraft in prompt readiness for distant service, and considering the impelling necessity for continuation of the training program, it was determined that the arrangements that were actually in effect were the best that we could do. This in effect was a calculated risk. Subsequent events proved that the calculations weren't good. Calculations at the time, however, did show that in the very limited sectors could be continually patrolled with the force available. It may be remarked in passing that with the effectiveness of search that could have been maintained, it is doubtful that the approach of the Japanese carriers on the morning of December 7, 1941 [307] would have been detected as the arc of their approach could quite possibly have been unguarded.

Mr. SONNETT. Admiral, the various considerations concerning reconnaissance which you have just described were, I take it, your considerations at the time?

Vice Admiral McMORRIS. Yes, I think so. I might say that the passage of time and various discussions of this matter, it is sometimes difficult to say whether those specific things were in your mind at that time or that possibly other considerations were in mind

dition. I feel safe in saying, however, that while the considerations which I have just mentioned are my best recollection now, it is not only possible but highly probable that they were in my mind at that time and were voiced in discussions with the Commander-in-Chief and with others concerned.

Mr. SONNETT. It is the fact, Admiral, I take it, that you do not recall any formal conference or detailed discussion with the Commander-in-Chief on that subject?

Vice Admiral McMORRIS. It would be better to say that it was not a practice to have formal conferences. There was not a formal conference, but there were numerous conferences and discussions, and while I cannot say that this specific question was the subject of any one conference, it undoubtedly was a matter that was discussed during this period, and the action taken was after consideration and evaluation of the factors involved in the light of information and circumstances that existed at the time.

Mr. SONNETT. What I am trying to get at, Admiral, is you have no independent recollection of any specific discussion with Admiral Kimmel after November 27th on the subject, but you feel it must have been discussed?

[308] Vice Admiral McMORRIS. While I have no specific recollection as to time or date or subject matter of a conference, I can say definitely that during this period this subject matter was discussed between myself and others and the Commander-in-Chief.

Mr. SONNETT. Will you tell us what Admiral Kimmel said at any such discussion, Admiral, concerning reconnaissance from Oahu?

Vice Admiral McMORRIS. No, I cannot, but manifestly the conclusions that he reached did not result in any distant search being maintained, but rather that the search at the time was against submarines in localized areas.

Mr. SONNETT. Do you recall, Admiral, any discussion with Admiral Kimmel after the war warning of November 27th and prior to December 7th concerning a projected reconnaissance flight by the Army over the Mandated Islands?

Vice Admiral McMORRIS. No, I do not. I do recall that General Martin was very loathe to have the fighter aircraft over water at all, and while I do not recall any discussion of Army flights over the Mandated Islands, it doesn't mean that such discussions may not have taken place, but certainly no action was ever taken leading to anything of that sort; so that, if such discussion did take place, it must have been concluded that such would be unfeasible.

Mr. SONNETT. Admiral, I show you exhibit 28 of this investigation, which is a memorandum from Captain Layton to the Admiral on November 28, 1941, and ask you whether, after examining it, it refreshes your recollection at all concerning the proposed Army reconnaissance.

Vice Admiral McMORRIS. That does refresh my recollection to some extent because I was thinking at the time in terms of visual reconnaissance by a number of planes. I do now vaguely recall some discussion with regard to photo reconnaissance, but the recollection is vague in the extreme.

[309] Mr. SONNETT. Admiral, do you recall the extent of the sector from Oahu which could have been covered by the patrol planes available during the period November 27th to December 7, 1941?

Vice Admiral McMorris. That is a question that cannot be categorically answered. Various combinations of diagrams were given consideration and had a search been determined upon, it would have necessarily finally been based on the radius of flights and how long a period of time the searches would continue and whether or not the needs of training and engine overhaul would be completely ignored. As a practical measure, had such searches been instituted at all, they undoubtedly would have been a compromise among the different requirements involved, just as a compromise was actually reached in limiting the searches to the fleet operating areas.

Mr. SONNETT. Admiral, you stated a moment ago that various diagrams were given consideration. When and by whom were they considered?

Vice Admiral McMorris. That I cannot now answer. There were undoubtedly some drawn within the War Plans Section, some by the Aviation Officer, possibly or even probably by the Operations Division. I do not recall whether any were brought over by the patrol wing commander. The extent to which any were directly presented to the Commander-in-Chief or which he may have noted within my office or the Operations Office, I cannot now answer.

Mr. SONNETT. Admiral Bellinger was the Air Officer at that time, was he not, Admiral?

Vice Admiral McMorris. He was in command of the patrol wing of the fleet that was stationed here at that time, and the senior naval officer in the patrol craft.

Mr. SONNETT. He testified, Admiral, before the Naval Court of Inquiry [310] that during the period in question, November 1941, on, continuous daily patrol could have been flown by dividing the combat crews into three groups, using twenty planes daily covering 144°, which could have been continued for an underterm of a number of days. Does that accord with your recollection as to the capabilities for reconnaissance during that period?

Vice Admiral McMorris. I would say that that wouldn't be wrong if that were the only consideration to be given, namely, to conducting a search, but the Commander-in-Chief had not only that consideration to weigh, but also the matter of keeping planes ready for important service and for training of personnel for new aircraft being brought in.

Mr. SONNETT. How many naval aircraft were available at that time at Oahu? Do you recall, Admiral?

Vice Admiral McMorris. I do not.

Mr. SONNETT. Admiral, I show you exhibit 22 of this investigation which consists of a series of photostats of a document entitled "Communication Intelligence Summaries" and I direct your attention to those particularly for the period 27 November 1941 to 5 December 1941 and ask you whether you recall having seen those at the time.

Vice Admiral McMorris. I recall being familiar with information of that general nature at that time, that frequently I did not myself read them but heard them either read or orally presented by Captain Layton, and I judge that those are the principal intelligence information that was available at that time.

Mr. SONNETT. Referring to the summary for November 30, 1941, Admiral, and to the lower left-hand corner, is that your initial impression?

Vice Admiral McMorris. I don't know. It may well be.

Mr. SONNETT. Do you recognize the initial in the lower right-hand corner?

[311] Vice Admiral McMorris. That appears to be Admiral Kimmel's initial. I certainly had access to all such material at that time.

Mr. SONNETT. I refer you to the initial on the 23 November 1941 summary at the lower left-hand corner and ask you whether that is your initial.

Vice Admiral McMorris. Probably.

Mr. SONNETT. And to the one for November 22, 1941, Admiral, the lower left-hand corner.

Vice Admiral McMorris. The same comment holds. That is probably my initial.

Mr. SONNETT. Is that also true of the one for November 30th, Admiral, that it probably is your initial, or aren't you sure about it?

Vice Admiral McMorris. Yes, that is probably.

Mr. SONNETT. In the November 30th summary, Admiral, it is indicated, is it not, that the radio intelligence unit was of the opinion that there was a Japanese carrier in the Mandates?

Vice Admiral McMorris. Yes.

Mr. SONNETT. What, if any, discussion did you have with Admiral Kimmel concerning that belief?

Vice Admiral McMorris. I do not now recall any. It is quite possible, however, that discussion did occur.

Mr. SONNETT. Would it be an accurate statement, Admiral, to say that you had received during that period either these communication intelligence summaries or the substance of them?

Vice Admiral McMorris. That would be accurate.

Mr. SONNETT. Admiral, I show you exhibit 8 of this investigation, which consists of photostats of various dispatches, and refer you particularly to the dispatch of ComFOURTEEN of 26 November and ask whether you recall having seen that at the time.

[312] Vice Admiral McMorris. I have now no independent recollection of that message, but would say that I probably did see it at the time. I almost surely saw it at the time.

Mr. SONNETT. That indicates, Admiral, does it not, that there was believed to be, among other things, at least one carrier division unit in the Marshalls?

Vice Admiral McMorris. Yes.

Mr. SONNETT. I also show you, Admiral, exhibit 23 of this investigation, which is a memorandum of December 1, 1941, from Lieutenant Commander Layton, Fleet Intelligence Officer, to the Admiral, and ask you whether you recall having seen that.

Vice Admiral McMorris. Again I now have no independent recollection of seeing that, but would say it is improbable that I did not see it.

Mr. SONNETT. Do you recall, Admiral, that on or about December 1, 1941, there was a change in the service calls of the Japanese fleet?

Vice Admiral McMorris. I remember that about that time there was a change in their call signs.

Mr. SONNETT. And do you further recall that in the succeeding days prior to the attack there was a blank of information as to the Japanese carriers?

Vice Admiral McMorris. My recollection now is that specific information was lacking, but my general impression now is that we believed at the time that we had a fairly good idea of the general location of the major elements of the Japanese fleet.

Mr. SONNETT. Where did you, during the period November 27th to December 6, 1941, believe the Japanese carriers were, Admiral?

Vice Admiral McMorris. Again, it is difficult to say what the specific beliefs were at that time, but generally in home waters or toward Formosa.

[313] Mr. SONNETT. Now, referring to the communication intelligence summaries, exhibit 22, will you point out where in the summaries is the information on which you based that belief?

Vice Admiral McMorris. Before looking, I may say that it may or may not be specifically in here.

Mr. SONNETT. I should add, Admiral, if it is not there, would you state whatever the information was on which you based the belief?

Vice Admiral McMorris. Nor would I be able to answer a question of that nature.

To answer the question now would be an attempt to take the record here and justify the conclusion reached. The information is at best very vague. It would take a considerable number of quotations to give them as they come.

24 November:

Large numbers of dispatches involving Third Fleet units, some of which appear to be movement reports. The fact that CinC Third Fleet appears as the addressee on many dispatches to and from Second Fleet units indicates that these two fleets will be closely associated in any future operations. Yesterday, a large number of dispatches associating Carrier Division Three with CinC Third Fleet.

25 November:

One or more of the Carrier Divisions are present in the Mandates.

26 November:

The Tokyo Intelligence and Direction Finder plotting units addressed a large number of urgent dispatches to the major commands and to the CinC Second and Third Fleets in particular. . . . Takao and Bako originated more traffic today than usual, it was addressed to Third Fleet mostly but the CinC Second Fleet and the China Fleets came in for their share.

[314] Again on the 26th of November:

The traffic between Second, Third, Fourth Fleets and the Combined Air Force still continues at its high level.

27 November:

Bako addressed the Chief of Staff, Third Fleet, information Destroyer Squadrons Four and Five and Chief of Staff Second Fleet. The main Tokyo originator today was the Intelligence activity who sent five dispatches to the major commands.

Same date:

**COMBINED FLEET**—There is still no evidence of any further movement from the Kure-Sasebo area. The Chief of Staff Combined Fleet originated several messages of general address. He has been fairly inactive as an originator lately. CinC Second Fleet originated many messages to Third Fleet, Combined Force, and Bako.

Again:

**THIRD FLEET**—Still holding extensive communication with Bako, South China Fleet and French Indo-China. . . . There is nothing to indicate any movements of the Third Fleet as yet.

28 November:

Tokyo originators were active with messages of high precedence to the Commanders-in-Chief of the Second and Third Fleets and Combined Air Force. . . . The Chief of the Naval General Staff sent one to the Chief of Staffs of Combined Air Force, Combined Fleet, Fourth Fleet, Third Fleet, French Indo-China Force, Second Fleet, and RNO Palao.

Again, same date:

**COMBINED FLEET**—No indication of movement of any Combined Fleet units. Commander-in-Chief, Second Fleet originated his usual number of dispatches to Third Fleet and Combined Air Forces. The units paid particular attention to by the Commander-in-Chief, Second Fleet, were Crudivs 5 and 7 and Desrons 2 and 4 and Subron 5. No traffic today from the Takao (CA).

[315] Again, same date:

**THIRD FLEET**—Little activity from Third Fleet units save for the Commander-in-Chief. The impression is growing that the First Base Force is not present with the bulk of the Third Fleet in Sasebo but it is not yet located elsewhere. \* \* \* Two Third Fleet units arrived at Bako and are apparently returning to Kure from Bako.

29 November:

Commander-in-Chief, Third Fleet, sent one message to Comdesron 5, Number Two Base Force, Number One Base Force, Defense Division One and Comdesrons 2 and 4. He held extensive communications with the Commander-in-Chief Second Fleet and Bako. Two more units of Third Fleet made movement reports.

30 November:

One urgent dispatch was sent by NGS to Chiefs of Staff, Combined, Second, Third, Fourth, and Fifth Fleets, Combined Air Force.

30 November:

No information obtained as to the location of the Commander-in-Chief Third Fleet, which gives the strong impression that he is underway.

1 December:

**FIRST FLEET**—Nothing to indicate that this fleet as a fleet is operating outside of Empire Waters.

**SECOND FLEET**—This fleet is believed proceeding from the Kure-Sasebo area in the direction of South China and Indo-China. Takao does not appear to play an important role in today's traffic; consequently, the assumption is made that this fleet is passing up Takao. Certain units of the Second Fleet Task Force are definitely in the Indo-China area.

**THIRD FLEET**—Nothing to report except that the same association of Second, Third Fleets and Combined Air Force with South China and Indo-China forces continues.

[316] 2 December:

**SECOND FLEET**—No units have stood out prominently the last two or three days. This is partly due to lack of new identifications but contributes somewhat to the belief that a large part of the Second Fleet is underway in company. Cruiser Division Seven and Destroyer Squadron Three are unlocated and unobserved since change of calls.

Same date:

**THIRD FLEET**—Nothing to report. Shanghai appeared in an indirect way in some of the Third Fleet traffic.

**CARRIERS**—Almost a complete blank of information on the Carriers today. Lack of identifications has somewhat promoted this lack of information. However, since over two hundred service calls have been partially identified since the change on the first of December and not one carrier call has been recovered, it is evident that carrier traffic is at a low ebb.

## 3 December :

The extensive use of alternate calls by the major commands slows up identification of even these Units. Very few units have been positively identified so far. The Chief of the Naval General Staff originated three long dispatches to the CINC COMBINED, SECOND and THIRD FLEETS. The Tokyo Intelligence Unit originated nine dispatches to the same addressees.

The presence of the CINC SECOND FLEET in Taiwan waters is not revealed by radio traffic. In some traffic from Takeo the CINC SECOND FLEET is indicated as having previously received the messages while in others to Tokyo he is indicated for delivery by that Station. It is the impression that both SECOND and THIRD FLEETS are underway but are not verified by Radio Intelligence means.

## 4 December :

There were a large number of urgent messages today, [317] most of these from Tokyo to the major commanders. Among others Tokyo Intelligence originated a seven-part message to Chiefs of Staff China Fleet, Combined Fleet, Third Fleet, South China Fleet, French Indo-China Force, and Sama. In this activity sent twelve messages to the major commanders.

## Same date :

The outstanding item of today's traffic is the lack of messages from the CINC Second Fleet and CINC Third Fleet. These previously very talkative commanders are now very quiet. While the Fleet calls are not yet well identified, the lack of traffic from these commands cannot be ascribed to that. These two commands are still prominent as addressees. It is now believed that the CINC Second Fleet is in the vicinity of Takao and that the apparently conflicting evidence is due to traffic destined for the Tokyo UTU broadcast which the CINC Second Fleet is still copying. The CINC Combined Fleet sent one message to an unidentified unit for information to Third Base Force, Palao, CINC Second Fleet and CINC Third Fleet.

## 5 December :

Neither the Second or Third Fleet Commanders have originated any traffic today. They are still frequently addressed but are receiving their traffic only by broadcast. They are undoubtedly in Takao area or farther south since the Takao broadcast handles nearly all their traffic. No traffic from the Commanders of Carriers or Submarine Force has been seen, either.

## 6 December :

Still no traffic from the Second and Third Fleet Commanders. These units are sending their traffic via the TAKAO and TOKYO broadcasts. The Commander-in-Chief Combined Fleet originated several messages to the Commander of the Fourth Fleet and the major commanders.

[318] Mr. SONNETT. Admiral, as to the 6th of December summary, I would like to call your attention to a pencilled note at the bottom which indicates that that summary was not received until after the attack. I just wondered whether you could confirm that or not, or whether you have any recollection of it.

Vice Admiral McMORRIS. I have no recollection.

Mr. SONNETT. I also would like to refer you, Admiral, back to the December 3rd intelligence summary, which closes with the statement, "No information on submarines or Carriers."

Vice Admiral McMORRIS. Yes.

Mr. SONNETT. Now, Admiral, may I show you exhibit 21 of this investigation, a photostat of Pacific Fleet Intelligence Bulletin number 45-41, and ask you whether you saw that on or about that date?

Vice Admiral McMORRIS. It is highly probable that I did during that period.

Mr. SONNETT. Referring, Admiral, to page 1 of the bulletin, do you recall the following statement:

The following revision of Op-16-F-2, ONI Serial number 27-41, supersedes and revises the former report on this subject,

The subject being the organization of the Japanese fleet.

The principal change consists of a further increase in the number of fleet commands. This has arisen from the regrouping of aircraft carriers and sea-plane tenders into separate forces and from the creation of special task forces in connection with the southward advance into Indo-China.

And then the major fleet commands are listed, the seventh being the carrier fleet, aircraft carriers of five carrier divisions.

Vice Admiral McMorris. Item 7, just to avoid confusion, because they give the numbers of those.

[319] Mr. SONNETT. Right, sir; item 7 listed as the carrier. Do you recall having had that information, Admiral, at that time?

Vice Admiral McMorris. I feel sure I must have had it.

Mr. SONNETT. Now, referring back to page 8, Admiral, of the bulletin, there is set forth, is there not, the composition of the Japanese carrier fleet?

Vice Admiral McMorris. Yes. It indicates here ten carriers and sixteen destroyers.

Mr. SONNETT. Now, is it the fact, Admiral, that after December 1, 1941, and prior to the attack on Pearl Harbor, you had no intelligence or information concerning the location or movements of those carriers?

Vice Admiral McMorris. Of a carrier fleet as such we did not, as I recall it.

Mr. SONNETT. Did you have any information concerning the movements of any of the carriers of the Japanese carrier fleet after December 1, 1941?

Vice Admiral McMorris. Not specifically.

Mr. SONNETT. Did you have any in general? If so, what?

Vice Admiral McMorris. Without now being able to indicate anything specific, the general organization as set forth in the paper in question was to a large extent a type organization, and while there was a lack of reference to specific carriers or to carriers as a whole, I did not reach a conclusion that they were operating independently of the rest of the Combined Fleet.

Mr. SONNETT. Did you, Admiral, reach the conclusion that, as stated in these communication intelligence summaries, after December 1, 1941, there was no information as to the carriers?

[320] Vice Admiral McMorris. My recollection now is that during that period there were one or two vague indications associating them with the Second and Third Fleets, which was logical, and some possible associations with Palao, and at least one instance with the Marshalls.

Mr. SONNETT. Well, Admiral, referring to exhibit 23, which is now Captain Layton's estimate of December 1, 1941, of the location of the Japanese fleet, do you find any reference in that estimate to the location of Carrier Divisions Three and Four of the Japanese fleet?

Vice Admiral McMorris. I note under "Kure-Sasebo" in red pencil "Four CV." I note under heading "CinC 2nd Fleet with units at

Takao" Cardivs 3 and 4, and I note under the summation four at that place. I note under "Marshall Area" one CV.

Mr. SONNETT. Now, Admiral, referring to exhibit 21, that indicates on page 8 Carrier Division One of the Japanese fleet consisted of AKAGI and the KAGA and Carrier Division Two of the SORU and HIRYU. Do you find in the December 1st estimate by Captain Layton, exhibit 23, any indication as to the location of any of four carriers comprising Carrier Divisions One and Two?

Vice Admiral McMORRIS. I do not find in that paper the name of any specific ships, carriers or otherwise.

Mr. SONNETT. Do you find on page 3, Admiral, under "Bako-Tal area" Carrier Division Four and Carrier Division Three?

Vice Admiral McMORRIS. Yes.

Mr. SONNETT. Do you find any place in the paper Carrier Division One or Carrier Division Two?

Vice Admiral McMORRIS. No.

[321] Mr. SONNETT. Did you participate, Admiral, in any conference with Admiral Kimmel concerning the December 1st estimate of Captain Layton?

Vice Admiral McMORRIS. I do not recall, but if there were a discussion on that, it is improbable that I would not have been present.

Mr. SONNETT. Well, I take it, Admiral, you recall no specific discussion of the lack of information concerning Carrier Divisions One and Two of the Japanese fleet on or about December 1, 1941, and prior to the attack?

Vice Admiral McMORRIS. I do not so recall, but I do recall that during that general period, the information as to locations of Japanese fleet units far from as specific as was desired, but I do not recall the lack of information, taking into consideration the general situation and all other information at hand, that we were extremely disturbed.

Mr. SONNETT. Referring back to exhibit 17 of the Naval Com record, the so-called war warning dispatch of November 27, 1941, should like to call your attention to the following portion of the dispatch:

Execute an appropriate defensive deployment preparatory to carrying out tasks assigned in WPL-46.

I should like further to call your attention to the Initial Tasks of the Pacific Fleet and in particular items "b," "g," and "m" of Phase I initial tasks, to be taken when Japan was not in the war, and to ask you what was done by way of a deployment preparatory to carrying out those tasks. I will read them again so that you will have them clearly in mind. (Reading):

b. Maintain fleet security at bases and anchorages and at sea.

g. Protect the communications and territory of the associated powers and prevent the extension of enemy military power into the [322] Western Hemisphere by patrolling with light forces and patrol planes, and by the action of striking groups as necessary. In so doing support the British naval force south of the equator as far west as Longitude 155° East.

m. Guard against surprise attack by Japan.

The question, Admiral, is—

Vice Admiral McMORRIS. I know the question.

Mr. SONNETT. Referring to the war warning, what appropriate defensive development preparatory to carrying out those tasks was executed?

Vice Admiral McMorris. That question has in effect been answered in my reply in this testimony to an earlier question regarding that dispatch. In substance there was no material change in the disposition and deployment of the fleet forces at that time other than the movements of certain aircraft to Midway and Wake and of the carriers, with their attendant cruisers and destroyers, to those locations to deliver aircraft.

Mr. SONNETT. Admiral, the language which I have quoted from the war warning dispatch was a direction, was it not?

Vice Admiral McMorris. Yes.

Mr. SONNETT. I take it, then, that it was your view that either you had already in effect an appropriate defensive deployment or that what you had in effect on November 27th plus the steps you mentioned amounted to an appropriate defensive deployment. Is that correct?

Vice Admiral McMorris. That is correct, and in addition thereto, considering the other tasks assigned in case of war, the direction to take defensive dispositions carried with it the implication that offensive dispositions weren't to be taken. The primary offensive task of the [322] Pacific Fleet, and one that in my view would require very prompt action, was employment of our forces against the Marshalls in order to force the Japanese to withhold a portion of their forces from operations against Malaysia.

This so-called war warning order, mentioning specifically "defensive" dispositions, was issued while important conversations were going on in Washington with a view to prevention of war. It seems clearly to indicate that our forces should not be exposed in the Marshall area or close approaches thereto preparatory to an assault, as detection there might prejudice efforts to maintain peace. Since the fleet was in effect cautioned against offensive dispositions, by specific directives to take defensive dispositions, and since the fleet had to a large extent been already disposed in a defensive manner, it was felt that the directive in question was being complied with.

Mr. SONNETT. Admiral, I call your attention to the fact that the initial tasks of the Pacific Fleet contained in Pacific Fleet Operating Plan Rainbow Five were divided into two phases: Phase I, Japan not in the war, and Phase IA, Japan in the war; and that Phase I did not provide for any raid or any offensive action toward the Marshalls or elsewhere, but did provide for protecting the communications and territory of the associated powers, the prevention of the extension of enemy military power into the Western Hemisphere by patrolling with light forces and patrol planes, and also provided for guarding against surprise attack by Japan.

What specific deployment was made to accomplish those tasks?

Vice Admiral McMorris. The disposition of the major portion of the fleet in Hawaiian rather than in coastal waters was a major action [323] in that regard. The reenforcement hitherto mentioned for Midway and Wake were elements of that disposition. The employment of the fleet units underway at sea and the Hawaiian area with appropriate screens and with patrol of the area by patrol aircraft were other elements of that disposition. The maintenance of a full supply of ammunition and the requirement that all ships at all times must have a certain minimum quantity of fuel on board (my recollection)

tion is that that requirement was seventy per cent, although it may have varied somewhat with the class of the ships) was a support act to make the dispositions effective.

Mr. SONNETT. It would, Admiral, have been an appropriate move would it not, in order to accomplish the initial task "m," namely, guard against surprise attack by Japan, to have established an air presence from Oahu?

Vice Admiral McMORRIS. Yes, that would have been an appropriate act, but no one act nor no one disposition can be examined independent of other requirements.

Mr. SONNETT. Referring again, Admiral, to exhibit 17 of the Naval Court's record, the so-called war warning, it started out, did it not by stating:

This dispatch is to be considered a war warning X Negotiations with Japan looking toward stabilization of conditions in the Pacific have ceased and an aggressive move by Japan is expected within the next few days X The number and equipment of Japanese troops and the organization of naval task forces indicates an amphibious expedition against either the Philippines or the Peninsula or possibly Borneo X Execute an appropriate defensive deployment et cetera, and language that we quoted before.

[325] Now, had you received a dispatch prior to that time stating that this was a war warning or that an aggressive move was expected, other than the dispatch of November 24th, which stated in part, "... a surprise aggressive movement in any direction, including attack on Philippines or Guam, is a possibility"?

Vice Admiral McMORRIS. We had received no communication which used the term, "This is a war warning." However, in January of 1941, while I was under orders to duty as War Plans Officer, Pacific Fleet, but before I had reported as such and before Admiral Kimmel had assumed command, I did participate in a conference with Admiral Richardson, then the Commander-in-Chief, and War Plans Officer and with Admiral Kimmel and with the Chief of Staff of the two admirals mentioned, concerning the probability of war with Japan; and throughout the year until 7 December there were various communications by letter and by dispatch and by interchange of personal letters between the Chief of Naval Operations and the Commander-in-Chief, Pacific, regarding the probability of war with Japan; and the situation was tense throughout the year, much so that the dispatch in question occasioned no surprise, did it convey any considerable amount of additional or startling information.

Mr. SONNETT. The conference to which you refer just before you reported as War Plans Officer, I take it, occurred in late January or early February of 1941, Admiral?

Vice Admiral McMORRIS. Late January, 1941, and as a result thereof a joint letter was sent by Admiral Richardson and Admiral Kimmel to the Chief of Naval Operations.

Mr. SONNETT. Did you at that time see the letter of the Secretary of the Navy, dated January 24, 1941, which was exhibit 9 before the Naval [326] Court of Inquiry, a copy of which I now show you?

Vice Admiral McMORRIS. I saw that letter in late January or early February, 1941.

Mr. SONNETT. Did the statements of the Secretary of the Navy in the letter, which I will now read in part, accord with your own views?

(Reading:)

If war eventuates with Japan, it is believed easily possible that hostilities would be initiated by a surprise attack upon the Fleet or the Naval Base at Pearl Harbor. . . .

The dangers envisaged in their order of importance and probability are considered to be:

- (1) Air bombing attack.
- (2) Air torpedo plane attack.
- (3) Sabotage.
- (4) Submarine attack.
- (5) Mining.
- (6) Bombardment by gun fire.

Vice Admiral McMORRIS I had no fault to find with the views expressed therein, although not completely in accord as to the elements of danger as listed in importance there.

Mr. SONNETT. Were you also in accord with the statement of the then Secretary of the Navy, which I will quote: "The countermeasures to be considered are: (a) location and engagement of enemy carriers and supporting vessels before air attack can be launched," and the further statement referring to (a) as follows: "The operations set forth in (a) are largely functions of the Fleet, but quite possibly might not be carried out in case of an air attack initiated without warning prior to a declaration of war"?

[327] Vice Admiral McMORRIS. Those views appeared to be sound.

Mr. SONNETT. And I take it, Admiral, from your previous testimony that certainly as late as October 14, 1941, when the fleet security letter was issued, you still thought that an air attack was possible although you were of the view that it was not probable?

Vice Admiral McMORRIS. I felt that an air attack was possible but not probable and that the fleet should not take as its sole object of existence the defense of itself against a surprise attack, but that it should also carry on other fundamental duties.

Mr. SONNETT. Those duties, Admiral, were the duties we referred to before, set forth in the Pacific Fleet Operating Plan, were they not?

Vice Admiral McMORRIS. Yes, and with reference to that plan, I presume that that included the training and otherwise readying of itself for operations, but whether or not those duties are specifically indicated there, they would be implicit in any orders or plans that might be issued.

Mr. SONNETT. In that connection, Admiral, I call your attention to initial task "k" of the Phase I tasks, reading, "Continue training operations as practicable."

It is the fact, Admiral, or it was the fact, as you earlier testified, that patrols, or aircraft reconnaissance rather, was being conducted from Midway and other outlying bases during the so-called critical period, November 27, 1941, on, was it not?

Vice Admiral McMORRIS. Only to a very limited extent. The aircraft that were at the outlying bases other than Midway were entirely defensive. The aircraft at Midway were partially defensive and par-

tially [328] for patrol. The amount of gas and the facilities at Midway were extremely limited and necessitated the most conservation of the available supplies and of the aircraft themselves in order that engines might not be worn out before a crisis period arose. Again, it may be remarked in passing that had the maximum search been instituted from Midway and Pearl Harbor the 27th of November warning, the situation with regard to air engines by the 7th of December would have been in a highly critical situation.

Mr. SONNETT. By the first week in December, 1941, Admiral had had, of course, the war warning and you knew that Japanese forces were on the move, according to intelligence, and you also knew that the Japanese were destroying codes and the like, as I recall from previous testimony; is that correct?

Vice Admiral McMORRIS. That is correct.

Mr. SONNETT. You also knew, I take it, Admiral, and were aware of the fact that the Japanese in the past had attacked without declaration of war and indeed your security orders and war plans were based on an assumption that they might do that, is that correct?

Vice Admiral McMORRIS. The factors which you have mentioned were constantly in the mind of myself and, I am sure, were in the mind of the Commander-in-Chief.

Mr. SONNETT. I take it, Admiral, that one of the things that you were thinking about during that first week of December was the proposed reconnaissance and raid in force on the Marshall Islands, which was one of the tasks set forth in Phase IA of the Pacific War Plan, is that correct?

[329] Vice Admiral McMORRIS. That is correct. During that period, I daily, or at most on alternate days, furnished the Commander-in-Chief an informal typed memo of the action that I felt should be taken by the important elements of the fleet if war ensued in the following twenty-four hours.

Mr. SONNETT. I show you, Admiral, exhibits 69A and 69B of the Naval Court of Inquiry and ask you whether those are the memoranda to which you referred.

Vice Admiral McMORRIS. These are typical, but I believe there were additional ones.

Mr. SONNETT. Those are dated, Admiral, November 30th and December 5, 1941, respectively, are they not?

Vice Admiral McMORRIS. Yes.

Mr. SONNETT. Was there any provision made in those for reconnaissance from Oahu?

Vice Admiral McMORRIS. No.

Mr. SONNETT. I call your attention, Admiral, to task "g" of Phase IA of the initial tasks of the Pacific Fleet—that is, the Phase I tasks are those to be taken initially when Japan is in the war—task "g" reads as follows: "Maintain air patrols against enemy forces in the approaches to Oahu and outlying bases." Why was no provision made for carrying out that task?

Vice Admiral McMORRIS. There was actually in effect in the Pacific Fleet air patrols against enemy forces, but the patrol was against submarines which was regarded as the greatest element of danger. On the outbreak or commencement of war, certain of the patrol craft were

pass to the [330] operational control of the Commander of the Hawaiian Coastal Frontier and such searches would have been conducted by him. However, the number of such aircraft so assigned was very small and it was expected that they would largely be used for anti-submarine patrols as was in effect at the time. Although the operations of that nature were under the general supervision and direction of the Operations Division rather than the Plans Division of the Staff, I was fully aware of what was being done and was completely in accord and had given the weight of my advice in that direction to the Commander-in-Chief.

Mr. SONNETT. In advising the Commander-in-Chief during the critical period of 1941, did you evaluate and consider at any length the intelligence information showing that you had no information as to the whereabouts of the Japanese carriers from December 1st on?

Vice Admiral McMorris. Certainly the negative as well as the positive information available entered into the conclusions.

Mr. SONNETT. I have nothing further, Admiral.

Admiral HEWITT. In your testimony before one of the previous investigations you stated that in your opinion the island defense was adequate and in case of an air attack the chance to inflict damage was small. The question arose in my mind as to what you based that opinion on.

Vice Admiral McMorris. It might be somewhat difficult to give the train of thought that led to those conclusions, but I felt that with the defenses here, with the anti-aircraft power and with the fighter strength, that a large proportion of the attacking planes would be destroyed and that the accuracy of the bombing would be such that no large number of [331] hits would be obtained. Notwithstanding the success of the British attack at Taranto (I believed there were peculiar conditions that existed there), I did not believe that there was a serious hazard from aerial torpedo attack in Pearl because of the necessity for attacking planes to come very low. I believed that a considerable proportion of them would be destroyed by AA fire, aside from the local fighter protection, and that the shallowness of the water and the short distance the torpedoes would have to run would mean that the torpedoes themselves would not inflict great damage. Manifestly, my conclusions were entirely wrong in all those respects. They were reached, however, from reading available information and acquaintance with the torpedo performance in our own Navy.

Admiral HEWITT. Did you have any knowledge as to the readiness of the Army anti-aircraft defenses, whether they were actually alerted and occupied their positions?

Vice Admiral McMorris. No.

Admiral HEWITT. But your assumption was that they were in readiness?

Vice Admiral McMorris. That is correct, and perhaps I was remiss in not acquainting myself more fully as to what they were doing. We knew that our own establishment was fairly good. Actually they proved not to be as good as I felt. We were a bit too complacent there. I had been around all of the aircraft defenses of Hawaii; I knew their general location. I had witnessed a number of their anti-aircraft practices and knew the quantity and general disposition of

their aircraft. I knew that they were parked closely together for more ready protection against sabotage rather than dispersed. Nevertheless, I was not directly acquainted or indirectly acquainted with the actual state [332] of readiness being maintained or the watches being kept.

Admiral Hewitt. It was brought out in the other investigation that relations between Admiral Kimmel and General Short were cordial and they saw each other frequently and kept each other informed as well as possible. I wonder whether that extended to elements of the staff, whether there was much interchange of information.

Vice Admiral McMorris. I think there was such interchange of information rather habitually on an informal basis. I myself frequently saw members of General Short's staff. I know General Martin, I believe, and Admiral Bellinger had not infrequently attended meetings; perhaps they shouldn't be characterized as conferees. I know that there had been called for the morning of the 8th of December a meeting between a number of General Short's officers and District officers to meet with Captain DeLany, who was the Operations Officer at the time, at his call to see if there could be brought about an improvement with regard to communications and arrangements for coordination if meeting attack. I cite those things merely as illustrative. There was a considerable amount of interchange of information and discussion with one another. At that time it is certain that the two services acted semi-independently, but the local plan of defense which Admiral Kimmel had approved, had been drawn up by the Commander of the Hawaiian Department's staff and by the Commander of the Sea Frontier's staff.

Before I joined Admiral Kimmel's staff, I was Operations Officer for Admiral Andrews, who was the Commander of the Hawaiian Fleet Detachment, and was Senior Officer Present in the Hawaiian Islands when the fleet came out in 1940 some time. During that period, I frequently visited Fort Shafter, the military establishments in Hawaii, and discussed defensive [333] plans with the Planning Officer of the District Commandant. I witnessed a number of firings by the elements. On more than one occasion the G-3 officer of the Department was my guest at our own firings, and after I joined Admiral Kimmel's staff, that association continued, and I feel that I was not excused from having contact with the Army personnel on their problems.

Admiral Hewitt. When you discussed the considerations of the principal danger being from submarines, that would apply to ships in the operating areas and to ships entering and leaving the harbor, would not apply to the ships inside the harbor?

Vice Admiral McMorris. No, sir, it did not apply to ships inside the harbor. There had been considerable fear that submarines outside the channel entrance might sink a ship in the entrance. Consideration was given to defensive mining and to the establishment of listening posts a little farther offshore. The thought of defensive mining was abandoned because the shelf was narrow and there was a fair amount of current along there. Almost every one reached the same conclusion that the defensive mines would be more harmful than the submarine menace might be. And there was grave concern over the lack of anti-submarine craft either in numbers or in

Nevertheless, it was felt that the chance of a submarine getting within Pearl Harbor was very, very remote. Actually, of course, when the attack came about, we found we were unduly complacent.

Admiral Hewitt. Well, the submarines that got in Pearl Harbor weren't sea-going submarines; they were midgets.

Vice Admiral McMorris. Correct, sir. That was our first acquaintance with the midgets.

34] Admiral Hewitt. I think that is all I have. I want to thank you very much.

(The witness was excused.)

The investigation was then, at 5:20 p. m., adjourned until 9:45 a. m., 2 June 1945.)

[335] PROCEEDINGS OF THE HEWITT INQUIRY

THIRTEENTH DAY

Pursuant to notice, the investigation met at the Visiting Flag Officer's Office, Headquarters, Commander-in-Chief, U. S. Pacific Fleet and Pacific Ocean Areas, Pearl Harbor, Oahu, T. H., at 9:45 a. m., 2 June 1945.

Present: Admiral H. Kent Hewitt, USN; Mr. John F. Sonnett; Lieutenant Commander Benjamin H. Griswold, USNR; Lieutenant John Ford Beacher, USNR; and Ship's Clerk Ben Harold, USNR.

A witness entered, read the precept, and was duly sworn.

Mr. SONNETT. Will you state your name and rank, sir?

Vice Admiral SMITH. William W. Smith, Vice Admiral, USN.

Mr. SONNETT. Admiral, you were Chief of Staff of the Pacific Fleet from February, 1941, to December 7, 1941, were you not?

Vice Admiral SMITH. Yes.

Mr. SONNETT. I show you exhibit 34 of this investigation and ask you whether you can identify it.

Vice Admiral SMITH. This is Staff Instructions, Pacific Fleet, issued July 14, 1941, signed by me.

Mr. SONNETT. Admiral, that was issued by you on or about July 14, 1941, with Admiral Kimmel's approval, was it not?

Vice Admiral SMITH. Yes.

Mr. SONNETT. And the purpose of the instructions, I take it, was to summarize the duties of various members of the staff of CincPac?

Vice Admiral SMITH. That is right.

Mr. SONNETT. Would you examine, Admiral, paragraph 112 on page 1 and read paragraph 112 into the record?

[336] Vice Admiral SMITH (reading):

112. The Commander-in-Chief is available to the entire Staff for consultation, but all questions for decision or action should pass through the Chief of Staff whenever such a procedure will not involve an undue delay.

Mr. SONNETT. Will you refer, Admiral, to paragraph 200 on page 3 and similarly read that into the record?

Vice Admiral SMITH (reading):

200. CHIEF OF STAFF—01—*Personal Aide.*

(See Navy Regulations Articles 785—788.)

(a) Carries out policies prescribed by the Commander-in-Chief.

(b) Exercises general supervision over and coordinates work by members of the Staff.

(c) Advises the Commander-in-Chief on all matters concerning the war readiness and battle efficiency of the Fleet.

(d) Supervises the preparation of campaign orders and plans, as well as strategical and tactical problems of the Fleet.

(e) Signs correspondence as follows:

(1) Routine Matters.

(2) Minor recommendations, or minor forwarding endorsements on same to material Bureaus regarding repairs and alterations concerning which a policy has been established.

- (3) Orders to and requests from officers not in Command.
- (4) Matters concerning which the policy is of long standing.
- (5) Letters from the Navy Department noted for compliance, information or guidance.
- (6) The Commander-in-Chief personally will sign correspondence regarding questions of particular importance involving criticism, approval, or disapproval of previous recommendations; action on legal papers.

[337] Mr. SONNETT. I show you exhibit 35 in this investigation and ask you if you can identify it.

Vice Admiral SMITH. Yes.

Mr. SONNETT. Will you state what it is, Admiral?

Vice Admiral SMITH. U. S. Pacific Fleet Operating Plan Rail Five, otherwise known as WPPac-46.

Mr. SONNETT. That was distributed to the fleet on or about June 1941, was it not?

Vice Admiral SMITH. Yes, it was.

Mr. SONNETT. I show you exhibit 36, Admiral, and ask you if you can identify it.

Vice Admiral SMITH. Yes. That is a letter from the Chief of Naval Operations to the Commander-in-Chief, U. S. Pacific Fleet, in which the Chief of Naval Operations states that he has reviewed the plan of exhibit 35 and accepts it.

Mr. SONNETT. I take it, Admiral, that in accordance with your supervision, at least generally, the preparation of the war plan of exhibit 35, and that you were familiar with its provisions.

Vice Admiral SMITH. I had very little to do with the preparation of it, but I did supervise it and read it before it was presented to the Commander-in-Chief for signature.

Mr. SONNETT. Admiral, would you examine Part 1 of the plan, about page 12, relating to the composition of Task Force Nine, was the patrol plane force, was it not?

Vice Admiral SMITH. Yes.

Mr. SONNETT. How many patrol planes were listed as comprising that task force?

[338] Vice Admiral SMITH. All units of Aircraft Section Force, 107 VP. The rest of them are ships: Two AV, two AVP, two AVD; and ten utility planes, VJR.

Mr. SONNETT. Referring to page 19 of the exhibit, Admiral, you find stated the basic concept of war in the Pacific as set forth in the basic plan. Will you read that into the record, sir?

Vice Admiral SMITH (reading):

Even if Japan were not initially to enter the war on the side of the Axis Powers it would still be necessary for the Associated Powers to deploy their forces in the manner to guard against Japanese intervention. If Japan does enter the war the military strategy in the Far East will be defensive. The United States will not intend to add to its present military strength in the Far East but will rely on the United States Pacific Fleet offensively in the manner best calculated to weaken Japanese economic power, and to support the defense of the Malay barrier by diverting Japanese strength away from Malaysia. The United States will not intend to so augment its forces in the Atlantic and Mediterranean areas that the United States Commonwealth will be in a position to release the necessary forces for the Far East.

Mr. SONNETT. Referring to page 22 of the exhibit, Admiral, you find concerns the initial Japanese deployment estimated in the plan. Will you read sub-paragraph "f" into the record?

Vice Admiral SMITH (reading) :

1334. . . .

f. Raiding and observation forces widely distributed in the Pacific, and submarines in the Hawaiian area.

Mr. SONNETT. What, Admiral, was comprehended by the term [339] "raiding and observation forces widely distributed in the Pacific"?

Vice Admiral SMITH. We expected raids on Wake and Midway, possible raids on Wake and Midway, and the Philippines, but everything tended to give us the opinion that the first strike would be down towards Singapore.

Mr. SONNETT. You are speaking now of your intelligence, Admiral, primarily?

Vice Admiral SMITH. Yes.

Mr. SONNETT. What I am trying to get at at the moment is the understanding which you had of the estimated Japanese initial deployment covered by the statement that raiding and observation forces would be widely distributed in the Pacific and submarines in the Hawaiian area.

Vice Admiral SMITH. We were particularly guarding against their submarine raids in the area and perhaps we were influenced by the fact that within fifteen days after Admiral Kimmel took over as Commander-in-Chief, we had several alarms in the operating areas to the south of Oahu. In one case the destroyers had sound contact with what they believed to be a submarine for a period of more than thirty-six hours. No bombing attack was made on it. One experienced destroyer officer stated that he personally heard propeller noises. Looking back on it, we doubt very much that it was a submarine; it was probably due to different temperatures of water, because one month later when the moon was the same we had the same experience. But we were always guarding against a submarine attack. We believed that that was Japan's first attack to be made upon us and we made every effort to guard against it.

Mr. SONNETT. While you are on the subject of submarine contacts, Admiral, will you state what other contacts you recall prior to December 7, 1941, in the general vicinity of the Hawaiian Islands?

[340] Vice Admiral SMITH. There were many of them, but they were probably large fish. The first one that I recall was in the summer of 1940 when I had the cruiser BROOKLYN and had the gunnery school on board and I came into Pearl Harbor every two or three days, and as I approached the entrance, I received orders to black out, that a submarine had been detected off the entrance, and I remained outside. Within a few hours a dispatch was received from the Commandant, Fourteenth Naval District, stating the contact was false, that it had been a fish. And those continued all during 1941 at intervals. Whether they were real submarines, I don't know. In most cases we decided they were not.

Mr. SONNETT. With particular reference, Admiral, to the months October, November, and up to December 7, 1941, do you recall any contacts in that period?

Vice Admiral SMITH. No, I do not.

Mr. SONNETT. Returning to the war plan, Admiral, will you examine at page 24 paragraph 2101, which appears to contain an Outline Tasks, and read into the record sub-paragraph "h"?

Vice Admiral SMITH (reading):

h. Protect the territory of the Associated Powers in the Pacific Area prevent the extension of enemy military power into the Western Hemisphere by destroying hostile expeditions and by supporting land and air forces in den the enemy the use of land positions in that hemisphere.

Mr. SONNETT. I take it, then, that Hawaii was one of the territories of the Associated Powers covered by that paragraph?

Vice Admiral SMITH. Yes.

Mr. SONNETT. Will you refer to page 25 and read into the record [341] paragraph 2201?

Vice Admiral SMITH (reading):

2201. It will be noted that the tasks assigned in the previous chapter are based upon Assumption A-2 of paragraph 1211 (Japan in the war). In formulating tasks the Commander-in-Chief has provided also for Assumption A-1 and divided the tasks to be accomplished by the Pacific Fleet into phases, as follows:

- a. PHASE I—Initial tasks—Japan not in the war.
- b. PHASE IA—Initial tasks—Japan in the war.
- c. PHASE II, etc.,—Succeeding tasks.

Mr. SONNETT. Paragraph 2202 sets forth, does it not, initial tasks to be performed by the Pacific Fleet before the Japanese got in the war? Will you read that?

Vice Admiral SMITH (reading):

2202. Phase I tasks are as follows:

- a. Complete mobilization and prepare for distant operations; thereafter maintain all types in constant readiness for distant service.
- b. Maintain Fleet security at bases and anchorages and at sea.
- c. Transfer the Atlantic reinforcement, if ordered.
- d. Transfer the Southeast Pacific Force, if ordered.
- e. Assign twelve patrol planes and two small tenders to Pacific Southern and a similar force to Pacific Northern Naval Coastal Frontier, on M-day.
- f. Assign two submarines and one submarine rescue vessel to Pacific Northern Naval Coastal Frontier on M-day.
- g. Protect the communications and territory of the Associated Powers prevent the extension of enemy military power into the Western Hemisphere by patrolling with light forces and patrol planes, and by the action of strike groups as necessary. In so doing support the British naval forces south of the equator as far west as Longitude 155° East.

[342] h. Establish defensive submarine patrols at Wake and Midway.

- i. Observe, with submarines outside the three mile limit, the possible radio bases in the Japanese Mandates, if authorized at the time by the Navy Department.

j. Prosecute the establishment and defense of subsidiary bases at Midway, Johnston, Palmyra, Samoa, Guam and Wake, and at Canton if authorized.

k. Continue training operations as practicable.

l. Move the maximum practicable portion of Second Marine Division to Hawaii for training in landing operations.

m. Guard against surprise attack by Japan.

Mr. SONNETT. Referring to page 32 of the exhibit and paragraphs 3141 to 3143, those paragraphs set forth, do they not, the initial tasks assigned to the patrol plane force before Japan was in the war?

Vice Admiral SMITH. Yes.

Mr. SONNETT. Would you read those into the record, sir?

Vice Admiral SMITH (reading):

3141. Task Force Nine will perform the task assigned in the following paragraphs of this section.

3142. On W-day transfer twelve patrol planes and two tenders to each of the Pacific Southern and Pacific Northern Naval Coastal Frontiers. Continue administration of these forces and rotate detail at discretion.

3143. Perform tasks assigned in the patrol and sweeping plan (Annex I).

Mr. SONNETT. Referring to Annex I, Admiral, as to Phase I, namely, when Japan is not in the war, would you read into the record paragraph 2? Annex I, I take it, is the Patrol and Sweeping Plan?

Vice Admiral SMITH. Yes.

Mr. SONNETT. Would you read into the record paragraph 2 of that plan?

[343] Vice Admiral SMITH (reading):

This Fleet will, in the Pacific Area, protect the territory and sea communications of the Associated Powers by:

(a) Patrolling against enemy forces, particularly in the vicinity of the Hawaiian Islands; and on shipping lanes (1) West Coast-Hawaii, (2) Trans-Pacific westward of Midway and (3) in South Seas in vicinity of Samoa.

(b) Escorting as conditions require and forces available permit.

(c) Covering.

(d) Employing striking forces against enemy raids and expeditions.

(e) Routing shipping.

Mr. SONNETT. Referring to paragraph 3 of the Patrol and Sweeping Plan, it sets forth, does it not, specific tasks of the various task forces?

Vice Admiral SMITH. Yes, it does.

Mr. SONNETT. Will you read the specific tasks set forth for Task Force Nine? I think it is on page I-16.

Vice Admiral SMITH (reading):

(d) *Task Force Nine* (Patrol Plane Force).

(1) Having due regard for time required to overhaul and upkeep planes and for conservation of personnel, maintain maximum patrol plane search against enemy forces in the approaches to the Hawaiian area.

(2) Initially base and operate one patrol plane squadron from Midway. At discretion increase the number of planes operating from bases to westward of Pearl Harbor to two squadrons, utilizing Johnston and Wake as the facilities thereat and the situation at the time makes practicable.

(3) Be prepared, on request of Commander *Task Force Three*, to transfer one patrol squadron and tenders to that force for prompt operations in the South Pacific.

(4) Be particularly alert to detect disguised raiders.

[344] (5) In transferring planes between bases, conduct wide sweep en-route.

(6) Planes engaged in training operations furnish such assistance to Naval Coastal Frontiers in which based as may be practicable.

(7) Effect closest cooperation practicable with surface forces engaged in sweeping during initial sweep of Phase IA.

(8) Modify patrols as necessary in order to carry out tasks assigned in Marshall Raiding and Reconnaissance Plan (Annex II to Navy Plan O-1).

(9) Units operating from outlying bases cooperate, to the extent compatible with assigned tasks, with other forces, thereat. Be guided by principles of command relationship set forth in Annex IV to Navy Plan O-1.

Mr. SONNETT. Referring, Admiral, to page 8 of the war plan, does it appear that the plan was to become effective on W-Day?

Vice Admiral SMITH (reading):

At the date of issue of this plan, the U. S. Pacific Fleet has virtually mobilized, and is operating, with intensive security measures, from the Pearl Harbor base. It is expected, therefore, that the major portion of the Fleet can be ready for active service within four days of an order for general mobilization. To provide for the contingency of M-day being set prior to the date on which hostilities are to open, the day of execution of this Plan is designated throughout the Plan as

W-day. The day that hostilities open with Japan will be designated J-day. This may or may not coincide with W-day.

Mr. SONNETT. To attempt to summarize, Admiral, for the sake of the record, does it appear from the plan that it might be put into execution on a day other than the date hostilities with Japan commenced or on a day other than M, or mobilization, day?

Vice Admiral SMITH. It could have been put into effect on any date by the Navy Department.

[345] Mr. SONNETT. Do you find any provision in the plan, Admiral, which requires the designation of W-Day to require the approval of the Navy Department?

Vice Admiral SMITH. I would have to read the entire plan to answer that question. My recollection is that we had it in some form.

Mr. SONNETT. Apart from that question, Admiral, and referring specifically to the Phase I initial tasks, namely, those to be performed when Japan was not in the war—those, you will recall, are set forth on pages 24 and 25 of the plan—is it correct that the Phase I initial tasks were entirely defensive in nature?

Vice Admiral SMITH. Yes, they are entirely defensive, and training, of course, which is very important.

Mr. SONNETT. Do any of the Phase I initial tasks, when Japan was not yet in the war, require, or did they require, a directive from the Navy Department to be discharged?

Vice Admiral SMITH. That is my impression, yes.

Mr. SONNETT. I refer you specifically by way of illustration to Initial Task 1-m, which is "Guard against surprise attack by Japan. Was that a task which the Commander-in-Chief of the Pacific Fleet was required to carry out, irrespective of any Navy Department directive?

Vice Admiral SMITH. Yes, that was constantly in his mind.

Mr. SONNETT. And similarly, Admiral, referring to Initial Task 1-g, to protect the communications and territory of the Associated Powers in the Pacific, that, too, was a task which the Commander-in-Chief, Pacific Fleet, had irrespective of the Navy Department, was it not?

Vice Admiral SMITH. Yes, it was.

Mr. SONNETT. Admiral, I show you Annex VII, Section VI, to the [346] Joint Coastal Frontier Defense Plan and Addendum I thereto, which was exhibit 23 before the Naval Court of Inquiry, and ask you whether you recall having seen that.

Vice Admiral SMITH. I do not recall the details of this plan, but I remember it as having been signed by the Commandant, Fourteenth Naval District, and by General Short. We had it in our office.

Mr. SONNETT. Will you refer to Addendum I, which is annexed to that document, and will you state, Admiral, what Addendum I is?

Vice Admiral SMITH. It is a "joint estimate covering Joint Army and Navy air action in the event of a sudden hostile action against Oahu or Fleet units in the Hawaiian area."

Mr. SONNETT. Do you recall having seen that at or about the date it bears?

Vice Admiral SMITH. I can't recall when I first saw it, but I did see it.

Mr. SONNETT. Referring, Admiral, to the summary of the situation contained in Addendum I, will you read that into the record and then state whether it was in accord with your views at the time?

Vice Admiral SMITH (reading):

(a) Relations between the United States and Orange are strained, uncertain, and varying.

(b) In the past Orange has never preceded hostile actions by a declaration of war.

(c) A successful, sudden raid, against our ships and Naval installations on OAHU might prevent effective offensive action by our forces in the Western Pacific for a long period.

(d) A strong part of our fleet is now constantly at sea in the operating areas organized to take prompt offensive action against any surface or submarine force which initiates hostile action.

[347] (e) It appears possible that Orange submarines and/or an Orange fast raiding force might arrive in Hawaiian waters with no prior warning from our intelligence service.

Mr. SONNETT. Was that in accord, Admiral, with your views at or about that date, March of '41?

Vice Admiral SMITH. I would say that this is an estimate of the situation in which all possibilities were considered. I would also state that I know of no one in this area who really believed there would be a hostile air attack on the Hawaiian Islands, but we guarded against it. I believe that prior to this date—I know that prior to this date, in fact the 15th of February, we issued an order, 2CL-41, which was later revised in the middle of October, that provided for this very thing, for both air and submarine attack, and also that our ships were so moored at all moorings in Pearl Harbor—in the first place, the heavy ships had to be headed out before they were moored, and they were so moored that it provided in all four areas there was an arc of fire from every direction from which planes could come from a 360 degree arc. And I remember that we knew at that time the Army plan was to throw a cordon of light anti-aircraft guns around Pearl Harbor, but we felt that the guns of the fleet, in case of a surprise attack, would be much more effective than anything the Army had. It was for that reason that we moored the ships as we did.

Mr. SONNETT. Admiral, will you refer to exhibit 8 of the Naval Court record and state whether or not that is the Pacific Fleet letter on the security of the fleet at base and in the operating areas which you just mentioned?

Vice Admiral SMITH. Yes, that is. It is a revision of a similar letter issued on the 15th of February, 1941.

[348] Mr. SONNETT. And that revision was issued on October 14, 1941, was it not, sir?

Vice Admiral SMITH. Yes.

Mr. SONNETT. Will you read assumption 2 (b) of the Pacific Fleet confidential letter into the record, Admiral?

Vice Admiral SMITH (reading):

2. . . .

(b) That a declaration of war may be preceded by:

- (1) a surprise attack on ships in Pearl Harbor.
- (2) a surprise submarine attack on ships in operating area.
- (3) a combination of these two.

Mr. SONNETT. So that, I take it, Admiral, it was your view that a surprise air attack on Pearl Harbor was a possibility?

Vice Admiral SMITH. Oh, yes, but a remote possibility, I would say.

Mr. SONNETT. And that was the basis for the fleet letter on security and of the war plans?

Vice Admiral SMITH. Yes.

Mr. SONNETT. That possibility, also, Admiral, reflected your knowledge, did it not, of the fact that historically the Japanese had attacked without declaration of war.

Vice Admiral SMITH. Yes.

Mr. SONNETT. Would you, Admiral, refer to exhibit 15 of the Naval Court record, which is exhibit 24 of this investigation, and state whether or not you saw that dispatch at or about the date it bears?

Vice Admiral SMITH. I don't recall whether I saw it at the time. I think I did. I am familiar with the dispatch.

Mr. SONNETT. For the sake of the record, will you just briefly describe what that dispatch is?

[349] Vice Admiral SMITH. It is from the Chief of Naval Operations to the Commanders-in-Chief, Asiatic, Pacific, and the Commandants of Districts 11, 12, 13, and 15, with information to Cinclant and Spenavo, London, and it states:

Chances of favorable outcome of negotiations with Japan very doubtful. This situation coupled with statements of Japanese Government and movements of their naval and military forces indicate in our opinion that a surprise aggressive movement in any direction including attack on Philippines or Guam is a possibility X . . . Action advises to inform senior Army officers their areas. Utmost secrecy necessary in order not to complicate an already tense situation or precipitate Japanese action X Guam will be informed separately.

Mr. SONNETT. Now, will you refer to exhibit 17, Admiral, of the Naval Court record, which is exhibit 25 of this investigation, and state whether or not you saw this dispatch at or about the date it bears?

Vice Admiral SMITH. I saw it on the date it was received, the 27th of November.

Mr. SONNETT. Again, for the sake of the record, will you state what that dispatch is?

Vice Admiral SMITH. It starts out by saying: "This dispatch is to be considered a war warning," and then unfortunately it tells us what the attack is coming from or what will be attacked.

Mr. SONNETT. Will you read that language into the record, Admiral?

Vice Admiral SMITH. "This dispatch is to be considered a war warning X Negotiations with Japan looking toward stabilization of conditions in the Pacific have ceased and an aggressive movement of Japanese troops and the organization of naval task force indicates an amphibious expedition [350] against either Philippines, Thai or Kra Peninsula or possibly Borneo X Execute appropriate defensive deployment preparatory to carrying out tasks assigned in WPL46 X Inform district and Army authorities A similar warning is being sent by War Department X Spenavo inform British."

Mr. SONNETT. That is the so-called war warning of November 27, Admiral, is it not?

Vice Admiral SMITH. Yes.

Mr. SONNETT. Will you refer now to exhibit 18 of the Naval Court record, the following exhibit, and state whether or not you saw that dispatch at or about the date it bears?

Vice Admiral SMITH. Yes, I remember this very well.

Mr. SONNETT. Again, will you state what that dispatch is?

Vice Admiral SMITH. This dispatch was received by the Army from the War Department, as well as by the Commander-in-Chief from the Navy Department, and we were in conference for several days on it as to how to carry it out. It required us to move to replace our planes in the outlying islands, Midway and Wake, by Army planes, as I remember.

It will be necessary for you to transport these planes and ground crews from Oahu to these stations on an aircraft carrier X Planes will be flown off at destination and ground personnel landed in boats essential spare parts tools and ammunition will be taken in the carrier or on later trips of Regular Navy supply vessels X Army understands these forces must be quartered in tents X Navy must be responsible for supplying water and subsistence and transporting other Army supplies X Stationing these planes must not be allowed to interfere with planned movements of Army bombers to Philippines X Additional parking areas should be laid promptly if necessary X Can Navy bombs now at outlying positions be carried by Army bombers which may fly [351] to those positions for supporting Navy operations X Confer with commanding general and advise as soon as practicable.

Mr. SONNETT. What is the date of that dispatch, Admiral?

Vice Admiral SMITH. November 26, 1941.

Mr. SONNETT. I believe you stated that several days were spent in conference on that subject?

Vice Admiral SMITH. Yes.

Mr. SONNETT. And the conferences were between General Short and Admiral Kimmel?

Vice Admiral SMITH. And their staffs.

Mr. SONNETT. And their staffs?

Vice Admiral SMITH. And the Commanding General of the Army Air Force.

Mr. SONNETT. As I recall your previous testimony, Admiral, you indicated that it was in connection with that subject that General Short and Admiral Kimmel had the closest to a dispute that you ever saw between them?

Vice Admiral SMITH. Yes.

Mr. SONNETT. Will you state just what that was?

Vice Admiral SMITH. During the discussion, we informed the Army that the planes they placed on Wake would have to remain there for the duration of a war, if any, because it was impossible to put a ship in there and take them out and Army planes are not equipped to land on a carrier, although they can take off from a carrier. Admiral Kimmel then asked, "What may I expect of Army fighters on Wake?" and General Martin of the Army Air Force replied, "We do not allow them to go more than fifteen miles offshore," to which Admiral Kimmel replied, "Then they are [352] no damn good to me," or words to that effect. General Short stated, not angrily at all, that, "If I man these islands, I must command them," and Kimmel replied, "Only over my dead body. The Army should exercise no command over Navy bases." General Short replied, "Mind you, I do not want these islands. I think they are better manned by Marines. But if I must put troops and planes on them, then I must command them." And that was the extent of the controversy.

Mr. SONNETT. Actually, Admiral, subsequently Marines were used instead of Army personnel, were they not, to reenforce the islands?

Vice Admiral SMITH. Before Pearl Harbor, Admiral Halsey was on his way with the ENTERPRISE to land an additional squadron of Marine planes, but the plan, as I recall it, went further than replacing planes; the troops were involved also, because I remember that the Army had no guns and it was necessary for us to leave our guns there.

Mr. SONNETT. I take it then, Admiral, that at or about the time of the receipt of the so-called war warning of November 27th, General Short and Admiral Kimmel were engaged in considerable discussion about this proposal to reenforce Midway and Wake with Army personnel?

Vice Admiral SMITH. Yes, they were.

Mr. SONNETT. What conferences and discussions were held, Admiral, after November 27th concerning the so-called war warning message?

Vice Admiral SMITH. A conference was held in Admiral Kimmel's office that afternoon. Admiral Bloch was not present since he was visiting his wife in the hospital. He was represented by Captain Earle. The conference was held, to my recollection, about 5 p. m. I do not recall whether General Short was present at that one, but I know that the Intelligence [352] Officer was given a copy of the dispatch to take over and make certain that General Short got it. I am quite certain a conference was held the next day. In the meantime, on the evening of the 27th, the Army was on the march. I manned the public utilities, reservoirs, and so on, to protect them against possible sabotage, which apparently was what the Army feared most in these islands. How many conferences were held later, I do not recall, but by that time we were conferring at least every other day. I was present at most of the conferences. But one night I recall that Admiral Kimmel at 6 o'clock called up General Short at General Short's home and General Short said he was about to go up to the north side of the island and Kimmel said, "Stay there; I am coming over to see you," which he did. What that conference was about, I don't know, but I imagine it was on this same subject. I was not present at that.

Mr. SONNETT. How was the so-called war warning of November 27th evaluated by Admiral Kimmel, sir?

Vice Admiral SMITH. There were several considerations. One was that negotiations had been resumed on the arrival of Kurusu. There was a report that Admiral Hart's seaplanes had discovered large Japanese forces moving south. The Intelligence Officer placed the position of some Japanese forces somewhere supposedly in the Marshalls. The Combined Fleet, as I recollect it, was in home waters and the carriers were supposedly in home waters also. Therefore, we felt, not knowing whether the United States would be in the war or not—many of the directions we received, mostly in personal letters from Admiral Stark but which are on file, cautioned us not to take any action that might foment a war. The people of the United States were divided in their opinions apparently. We believed that their [354] attack would be on the Dutch and British to the south and that if they did attack us, it would be in the Philippines. We had no assurance from our

government that the United States would go to war if the Dutch and British were attacked. We were in constant training, intensive training, to prepare for war, but there was nothing in that message that led us to believe that Pearl Harbor was threatened with an air attack. We did expect a surprise submarine attack.

Mr. SONNETT. Referring to the November 24th dispatch from OpNav, that dispatch started, did it not, as follows:

Chances of favorable outcome of negotiations with Japan very doubtful x This situation coupled with statements of Japanese Government and movements their naval and military forces indicate in our opinion that a surprise aggressive movement in any direction including attack on Philippines or Guam is a possibility? Upon receipt of that dispatch was it found that the views of yourself and Admiral Kimmel were in accord with the situation as stated in the dispatch?

Vice Admiral SMITH. Yes, but the words, "In any direction including an attack on the Philippines and Guam" implies that they are not coming any farther east than the Philippines or Guam.

Mr. SONNETT. Of course, it was true at that time, Admiral, that it was your estimate, as set forth in the various war plans, that a surprise attack on Oahu by air was a possibility?

Vice Admiral SMITH. Always, yes.

Mr. SONNETT. And this dispatch said, did it not, that a surprise aggressive movement in any direction, including attack on Philippines or Guam, is a possibility?

Vice Admiral SMITH. That's right.

Mr. SONNETT. Now, referring to the so-called war warning of [355] November 27th that started out, did it not, sir, by stating, "This dispatch is to be considered a war warning"?

Vice ADMIRAL SMITH. Yes.

Mr. SONNETT. Had you ever received a dispatch before that time in such language?

Vice Admiral SMITH. No, and as I have previously testified, if they put a period after the words "war warning," it would have been a much more effective message. We had received many letters from the Chief of Naval Operations—in fact, almost weekly warnings—and Admiral Kimmel's predecessor, Admiral Richardson, had received similar warnings. Perhaps we received too many of them. But we hadn't received one saying, "This is to be considered a war warning," not previously.

Mr. SONNETT. The second sentence of that November 27th dispatch, Admiral, was as follows, was it not:

Negotiations with Japan looking towards stabilization of conditions in the Pacific have ceased and an aggressive move by Japan is expected within the next few days?

Vice Admiral SMITH. That is correct.

Mr. SONNETT. Was that substantially in accord with your own views at the time of receipt of the warning, namely, that within a few days Japan would strike somewhere?

Vice Admiral SMITH. Yes, but I have a vague recollection that on the same date that this was received we had some other word, possibly in the local paper, that negotiations had been resumed, and, of course, they were resumed.

Mr. SONNETT. Of course, Admiral, I take it that you do not mean to state that as between a newspaper account—

Vice Admiral SMITH. Oh, no.

Mr. SONNETT. And an OpNav dispatch, you would lend more credence [356] to a newspaper account?

Vice Admiral SMITH. Oh, no. Something had happened—it must have been another dispatch—by which we learned that negotiations had been resumed.

Mr. SONNETT. Do you recall, Admiral, the receipt of dispatches during the first week of December, 1941, advising that the Japanese were destroying their codes?

Vice Admiral SMITH. Yes.

Mr. SONNETT. And that, I take it, confirmed the impression that war was imminent with Japan?

Vice Admiral SMITH. Yes, and we had directed Guam to destroy its codes.

Mr. SONNETT. Now, Admiral, what specific steps were taken between November 27th and December 7, 1941, as a result of this warning?

Vice Admiral SMITH. We continued our intensive schedule of training, having always at least one task force operating and usually two. We notified all task force commanders of the receipt of the message and called attention to our order 2CL-41 of October 15th and 12th. We had our destroyers—the big ships were always protected by destroyers against submarine attack. We carried out our searches in the operating area. I am quite certain we had alerts in the harbor just for training. We prepared to carry out the war plan if ordered to do so.

Mr. SONNETT. Which of those actions, Admiral, was not in effect before November 27th?

Vice Admiral SMITH. Before November 27th, on any suspicion of sighting or on sound contact with anything that could be an enemy submarine, a signal was sent out immediately and all forces in the operating area [357] ceased whatever training they were doing; the destroyers went at high speed to protect the carriers and battleships, carrying out the provisions of existing directives. This happened on many occasions, sometimes when the entire fleet was at sea.

Early in Admiral Kimmel's administration he reported to the Chief of Naval Operations that he had on one occasion issued orders to depth charge a suspicious contact in the operating area and had changed those orders. The Chief of Naval Operations in his letter stated, "Thank God you didn't," or words to that effect. Before the 27th of November, Admiral Kimmel, with no instructions from the Navy Department, issued orders that any submarine within a radius of one mile, I believe it was, possibly three miles, of the entrance to Pearl Harbor would be depth charged by the offshore patrol. After November 27th, it is my recollection that he issued orders to depth charge submarines in any area in which we were operating.

Mr. SONNETT. As to the air patrol of operating areas, Admiral, that had been in effect, I take it, prior to November 27th?

Vice Admiral SMITH. Oh, yes, that had been in effect, I should say during the entire year of 1941.

Mr. SONNETT. And that air patrol of the operating areas was continued after November 27th?

Vice Admiral SMITH. Yes.

Mr. SONNETT. For the sake of the record, Admiral, will you just state generally what the operating areas were?

Vice Admiral SMITH. The operating areas were to the south of Oahu for approximately thirty miles and extending east and west. Some ships were operating around Maui. Those were the general operating areas. Occasionally we operated to the north of Oahu, and shortly before Pearl Harbor we had a fleet exercise for the entire fleet to the north of Oahu, [358] and it was very intensive, darkened at night, as we had been for some time, and, of course, on occasions like those the air searches were to the northward to protect the fleet.

Mr. SONNETT. Was there any air search from Oahu to the north after November 27th and prior to the attack?

Vice Admiral SMITH. I cannot recall.

Mr. SONNETT. Do you recall whether the operation to which you just testified occurred after November 27th and before the attack?

Vice Admiral SMITH. There were no operations to the north between 27 November and 7 December 1941, although I believe we would send a destroyer at night to make a trip along the north shore, with the possibility that the destroyer might find a submarine lurking there or communicating with the beach. I know that that was done early in the war and I believe that it was done after November 27th.

Mr. SONNETT. You testified before the Naval Court that, in substance, as Chief of Staff you did not maintain a current written estimate of the situation, but that you did maintain a current mental estimate, and that the situation was discussed daily and that daily the War Plans Officer and the Fleet Intelligence Officer presented their estimates to Admiral Kimmel. Is that correct?

Vice Admiral SMITH. Correct, yes.

Mr. SONNETT. Who was the War Plans Officer?

Vice Admiral SMITH. Captain, now Vice Admiral, C. H. McMorris.

Mr. SONNETT. And the Fleet Intelligence Officer?

Vice Admiral SMITH. Was Lieutenant Commander, now Captain, Layton.

Mr. SONNETT. And that practice of furnishing a daily estimate was followed from November 27th to December 7th?

[359] Vice Admiral SMITH. Followed long before that.

Mr. SONNETT. And also during that period?

Vice Admiral SMITH. Yes.

Mr. SONNETT. Before the Naval Court, Admiral, you stated in answer to a question as to the adequacy of the state of readiness existing on December 7th, in substance, as follows: That in your opinion the state of readiness was adequate to meet the emergency envisaged in the warning messages and then you said: "You must remember that what we were thinking about in the Pacific was not the defense of Pearl Harbor. We were thinking about the fleet and the readiness of the fleet. I believe that the state of readiness is indicated by the fact that how quickly the gun crews responded to the fire which was absolutely unexpected. We exercised as much security as we could in port. We realized that the Army defenses were not adequate, that ships were stationed in sectors and every sector was always occupied for anti-aircraft fire, but we also had to get that fleet in readiness to go back to sea. It happened at a time when two task forces were in

port. Usually only one was in port. Sometimes three were at sea depending upon the exercises that were projected by the Commander-in-Chief. The readiness of the ships—they were ready for anything but they were thinking mostly of how soon they could get out and how to get out and go into battle. They were not thinking about the defense of Pearl Harbor.”

Is that a correct statement of your views during the period after November 27, 1941?

Vice Admiral SMITH. Yes, it is.

Mr. SONNETT. I take it, then, that the primary emphasis, Admiral, during that so-called critical period after November 27th was on preparation for offensive action by the fleet?

Vice Admiral SMITH. Yes, to get ready, yes.

[360] Mr. SONNETT. And that your thinking was primarily on that score?

Vice Admiral SMITH. Yes.

Mr. SONNETT. Admiral, among the intelligence which you received prior to the attack, do you recall any information received from intercepted telephone conversations of the Japanese, or from intercepted cable messages from the Japanese?

Vice Admiral SMITH. No. Those cable messages were brought to me two days after the attack on Pearl Harbor. We, so far as I know, had intercepted no important messages concerning enemy movements.

Mr. SONNETT. Either telephonically or by cable?

Vice Admiral SMITH. No.

Mr. SONNETT. Admiral, would you state for the record your estimate of the situation and of possible enemy courses of action during the period November 27th to December 7, 1941?

Vice Admiral SMITH. I believe I have stated before we thought that the enemy would take his first action to the south against the British and Dutch, possibly the Philippines. Early in 1941 I recall an officer messenger coming through from Admiral Hart's flagship in which he gave his estimate of the possibility that the Japanese would go south and would bypass the Philippines and not attack there at all; would get Hong Kong and places to the south before that. I don't say that we agreed with that, but it was my estimate, and I believe the estimate of the staff, that their activities would be confined to the Far East to take everything they needed there before any action was taken to the eastward; and always, because of their previous history, the possibility of a very strong submarine attack to disable our heavy ships.

Mr. SONNETT. That is, in the Pearl Harbor area?

[361] Vice Admiral SMITH. Yes.

Mr. SONNETT. I take it also, Admiral, that it was your estimate after November 27, 1941, that an air attack at Pearl Harbor was a possibility?

Vice Admiral SMITH. A possibility, but certainly not a probability.

Mr. SONNETT. Admiral, I show you exhibit 8 of this investigation which consists of photostatic copies of three dispatches, and ask whether you recall having seen those.

Vice Admiral SMITH. I don't recall ever having seen this dispatch but this intelligence is of the nature given to the Commander-in-Chief by our Intelligence Officer, who worked very closely with the In-

telligence Officer of the Fourteenth Naval District, and I recall this particularly, that "our best indications are that all known First and Second Fleet carriers still in Sasebo-Kure area."

Mr. SONNETT. I show you exhibit 21, Admiral, and ask you if you can identify it.

Vice Admiral SMITH. I don't recall ever having seen this.

Mr. SONNETT. Do you recall, Admiral, having received at or about that date, which, I believe, is November 27th, information to the effect substantially that the Japanese had organized their carriers into a separate force, that they were estimated to have five carrier divisions, consisting of a total of ten carriers?

Vice Admiral SMITH. I do not recall that. We knew how many they had, but I don't recall any special organization they had formed.

Mr. SONNETT. What is your recollection as to the number of carriers that the Japanese had?

Vice Admiral SMITH. Eleven, including the small ones.

Mr. SONNETT. And they were organized into divisions, Admiral?

Vice Admiral SMITH. Yes, as I recall it.

[362] Mr. SONNETT. How many carriers to a division?

Vice Admiral SMITH. I think two.

Mr. SONNETT. I show you, Admiral exhibit 22, photostatic copies of communication intelligence summaries, and call your attention particularly to those during the period November 27th to December 6, 1941, and ask, first, if you can identify the initials appearing in the lower right-hand corner of those summaries.

Vice Admiral SMITH. Yes, Admiral H. E. Kimmel.

Mr. SONNETT. Would you examine those, Admiral, and state whether or not you received them during the period November 27th to December 6, 1941?

Vice Admiral SMITH. I don't remember just when this was received, but I assume it was received on or after 27 November. I would say that the Intelligence Officer held his stuff very, very close and, as I have stated, I was usually present in his daily meeting with the Commander-in-Chief, but there was so much administrative work going on that frequently I was called from the office for some other purpose. However, I was familiar with these estimates, traffic analyses.

Mr. SONNETT. What was your estimate, Admiral, from November 27th to December 6, 1941, as to the location of the Japanese carriers?

Vice Admiral SMITH. About as stated here, some in the Marshalls and the remainder in home areas. As this states, "An air unit in the Takao area addressed a dispatch to the KORYU and the SHOKAKU. Carriers are still located in home waters. No information of further movement of any combined air force to Hainan."

Mr. SONNETT. Admiral, would you examine the summaries after November 27th and up to December 6, 1941, and point out the information which was the basis for your belief that the carriers remained in those [363] locations?

Vice Admiral SMITH. Now, I see nothing very alarming in these dispatches up to Pearl Harbor. On one day the traffic will be very light, radio traffic, and on the next day it is very heavy right up to the 6th of December. The fact that you don't hear from the Second Fleet, he doesn't originate any message, doesn't necessarily mean that he is on the way to Pearl Harbor. Our own forces while at sea exercising

maintained radio silence. We had a very large force, almost half of the Pacific Fleet, in May, 1941, proceed to the Atlantic and no traffic was heard from them for a period of some six weeks. So the absence of radio traffic from the forces at sea doesn't indicate anything to me.

Mr. SONNETT. Does it indicate that they are at sea, Admiral?

Vice Admiral SMITH. It indicates the probability that they are at sea, yes.

Mr. SONNETT. And it is the fact that after December 1, 1941, there was no information from the Japanese carriers' radio traffic?

Vice Admiral SMITH. No, except after saying there is no information, they usually wind up with, "They are believed to be in home waters."

Mr. SONNETT. Was there any such statement in the summaries, Admiral?

Vice Admiral SMITH. On the 27th, "Carriers are still located in home waters. No information of further movement of any combined air force units to Hainan." The 29th, "The arrival of Air Squadron Seven in the Takao area is confirmed. The presence of Cruiser Division Four is not confirmed nor denied. The dispatches indicate today that the following units are under the immediate command of the Commander-in-Chief, Second Fleet." That includes several submarine divisions and destroyer squadrons and [364] two carriers, Cardiv 3. On the 1st of December, "Carriers no change."

Mr. SONNETT. On the 1st it was noted that there was a change in Japanese radio calls, Admiral, was it not?

Vice Admiral SMITH. Yes. I didn't know about that before. In fact, that impresses me more than anything I have read here, and it is followed by great confusion because they cannot locate anybody.

Mr. SONNETT. Will you note their statement, Admiral—I think it is on the 2nd—concerning the blank of information as to carriers and tell us what your evaluation of that was?

Vice Admiral SMITH. On the 2nd:

*COMBINED AIR FORCE*—This force continues to be associated closely with Second, Third, and Indo-China Fleets. Some units of the Combined Air Force have undoubtedly left the Takao area.

Mr. SONNETT. Just after that, Admiral, the next paragraph.

Vice Admiral SMITH (reading):

Almost a complete blank of information on the carriers today. Lack of identification has somewhat promoted this lack of information. However, since over 200 service calls have been partially identified since the change on the first of December and not one carrier call has been recovered, it is evident that carrier traffic is at a low ebb.

Mr. SONNETT. Do you recall having seen that, Admiral, at the time?

Vice Admiral SMITH. No, I do not. It is too long ago. I do not recall.

Mr. SONNETT. And on the 3rd, if you will just note the reference to carriers.

Vice Admiral SMITH. I don't see anything on the 3rd of December—

Mr. SONNETT. On the last line, Admiral.

[365] Vice Admiral SMITH. "No information on submarines or carriers." Then on the 4th—

Mr. SONNETT. Do you recall having noted the lack of information on the 3rd as to carriers?

Vice Admiral SMITH. I don't recall it. On the 4th it gives the information that the Second Fleet, which includes the carriers, was in the vicinity of Takao.

Mr. SONNETT. What was that, Admiral?

Vice Admiral SMITH. On the 4th, speaking of the Combined Fleet:

The outstanding item of today's traffic is the lack of messages from the Commander-in-Chief Second Fleet and the Commander-in-Chief Third Fleet. . . . These two commands are still prominent as addressees. It is now believed that the Commander-in-Chief Second Fleet is in the vicinity of Takao and that the apparently conflicting evidence is destined for the Tokyo UTU broadcast, which CinC Second Fleet is still copying. CinC Combined Fleet sent one message to an unidentified unit for information to the Third Base Force, Palao, and CinC Second Fleet and CinC Third Fleet as information addressees.

Mr. SONNETT. Admiral, do you recall whether the lack of information as to Japanese carriers which is set forth in the communication intelligence summaries after December 1, 1941, was discussed between you and Admiral Kimmel?

Vice Admiral SMITH. No. My recollection is that he questioned the Intelligence Officer on it, in fact, every day, but I don't know that we discussed that or what it might possibly mean. It is more likely that he might have done it with the War Plans Officer. He frequently sent for the War Plans Officers while I was doing something else. He may have discussed it with them.

[366] Mr. SONNETT. In that connection, Admiral, I show you exhibit 23, which is a December 1, 1941, memorandum from the Fleet Intelligence Officer to the Admiral on the location of the Japanese fleet, and ask whether you recall having seen that.

Vice Admiral SMITH. I recollect that this report was called for by the Commander-in-Chief. I probably saw it at the time. In fact, it was submitted frequently.

Mr. SONNETT. That, I take it, was a special report by the Fleet Intelligence Officer at the Commander-in-Chief's request?

Vice Admiral SMITH. To the Commander-in-Chief. That was not distributed to the staff. It may have gone through the War Plans Section.

Mr. SONNETT. Admiral, do you recall whether or not you saw that estimate at the time, that is, about December 1 or 2, 1941?

Vice Admiral SMITH. No. It looks very familiar to me, but my recollection is that I saw more than one of those, and this particular one I don't recall. Undoubtedly I saw it.

Mr. SONNETT. Do you recall, Admiral, that at that time it was noted by the Commander-in-Chief that this estimate did not account for the whereabouts of Japanese Carrier Divisions One and Two?

Vice Admiral SMITH. No.

Mr. SONNETT. You recall no conversation with Admiral Kimmel on that point?

Vice Admiral SMITH. No.

Mr. SONNETT. And you did not, I take it, participate in any meetings between Admiral Kimmel and Layton at which that point was discussed?

Vice Admiral SMITH. No, I don't remember.

Mr. SONNETT. What discussion, Admiral, if any, during the period November 27 to December 6, 1941, do you recall with Admiral Kimmel concerning [367] aircraft reconnaissance?

Vice Admiral SMITH. He had frequent conversations with Admiral Bellinger, who is much more capable of answering that question than I am. Just on which days those conferences were held, I don't know, but they frequently discussed the practicability of more extensive use of patrol planes, and it is my recollection that Bellinger outlined his limitations to Admiral Kimmel on several occasions, that he was limited by the number of engines he had. He was trying to get leak proof tanks installed. It was a question of whether he should put it all into training or wear out his planes, of which he had not too many.

Mr. SONNETT. Do you recall any such discussion, Admiral, after November 27, 1941?

Vice Admiral SMITH. No, I could not. I could not be certain about that.

Mr. SONNETT. I show you a route sheet and correspondence to which are annexed aircraft schedules, together with a photostatic copy of an outgoing dispatch from CincPac to ComPatWing Two, dated 22 November 1941, and ask whether you recall those.

Vice Admiral SMITH. My recollection is that the Fleet Aviator discussed this with Kimmel. He would never prepare a dispatch of this kind without bringing it to Admiral Kimmel's attention. And I undoubtedly released the dispatch, but I wouldn't have done so had Kimmel not known what was going on.

Mr. SONNETT. Now, those schedules, Admiral, set forth the utilization of the patrol planes of the fleet from November 17, 1941, up to and including December 31, 1941, do they not?

Vice Admiral SMITH. Yes.

[368] Mr. SONNETT. And the schedules as submitted were approved on November 22, 1941?

Vice Admiral SMITH. Yes.

Mr. SONNETT. May we mark a photostatic copy of the route sheet and schedules together with a photostatic copy of the dispatch approving them, Admiral, as an exhibit?

Admiral HEWITT. Yes.

Mr. SONNETT. And for the sake of the record, Admiral, the document I show you is a photostatic copy of the original document you have before you, is it not?

Vice Admiral SMITH. Yes.

(The documents referred to were received and marked "Exhibit 37.")

Mr. SONNETT. Admiral, these schedules do not provide for any reconnaissance from Oahu, do they?

Vice Admiral SMITH. It is not so stated here and it probably came under "training" because it is certain that the searches were conducted daily in the operating area. It would appear that no particular squadron was assigned that duty and that was probably part of the training.

Mr. SONNETT. These schedules, Admiral, were approved before receipt of the November 24th and the November 27th, or war warning dispatches, were they not?

Vice Admiral SMITH. Yes.

Mr. SONNETT. Do you recall any discussion with Admiral Kimmel after November 27th concerning the necessity or desirability for revision of these schedules?

Vice Admiral SMITH. I do not recall. So many things happened that I cannot remember that. I think it is more likely that Admiral Bellinger [369] or Rear Admiral A. C. Davis, the Fleet Aviator, would be able to answer that question.

Mr. SONNETT. Do you recall any discussion during the period November 27th to December 6th of any proposed Army reconnaissance over the Mandated Islands?

Vice Admiral SMITH. Two planes had long been directed by the Chief of Naval Operations to make a flight from Hawaii over the Mandated Islands, to land, I believe, in New Caledonia, then to proceed to Australia and to Manila. The purpose of this flight was photographic reconnaissance and the planes were ordered by the Chief of Naval Operations not to circle the Mandated Islands but to proceed directly over them, then furnish the Commander-in-Chief, Asiatic, and the Commander-in-Chief, Pacific, with copies of the photographs. One of the planes had arrived in Pearl Harbor, but, as I recall the conversation between Admiral Bellinger and the Commander-in-Chief, they had failed to bring their camera with them or some item of very important equipment. To the best of my knowledge, the second plane never arrived and the flight was never made before Pearl Harbor.

Mr. SONNETT. These were Army planes, Admiral, were they not?

Vice Admiral SMITH. Yes, they were Army planes.

Mr. SONNETT. And when you said that the reconnaissance had been directed by the Chief of Naval Operations, did you mean the Chief of Staff of the Army?

Vice Admiral SMITH. It probably was the Chief of Staff. I dare say that it resulted from a conference because their orders were to deliver the photographs to Admiral Hart and to Admiral Kimmel, the copies; so I imagine the Navy must have been in it.

[370] Mr. SONNETT. I show you exhibit 28 of this investigation, Admiral, and ask you whether you recall having seen that at or about November 28, 1941.

Vice Admiral SMITH. I don't recall having seen this paper, and I doubt if I did see it. However, I knew about the flight as projected. I was of the opinion—I still am of the opinion—that the flight was ordered long before November 28th, but the planes weren't ready.

Mr. SONNETT. Admiral, you testified before the Naval Court, in substance, that you thought that the intent of the war warning message of the 27th was to get you on your toes out here and to get you ready to execute the war plan. Is that correct?

Vice Admiral SMITH. That is correct.

Mr. SONNETT. And you recall that the November 27th message directed that an appropriate defensive development preparatory to carrying out the tasks assigned in WPL-46 be executed? Do you recall that provision of the exhibit?

Vice Admiral SMITH. Yes.

Mr. SONNETT. Now, will you state what discussion was had with Admiral Kimmel concerning the steps to be taken to constitute an appropriate defensive deployment preparatory to carrying out the initial tasks assigned to the Pacific Fleet by the war plans?

Vice Admiral SMITH. I cannot remember in detail, but I do recall conferences over the charts, Admiral Kimmel taking the type commanders personally to the War Plans Office and going over all these

islands of the Marshalls and Carolines; discussions of what might be found there; whether they would be soft or difficult; that that had been going on for months.

[371] Mr. SONNETT. Referring to exhibit 35, the Pacific War Plan, you will recall, Admiral, that the initial tasks assigned the Pacific Fleet were in Phase I, namely, Japan not in the war and Phase Ia, Japan in the war; that under Phase I, one of the tasks was: "g. To protect the communications and territory of the Associated Powers and to prevent the extension of enemy military power into the Western Hemisphere by patrolling with light forces and patrol planes and by the action of striking groups as necessary"; and "m. To guard against surprise attack by Japan."

What, if any, consideration was given to the steps to be taken to carry out those initial tasks which were to be taken before Japan got into the war?

Vice Admiral SMITH. Well, the ships had already been designated for each task long before 27 November. All that was needed was the word to carry out the plan.

Mr. SONNETT. As I recall your earlier testimony, Admiral, Phase I initial tasks required no Navy Department direction to be carried out?

Vice Admiral SMITH. Well, certain parts of it.

Mr. SONNETT. Specifically, the portions I just called to your attention, namely, to protect the communications and territory of the Associated Powers and prevent the extension of enemy military power into the Western Hemisphere by patrolling with light forces and patrol planes, and also to guard against surprise attack. Was there any consideration given as to the means or methods to be employed to carry out the directive?

Vice Admiral SMITH. Certain of those items were already being done without the plan being in effect. For example, we had submarines stationed off Midway and Wake, fighting planes out of Wake and patrol [372] planes operating from Midway. Whenever a task force moved with a carrier, they always had their planes in the air on a search. We always, over our ships, launched our planes for protection against submarines. We had been doing that a long time.

Mr. SONNETT. I note that one of the Phase I initial tasks to be taken when Japan was not in the war, as set forth in the war plan was "h," namely, to establish defensive submarine patrols at Wake and Midway.

Vice Admiral SMITH. Yes.

Mr. SONNETT. That was, of course, done, Admiral?

Vice Admiral SMITH. That was done.

Mr. SONNETT. Prior to the attack?

Vice Admiral SMITH. Yes.

Mr. SONNETT. What I would like to get at is what was done in connection with the other similar Phase I tasks in connection with the patrolling by light forces and patrol planes and guarding against attack by Japan.

Vice Admiral SMITH. I would say that the only thing that was done was the guarding with patrol planes in the direction of Japan or to the northward. I have forgotten just where in the phase it con-

but remember we had to send cruisers and submarines to the north and southeast Pacific, Samoa. That was not considered a necessary preliminary to the mobilization.

Mr. SONNETT. Would the establishment of aircraft patrol from Oahu have been an appropriate defensive deployment to carry out the initial tasks assigned by the Pacific Fleet war plans?

Vice Admiral SMITH. Yes, it would.

Mr. SONNETT. I show you, Admiral, exhibits 69A and 69B of the Naval Court of Inquiry and ask you whether you can identify those.

[373] Vice Admiral SMITH. Yes, I do.

Mr. SONNETT. Will you state what they are, Admiral?

Vice Admiral SMITH. This is a memorandum for the Commander-in-Chief, prepared by the War Plans Officer, Captain McMorris, dated 30 November 1941. It is a recommendation to the Commander-in-Chief on steps to be taken in case of an American-Japanese war within twenty-four hours of the date of the memorandum. This is followed by a second memorandum of the same nature, dated noon, December 5, 1941, recommending steps to be taken in case of an American-Japanese war within the next forty-eight hours.

Mr. SONNETT. Did you see those at or about the dates they bear, Admiral?

Vice Admiral SMITH. I believe so.

Mr. SONNETT. Do you find in either of those memoranda any provision made to carry out the initial tasks laid down in the war plans concerning aircraft patrol?

Vice Admiral SMITH. No, I do not.

Mr. SONNETT. Did you participate in any discussion with Admiral Kimmel or with Captain McMorris concerning the adequacy of the steps recommended by him in those memoranda?

Vice Admiral SMITH. I don't recollect having done so.

Mr. SONNETT. Do you recall any discussion with Admiral Kimmel during this period November 27th to December 7, 1941, of the lack of information reflected in the intelligence summaries as to Japanese carriers?

Vice Admiral SMITH. No. There were frequent discussions, but lack of sufficient information from the Navy Department. We believed at that time that our intelligence was adequate. We received very little from Naval Intelligence. It is possible that the Intelligence Officer of the [374] Fourteenth Naval District and the Intelligence Officer of the Commander-in-Chief received more information than I know of. Occasionally a paper from the State Department would pass over my desk on conditions in Japan, but I never saw anything alarming in one of those papers. I believe they came out monthly. There may, of course, have been other reports of the State Department of a more secret nature that weren't issued to us at all. If there were, they weren't shown to me. I do not recall any discussion of the adequacy or inadequacy of our own intelligence staff. The same two officers are continuing the same jobs; so they are apparently considered satisfactory now.

Mr. SONNETT. Admiral, was it the fact that, so far as your intelligence was concerned relating to the movements of Japanese naval vessels, your reliance was on the intelligence submitted by the Fleet Intelligence Officer primarily?

Vice Admiral SMITH. Yes.

Mr. SONNETT. Which was most current?

Vice Admiral SMITH. And based upon the analysis of radio traffic. At that time, to the best of my knowledge, our people were unable to decipher Japanese naval codes. They did decipher commercial codes, the movements of commercial ships.

Mr. SONNETT. Referring, Admiral, to your previous testimony that your estimate was that a surprise attack by the Japanese on the fleet in the harbor by air was possible but not probable, will you state the basis for that estimate?

Vice Admiral SMITH. There was a great deal of doubt in our minds that Japan would go to war with us unless Germany did so also. Our information from all sources, including the Navy Department, our [375] intelligence did not indicate that the Japanese fleet had any intentions or was on the way to attack Pearl Harbor. The Japanese fleet, as located, indicated no move in this direction, and I believe, most important of all, we doubted whether the Japanese would dare send a large force as far to the eastward as Hawaii. The possibility that they might be located even by a neutral ship existed. They might have been located several times before their arrival there, in which case they would have been at a great disadvantage. I believe that all of these things existed in the back of our minds and it was for this reason that we did not fear an air attack.

Admiral HEWITT. Thank you very much.

(The witness was excused.)

(The investigation then, at 12:05 p. m., recessed until 1:30 p. m. at which time is reconvened.)

(Present: The same parties.)

[376] Two witnesses entered, each read the precept, and each was duly sworn.

Mr. SONNETT. Will you state your name and rank, Commander Burr?

Commander BURR. Harold S. Burr, Commander, USNR.

Mr. SONNETT. Lieutenant?

Lieutenant WOODRUM. Donald Woodrum, Lieutenant, USNR.

Mr. SONNETT. Commander, what is your present assignment?

Commander BURR. I am Acting District Intelligence Officer, Fourteenth Naval District.

Mr. SONNETT. And yours, Lieutenant?

Lieutenant WOODRUM. I am attached to the District Intelligence Office, Fourteenth Naval District.

Mr. SONNETT. What was your assignment in 1941, Commander Burr?

Commander BURR. I was Naval Liaison Officer for the Command at the headquarters of the Commanding General, Hawaiian Department, and on the complement of the District Intelligence Office.

Admiral HEWITT. Will you give us an outline of what your duties were as Liaison Officer, generally?

Commander BURR. Sir, it was a new job and I was sort of a hand man, trying to help the Army with its problems involving the Navy, seeing that officers in the Army were placed in touch with appropriate officers in the District in order to accomplish missions of mutual responsibility or interest. It was a very broad field.

Admiral HEWITT. I suppose also you advised them about naval affairs insofar as you could?

Commander BURR. Yes, sir.

Q Mr. SONNETT. Did you know in 1941 then Lieutenant Commander Layton?

A Commander BURR. I did.

Q SONNETT. And what was his assignment at that time?

A Commander BURR. I understood it to be Fleet Intelligence Officer.

Q SONNETT. Do you recall on or about November 27, 1941, receiving from Lieutenant Commander Layton a message for delivery to General Short?

A Commander BURR. I think it was received directly from Lieutenant Commander Layton, but I am not sure. It was at CincPac and he and others were there at the time. The Chief of Staff, Fourteenth District, was there, and I couldn't swear it was Commander Layton, although I am sure he is acquainted with the message.

Q SONNETT. I show you exhibit 17 of the Naval Court of Inquiry asking whether the message which you received at that time was a copy of this or substantially a copy of this message.

A Commander BURR. I would say it appears to be substantially the

Q SONNETT. Will you state what you did with that message at that time, Commander?

A Commander BURR. I was instructed to deliver that message to General Short, Commanding General of the Hawaiian Department. It took several hours by the time I received it, but I drove directly to Fort Shafter and attempted to locate General Short. No one seemed to know where he was at the time. I knew that the message was urgent; I looked for the Chief of Staff, who was next senior, and I couldn't find him. The Senior Officer Present was Colonel Donnegan, then Lieutenant Colonel William Donnegan, head of G-3, which, I believe is the next senior officer. So I showed the [378] message to him and explained my eagerness to reach General Short, and, as far as I can recollect, he stated that he would see to it that General Short saw it and that since he was apparently the action officer, he would proceed to act on the message at that time.

Q SONNETT. Did you leave the message with him?

A Commander BURR. Reluctantly.

Q SONNETT. Did you subsequently ascertain whether the message had been delivered to General Short?

A Commander BURR. Yes, sir, I checked with Colonel Donnegan and learned that it had been delivered to General Short.

Q SONNETT. When were you told by Colonel Donnegan that it had been delivered to General Short?

A Commander BURR. On or about the 28th, the following day.

Q SONNETT. I think, Admiral, that is all on that particular point.

A Admiral HEWITT. I think that is all.

Q SONNETT. Lieutenant, during 1941 were you familiar with the one line taps which were on the line of the Japanese Consulate in Honolulu?

A Lieutenant WOODRUM. After about October I was made familiar with them.

Q SONNETT. Do you have in the files of the District Intelligence transcripts of the telephone conversations so intercepted?

A Lieutenant WOODRUM. I do.

Mr. SONNETT. In addition to taps on the line of the Japanese Consul, were there telephone taps on the line of the Japanese Vice Consul as well?

Lieutenant WOODRUM. There was a tap on the private line of the [379] Japanese Vice Consul in the Consulate itself.

Mr. SONNETT. In addition to the telephone taps by ONI on the business phones of the Japanese Consul and Vice Consul, did you for a time have taps on their home phones?

Lieutenant WOODRUM. Yes, we did. We had a tap on the home phone of the Consul General until about September and on the Vice Consul until we shut down.

Mr. SONNETT. When did you discontinue tapping the telephone wires in question, Lieutenant?

Lieutenant WOODRUM. December 2, 1941.

Mr. SONNETT. Can you state in general the nature and type of information which was acquired from the telephone taps you have described?

Lieutenant WOODRUM. There was very little of military significance. There was a great deal of information concerning the routine activities of the Consul and some information concerning the activities of the local Japanese population.

Mr. SONNETT. Could you prepare and submit for this investigation Lieutenant, copies of the transcripts of telephone conversations intercepted from October to December 2, 1941?

Lieutenant WOODRUM. I can.

Mr. SONNETT. May we mark those as exhibits when received, Admiral?

Admiral HEWITT. Yes.

(The documents referred to were received, to be marked "Exhibit 38.")

Mr. SONNETT. Will you state, Lieutenant, the reasons for the discontinuance of the telephone taps by ONI on or about December 2, 1941?

Lieutenant WOODRUM. I have no personal knowledge of the reason [380] for removing the taps on December 2nd, but this is my general understanding of the reason that action was taken at that time. The Federal Bureau of Investigation, with our cognizance, had placed a tap on the private phone of one Kenzi Kimura, the general manager of the NYK office in Honolulu. This occurred some time in November, 1941. Late in November, 1941, a member of the District Intelligence Office learned from a contact at the telephone company that workmen had uncovered the FBI tap on Mr. Kimura. The member of the District Intelligence Office assumed that FBI had made this tap without the cognizance of the telephone company inasmuch as the NYK office was on the ground floor of the same building in which the FBI office was located and the tap was in the basement of that building. During a subsequent visit of an FBI agent, the representative of the DIO informed him of this fact in a spirit of cooperation, with the thought of warning him that his taps had been uncovered and security violated. I was present at this meeting when the FBI agent was so informed. It is my understanding that a representative of the FBI thereafter approached the telephone company and demanded to know why their representatives were revealing FBI secrets to the Office of Naval Intelligence. The result of this approach by the FBI was t

give one or more employees of the telephone company a realization that this sort of activity was going on, whereas they previously, to our knowledge, hadn't known of it.

When Captain Mayfield learned of the FBI action, he ordered all taps to be removed. It was my understanding that the reason for this was his concern at the violation of security caused by this incident and his concern that some incident of possible international import might result from such revelations. The telephone tapping work done by ONI was kept extremely secret. Only a handful of persons in the District [381] Intelligence Office, who were directly concerned with the information gained thereby, were even aware that such work was being done. Many persons attached to the office weren't aware that such work was being done and great care was taken to prevent their obtaining that knowledge. I was told that even the Commandant of the Fourteenth Naval District was not aware of this activity in order that he might be spared any possible embarrassment arising from his knowledge thereof.

Mr. SONNETT. Do you know whether after December 2, 1941, the FBI tapped any of the Japanese telephone wires?

Lieutenant WOODRUM. I don't know.

Mr. SONNETT. Did they have access to the trans-Pacific telephone conversations?

Lieutenant WOODRUM. I have seen transcripts of taps they made on conversations between Honolulu and Japan during the months of November and December, 1941.

Mr. SONNETT. Among those conversations was the so-called Mori conversation, was there not?

Lieutenant WOODRUM. Yes, there was.

Mr. SONNETT. Will you state when the Navy first received a transcript of that conversation?

Lieutenant WOODRUM. It is my understanding that this conversation took place on the evening of December 5, 1941, and that Captain Mayfield was notified by FBI, either immediately or the following day, that a suspicious conversation had taken place and that a translation and transcription was being made by the FBI translator at that time.

It is my further understanding that a written translation of the conversation was received at the District Intelligence Office some time [382] on December 6, 1941. At that time it was studied by Commander Denzel Carr, who thereupon desired to hear the original recording of the conversation. Arrangements were made with the FBI to have him do this, but as it was late in the evening already by the time this was done, it was agreed that he would go down the following day and listen to the recording. At a time subsequent to the Japanese attack, within a day or so, Commander Carr did go down and listen to the recording. At that time he stated to me that it was his opinion that Dr. Mori was not attempting to send information from the Islands, but on the contrary was greatly surprised and mystified by the whole tenor of the conversation. It was further Commander Carr's opinion that Dr. Mori hedged and hesitated to give anything in the way of specific military information. A study of the transcript reveals that strictly military subjects were discussed only briefly and that Dr. Mori gave little or no specific military information.

Mr. SONNETT. You have supplied us with a copy of the Mori conversation, have you not?

Lieutenant WOODRUM. We have.

Mr. SONNETT. May we mark that, Admiral?

Admiral HEWITT. Yes.

(The document referred to was received and marked "Exhibit 39.")

Lieutenant WOODRUM. The man who made this telephone call was subsequently interned for accepting the telephone call.

Mr. SONNETT. Lieutenant, was there any telephone tap by ONI or FBI which came to the attention of Naval Intelligence prior to December 7, 1941, wherein military information was furnished by person here to any outside source?

[383] Lieutenant WOODRUM. You mean furnished here to the Consulate?

Mr. SONNETT. Well, any way. Furnished to any Japanese representative. Let's put it that way.

Lieutenant WOODRUM. There are only two instances to my knowledge in which this occurred. In one instance, in 1940—I would have to look up the right date—Japanese Vice Consul Okuda telephoned a Buddhist priest at Lahaina on the Island of Maui by the name of Vriji Hirayama and requested Hirayama to keep the Consulate informed of any United States fleet movements that came to his attention. In another instance, in 1941, a woman very much agitated called the Consulate and blurted out that the USS NEW ORLEANS had just left the harbor. The person answering at the Consulate hung up without reply, and it was the evaluation of the listeners that the woman was under some sort of emotional stress and that the people in the Consulate suspected some sort of a trick.

Mr. SONNETT. Prior to December 7, 1941, certain cable messages sent by the Japanese Consul over commercial cable lines were intercepted and received by the Office of Naval Intelligence, were they not?

Lieutenant WOODRUM. They were.

Mr. SONNETT. Do you have copies of those messages available?

Lieutenant WOODRUM. I can't state exactly which messages were made available. We have now copies of messages sent by the Consulate between December 1st and December 6th.

I might explain the background of that. At various times effort had been made to secure copies of the coded messages sent by the Consulate to Japan and to the Japanese Embassy in Washington. These efforts were unsuccessful. There are three cable companies in Honolulu and it was known [384] that the Consulate alternated between each of the three, using each one for a period of one month. It is my understanding that Admiral Bloch requested David Sarnoff, who was visiting in the Islands at that time, to make available to the naval service copies of messages handled by RCA Radio. Sarnoff agreed and ordered the local office to do this. On December 1st, following their usual custom, the Consulate began using the facilities of RCA. On the morning of 5 December the District Intelligence Office received the first copies of these cables, and it is my understanding that these were immediately sent out to Commander Rochefort's unit. It is also my understanding that these were not decoded until after the Japanese attack and that even then it was necessary to use a Japanese

nese code book that had been picked up in the effects of the Consulate after it was raided on December 7th.

Mr. SONNETT. Do you have the messages which were so delivered to the District Intelligence Office on December 5, 1941?

Lieutenant WOODRUM. We have copies of messages sent by the Consulate between December 1st and December 6th, decoded copies.

Mr. SONNETT. Decoded copies?

Lieutenant WOODRUM. Decoded copies.

Mr. SONNETT. Can you supply us with a decoded copy of each message sent by the Consul between December 1st and December 6th which was in the possession of Naval Intelligence prior to the attack on December 7th?

Lieutenant WOODRUM. I can't say from my own knowledge which was in the possession of Naval Intelligence prior to the attack.

Mr. SONNETT. No record was kept, I take it, of the messages turned over on December 5th?

Lieutenant WOODRUM. I know of no record.

[385] Mr. SONNETT. Can you supply us, then, with copies of each of the messages that you have decoded, sent by the Japanese Consul between December 1st and December 6, 1941?

Lieutenant WOODRUM. I can, and we have supplied you with some of those.

Mr. SONNETT. And you will supply us with a complete set of them?

Lieutenant WOODRUM. Yes.

Mr. SONNETT. May we mark those, Admiral, as an exhibit when they are received?

Admiral HEWITT. Yes.

(The documents referred to were received, to be marked "Exhibit 40.")

Mr. SONNETT. Aside from information received through telephone taps and from the interception of Japanese cable messages, was there any other information received by the Office of Naval Intelligence indicating Japanese interest in movements of United States ships or preparations to meet attack in Pearl Harbor, or any military subject?

Lieutenant WOODRUM. Over a period of years there was considerable information gathered by the Naval Intelligence service concerning Japanese interest in Pearl Harbor and the Island of Oahu. There are voluminous reports available concerning the visits of Japanese tankers, Japanese training ships, Japanese training squadrons to the Island of Oahu and to other islands in the Hawaiian group. It was well known that officers attached to these groups made "sightseeing trips" of the islands, including such vantage spots as Aiea Heights.

Mr. SONNETT. Did any of the information in the possession of [386] Naval Intelligence prior to December 7, 1941, indicate that the Japanese had a specific interest in the location or movements of United States ships in Pearl Harbor?

Lieutenant WOODRUM. The only instance I know of is the one heretofore cited of the conversation with the Buddhist priest on Maui.

Mr. SONNETT. Was there any information showing specifically that the Japanese were interested in the anti-aircraft defenses in or around Pearl Harbor?

Lieutenant WOODRUM. I know of none.

Mr. SONNETT. Was there any information indicating specifically that the Japanese were interested in the question of anti-torpedo in Pearl Harbor prior to December 7th?

Lieutenant WOODRUM. I know of none prior to December 7, 1941.

Mr. SONNETT. I have nothing further, Admiral.

Admiral HEWITT. I have nothing else.

(The witnesses were excused.)

(The investigation was then, at 2:27 p. m., adjourned until 4 p. m. of 4 June 1945.)

[387] PROCEEDINGS OF THE HEWITT INQUIRY

FOURTEENTH DAY

Pursuant to notice, the investigation met at the Visiting Flag Officer's Office, Headquarters, Commander-in-Chief, U. S. Pacific Fleet and Pacific Ocean Areas, Pearl Harbor, Oahu, T. H., at 4 p. m., Monday, 4 June 1945.

Present: Admiral H. Kent Hewitt, USN; Mr. John F. Sonnett; Lieutenant Commander Benjamin H. Griswold, USNR; Lieutenant John Ford Baecher, USNR; and Ship's Clerk Ben Harold, USNR.

A witness entered, read the precept, and was duly sworn.

Mr. SONNETT. State your name and rank, sir.

Brig. General POWELL. Brigadier General Carroll A. Powell, USA.

Mr. SONNETT. General, what was your assignment in November and December, 1941?

Brig. General POWELL. Signal Officer, Hawaiian Department.

Mr. SONNETT. And you were stationed where?

Brig. General POWELL. Fort Shafter.

Mr. SONNETT. Did the Army operate a radio intercept unit at Fort Shafter?

Brig. General POWELL. Yes, it did.

Mr. SONNETT. What, if any, decryption of intercepted Japanese messages was done at Fort Shafter, General?

Brig. General POWELL. None whatsoever.

Mr. SONNETT. I show you documents 14, 15, and 18 of exhibit 13, which are dispatches or messages between Tokyo and Honolulu relating to preparations for defense of Pearl Harbor and to the Japanese interest in [388] those preparations, and ask you whether you recall having seen those messages or any of them before.

Brig. General POWELL. I never have seen them.

Mr. SONNETT. I take it, General, that the intercepted messages of the Japanese were sent from Fort Shafter to Washington for decryption?

Brig. General POWELL. That is right.

Mr. SONNETT. And what methods were used to send the material to Washington?

Brig. General POWELL. Messages with a certain indicator, which I don't recall, were sent by radio, and all others were sent by air mail.

Mr. SONNETT. I think that is all, Admiral.

Admiral HEWITT. Thank you very much.

(The witness was excused.)

(The investigation was then, at 4:10 p. m., adjourned until 9:30 a. m., 5 June 1945.)

## [389] PROCEEDINGS OF THE HEWITT INQUIRY

## FIFTEENTH DAY

Pursuant to notice, the investigation met at the Visiting Flag Officer's Office, Headquarters, Commander-in-Chief, U. S. Pacific Fleet and Pacific Ocean Areas, Pearl Harbor, Oahu, T. H., at 9:30 a. m., Tuesday, 5 June 1945.

Present: Admiral H. Kent Hewitt, USN; Mr. John F. Sonnett; Lieutenant Commander Benjamin H. Griswold, USNR; Lieutenant John Ford Baecher, USNR; and Ship's Clerk Ben Harold, USNR.

A witness entered, read the precept, and was duly sworn.

Mr. SONNETT. State your name and rank, sir.

Vice Admiral WILKINSON. Theodore S. Wilkinson, Vice Admiral, USN.

Mr. SONNETT. Admiral, you were Director of the Office of Naval Intelligence on December 7, 1941, were you not?

Vice Admiral WILKINSON. Yes.

Mr. SONNETT. When had you assumed that position, Admiral?

Vice Admiral WILKINSON. October 15, 1941, as I recall it.

Mr. SONNETT. Will you state generally the structure of the Office of Naval Intelligence?

Vice Admiral WILKINSON. The Office of Naval Intelligence was composed of two main branches, foreign intelligence and domestic. The domestic had to do with internal subversion, espionage, and other activities of foreign nationals or organizations inimical to national, and particularly naval, welfare. It included several branch offices in principal cities of the United States, one of which was Honolulu. The foreign intelligence was organized under a number, approximately eight, of regional groups of which [390] the Far Eastern was one. Under the administration of ONI and directly of foreign intelligence were the Naval Attachés and Naval Observers stationed throughout the world.

Mr. SONNETT. Who was in charge, Admiral, of the foreign branch of the Office of Naval Intelligence?

Vice Admiral WILKINSON. Captain Heard, I believe, at that time, though there had been a change either just before or after.

Mr. SONNETT. Admiral, do you recall who was in charge of the Far Eastern Section of the foreign branch?

Vice Admiral WILKINSON. Commander McCollum.

Mr. SONNETT. Admiral, would you state in general the sources of information which the Far Eastern Section of the foreign branch of the Office of Naval Intelligence had?

Vice Admiral WILKINSON. Naval Attaché reports from Japan and China, Observers' reports from various ports in the Far East, reports from the Commander-in-Chief of the Asiatic Station, collateral items of interest produced by the investigations of the domestic branch of

ONI, particularly from Honolulu, radio intelligence matters as available in Washington, and also from a center set up in Manila.

Mr. SONNETT. And Pearl Harbor, Admiral?

Vice Admiral WILKINSON. The State Department reports from diplomatic agents and reports from the Commander-in-Chief of the Fleet at Pearl Harbor with respect to searches and radio intelligence.

Mr. SONNETT. Admiral, will you state your recollection as to the responsibility of the Far Eastern Section of the foreign branch of ONI for the dissemination of the information in its possession?

Vice Admiral WILKINSON. The responsibility of the Far Eastern section derived from the responsibility of the office as a whole. In general, the [391] duties of any of the foreign sections were to receive, collate, and analyze information obtained either by the agencies of ONI or received from other sources and to disseminate that information in one of several ways. The usual means of dissemination of technical information was transmission by mail of copies or abstracts of pertinent reports. There was a periodical publication, bi-weekly, I remember, to all flag officers, containing political and operational intelligence, which contained a Far Eastern section, and in which latter the Far Eastern Division of ONI would incorporate any information of value. A third means of dissemination, although not strictly dissemination, was the limited distribution within the Navy Department of highly confidential radio intelligence and all urgent or important operational information. The radio intelligence was incorporated in a secret book, which was passed by hand by a responsible officer to approximately four of the Navy Department's heads and to the President and the Secretary of State. The urgent operational information was reported to me and either by myself in company with Commander McCollum or by himself directly to the Chief of Naval Operations or the Assistant Chief of Naval Operations. There was also, as the situation got hot, a daily one or two paragraph summary of the Japanese picture which was given to the Chief of Naval Operations and to the Director of War Plans. The immediate report I have mentioned above was also made to the Director of War Plans. These reports or analyses usually contained some deduction as to future moves to be expected which we offered for such value as they might have to the Chief of Naval Operations and to the Director of War Plans.

Mr. SONNETT. As to the dissemination of information, Admiral, on the side of the Navy Department and to the Pacific Fleet, do I take it that it was the responsibility of ONI to disseminate information on the Japanese situation to the Pacific Fleet?

[392] Vice Admiral WILKINSON. That point was never fully terminated. We issued the reports and the bi-weekly summary of the situation, but I was told that the deductions of future movements were the function of War Plans rather than of Intelligence, and this understanding was confirmed by the Assistant Chief of Operations, Admiral Ingersoll, when at one time I said that I thought it was my responsibility. He told me at that time that the Army system was for Intelligence to prepare the analyses of enemy prospective movements, but in the Navy system War Plans did that. I told him that I would prepare that analysis myself in my office in order that War Plans and the Chief of Naval Operations might use it as they saw fit, and in consequence such analyses as I made weren't ter-

mitted to the fleet, but were given to the Chief of Operations and to War Plans. The same with respect to spot news of the enemy movements. My understanding at the time was, and still is, that I would report to War Plans and the Chief of Naval Operations the latest operational information deduced from all sources and that they would forward to the fleet such items as they felt should be so forwarded.

Mr. SONNETT. Would it be an accurate summary, then, Admiral, to state that information in the possession of the Office of Naval Intelligence concerning Japanese movements, for example, would be disseminated by ONI, but the evaluation of Japanese plans or deductions to be drawn from those movements would be the function of War Plans or the Chief of Naval Operations?

Vice Admiral WILKINSON. The latter part of your question, yes. The first part, the day by day information of the Japanese movements would not, according to my then and present understanding, be sent out by Intelligence, but rather by Operations after their evaluation.

[393] Mr. SONNETT. Admiral, I show you exhibit 9 of this investigation, which is a copy of the fortnightly summary of current national situation, issued by the Office of Naval Intelligence and dated December 1, 1941, and ask you if you can identify that as a summary set up by you.

Vice Admiral WILKINSON. Yes, that is a summary of which I was recently speaking.

Mr. SONNETT. Referring, Admiral, to page 9 of the exhibit, paragraph C summarizes, does it not, the Japanese naval situation as seen by the Office of Naval Intelligence at that time?

Vice Admiral WILKINSON. Yes, I recall this, and, in fact, the entire issue, as I read over the text of each issue before authorizing its publication.

Mr. SONNETT. Who prepared, Admiral, the portion of the exhibit to which I have called your attention, namely, relating to the Japanese naval situation?

Vice Admiral WILKINSON. The Far Eastern Section.

Mr. SONNETT. For the sake of clarity of the record, Admiral, as well as to refresh your own recollection since it has been some time ago, would you read the first paragraph of C into the record?

Vice Admiral WILKINSON. The heading is—

#### THE JAPANESE NAVAL SITUATION

Deployment of naval forces to the southward has indicated clearly that extensive preparations are underway for hostilities. At the same time troop transports and freighters are pouring continually down from Japan and northern China coast ports headed south, apparently for French Indo-China and Formosan ports. Present movements to the south appear to be carried out by small individual units, but the organization of an extensive task force, now definitely indicated, will probably take sharper form in [394] the next few days. To date this task force, under the command of the Commander in Chief Second Fleet, appears to be subdivided into two major task groups, one gradually concentrating off the southeast Asiatic coast, the other in the Mandates. Each constitutes a strong striking force of heavy and light cruisers, units of the Combined Air Force, destroyer and submarine squadrons. Although one division of battleships also may be assigned, the major capital ship strength remains in home waters, as well as the greatest portion of the carriers.

Mr. SONNETT. Admiral, I show you exhibit 10 of this investigation, a memorandum for the Director by A. H. McCollum, dated December 1, 1941, and ask whether you recall having seen that.

Vice Admiral WILKINSON. I recall it vaguely, but I presume that was given to me in view of its form.

Mr. SONNETT. Admiral, I show you exhibit 8 of this investigation which consists of photostatic copies of three dispatches, and whether you recall having seen those or any one of them?

Vice Admiral WILKINSON. I do not recall having seen any. I do not ordinarily see any of the so-called COPEKS, due perhaps to the very limited distribution, although I believe that the Far Eastern Section was given access to them by inspection at the office of record. I do not believe that they were furnished a copy.

Mr. SONNETT. The situation as to Japanese carriers, Admiral, set forth in exhibit 9, the ONI fortnightly summary for December 1, 1941, is summarized, is it not, in the statement as follows: "Although the division of battleships also may be assigned, the major capital strength remains in home waters, as well as the greatest portion of the carriers"?

[395] Vice Admiral WILKINSON. That was our best knowledge and belief at the time.

Mr. SONNETT. Do you recall, Admiral, upon what information that statement was based?

Vice Admiral WILKINSON. No. On the digest of all available information, radio intelligence and sighting, whatever we had.

Mr. SONNETT. Admiral, do you recall how this exhibit 9, the fortnightly summary of December 1, was sent out? By air mail?

Vice Admiral WILKINSON. By air mail, I believe.

Mr. SONNETT. And, I take it, it was sent out on or about the date it bears, namely, December 1, 1941?

Vice Admiral WILKINSON. Yes. It is my impression that it had been received in Pearl Harbor prior to December 7th.

Mr. SONNETT. What information, Admiral, do you recall or know after December 1, 1941, concerning the location or movements of Japanese carriers?

Vice Admiral WILKINSON. My remote recollection at this time is that we had little, if any, information as to the carriers. We had fairly complete knowledge of the movement down through the South China Sea and around Indo-China, but the movements in the Pacific Ocean as a whole, including both battleships and carriers, were completely veiled. There may have been one or two carriers involved in the South China Sea movement, but the carrier force as a whole was not definitely located.

Mr. SONNETT. Admiral, I show you exhibit 22 of this investigation which consists of photostatic copies of daily communication intelligence summaries at Pearl Harbor, and call your attention to the summary particularly for the period December 1 to December 5, 1941, and if you can recall having had any of the information contained in these summaries during that [396] period of time.

Vice Admiral WILKINSON. Not directly, but as digested through the Far Eastern Section. I note particularly the fact that parts of the Japanese fleet were apparently in radio silence, of which I was aware.

Mr. SONNETT. Admiral, do you recall any discussion with the Chief of Naval Operations or with the War Plans Officer concerning the lack of information as to parts of the Japanese fleet during the first week of December, 1941?

Vice Admiral WILKINSON. Yes. I think we reported daily that a large part of the Japanese fleet was apparently at sea with its whereabouts not known. We also reported, however, that the only indications we had been able to pick up of any movement were those toward the south, including through the South China Sea, and our conclusion that an attack on Thailand and the Malay Peninsula was imminent. I recall that Admiral Turner also concluded that an attack would be made on the Philippines.

Mr. SONNETT. Do you recall any discussion during that period of time, Admiral, concerning the question whether or not any aerial reconnaissance was being conducted from Oahu?

Vice Admiral WILKINSON. No discussion of which I was a part. That was in the line of operational intelligence, procured by our own operations, which I considered was a function of the Office of Operations proper, although, of course, I was interested in the results of such searches for their own value and for their consolidation in the general picture.

Mr. SONNETT. Was there, Admiral, during the month or so preceding December 7, 1941, any discussion in which you participated concerning the likelihood of a Japanese move toward Pearl Harbor?

Vice Admiral WILKINSON. Unfortunately, no.

[397] Mr. SONNETT. At that time, Admiral, what was your estimate as to the possibility or probability of a Japanese attack on Pearl Harbor?

Vice Admiral WILKINSON. I thought it was improbable and I thought it was impracticable in view of the air searches which I had known were being conducted when I had last left Hawaii in May and which I presumed, in the lack of any other knowledge, were still being conducted.

Mr. SONNETT. Did you, Admiral, have the view that such an attack on Pearl Harbor was a possibility?

Vice Admiral WILKINSON. A remote possibility, but to my mind I thought it would be detected and driven off before it could be effective.

Mr. SONNETT. Admiral, I show you exhibit 63 of the Naval Court of Inquiry record, which consists of certified copies of Japanese diplomatic dispatches, and ask if you would examine that.

Vice Admiral WILKINSON. Well, not recognizing this exhibit specifically, I was familiar with the various decrypted dispatches which were available in the Navy Department.

Mr. SONNETT. Admiral, will you state how such Japanese dispatches were obtained?

Vice Admiral WILKINSON. They were obtained by radio interceptor, if they were sent by cable, I believe that we got copies of the cable; I am not sure. The text was then given to a large decrypting unit under the immediate control of the Director of Communications, although ONI cooperated by assignment of certain technical personnel. The Army had similar experts and there was a division of labor between the two departments in connection with the decryption of all foreign texts. In general, I recall that the Navy, which had made a longer study and was more familiar with the Japanese language and codes, took care of most of the Japanese work, while [398] the Army looked after other nations.

The products of the decryption of the Japanese dispatches were embodied in a secret book which originally was shown in full to the Secretary of the Navy, Chief of Naval Operations, Director of War Plans, myself, and the President and the Secretary of State. At some time—I don't know precisely whether before or after December 7th—I believe only abbreviated summaries were shown to the President and Secretary of State. Also there was some arrangement that the Army would look after the State Department and that the President would be served on alternate days by the Army and the Navy, but I am not sure of this in my recollection. At any rate, the books contained, as I recall, the product of both the Army and the Navy work.

Mr. SONNETT. Admiral, I note that various of these Japanese dispatches are indicated to have been in the so-called purple code. Will you state generally what the purple code was?

Vice Admiral WILKINSON. I don't recall, although I vaguely remember that it was a diplomatic code.

Mr. SONNETT. Do you recall, Admiral, whether the Japanese purple code was being decrypted at any other place besides Washington?

Vice Admiral WILKINSON. Not to my recollection.

Mr. SONNETT. Admiral, I call your attention to a dispatch dated 19 November 1941 from Tokyo to Washington, which is indicated to have been translated on November 28, 1941, and ask whether you recall having seen that dispatch or having had that information.

Vice Admiral WILKINSON. Yes, I recall the "east wind," et cetera. I do not recall the specific Japanese words.

Mr. SONNETT. That dispatch, Admiral, was a dispatch setting up the so-called "winds" code to be used by the Japanese in daily Japanese language short wave news broadcasts, was it not?

Vice Admiral WILKINSON. Yes.

Mr. SONNETT. Do you recall, Admiral, what efforts were made to monitor for any message using the "winds" code?

Vice Admiral WILKINSON. My recollection is that the Japanese broadcasts were all monitored, and I do not recall any specific effort in connection with this, but since it was to appear in the regular news broadcast, it presumably would be detected therein.

Mr. SONNETT. Do you recall whether or not any message using the "winds" code was ever intercepted?

Vice Admiral WILKINSON. The method was not to use the "winds" code in a whole message, but simply to put in a word which of itself was the "winds" code. I recall that at some late stage, along about December 6th or 7th, I heard, either then or immediately after the Pearl Harbor attack, that there had been such a word in one of the broadcasts. I don't recall when.

Mr. SONNETT. Do you recall, Admiral, that the Japanese also had established a code known as the hidden word code?

Vice Admiral WILKINSON. No, I recall no mention of it.

Mr. SONNETT. Admiral, I show you document 6 and document 7 of exhibit 13 of this investigation. The first is a dispatch from Tokyo to Washington on November 27, 1941, establishing a hidden word code and the second is a message of 7 December 1941 from Tokyo, and ask whether you recall having seen either of those messages.

Vice Admiral WILKINSON. I do not recall either one of them.

Mr. SONNETT. Admiral, I show you exhibit 65 of the Naval Court of Inquiry, which consists of various documents supplied by the Federal Communications Commission, and ask whether you recall having seen any of [400] those documents.

Vice Admiral WILKINSON. No, I do not recall such.

Mr. SONNETT. Do you recall, Admiral, who it was who indicated to you some time around December 7, 1941, that a "winds" code message had been received?

Vice Admiral WILKINSON. I recall some mention of it, but not until after the attack, but I no longer attributed importance to it since the overt act had occurred. It may possibly have been the last message of the exhibit you just showed me, which, you will note, was received on December 8th.

Mr. SONNETT. But you don't remember who it was that mentioned it to you?

Vice Admiral WILKINSON. I don't recall, but presumably it would have been Commander McCollum, who was in touch with the Army, to whom the reports of that exhibit were made.

Mr. SONNETT. Do you recall, Admiral, during the first week in December, 1941, that Commander McCollum prepared a long dispatch, summarizing the situation, which he desired to have released and sent out and which dispatch he discussed with you?

Vice Admiral WILKINSON. From time to time Commander McCollum and I, or he after consulting me, would prepare dispatches to be submitted to the Chief of Naval Operations for release. I do not specifically recall this dispatch, but if you have any evidence of it, I could probably refresh my recollection.

Mr. SONNETT. Admiral, Captain Safford, who testified during this investigation and who testified in previous investigations, stated that on or about December 4, 1941, he was present when you and Admiral Noyes [401] conferred concerning the desirability of sending out a dispatch which had been prepared by Commander McCollum and that you were in favor of sending out the dispatch but Admiral Noyes was not in favor of doing so and that you indicated you would take it to the Chief of Naval Operations to try to get it released. Do you recall that incident at all?

Vice Admiral WILKINSON. No. It is quite possible that I did take it to Admiral Ingersoll, but I do not recall it specifically.

Mr. SONNETT. And I take it, therefore, Admiral, that you do not recall the contents of any dispatch which McCollum had prepared at that time?

Vice Admiral WILKINSON. Not at that specific time.

Mr. SONNETT. Do you recall, Admiral, whether in any dispatch prepared by Commander McCollum prior to the attack there was specific reference made to any Japanese broadcast using the "winds" code words relating to the United States?

Vice Admiral WILKINSON. No. I know the "winds" code words were discussed in Washington, but I do not remember any dispatch sent outside. There was, of course, at that time considerable reluctance to any widespread information which would indicate our operations and our success in breaking Japanese codes.

Mr. SONNETT. Admiral, I show you document 38 and document 39 of exhibit 63 of the Naval Court of Inquiry record and ask whether you recall having seen those intercepted Japanese messages.

Vice Admiral WILKINSON. Yes, I saw this in several successive as it was received, decrypted, and passed out in the secret book spoke of.

Mr. SONNETT. The first, Admiral, for the sake of the record dispatch from Tokyo to Washington, December 6, 1941, advised that the [402] Japanese had deliberated on the American proposal of the 26th of November and had drawn up a memorandum for the United States which would be in a separate message of fourteen parts?

Vice Admiral WILKINSON. Yes.

Mr. SONNETT. And also directed that the long message to the United States should be presented at a time to be specified in a separate message, is that correct?

Vice Admiral WILKINSON. Yes.

Mr. SONNETT. And the second, a dispatch from Tokyo to Washington, December 6, 1941, consists of the fourteen parts of the Japanese reply, does it not?

Vice Admiral WILKINSON. Yes. As I recall, the date is the Longitude date and the first thirteen parts were available to us on the date of December 6th, and the fourteenth part not till the morning of December 7th.

Mr. SONNETT. Admiral, I also show you document 41 of exhibit of the Naval Court of Inquiry record, a message from Tokyo to Washington, December 7, 1941, directing the Japanese Ambassador to submit to the United States Government the Japanese reply to the United States at 1 p. m. on the 7th, Washington time. Do you recall having seen that message?

Vice Admiral WILKINSON. I do not recall having seen it, but I heard it mentioned on the 7th.

Mr. SONNETT. Do you recall, Admiral, any discussion on December 7th concerning the significance of the time set for delivery of the Japanese reply, namely, 1 p. m. Washington time, and the relation of that time to times at Pearl Harbor and in the Far East?

Vice Admiral WILKINSON. I recall the discussion of the relationship [403] between the times, but whether that discussion was before or after the actual attack I do not at this moment recall.

Mr. SONNETT. Can you state, Admiral, who participated in the discussion and what was said?

Vice Admiral WILKINSON. Perhaps I had better mention the discussion of the fourteenth part. On arriving at the Office of Naval Intelligence shortly after 8 o'clock on the morning of Sunday, December 7th, I saw the fourteenth part and went to the office of the Chief of Naval Operations, where, as I recall, Admiral Stark, Admiral Ingersoll, and Admiral Turner were present. There was a discussion of the tone of the fourteenth part presaged, if not actually promising early overt acts, which still, to our best knowledge and indications, would be directed against Thailand and the Malay Peninsula and possibly the Philippines. As I recall, Admiral Stark said he would confer at once with General Marshall. At that time the 1 o'clock message may have been in hand, but I do not believe so and I do not recall now having heard it discussed until after the actual attack. At which time, in answer to the question, the discussion may have been with Commander McCollum or almost any one on the basis of

menting upon the fact that the two times apparently had been simultaneous.

Mr. SONNETT. Admiral, I show you exhibit 15 and exhibit 17 of the Naval Court of Inquiry and ask you whether you recall having seen those dispatches at or about the dates they bear.

Vice Admiral WILKINSON. I do not recall having seen either. They were apparently prepared by the War Plans Section, Op-12. The second I knew had been sent in substance; the first I don't remember.

Mr. SONNETT. The second is the so-called war warning, is it not?

Vice Admiral WILKINSON. Yes.

[404] Mr. SONNETT. What, if any, discussion, Admiral, was there on the morning of December 7, 1941, concerning the necessity or advisability of informing Admiral Kimmel or other fleet commanders of the prospective 1 p. m. delivery of the Japanese reply?

Vice Admiral WILKINSON. I don't remember a discussion of the 1 p. m. delivery. I remember a discussion of the immediate transmission of the status of negotiations indicated by the receipt of the fourteenth part, and my impression at the time was that Admiral Stark was to confer immediately with General Marshall for a joint decision as to notifying the Army and Navy forces in Hawaii and in the Far East.

Mr. SONNETT. Do you know what, if anything, was done after Admiral Stark and General Marshall conferred on that point?

Vice Admiral WILKINSON. Only by hearsay.

Mr. SONNETT. Admiral, on December 7, 1941, what telephonic connections existed between the Navy Department and the Commander-in-Chief of the Pacific Fleet?

Vice Admiral WILKINSON. I don't know. It was in the province of Communications.

Mr. SONNETT. Did you know at that time whether or not either the Navy or the Army had a so-called scrambler telephone?

Vice Admiral WILKINSON. My impression is the Army had one. I am not sure.

Mr. SONNETT. Was any consideration given at that time, namely, December 7, 1941, to the necessity or advisability of telephoning to the Commander-in-Chief of the Pacific Fleet or to other fleet commanders concerning the delivery of the Japanese reply?

[405] Vice Admiral WILKINSON. I don't know, but my recollection is that Admiral Stark was to confer immediately with General Marshall with the view of getting the information and presumably a warning out by the fastest means of communication that were then available.

Mr. SONNETT. I show you document 14, document 15, and document 24 of exhibit 13 of this investigation, which are intercepted Japanese communications between Honolulu and Tokyo, and ask whether you recall having seen those prior to December 7, 1941, or thereafter, and, if so, when.

Vice Admiral WILKINSON. I do not recall seeing these specifically, but I am certain that I did not see them before December 7th.

Mr. SONNETT. Admiral, in the interest of clarity of the record, could we have these three dispatches copied into the record at this point?

Admiral HEWITT. Yes.

(The dispatches referred to follow as pages 405A, 405B, and 405C.)

238 CONGRESSIONAL INVESTIGATION PEARL HARBOR ATTACK

#253 Re the last part of your #123.<sup>a</sup>

1. On the American Continent in October the Army began training barrage balloon troops at Camp Davis, North Carolina. Not only have they ordered five or five hundred balloons, but it is understood that they are considering the use of these balloons in the defense of Hawaii and Panama. In so far as Hawaii is concerned, though investigations have been made in the neighborhood of Pearl Harbor, they have not set up mooring equipment, nor have they selected troops to man them. Furthermore, there is no indication that any training in the maintenance of balloons is being undertaken. At the present time there are no signs of barrage balloon equipment. In addition, it is difficult to imagine that they have actually any. However, even though they have actually made preparations, because they must control the air over the water and land runways of the airports in the vicinity of Pearl Harbor, Hickam, Ford and Ewa,<sup>b</sup> there are limits to the balloon defense of Pearl Harbor. I imagine that in all probability there is considerable opportunity left to take advantage for a surprise attack against these places.

2. In my opinion the battleships do not have torpedo nets. The details are not known. I will report the results of my investigation.

1. On the evening of the 5th, among the battleships which entered Pearl Harbor were ——— and one submarine tender. The following ships were observed at anchor on the 6th:

9 battleships, 3 light cruisers, 3 submarine tenders, 17 destroyers, and in addition there were 4 light cruisers, 2 destroyers lying at docks (the heavy cruisers and airplane carriers have all left).

2. It appears that no air reconnaissance is being conducted by the fleet air arm.

#123 (Secret outside the department)

In view of the present situation, the presence in port of warships, aircraft carriers, and cruisers is of utmost importance. Hereafter, to the utmost of your ability, let me know day by day. Wire me in each case whether or not there are any observation balloons above Pearl Harbor or if there are any indications

they will be sent up. Also advise me whether or not the warships are provided with anti-mine nets.

NOTE: This message was received here on December 23.

BEN HAROLD,  
Ships Clerk, USNR.

[406] Mr. SONNETT. Admiral, these three dispatches indicate specific Japanese interest in the preparations for defense of Oahu against air attack, do they not?

Vice Admiral WILKINSON. Yes.

Mr. SONNETT. And it appears that they were translated by the Army after the attack, although they were dated prior to the attack?

Vice Admiral WILKINSON. On the fact of them the note as to the date of translation would so indicate it.

Mr. SONNETT. Admiral, do you know what the explanation may be for the delay in translating these messages?

Vice Admiral WILKINSON. No. Possibly circuit delays in the original coded text reaching Washington. Possibly a jam in the decoding office, caused perhaps by the long diplomatic message which was then being decoded about December 6th.

Mr. SONNETT. Do you recall, Admiral, that prior to this time there were other messages available in Washington showing that the Japanese were interested specifically in the location and movements of American ships in Pearl Harbor?

Vice Admiral WILKINSON. No, not prior to that time.

Mr. SONNETT. May I call your attention, Admiral, to documents 1, 2, 3, 7, 9, and 10 of exhibit 13 and ask whether they refresh your recollection on that point?

Vice Admiral WILKINSON. The first three of these I do not recall and they were apparently dated and translated before my taking over the office. Number 7, dated November 20th and translated December 4th, requesting an investigation of the fleet bases, I should have seen but do not now recall. The same applies to number 9, dated November 18th, [407] translated December 5th, requesting data as to vessels anchored in a certain area in Pearl Harbor and in Manila Bay. Number 10, dated November 18th and noted as translated on December 6th, giving specific information about movements of ships, I am sure I did not see before December 7th and I do not recall having seen it thereafter. The remainder were translated after the attack.

Mr. SONNETT. Was it your belief, Admiral, prior to the attack on December 7, 1941, that the Japanese agents in or around Pearl Harbor were interested in United States ships in the harbor?

Vice Admiral WILKINSON. I believe they were and I believe they were reporting them, but my belief was that they were concerned in the presence of the fleet with a view to its availability for distant operations rather than its susceptibility as a target.

Mr. SONNETT. Admiral, I call your attention to document 11 of exhibit 63 of the Naval Court of Inquiry and document 14 and ask whether you recall having seen those documents,

Vice Admiral WILKINSON. Yes, I believe I recall them both.

Mr. SONNETT. Those messages, Admiral, indicated that the Japanese had established deadlines beyond which there would be no further diplomatic negotiation with the United States, did they not?

Vice Admiral WILKINSON. Yes.

Mr. SONNETT. And referring, Admiral, particularly to the message of November 22, 1941, from Tokyo to Washington, translated on the same date, it indicated that Tokyo had fixed the 29th of November as a deadline and that that deadline absolutely could not be changed after that things were automatically going to happen, did it not?

Vice Admiral WILKINSON. Yes.

[408] Mr. SONNETT. Referring, Admiral, to document 18 of exhibit 63 of the Naval Court record, a message from Tokyo to Washington dated November 28, 1941, translated November 28, 1941, do you recall having seen that at or about that time?

Vice Admiral WILKINSON. Yes.

Mr. SONNETT. Admiral, that message indicated, did it not, that Tokyo regarded the November 26th note of the United States as a humiliating proposal?

Vice Admiral WILKINSON. Yes.

Mr. SONNETT. And that with a report of the views of the Imperial Government on this American proposal, the negotiations would *de facto* ruptured, but that Tokyo wanted them to be careful to avoid giving the impression that negotiations were broken off?

Vice Admiral WILKINSON. Yes.

Mr. SONNETT. Admiral, what consideration was given to the question of the necessity or desirability of sending to Admiral Kimbrell copies of these various Japanese messages which were intercepted?

Vice Admiral WILKINSON. I don't know. That was in the province of the Chief of Operations. As I have said, there was great reluctance to disseminate the knowledge of our code-breaking activities.

Mr. SONNETT. Admiral, will you please state what the arrangements were for the exchange of intelligence with the Army?

Vice Admiral WILKINSON. There was a complete liaison between the decrypting agencies and complete exchange of actual texts immediately after their transcription into a smooth copy. The two Far Eastern Sections of Naval Intelligence and Military Intelligence were in daily and, in fact, hourly contact by telephone and by frequent exchange of visits. The head [409] of Military Intelligence, General Miles, was in constant telephonic and other contact with me and, in fact, he was at dinner at my house when the first thirteen parts of the diplomatic message were brought to us at approximately 11:30 the night of December 6th, at which time we both ascertained that they had been shown to higher authorities in our two Departments.

Mr. SONNETT. Admiral, what information concerning the location or movements of the Japanese fleet was furnished by the Navy to the Army?

Vice Admiral WILKINSON. Why, I think everything we had, this process of interchange between the two Far Eastern Sections. I know that we got information that they picked up with respect to Japanese Army movements and activities and, of course, from time to time some of our agents would report something having

do with the Japanese Army and some of theirs something concerning the Japanese Navy, but all information was constantly interchanged.

Mr. SONNETT. Admiral, do you recall whether or not any information of significance came to your attention prior to December 7, 1941, which had been obtained from either tapping the telephone wires of the Japanese in Honolulu or from interception of their cable messages here?

Vice Admiral WILKINSON. No. Shortly after the attack we got word of the so-called "flower" telephone message, and I know that the local intelligence representative, the District Intelligence Officer, had endeavored to obtain copies of cable messages, but had been denied them because of the United States law concerning the integrity of civil communication.

Mr. SONNETT. You do not know, Admiral, then, whether or not, in fact, any copies of Japanese cable messages were secured at Honolulu prior [410] to December 7th?

Vice Admiral WILKINSON. I do not believe there were.

Mr. SONNETT. I have nothing further, Admiral.

Admiral HEWITT. I don't think I have anything further. Thank you very much.

Vice Admiral WILKINSON. I don't think I have anything to add.

Admiral HEWITT. Do you have anything to add? I would be glad to have you do it.

Vice Admiral WILKINSON. No.

Admiral HEWITT. That is all.

(The witness was excused.)

(The investigation was then, at 11:35 a. m., adjourned until 10 a. m.. 6 June 1945.)

\_\_\_\_\_

[411] PROCEEDINGS OF THE HEWITT INQUIRY

SIXTEENTH DAY

Pursuant to notice, the investigation met at the Visiting Flag Officer's Office, Headquarters, Commander-in-Chief, U. S. Pacific Fleet and Pacific Ocean Areas, Pearl Harbor, Oahu, T. H., at 10 a. m., Wednesday, 6 June 1945.

Present: Admiral H. Kent Hewitt, USN; Mr. John F. Sonnett; Lieutenant Commander Benjamin H. Griswold, USNR; Lieutenant John Ford Baecher, USNR; and Ship's Clerk Ben Harold, USNR.

A witness entered, read the precept, and was duly sworn.

Mr. SONNETT. State your name, sir.

Mr. STREET. George Street.

Mr. SONNETT. What is your occupation, Mr. Street?

Mr. STREET. District Manager, RCA Communications, Incorporated.

Mr. SONNETT. For how long have you been employed by RCA in Honolulu?

Mr. STREET. I have been with the company for over twenty-five years and have been in my present position for almost ten years.

Mr. SONNETT. During 1941, Mr. Street, did you know the District Intelligence Officer, Fourteenth Naval District, Captain Mayfield?

Mr. STREET. I did.

Mr. SONNETT. Do you recall that on or about the first week of December, 1941, certain messages were, at the request of the Navy, turned over by you to Captain Mayfield?

Mr. STREET. I do recall, yes.

Mr. SONNETT. Were those messages of the Japanese Consul sent from [412] Honolulu?

Mr. STREET. Yes, there were several.

Mr. SONNETT. Do you have any record, Mr. Street, of the messages which were turned over at that time to Naval Intelligence?

Mr. STREET. Not now. They were legally destroyed.

Mr. SONNETT. Does your company have at any place copies of those messages?

Mr. STREET. To the best of my knowledge and belief, copies of all messages transmitted to and from Honolulu will be in the files of our company at 28 Geary Street, San Francisco.

Mr. SONNETT. I take it, Mr. Street, that when you said copies of the messages had been destroyed, you mean they had been destroyed locally in the Honolulu office?

Mr. STREET. Locally, yes.

Mr. SONNETT. Pursuant to the authority of the Federal Communications Commission?

Mr. STREET. Yes, pursuant to the regulations of the Federal Communications Commission. It was simply a matter of my lack of storage space.

Mr. SONNETT. Do you recall, Mr. Street, whether or not, to the best of your recollection, all messages sent by the Japanese Consulate during the first week of December, 1941, were turned over to Naval Intelligence?

Mr. STREET. They were.

Admiral HEWITT. Do you have anything to add, Mr. Street?

Mr. STREET. Here are three copies of press messages filed from Honolulu on December 4th and 5th which I do not recall were given to Captain Mayfield previously.

[413] Mr. SONNETT. Can you identify the senders of each of those messages?

Mr. STREET. The message of December 4th, addressed Yomiuri Tokyo, was filed by Mrs. M. Mori, Correspondent. The two messages of December 5th, addressed Asahi, Tokyo, were filed by Mr. Onoder Correspondent.

Mr. SONNETT. I have nothing further, Admiral, for Mr. Street.

Admiral HEWITT. I have nothing further. Thank you very much.

(The witness was excused.)

(The investigation was then, at 10:20 a. m., adjourned until 9:30 a. m., 7 June 1945.)

[414] PROCEEDINGS OF THE HEWITT INQUIRY

SEVENTEENTH DAY

Pursuant to notice, the investigation met at the Visiting Flag Officer's Office, Headquarters, Commander-in-Chief, U. S. Pacific Fleet and Pacific Ocean Areas, at 9:35 a. m., Thursday, 7 June 1945.

Present: Admiral H. Kent Hewitt, USN; Mr. John F. Sonnett; Lieutenant Commander Benjamin H. Griswold, USNR; Lieutenant John Ford Baecher, USNR; and Ship's Clerk Ben Harold, USNR.

A witness entered, read the precept, and was duly sworn.

Mr. SONNETT. State your name and rate.

Radioman HUMPHREY. Richard W. Humphrey, radioman third class, USNR.

Mr. SONNETT. On December 7, 1941, you were on duty at the radio station at Bishop's Point, Oahu, were you not?

Radioman HUMPHREY. I was.

Mr. SONNETT. Under whose jurisdiction did that station come?

Radioman HUMPHREY. At that time it came under the jurisdiction of the Commander, Inshore Patrol.

Mr. SONNETT. Were you acquainted with one C. E. Gibson?

Radioman HUMPHREY. I was.

Mr. SONNETT. And also one R. B. Moyle?

Radioman HUMPHREY. I was.

Mr. SONNETT. Can you state where, to the best of your knowledge, they are now located?

Radioman HUMPHREY. To the best of my knowledge, Moyle was last known to be on a train in Florida as a shore patrolman and Gibson was a flag radioman aboard an LST.

[415] Mr. SONNETT. Who was the duty officer on December 7, 1941, at that station?

Radioman HUMPHREY. The duty officer was Lieutenant Commander A. E. Kilhefner.

Mr. SONNETT. And do you know where he is now located?

Radioman HUMPHREY. To the best of my knowledge, he is now located at a naval air station in Brazil.

Mr. SONNETT. At what time did you come on duty on December 7, 1941?

Radioman HUMPHREY. I came on duty approximately ten minutes until 8 o'clock.

Mr. SONNETT. In the morning?

Radioman HUMPHREY. In the morning, yes, sir.

Mr. SONNETT. I show you exhibit 18 of this investigation, which is a copy of the radio log of the station for December 7, 1941, consisting of two pages, and note on the reverse side of each page a certification of that log by you, is that correct?

Radioman HUMPHREY. That is correct. I certified that this is a copy of the log that we kept at the Section Base.

Mr. SONNETT. Now, the log has at the left-hand side times from 1445 to 1830. Those are Greenwich times, are they not?

Radioman HUMPHREY. They are. That is Greenwich Civil Time.

Mr. SONNETT. And that would be comparable to 0415 to 0800, local Pearl Harbor time?

Radioman HUMPHREY. That is correct.

Mr. SONNETT. Referring to the entries in the log from 1445, Greenwich time, to 1508, Greenwich time, that would be from 0415 to 0438 [416] would it not, Pearl Harbor time?

Radioman HUMPHREY. That is right.

Mr. SONNETT. And do you find there a record of a conversation between the WARD and the CONDOR?

Radioman HUMPHREY. I do.

Mr. SONNETT. Now, in substance, will you state what that conversation was?

Radioman HUMPHREY. In substance, it is a conversation between the two ships, trying to determine the position of a submarine operating in a restricted area.

Mr. SONNETT. Is there any indication that that conversation was addressed to your station or to the Inshore Patrol or to any one else for action?

Radioman HUMPHREY. No, there is no indication of any such thing. It is purely a conversation between the two ships.

Mr. SONNETT. In the event that your station had taken any action by way of reporting that conversation to the Inshore Patrol by radio would that have appeared subsequently in the log?

Radioman HUMPHREY. Had we relayed this conversation to the Inshore Patrol by radio on this frequency, it would have appeared in this log.

Mr. SONNETT. And you find no record of such action in the log?

Radioman HUMPHREY. No such entry in the log.

Mr. SONNETT. Referring to page 2 of the log, there is a report, is there not, by the WARD of having attacked a submarine?

Radioman HUMPHREY. There is.

Mr. SONNETT. At what time, both Greenwich and local, was that report logged?

[417] Radioman HUMPHREY. That is 1721, Greenwich time, and the message was transmitted again at 1723, Greenwich time, which makes it 0653, local time.

Mr. SONNETT. And that message was addressed by the WARD to whom?

Radioman HUMPHREY. That was addressed by the WARD to Commander, Inshore Patrol.

Mr. SONNETT. I have nothing further, Admiral.

Admiral HEWITT. I have nothing. Thank you very much.

(The witness was excused.)

(A brief recess was taken.)

[418] A witness entered, read the precept, and was duly sworn.

Mr. SONNETT. State your name and rank.

Captain DYER. Thomas H. Dyer, Captain, USN.

Mr. SONNETT. What is your present assignment, Captain?

Captain DYER. I am Officer in Charge of the Cryptanalytical and Decrypting Section, Fleet Radio Unit, U. S. Pacific Fleet Radio Unit.

Mr. SONNETT. In December, 1941, were you associated with that unit or its predecessor?

Captain DYER. I have been associated with that unit and its predecessor since 2 July, 1936.

Mr. SONNETT. Who else, Captain, besides yourself was engaged in decryption work at that unit during December, 1941?

Captain DYER. Lieutenant Commander Wesley A. Wright, USN, was my principal assistant; Chief Yeoman Arnold M. Conant, Chief Radioman Woodward—I will have to look up his initials for you—several other enlisted personnel and several Reserve officers who had recently reported for duty and were under training, whose names I do not now recall.

Mr. SONNETT. Commander Wright is now at Bainbridge Island, is he not, Captain?

Captain DYER. I have been so informed.

Mr. SONNETT. And I think you also told me that you had been informed that Woodward is now in Washington?

Captain DYER. That is correct.

Mr. SONNETT. Washington, D. C.?

Captain DYER. Washington, D. C.

Mr. SONNETT. Do you recall where Conant is?

Captain DYER. He is also in Washington, D. C.

[479] Mr. SONNETT. Who was engaged principally in the translation of the decrypted communications in that unit in December, 1941, Captain?

Captain DYER. Captain A. B. Laswell, U. S. Marine Corps, and Lieutenant Commander R. Fullenwider were the principal translators.

Mr. SONNETT. The entire unit, Captain, was under the command of now Captain Rochefort, was it not?

Captain DYER. That is correct.

Mr. SONNETT. There has been testimony, Captain, in previous investigations that during the first week of December, 1941, certain communications of the Japanese Consul were delivered to ONI and by ONI to your unit for decryption and translation. Were you aware of that at the time?

Captain DYER. The only Japanese communications of which I am personally aware were received subsequent to the attack on Pearl Harbor and were decrypted and translated during the ensuing week.

Mr. SONNETT. Do you know, Captain, whether at any time prior to December 7, 1941, cable messages to or from the Japanese Consul at Honolulu were received by the Navy?

Captain DYER. Not to my knowledge.

Mr. SONNETT. And I take it that the first time you ever saw a translation of such a message was after December 7, 1941?

Captain DYER. Was either the 9th or the 10th of December.

Mr. SONNETT. I show you exhibit 29 of this investigation, Captain, which consists of various translations of Japanese messages supplied by Captain Layton, and for your information state that he testified before Admiral Hewitt that he received those on or about December 10th from Captain Rochefort. Do you recall having seen those at or about that time?

Captain DYER. I can definitely recall some of the items and I [420] reasonably sure I saw all of them at about that time.

Mr. SONNETT. I show you exhibit 40 of this investigation, Captain, which consists of two investigation reports made by ONI at Honolulu, the second of which is dated 14 February 1942, by Lieutenant Stevenson, and which sets forth various messages in translated form, which, according to the report, were learned in their translated form on December 1941, and ask you whether you recall having seen these messages at or about that time, namely, December 11, 1941.

Captain DYER. I am sure I saw some of the messages at about that time.

Mr. SONNETT. Captain, do you have a file with you of decrypting and translations of Japanese messages?

Captain DYER. I do have a file of certain Japanese diplomatic translations. Here it is.

Mr. SONNETT. May we mark this, Admiral, as an exhibit with understanding that the Captain is going to photostat today the beginning of it up to the point indicated by the paper clip and let us have that to take with us tomorrow and will photostat the balance and send it to you at Washington?

Admiral HEWITT. Yes.

Mr. SONNETT. The beginning of the file contains various of messages referred to in the ONI report and also some of the messages set forth in exhibit 29 which Captain Layton supplied.

Admiral HEWITT. All right.

(The file referred to was received and marked "Exhibit 41.")

Mr. SONNETT. For the sake of the record, Captain, and as illustration I take it, of the other translations and decryptations, will you refer to the [421] pencilled translation of a message dated 6 December 1941, bearing number 02530, and state whether that is a translation of one of the Japanese messages to which you referred?

Captain DYER. It is.

Mr. SONNETT. That translation bears the symbol, Captain, H. Would you state what that indicates?

Captain DYER. That is the designation for one of the many Japanese diplomatic systems and indicates the type of cipher.

Mr. SONNETT. Captain, I show you a sheet of paper containing various letters and ask you if you can state what that is.

Captain DYER. This paper represents a portion of the decrypting process which was applied to the message you just showed me.

Mr. SONNETT. May we mark that as an exhibit, Admiral?

Admiral HEWITT. Yes.

(The paper referred to was received and marked "Exhibit 42.")

Mr. SONNETT. Captain, would you similarly photostat this afternoon exhibit 42 so that we may take a photostat and return the original as an exhibit?

Captain DYER. I will.

Mr. SONNETT. And would you, Captain, while we are thinking of it, annex to both exhibit 41 and to exhibit 42 a certificate stating that the photostats you supply are correct photostats of the original from which you have?

Captain DYER. Yes.

Mr. SONNETT. The PA code then, Captain, was a code which required decryption first into plain Japanese and then translation into English [422] from the Japanese?

Captain DYER. That is correct.

Mr. SONNETT. Can you state who did the decryption and translation of this message?

Captain DYER. I am practically certain that the decryption was done by Chief Radioman Woodward. I do not recognize the handwriting and have no way of identifying the translation.

Mr. SONNETT. The decryption in question, Captain, appears in the file, I take it, in written out form immediately behind the translation into English to which we have been referring?

Captain DYER. That is true in the majority of cases.

Mr. SONNETT. Captain, do you have any other file or, to your knowledge, is there any other file in the unit here containing decryptions or translations of Japanese messages which were sent prior to 7 December 1941?

Captain DYER. I believe there is no other file in existence, to the best of my knowledge.

Mr. SONNETT. I have nothing further, Admiral.

Admiral HEWITT. All right. I have nothing further. Thank you very much.

[423] (The witness was excused.)

(The investigation was then, at 11:50 a. m., adjourned until 9:45 a. m., Friday, 8 June 1945.)

[424] PROCEEDINGS OF THE HEWITT INQUIRY

EIGHTEENTH DAY

Pursuant to notice, the investigation met at the Visiting Flag Officer's Office, Headquarters, Commander-in-Chief, U. S. Pacific Fleet and Pacific Ocean Areas, Pearl Harbor, Oahu, T. H., at 9:45 a. m., Friday 8 June 1945.

Present: Admiral H. Kent Hewitt, USN; Mr. John F. Sonnett; Lieutenant Commander Benjamin H. Griswold, USNR; Lieutenant John Ford Baecher, USNR; and Ship's Clerk Ben Harold, USNR.

A witness entered, read the precept, and was duly sworn.

Mr. SONNETT. State your name and rank.

Captain FINNEGAN. Joseph Finnegan, Captain, USN.

Mr. SONNETT. What is your present assignment, Captain?

Captain FINNEGAN. Attached to the Fleet Radio Unit, Pacific Fleet.

Mr. SONNETT. When did you first become attached to the fleet radio unit?

Captain FINNEGAN. Under regular orders on the 15th of February, '42.

Mr. SONNETT. And had you previously reported to that unit under verbal orders?

Captain FINNEGAN. On either the 9th or the 10th of December, 1941, under verbal orders of Admiral Kimmel, I reported there for temporary duty.

Mr. SONNETT. Prior to that time what was your assignment, Captain?

Captain FINNEGAN. Aide and Flag Lieutenant to Rear Admiral David W. Bagley, Commander Battleship Division Two, USS TENNESSEE.

Mr. SONNETT. You are a translator of Japanese, Captain, are you not?

Captain FINNEGAN. Yes.

[425] Mr. SONNETT. Will you state what your training and experience have been in the translation of Japanese?

Captain FINNEGAN. I took the regular Japanese language course, attached to the American Embassy in Tokyo, 1934 to 1937, followed by fourteen months of work in radio intelligence.

Mr. SONNETT. Captain, I show you exhibit 41 of this investigation, which contains twenty-eight pages of Japanese language and work sheets and translations supplied by Captain Dyer of the fleet radio unit, and ask you whether you can identify any of the handwriting in that exhibit as your own.

Captain FINNEGAN. Pages 7 and 8 and 22.

Mr. SONNETT. Page 22, Captain, is a translation of a message, is it not, dated 3 December 1941 from *Kita*? Would you state for the record what your translation of that message was?

Captain FINNEGAN. "WYOMING and two seaplane tenders departed the third."

Mr. SONNETT. Pages 7 and 8, Captain, which you identified, constitute a translation of a message from *Kita* to Tokyo, dated 6 December 1941, bearing number 02530, does it not?

Captain FINNEGAN. It does.

Mr. SONNETT. Is it correct, Captain, that the translation of the 6 of December message, pages 7 and 8, is a translation of the handwritten message appearing on page 9 of the exhibit?

Captain FINNEGAN. It is.

Mr. SONNETT. Captain, I refer you to document 14 of exhibit of this investigation, which appears to be an Army translation of the same message, does it not?

Captain FINNEGAN. It is a translation of the same message and it is marked Army.

Mr. SONNETT. And it bears a translation date indicating translation by the Army on December 8, 1941?

Captain FINNEGAN. It does.

[426] Mr. SONNETT. I call your attention, Captain, to the last sentence in paragraph 1 of the Army translation, which reads as follows: "I imagine that in all probability there is considerable opportunity left to take advantage for a surprise attack against the places," and I refer you also to the last sentence of the first paragraph of your translation, page 7 of exhibit 41, reading: "The whole matter seems to have been dropped."

I further invite your attention to the Japanese language message on page 9 of exhibit 41, and ask you to reexamine it and to state whether your translation or the Army translation is correct as to the sentence to which I have directed your attention.

Captain FINNEGAN. Without hesitation, I believe that the Army translation is correct. The position of the sentences doesn't mean anything. You can't compare the last sentence with the last sentence. The last part of the rough work sheet, that is, pages 9 and 10, is fairly garbled or missing groups, but it is quite easy and very logical to fill in the missing groups in garbles, and I would say without hesitation that the Army translation is most probable and probably correct.

Mr. SONNETT. How long had you been away from Japanese, Captain, prior to the time when you translated this message?

Captain FINNEGAN. A little more than three years.

Mr. SONNETT. Captain, when did you translate this message?

Captain FINNEGAN. I don't remember the exact date. It was probably the 10th, but certainly not before the 9th of December, 1941.

[427] Mr. SONNETT. Did you translate any Japanese messages at Pearl Harbor prior to December 7, 1941?

Captain FINNEGAN. No, I didn't even enter the combat intelligence office.

Mr. SONNETT. Do you know of any translation of any of the Japanese consular messages by anybody else prior to December 7, 1941?

Captain FINNEGAN. I do not recognize any of the messages in the file as having been made before that time and it is my distinct impression that all of these were received about the same time and translated if not on one day, within two days of pages 7 and 8, within a period of forty-eight hours, I would say.

Mr. SONNETT. I have nothing further, Admiral.

Admiral HEWITT. All right. Thank you very much.

(The witness was excused.)

[428] A witness entered, read the precept, and was duly sworn.

Mr. SONNETT. State your name and rank.

Lieut. Comdr. HUBBELL. Monroe Harmon Hubbell, Lieutenant Commander, UNSR.

Mr. SONNETT. What is your present assignment, Commander?

Lieut. Comdr. HUBBELL. At present I am Officer in Charge, Distribution Section, Officer Division, Naval Personnel Office, Pacific.

Mr. SONNETT. What were your duties on December 7, 1941?

Lieut. Comdr. HUBBELL. I was Commanding Officer of the USS CONDOR, AMC-14.

Mr. SONNETT. On the morning of December 7, 1941, were you engaged in sweeping off the mouth of Pearl Harbor?

Lieut. Comdr. HUBBELL. We were.

Mr. SONNETT. Do you recall a blinker signal to the USS WARD given by you that morning?

Lieut. Comdr. HUBBELL. I do.

Mr. SONNETT. At about what time was it?

Lieut. Comdr. HUBBELL. At approximately 0350.

Mr. SONNETT. What was the substance of the message you sent to the WARD at that time?

Lieut. Comdr. HUBBELL. It was indicated to the WARD that we had sighted what appeared to be a periscope of a submarine.

Mr. SONNETT. Did you subsequently have a radio conversation on the TBS with the WARD?

Lieut. Comdr. HUBBELL. I did.

Mr. SONNETT. I show you exhibit 18 of this investigation and ask if you find there recorded the radio conversation which you had with the WARD [429] that morning.

Lieut. Comdr. HUBBELL. That is the substance, to the best of my recollection now.

Mr. SONNETT. And will you state for the benefit of the record the substance of your radio conversation and the time at which it took place?

Lieut. Comdr. HUBBELL. It was at approximately 0415 and it had to do with an inquiry from the WARD as to the location and course of the submarine that we had sighted.

Mr. SONNETT. What did you advise the WARD as to the location and course of the submarine?

Lieut. Comdr. HUBBELL. As I remember, it is substantially what is stated here, that we gave them the course that we were steering at the time and indicated that at the time the periscope was sighted, that it was not a positive identification, but under the conditions of visibility, it appeared that the course was approximately the same as ours and that shortly thereafter the course of the submarine changed abruptly and our own course changed rather abruptly. At the time the periscope was sighted, it appeared to be heading directly for the entrance buoys.

Mr. SONNETT. Other than your report to the USS WARD, did you make any report of this incident to the inshore patrol or any one else?

Lieut. Comdr. HUBBELL. No. The identification at that time was not positive enough to consider making a report to other than the Senior Officer Present Afloat there.

Mr. SONNETT. Who was the Commanding Officer of the WARD take it?

Lieut. Comdr. HUBBELL. That is right.

Mr. SONNETT. Admiral, we have a certified copy of the Pearl Harbor Navy Yard Duty Officers' information sheets, particularly as of December 6, 1941. [430] I think this might be a good point to receive it as an exhibit for the record if that meets with your approval.

Admiral HEWITT. Yes.

(The document referred to was received and marked "Exhibit 43.")

Mr. SONNETT. May we note for the record, Admiral, that exhibit provides in part: "The anti-torpedo net will be closed from sunset to sunrise. To be opened and closed only upon orders from the Captain of the Yard, the Assistant Captain of the Yard, or the Yard Duty Officer"?

Commander, at my request you have endeavored to find out, have you not, at what time sunrise occurred at Pearl Harbor on December 7, 1941?

Lieut. Comdr. HUBBELL. That is correct.

Mr. SONNETT. And what information did you receive on that?

Lieut. Comdr. HUBBELL. The word received was that sunrise was approximately 0727. That is within a few minutes of the actual time.

Mr. SONNETT. We also have, Admiral, a certified extract from the signal log of the USS YNG-17?

Commander, what was the USS YNG-17?

Lieut. Comdr. HUBBELL. That was the gate vessel at the entrance to Pearl Harbor.

Mr. SONNETT. May we receive this, Admiral, at this point?

Admiral HEWITT. Yes.

(The document referred to was received and marked "Exhibit 44.")

Mr. SONNETT. We also have, Admiral, a certified extract of the quartermaster's log of the USS YNG-17 for the same dates. May we receive that also as an exhibit?

[431] Admiral HEWITT. Yes.

(The document referred to was received and marked "Exhibit 45.")

Mr. SONNETT. Directing your attention to exhibit 45 and to the entries for December 7, 1941, commencing at 0232, Commander, would you read those into the record for the sake of clarity? Then I wish to ask you a question about that.

Lieut. Comdr. HUBBELL. (Reading.)

0232 Gate closed.  
0447 Commenced opening gate.  
0458 Gate opened. White lights.  
0508 CROSSBILL stood in.  
0532 CONDOR stood in.  
0618 Hoisted ball.

Mr. SONNETT. The entries in the log, I take it, Commander, or to your entering after the CROSSBILL at or about 0532 on December 7, 1941, are in accord with your own log and recollection substantially.

Lieut. Comdr. HUBBELL. That is correct.

Mr. SONNETT. And that is Honolulu time?

Lieut. Comdr. HUBBELL. That is correct.

Mr. SONNETT. What is the meaning of the entry at 0618 after you stood in "hoisted ball"?

Lieut. Comdr. HUBBELL. To my present recollection, that indicated that the gate was open.

Mr. SONNETT. It appears that the next entry on the log is "0800 Japanese air raid." When does it appear that the gate was closed from that log, Commander?

[432] Lieut. Comdr. HUBBELL. The log indicates that the gate was closed at 0846.

Mr. SONNETT. Referring to the entry in exhibit 45, Commander, indicating that at 0532 on December 7, 1941, the CONDOR stood in to Pearl Harbor, can you recall what the conditions of visibility were at that time?

Lieut. Comdr. HUBBELL. To the best of my knowledge, they were very good. They were approaching daylight conditions.

Mr. SONNETT. We have one more certified extract of the log, Admiral, which is an extract from the log of the signal tower at the Navy Yard, which, if you approve, we should receive at this point.

Admiral HEWITT. Yes.

(The document referred to was received and marked "Exhibit 46.")

Mr. SONNETT. May we note, Admiral, for the record at this point that exhibit 46, the log of the signal tower, has an entry at 2250 on December 6, 1941, that the LITCHFIELD cleared and the gate was closed, and that the next entry is 0600, December 7th? There apparently were no entries kept during the morning of December 7, 1941, up to 0600.

I have nothing further, Admiral.

Admiral HEWITT. All right. Thank you very much.

(The witness was excused.)

(The investigation then, at 10:12 a. m., adjourned until 3 p. m., Saturday, 9 June 1945, to meet at San Francisco.)

[433] PROCEEDINGS OF THE HEWITT INQUIRY

NINETEENTH DAY

Pursuant to notice, the investigation met at the Office of the Commander Western Sea Frontier, Federal Building, San Francisco, California, at 3 p. m., Saturday, 9 June 1945.

Present: Admiral H. Kent Hewitt, USN; Mr. John F. Sonnett; Lieutenant Commander Benjamin H. Griswold, USNR; Lieutenant John Ford Baecher, USNR; and Ship's Clerk Ben Harold, USNR.

A witness entered, read the precept, and was duly sworn.

Mr. SONNETT. State your name and rank.

Lieut. Comdr. MURRAY. Allan A. Murray, Lieutenant Commander, USNR.

Mr. SONNETT. Commander, what is your present assignment?

Lieut. Comdr. MURRAY. Well, I am on the Staff of the Military Government Staging and Holding Area, Monterey, California.

Mr. SONNETT. What were your duties during December, 1941?

Lieut. Comdr. MURRAY. I was one of four watch officers who stood a twenty-four hour round-the-clock watch on the wires coming in which brought in all of the messages, and so forth, that were handed to us for working over.

Mr. SONNETT. In what section, Commander?

Lieut. Comdr. MURRAY. Op-20-G.

Mr. SONNETT. That was at Washington?

Lieut. Comdr. MURRAY. That is right; Navy Department.

Mr. SONNETT. Who was the commanding officer of that section?

Lieut. Comdr. MURRAY. Captain Safford.

Mr. SONNETT. And who were the other three watch officers?

[434] Lieut. Comdr. MURRAY. There was Brotherhood, Pering, and Brown. Then there was George Linn, who was the senior officer and normally did not stand watch, but when any one was on leave, Linn stood watch.

Mr. SONNETT. Were you standing a watch during the first week of December, 1941?

Lieut. Comdr. MURRAY. Part of the week, yes. You see, we worked a certain number of watches and then we had forty-eight hours off.

Mr. SONNETT. Who else was on watch that week of those you named?

Lieut. Comdr. MURRAY. Well, Brown was on vacation, so Linn was taking Brown's place, and otherwise the setup was the same.

Mr. SONNETT. I show you document 15 of exhibit 63 of the Naval Court of Inquiry record and ask you whether you have ever seen that message before.

Lieut. Comdr. MURRAY. Yes, but I did not see it in English. You see, I saw it in Japanese *kana* and at that time Commander Kramer was the language officer and, of course, I don't know enough about

the language to read the whole message, but he took out transcripts of this, such as these words here of the four winds, and handed those words and told us the meaning of those and told us to wait out for those words.

Mr. SONNETT. That was an intercepted Japanese dispatch setting up the so-called "winds" code, was it not, Commander?

Lieut. Comdr. MURRAY. That is my understanding of it. Anything that I say on this, gentlemen, it is more or less second-hand information because I am not a language expert and the only thing I can say about it is what they told me and my instructions in regard to it.

Mr. SONNETT. Will you state what your instructions were, Commander, in regard to the "winds" code?

[435] Lieut. Comdr. MURRAY. Well, my instructions were more or less the same as they had always been and that is anything of any importance that came in was to get hold of Commander Kramer and Commander Kramer always left word where he was going. He was very faithful in that respect and never moved from one place to another without calling up and telling us where he was; so we knew where he was most of the time. But our orders were in addition to that, if we couldn't get him on the phone, to go and take a car and get him by any means possible in the event of anything of any importance; and if any of those had come in, that is exactly what we would have done.

Mr. SONNETT. That translation of that message was on or about November 28, 1941, was it not?

Lieut. Comdr. MURRAY. Approximately, yes; about a week before Pearl Harbor.

Mr. SONNETT. And is it the fact that efforts were made to monitor for any Japanese message using the so-called "winds" code?

Lieut. Comdr. MURRAY. As far as I know, every effort was made using even the Coast Guard to get every possible message that they could get in the hope that they might come through, because it was my understanding—I don't particularly understand this English version here—it was my understanding it would be added in in the plain text news broadcasts that were made. Now, I guess that is essentially what it says here. It says, "In the middle of the daily Japanese language shortwave news broadcast." I guess that is the same, yes.

Mr. SONNETT. So far as you know, was any Japanese broadcast or message ever intercepted by any one using the "winds" code word relating to the United States?

Lieut. Comdr. MURRAY. Let me explain the whole situation in that, [436] as I mentioned to you before. It never came in on my watch and I was very particular about it and the staff that I had on there, after they had gone over it, I went over it myself to be sure so that I don't think it is possible it could have gone through on my watch. I was on the day watch of the 4th and the 5th; then I went off on forty-eight hour watch. Now, then, when I came back after Pearl Harbor happened, it is my memory, and I am pretty clear about it, that Linn mentioned that it had come in, but it had come in at a time when they couldn't use it. Now, that is exactly as I remember it, but it did not come in on my watch and I am absolutely certain that up until 4 o'clock the afternoon of the 5th it hadn't come in because if it had come in on any one's watch other than mine, I could

tainly would have known about it because all watch officers passed along the log and all events of preceding watches.

Mr. SONNETT. I show you exhibit 65, Commander, of the Naval Court of Inquiry record, which consists of documents received from the Federal Communications Commission, and direct your attention particularly to documents 2, 3, and 4 and ask whether any of those came to your attention.

Lieut. Comdr. MURRAY. Document 4 I never did see. Document 3 I couldn't say because it is in English and I practically never saw any of these messages in English. And Document number 2 the same. Document number 1, I remember that, but I don't remember it from the Army. That was our own organization that gave us that.

Mr. SONNETT. Document number 1, Commander, for the sake of clarity of the record, sets forth the Japanese language to be used for the three signals, does it not?

Lieut. Comdr. MURRAY. Yes.

Mr. SONNETT. And you had the substance of that information, for [437] which you were watching?

Lieut. Comdr. MURRAY. But we had it in Japanese and not in English.

Mr. SONNETT. In Japanese?

Lieut. Comdr. MURRAY. Yes. The first document you showed me there, I remember now that those words used there in Japanese were the words we had on a slip of paper and told to watch for, but we had none of these in English.

Mr. SONNETT. Commander, you said that on or about December 7th Linn stated to you it had come in?

Lieut. Comdr. MURRAY. After December 7th.

Mr. SONNETT. After December 7th?

Lieut. Comdr. MURRAY. Yes.

Mr. SONNETT. Will you state exactly what he said, as best you recall?

Lieut. Comdr. MURRAY. Well, it was in connection with that multi-part message that came in. You see, I was off. I was to go on again at 4 o'clock on the afternoon of Pearl Harbor Day. I was sitting home, listening to my radio, when I heard the flash and I jumped into a taxicab and reported immediately. It appears then that the word that was passed on to me from the preceding watch officer was that during the night of the 6th a multi-part message had come in, which I understood later was the message that was handed to the Secretary of State the follow day—the multi-part message had come in and they had all gone to work and sweated over it and then during the course of that conversation, Linn mentioned to me—I am quite sure of this, but I can't swear to it—that the "winds" code message had come in, but I don't know whether the Army got it or whether we got it or who. You see, the Army and the Navy there were working two teams and the [438] way the set up was, that on one day—odd or even day; I can't remember which—the Navy handled it; the other day the Army handled it. Now, of course, we, to be perfectly frank about it—we went ahead on our own anyway and I think it was due to the fact that we went ahead on your own that we got a little bit of jump on that multi-part message. You see, actually that multi-part message came in on the day that was supposed to be handled by the Army.

Mr. SONNETT. That is, on December 6th?

Lieut. Comdr. MURRAY. Yes, but in view of the urgent circumstances, we went ahead on it anyway, that is, our organization did, I am quite sure that Linn was on that watch because Brown-watches got mixed up and Brown normally either preceded me or followed me and the fact that he was on vacation, I am quite sure that it was Linn that got that multi-part message.

Mr. SONNETT. Now, when Linn said to you that this message came in, did he indicate when it had come in?

Lieut. Comdr. MURRAY. No.

Mr. SONNETT. Did you understand that it had come in about the same time as the multi-part message?

Lieut. Comdr. MURRAY. No. My understanding was that it came in later, because the impression I got from him was that they got it too late to do anything about it.

Mr. SONNETT. That would be, then, on December 7th?

Lieut. Comdr. MURRAY. Apparently that would be it.

Mr. SONNETT. I show you, Commander, document 6 and document of exhibit 13 of this investigation and ask whether you have seen these documents before.

[439] Lieut. Comdr. MURRAY. No, I don't ever remember seeing that. That is the first one.

Mr. SONNETT. That is document 6, is it, of the exhibit?

Lieut. Comdr. MURRAY. Yes, that is 6.

Mr. SONNETT. For the sake of the record, Commander, can we say what that document is? That is an intercepted Japanese dispatch of what date?

Lieut. Comdr. MURRAY. 27 November.

Mr. SONNETT. And it indicates that a code is set up?

Lieut. Comdr. MURRAY. Well, yes, yes. This designation here J-1 I recognize, too. That usually carried instructions of this kind.

Mr. SONNETT. The dispatch stated, did it not: "With international relations becoming more strained, the following emergency system of dispatches using *ingo denpo* (hidden word or misleading language telegrams) is placed in effect. Please study this carefully?" That it lists a series of code words, does it not?

Lieut. Comdr. MURRAY. Yes, it gives the code word and the meaning that the code word will have.

Mr. SONNETT. Were you familiar with the establishment by the Japanese of the so-called hidden word code as indicated in the exhibit?

Lieut. Comdr. MURRAY. No, I wasn't.

Mr. SONNETT. Will you refer to the next document, which is

Lieut. Comdr. MURRAY. That I could have seen. You see, again, if I had seen that, gentlemen—well, it was in code—

Mr. SONNETT. For the sake of the record, Commander, would you read that into the record, too?

Lieut. Comdr. MURRAY. "Relations between Japan and England are not [440] in accordance with expectations."

Mr. SONNETT. What is the date of it?

Lieut. Comdr. MURRAY. 7 December.

Mr. SONNETT. From whom and to whom?

Lieut. Comdr. MURRAY. From Tokyo, a circular.

Mr. SONNETT. Do you know whether or not, Commander, Linn was referring to that message of December 7th when he said to you that a message had come in employing the "winds" code?

Lieut. Comdr. MURRAY. Well, I am not sure what he was referring to, except this, that we all had the "winds" code on our mind and we even dreamt about it at night. We just were on our toes and on edge, looking and waiting for that thing, and as soon as he said it came in but too late to use, well, there was only one thing that came to our mind, and I will be perfectly frank about it. It was no definite specification made on it or anything further said.

Mr. SONNETT. If a "winds" code message had come in relating to England on December 7, 1941, would it have been translated the same as document 11 of exhibit 13?

Lieut. Comdr. MURRAY. Would it have been translated the same as 11? You mean written up in that form?

Mr. SONNETT. In substance, would it have conveyed the same meaning?

Lieut. Comdr. MURRAY. I believe it would, yes, but again I have the language difficulty to contend with and I can say it is my belief that it would have been that way.

Mr. SONNETT. Well, what I have in mind is, Commander, the "winds" code established a code the use of which would signify a break in diplomatic relations between this country, England, Russia, and Japan.

Lieut. Comdr. MURRAY. Yes.

[441] Mr. SONNETT. That was also true of the hidden word code, was it not?

Lieut. Comdr. MURRAY. That is right.

Mr. SONNETT. As indicated?

Lieut. Comdr. MURRAY. That is right.

Mr. SONNETT. So that the message you have before you, which is document 11 of exhibit 13, conveyed the substance of the message which could have been sent in either the "winds" code or the hidden word code?

Lieut. Comdr. MURRAY. Right. In other words, it infers a warning that something is going to happen.

Mr. SONNETT. I have nothing further, Admiral.

Admiral HEWITT. I think that is all. Thank you very much.

(The witness was excused.)

[442] A witness entered, read the precept, and was duly sworn.

Mr. SONNETT. State your name and rank.

Commander WRIGHT. Wesley A. Wright, Commander, USN.

Mr. SONNETT. What is your present assignment, Commander?

Commander WRIGHT. I am Officer in Charge of the naval radio activities, Bainbridge Island.

Mr. SONNETT. What was your assignment on December 7, 1941?

Commander WRIGHT. Assistant Communications Officer, Staff of the Commander-in-Chief, on temporary duty in combat intelligence unit, Fourteenth Naval District.

Mr. SONNETT. For how long prior to December 7, 1941, had you been on that duty?

Commander WRIGHT. Since March 31, '41.

Mr. SONNETT. Who was in charge of that activity, Commander Wright?  
 Commander WRIGHT. Then Lieutenant Commander J. J. Rochford.

Mr. SONNETT. And what were your duties in that unit?

Commander WRIGHT. Assistant Cryptanalyst.

Mr. SONNETT. Who else was engaged in cryptanalysis activities at that unit at that time?

Commander WRIGHT. Lieutenant Commander T. H. Dyer was the senior cryptanalyst and myself and we had an ensign, a Reserve, who had been there since December, '40—I think it was Wurner. We had a lieutenant, Reserve, by the name of Underwood; a chief yeoman by the name of Woodward; Chief Yeoman Rorie.

Mr. SONNETT. Is this all in decrypting?

Commander WRIGHT. All of those up to Rorie were actually engaged in decrypting and clerical.

[443] Mr. SONNETT. Woodward?

Commander WRIGHT. No. Rorie. Woodward was entirely in charge of crypting and language assistance. Chief Yeoman Conant. Lieutenant Hopewick was available for decrypting work. His primary duties were with the IBM machines. I believe that is all.

Mr. SONNETT. Commander, you recall, I take it, that during the early part of December, 1941, certain messages of the Japanese Consul in Hawaii were secured and worked on by your unit?

Commander WRIGHT. Yes, I remember that.

Mr. SONNETT. Can you recall approximately when those messages were received in your unit?

Commander WRIGHT. I am afraid I couldn't answer that definitely. I have discussed these things so much since that I know we got them on the 5th now, but that would be absolutely hearsay.

Mr. SONNETT. Commander, I show you exhibit 29 of this investigation, which consists of photostatic copies of translated dispatches and from the Japanese Consul at Honolulu during the first week of December, 1941, and ask you whether you recall that they were among the dispatches received and translated at that time.

Commander WRIGHT. Yes, I believe they were among the dispatches that were delivered to us by the naval intelligence unit of the Fourteenth Naval District.

Mr. SONNETT. I also show you exhibit 40 of this investigation and call to your attention the second ONI report contained in that exhibit dated 14 February 1942, and ask you whether the translated Japanese messages set forth in that report were among those received prior to December 7, 1941.

Commander WRIGHT. I would say that they were all received together. [444] It is my recollection that we got them all on the 5th. It would have been very difficult for us to get one that was sent on the 6th—no, not necessarily; if it was sent the 6th Tokyo time, we could have got it on the 5th. I would state that I am fairly positive on those up to and including the day of the 5th. Those that are dated the 6th, I am not so sure about them; but I don't remember the second package coming in.

Mr. SONNETT. Commander, did you work on the decryption of any of those messages which came in up to and including December 7, 1941?

Commander WRIGHT. Not directly, no. In a supervisory capacity, I watched Woodward's work.

Mr. SONNETT. Was it Woodward, then, who did the bulk of the decryption?

Commander WRIGHT. Woodward, I believe, did all of the decryption with some clerical assistance.

Mr. SONNETT. I show you exhibit 41 of this investigation, Commander, which consists of twenty-eight pages of photostats of handwritten and typed decryptions and translations, and ask you whether you can identify the handwriting on any of those pages.

Commander WRIGHT. No, I am afraid I couldn't recognize the handwriting positively. I am quite sure that between Woodward and Laswell—they are in Washington—they can all be identified. They are both there in Washington, and Laswell was the translating unit out there at the time.

Mr. SONNETT. Do you recall, Commander, whether any of the messages to or from the Japanese Consulate in Hawaii which were delivered to the Navy prior to December 7, 1941, was decrypted and translated before the attack?

Commander WRIGHT. No, I don't know whether any were or not. I have been under the impression that there were none delivered to Layton previously, but if he has testified differently, he is probably correct. I wouldn't [445] have been involved in it myself.

Mr. SONNETT. My question wasn't whether they were delivered to Layton, but whether there was any decrypted and translated prior to the attack.

Commander WRIGHT. I don't know. Again, I think Laswell and Woodward can give you a better answer.

Mr. SONNETT. Commander, were you familiar with the establishment of the so-called "winds" code by the Japanese on or about November 28, 1941?

Commander WRIGHT. Yes, it came to my attention at that time.

Mr. SONNETT. I show you exhibit 63 of the Naval Court of Inquiry, document 15, and ask you whether you were familiar with that dispatch of the substance of it.

Commander WRIGHT. Yes.

Mr. SONNETT. That is the so-called "winds" code, is it not?

Commander WRIGHT. That is setting up the wind warning.

Mr. SONNETT. Are you familiar with the efforts which were made to monitor for any Japanese message employing that code?

Commander WRIGHT. Yes. As I remember it, immediately after the receipt of this message, we set a watch, a twenty-four hour watch, on those broadcasts at the radio station, one language officer on for every four hours.

Mr. SONNETT. What were the results, if any?

Commander WRIGHT. No message of that nature was intercepted by our unit.

Mr. SONNETT. Do you know of the receipt by any one of a "winds" code message relating to the United States prior to December 7, 1941?

Commander WRIGHT. No, I do not know of such. That is, the execute.

Mr. SONNETT. Did any information ever come to your attention which was received as a result of tapping the telephone wires of the

Japanese [446] Consulate, that is, prior to December 7, 1941.

Commander WRIGHT. No.

Mr. SONNETT. On December 7, 1941, Commander, you were on duty at the unit at Pearl Harbor, were you not?

Commander WRIGHT. Yes.

Mr. SONNETT. And during the course of that day, it has been indicated by previous investigations, there were various radio bearings received as to the location of the attacking force. You testified before Admiral Hart that there was an early arbitrary assumption that the surface forces were actually to the southward. Is that your recollection?

Commander WRIGHT. I would say there was a general impression that the enemy forces were to the south.

Mr. SONNETT. There was one bearing, was there not, which was in direct conflict with the other bearings and indicated that the attacking force was almost due north?

Commander WRIGHT. Yes, but the circumstances surrounding the obtaining of that bearing were such that it was never given the prominence that it possibly might have had.

Mr. SONNETT. Will you state fully what those circumstances were, please?

Commander WRIGHT. The large direction finder which we then had had out at Lualualei, CXK, the only means of communication we had between Lualualei and our unit there at Pearl Harbor was by an Army mega-telephone and all those mega-telephones were put out of commission and we had no communication contact with the station; we finally raised the station by radio from Admiral Kimmel's headquarters and received one bearing by radio which indicated a northerly direction.

[447] Mr. SONNETT. About what time of day was that? I don't remember?

Commander WRIGHT. No, I am afraid I don't. I would say offhand maybe 10:30, 11 o'clock.

Mr. SONNETT. Do you know what, if any, action was taken as a result of having obtained that bearing?

Commander WRIGHT. No, I don't believe it made—it had influence on the opinion at all that the forces were to the south.

Mr. SONNETT. Was the direction finder at Lualualei a one direction or reciprocal—

Commander WRIGHT. The CXK is unilateral.

Mr. SONNETT. Unilateral?

Commander WRIGHT. Yes, it gives a true direction.

Mr. SONNETT. Were there any other CXK's being used in the area at that time?

Commander WRIGHT. No, the only other one we had at that time was in Mare Island.

Mr. SONNETT. Was there any information received from the Army on December 7, 1941, as to the radar bearings of the attacking forces? Do you know whether any information was received?

Commander WRIGHT. To the best of my knowledge, there was none received by our unit.

Mr. SONNETT. Commander, I call your attention to documents 1, 3, 7, 9, 10, 13, 14, 15, 16, 18, 19, 22, 23, and 24 of exhibit 13 of this in-

vestigation, which are all copies of Japanese dispatches relating to ships and defense preparations in the Pearl Harbor area, and ask you whether prior to December 7, 1941, you saw any of those dispatches.

Commander WRIGHT. No. To the best of my recollection, none of these [448] messages were transmitted to or received by our unit prior to December 7th.

Mr. SONNETT. I call your attention, Commander, specifically to document 14 of this exhibit, which is a message from Honolulu to Tokyo, dated December 6, 1941, in the PA-K2 system, dealing with barrage balloons, and also call your attention to pages 7 and 8 of exhibit 41, which is a pencilled translation, and ask you whether those are translations of the same message.

Commander WRIGHT. Yes, undoubtedly two different translations of the same message.

Mr. SONNETT. I call your attention to the last sentence of the first paragraph of document 14, which indicates that it is an Army translation, does it not?

Commander WRIGHT. Yes.

Mr. SONNETT. And the last sentence reads: "I imagine that in all probability there is considerable opportunity left to take advantage for a surprise attack against these places." I call your attention to the last sentence of the first paragraph of page 7 of exhibit 41, which reads: "The whole matter seems to have been dropped"—which indicates a different translation of that portion of the message, does it not?

Commander WRIGHT. It certainly indicates a different interpretation of the Japanese in that portion.

Mr. SONNETT. Have you any information about the difference in translation, Commander?

Commander WRIGHT. None at all.

Mr. SONNETT. And you do not know, I take it, who made the translation contained on pages 7 and 8 of exhibit 41?

Commander WRIGHT. Not offhand. I would guess it was Fullenwider, [449] but it is either Laswell or Fullenwider or possibly Rochefort. I would guess from this one it was possibly Fullenwider.

Mr. SONNETT. The messages in exhibit 13 to which I have called your attention just now, Commander, indicate that many of them were translated by the Army, do they not?

Commander WRIGHT. Yes.

Mr. SONNETT. Do you know how the Army received those messages in the first place and, secondly, what their procedure was for decrypting and translating them?

Commander WRIGHT. Roughly, as I remember it, we had a joint source of obtaining all the diplomatic traffic. We had our own intercept stations and they had their own intercept stations. We pooled the intercepts. Then they had a day by day arrangement whereby the Navy didn't necessarily work on all the traffic for that day, but the Navy was responsible for all of the translations for that day and the Army was responsible—if it were the odd days, then the Navy would be the even days; but both units works on all of the messages. The Army on there just indicates that it was the Army's date to be responsible for that particular message.

Mr. SONNETT. Can you state from those particular exhibits v Army intercept station intercepted them, that is, referring to the s ship movement and defense preparation messages?

Commander WRIGHT. In general, I would say that the numeral dicated Army and the letters indicated Navy. I am not sure of t You can get better information on that from the people that wer Washington at that time. Murray, I think, would probably know That is what it looks like to me, that the letters were Navy and numerals Army. The letter "S" would indicate that the message intercepted at Bainbridge Island.

[450] Mr. SONNETT. Was any decryption done at Bainbr Island, Commander? Do you know?

Commander WRIGHT. No.

Mr. SONNETT. Where was the decryption done of the Japa messages which were intercepted?

Commander WRIGHT. In accordance with the assignment of c analytical tasks, all of the decryption of diplomatic traffic was c either at Washington or at Cavite.

Mr. SONNETT. I have nothing further, Admiral.

Commander WRIGHT. I have nothing. Thank you very much.

(The witness was excused.)

(The investigation was then, at 3:52 p. m. adjourned until 2 p. m., 19 June 1945.)

[451] PROCEEDINGS OF THE HEWITT INQUIRY

TWENTIETH DAY

Pursuant to notice, the investigation met at the offices of the General Board, Navy Department, at 2:15 p. m., Tuesday, 19 June 1945.

Present: Admiral H. Kent Hewitt, USN; Mr. John F. Sonnett; Lieutenant Commander Benjamin H. Griswold, USNR; Lieutenant John Ford Beecher, USNR; and Ship's Clerk Ben Harold, USNR.

A witness entered, read the precept, and was duly sworn.

Mr. SONNETT. State your name and rank, please.

Captain EARLE. John B. Earle, Captain, USN.

Mr. SONNETT. What was your assignment on December 7, 1941, Captain?

Captain EARLE. Chief of Staff, Fourteenth Naval District.

Mr. SONNETT. And for how long had you been in that assignment?

Captain EARLE. Since June 9, 1941.

Mr. SONNETT. You testified previously, as I recall it, Captain, that in the several months preceding the attack on Pearl Harbor you had about ten or fifteen reports of submarines sighted around Pearl Harbor. Can you recall what those reports were?

Captain EARLE. Very indefinitely. They generally came from sampans—from fishing boats; occasionally from Army lookout posts; and now and then from planes.

Mr. SONNETT. Do you recall, Captain, the nature of the last report received prior to December 7, 1941?

Captain EARLE. No, I do not.

Mr. SONNETT. Captain, do you recall specifically any report of submarine sighting or contact in the months of October, November, and up to [452] December 6, 1941?

Captain EARLE. No, I do not.

Mr. SONNETT. Do you recall, Captain, whether prior to December 7, 1941, there was any report of a submarine just off the entrance to Pearl Harbor?

Captain EARLE. As I recall, there had been such a report, but whether it was official and not simply unofficial, I can't say at this time.

Mr. SONNETT. Do you recall whether that report was a contact or sighting, Captain?

Admiral HEWITT. You mean destroyer contact.

Mr. SONNETT. Destroyer contact or sighting.

Captain EARLE. I can't recall.

Mr. SONNETT. Did any report of a submarine contact prior to December 7, 1941, involve a depth charge on the submarine or suspected submarine?

Captain EARLE. My recollection is not sufficiently accurate to say whether or not I can recall that point. I have a vague recollection of

something of that kind, but not sufficiently accurate to make a definite statement.

Mr. SONNETT. Can you recall, Captain, whether any report prior December 7, 1941, involved firing upon a submarine or a suspected submarine?

Captain EARLE. I am almost certain that there was no such report.

Mr. SONNETT. Referring to the morning of December 7, 1941, Captain, I show you exhibit 18 of this investigation and direct your attention particularly to the conversation recorded at about 0520 Pearl Harbor time of that date between the WARD and the CONDOR, and ask whether that conversation or the fact of such a conversation came to your attention prior to the attack on December 7th?

Captain EARLE. It did not.

[453] Mr. SONNETT. You will note on the second page of this exhibit, Captain, a report by the WARD of its attack upon a submarine. That report did come to your attention prior to the attack as I understand your previous testimony.

Captain EARLE. That report did come to my attention but not in the wording that it is included in the log of the section base.

Mr. SONNETT. Would you state, Captain, the report of that conversation which was received by you on December 7, 1941, and state the time approximately at which you received it?

Captain EARLE. About 0710 I was informed by the Operations Division Officer, Lieutenant Commander Kaminski, that he had received a message from the WARD to the effect that "We have attacked and fired on a submarine."

Admiral HEWITT. Nothing about depth charges?

Captain EARLE. No, sir.

Mr. SONNETT. That report, Captain, was a more specific report, was it not, than any previous report concerning submarine contact which had been received by you?

Captain EARLE. Yes.

Mr. SONNETT. What action was taken on the report?

Captain EARLE. As I recall it, I immediately told the watch officer to inform the Commander-in-Chief's Operation Officer and to take steps to get the relief destroyer ready to proceed out of the harbor, get the message checked and verified and attempt to find out what further action was being taken by the WARD. I then called the Commandant of the Fourteenth Naval District, Admiral Bloch, informed him of what had been done, and talked the situation over with him for some time with a view to deciding what other action should be taken. Our reaction was that it was probably a mistake as we had had numerous reports of sighting of submarines, but that if it were not a [454] mistake, the WARD could take care of the situation and the relief destroyer could lend a hand, while the Commander-in-Chief had the necessary power to undertake any other action which might be desired. Mainly we were trying to definitely determine what had happened.

Mr. SONNETT. I take it, Captain, that no further action was taken on that report prior to the air attack on December 7th?

Captain EARLE. No other action was taken by me. I believe that in addition to that, that Commander Momsen, who was the Operations Officer, was contacted and told to take station. We were vague

alarmed but could see no specific threat involved except that by the possible position of an enemy submarine in that area.

Mr. SONNETT. Captain, I show you exhibit 8 of the Naval Court of Inquiry, which is Pacific Fleet Confidential Letter number 2CL-41 (Revised), dated October 14, 1941, and ask whether you saw that and were familiar with that prior to December 7, 1941?

Captain EARLE. It is my recollection that I saw this before December 7, 1941.

Mr. SONNETT. Now, referring to page 6 of that exhibit, Captain, sub-paragraph (m) (3), would you read that into the record, sir?

Captain EARLE. "It must be remembered too, that a single submarine attack may indicate the presence of a considerable surface force probably composed of fast ships accompanied by a carrier. The Task Force Commander must therefore assemble his Task Groups as quickly as the situation and daylight conditions warrant in order to be prepared to pursue or meet enemy ships that may be located by air search or other means."

Mr. SONNETT. Were you in agreement, Captain, there with that statement of the Pacific Fleet letter on security of the fleet?

[455] Captain EARLE. Most certainly in agreement, based upon the belief that such an attack might take place after the declaration of war.

Mr. SONNETT. Now, referring, Captain, to page 1 of that letter, you will find two assumptions stated. Would you read assumption (b) into the record? I suggest doing it that way because it has been some time since you have seen that exhibit, and also it will be clearer in the record.

Captain EARLE (reading):

(a) That no responsible foreign power will provoke war, under present existing conditions, by attack on the Fleet or Base, but that irresponsible and misguided nationals of such powers may attempt;

(1) Sabotage, on ships based in Pearl Harbor, from small craft.

(2) To block the entrance to Pearl Harbor by sinking an obstruction in the Channel.

(3) To lay magnetic or other mines in the approaches to Pearl Harbor.

(b) That a declaration of war may be preceded by;

(1) A surprise attack on ships in Pearl Harbor,

(2) a surprise submarine attack on ships in operating area,

(3) a combination of these two.

Mr. SONNETT. Now, Captain, coming back to the previous question, it appears, does it not, that one of the assumptions of the security letter was that a declaration of war might be preceded by a surprise Japanese attack? Having that in mind and turning to the statement that you previously read concerning the presence of a submarine, will you state why, on the morning of December 7, 1941, upon receipt of the report from the WARD, it was not believed that a large Japanese force might be in the offing and why appropriate action was not taken on that belief?

[456] Captain EARLE. In the first place, we were not sure of this supposed contact. It still seemed to have a possibility of being in error. This was particularly strengthened by a later report received from the WARD which said that she was proceeding to escort a sampan toward Honolulu. We couldn't imagine that the WARD, having actually attacked a submarine, would leave her post to proceed to Honolulu if it were a real attack. In the second place, we had no

force immediately available to resist any attack as far as the District was concerned, except the relief destroyer, and we felt that by referring the matter to the Commander-in-Chief, that we had done all that possibly could even if the attack were real.

Mr. SONNETT. Referring, Captain, to the previous submarine contact reports, that is, prior to December 7, 1941, were any air searches conducted as a result of those reports?

Captain EARLE. It is my recollection that there were air searches but we in the District had no control over these air searches and had no airplanes ourselves, so that we assumed that when information was referred to the Commander-in-Chief, that all necessary action would be taken.

Mr. SONNETT. With respect, Captain, to the question of aircor reconaissance, it appears from the previous investigations that sometime in July or August of 1941 Admiral Bloch suggested to Admiral Kimmel that reconaissance be conducted on a sector towards Jalapa. Have you any information in connection with that?

Captain EARLE. I have not.

Mr. SONNETT. And you do not know what the reasons were for the suggestions made by Admiral Bloch?

Captain EARLE. I do not recall.

Mr. SONNETT. Captain, I show you a certified collection of documents [457] which contains Annex VII, Section VI, Joint Air Agreements, of the Joint Coastal Frontier Defense Plan, this being dated 28 March 1941, and ask whether you recall having seen this at or about the time it was issued.

Captain EARLE. I do not recall definitely having seen this document, but inasmuch as when I reported as Chief of Staff in Japan I was shown all of the existing orders, it is very probable that I saw this.

Mr. SONNETT. Admiral, this contains various other documents which we don't presently need, but since it is certified, I wonder whether we shouldn't take it now as an exhibit and we can refer to it with the Captain. Some of the provisions will be of interest.

Admiral HEWITT. Yes.

(The document referred to was received and marked "Exhibit 47.")

Mr. SONNETT. Referring to exhibit 47, Captain, which we have been discussing, it appears that it was approved April 2, 1941, signed by Admiral Bloch and General Short, does it not?

Captain EARLE. It does.

Mr. SONNETT. Paragraph 2 of the exhibit provides for joint operations and paragraph 4 for joint anti-aircraft measures, including arrival and departure procedure for aircraft, and other items. Would you, referring to this exhibit, Captain, discuss what joint exercises and drills were held with the Army as a general practice in the months preceding the attack under the joint anti-aircraft procedure?

Captain EARLE. As I recall, definite problems were prepared for training purposes which would serve to develop the control features of the base anti-aircraft defense and at the same time develop necessary coordination between the operations of the Army and Navy air components. Frequent [458] drills—I should say at least once every ten days—were held in which planes would fly over

l Harbor area both day and night and the ships in the harbor  
ld stimulate anti-aircraft fire on these planes. The entire Pearl  
bor area was divided into sectors and there was a naval sector  
mander on a ship who was responsible for controlling the indi-  
al fire of that sector and make the necessary reports. In addi-  
to the above, a problem was developed about once a month or  
in which a definite target for aircraft was placed on a certain  
ing from Pearl Harbor at a certain time and the warning was  
in to both the Army and Navy that an enemy aircraft carrier  
nit was on such and such a bearing, distance so much. At that  
the various provisions of air control were used in that, fighter  
es were sent aloft and bombers were actually sent out to inter-  
and attack the simulated target offshore. I am not certain  
tly how many drills of this type were had before Pearl Harbor  
December 7th, but I should say at least three.

r. SONNETT. When was the latest of the three, Captain?

r. SONNETT. I am sorry, but I couldn't say exactly.

r. SONNETT. Can you recall whether any such drill was held be-  
n November 27th and December 7th, that is, roughly in the two  
ks preceding the attack?

aptain EARLE. I cannot recall.

dmiral HEWITT. What was the command staff setup for carrying  
joint operations as between the District and the Army command  
ch exercises?

aptain EARLE. You mean before Pearl Harbor?

dmiral HEWITT. Any such exercise, before Pearl Harbor and what  
set up after?

aptain EARLE. My recollection is colored from operations that took  
place after Pearl Harbor, but it is my belief that the entire  
blem of this aircraft coordination was handled through the fleet  
the Army. In other words, after the word came through that an  
ny had been sighted on a certain bearing, this word was given to  
fleet and to the Army and that then arrangements were made  
ween the commander of the fleet air and the Army air to coordinate  
r operations, including orders as to—detailed directions as to  
ction, speed, and number of planes to be used, and so forth.

o amplify the above statement, there was no joint command post  
perations center actually set up for these drills before the war.

Operations Office in the Headquarters of the Fourteenth Naval  
rict, which consisted of an operation switchboard with necessary  
munication personnel and a watch officer, was set up to handle  
e drills from the Fourteenth Naval District. I do not recall the  
t time, but either somewhere just before Pearl Harbor or just  
r, a coast artillery liaison officer was placed in this Operations  
e. Plans had been made for a joint command post, but no definite  
s had been taken as to location or details prior to the start of the

It is my recollection that plans had been made for a joint com-  
d post, but this had not gone beyond the planning stage.

fter the war started, a joint command post was set up immediately  
e Operations Office of the Fourteenth Naval District and operated  
e for several months while the Army moved their principal com-

mand center to the Crater. Shortly after their move, the Navy move its command center next to the Army center in the Crater.

Admiral HIWITT. That is, Fourteenth Naval District——

Captain EARLE. Fourteenth——

Admiral HEWITT. Or District and the Commander-in-Chief?

Captain EARLE. No, District; just the District.

[460] Mr. SONNETT. Prior to December 7, 1941, Captain, the Fourteenth Naval District had a Liaison Officer with General Short's headquarters, did you not?

Captain EARLE. Yes, sir.

Mr. SONNETT. What, in general, were his duties, Captain?

Captain EARLE. He was sent up to the Army to report to the Commanding General for duty as Liaison Officer and to perform such duties in that connection as would be required.

Mr. SONNETT. Exhibit 47, Captain, the Annex VII, Section VI, to the Joint Coastal Frontier Defense Plan, provided in part that the Army would expedite the installation and placing in operation of an aircraft warning service. During the period of completion of the AWS installation, the Navy, through use of radar and other appropriate means, would endeavor to give such warnings of hostile attack as might be practicable. What steps were taken, in general, Captain, by the Navy to carry out that agreement?

Captain EARLE. In the first place, communications were established with the Army over radio nets and teletype system so that any information that came in could be sent promptly to the Army station interested. The communication activities were informed that prompt reports must be made concerning any possible enemy activity. The few destroyers assigned to the District had the necessary instructions as to reporting contacts. There were no planes attached to the District, but it is my recollection that fleet planes were instructed to forward immediately any information to that extent. The District Communications Officer was thoroughly aware of the necessity for getting prompt information of enemy contacts to the Army.

Mr. SONNETT. To what extent, Captain, were you or Admiral Bloch kept informed concerning the reconnaissance being performed by the fleet planes in the months preceding the attack?

[461] Captain EARLE. I can't speak for Admiral Bloch, but as far as I am concerned, I had no information unless I came by it casually, following some special report of a sighting.

Mr. SONNETT. Captain, I show you a collection of dispatches relating to submarine contacts reported in November and December, 1941, some of which were sent for information to ComFOURTEEN, and ask you whether these are the type of reports of submarine contacts received prior to the attack to which you referred previously in your testimony.

Captain EARLE. They are.

Mr. SONNETT. May we mark that as an exhibit, Admiral?

Admiral HEWITT. Yes.

(The dispatches referred to were received and marked "Exhibit 48".)

Mr. SONNETT. Captain, referring again to exhibit 47, which is Annex VII, Section VI, to the Joint Coastal Frontier Defense Plan, it appears that the Army was to expedite the installation and placin

in operation of an aircraft warning service. It appears from previous investigations that some request was made of ComFOURTEEN for Navy liaison officers to work with the Army aircraft warning service. Do you have any knowledge or information concerning that?

Captain EARLE. The only information I have is that there was a naval officer engaged in assisting the Army to get their warning system installed and operating, who came to me at one time and asked for help and I told him to apply to the District Communications Officer, who would be glad to give him every possible assistance. This officer also mentioned that a certain number of naval liaison officers would be necessary at this warning center, to which I replied that we had no spare personnel in the District for that purpose as [462] we were extremely short in every department. The officer then stated that he would see what he could do to get liaison officers from the fleet, and it was my impression that no further action would be taken by the District unless the fleet found it necessary. It might be of interest to note that after Pearl Harbor liaison officers were supplied, but they all came from ships that had been damaged or sunk in Pearl Harbor.

Mr. SONNETT. While we are on the subject of the Army radar system, Captain, do you recall what reports you received from the Army relative to the bearing of planes or bearings of planes, received on December 7th, showing in which direction they departed from Pearl Harbor?

Captain EARLE. So far as as I know, I never saw such information.

Mr. SONNETT. Captain, the District Intelligence Officer was Captain Mayfield, was he not?

Captain EARLE. Yes, sir.

Mr. SONNETT. And the radio intelligence unit was under then Lieutenant Commander Rochefort?

Captain EARLE. That is correct.

Mr. SONNETT. Did you receive the daily communication intelligence summaries prepared by the radio intelligence unit, such as those contained in exhibit 22 of this investigation (handing the exhibit to the witness)?

Captain EARLE. No, I did not. These summaries were considered of such secret matter that the Commandant of the District wished as few as possible to see them.

Mr. SONNETT. Do you know whether or not such summaries came to Admiral Bloch's attention?

Captain EARLE. I do not, but I imagine they did.

Mr. SONNETT. Did you have any information prior to December 7, 1941, [463] concerning any telephone taps on the lines of the Japanese Consul or Vice Consul in Honolulu?

Captain EARLE. I have no information on that subject.

Mr. SONNETT. Do you know whether or not any cables of the Japanese Consul in Honolulu were intercepted prior to December 7, 1941?

Captain EARLE. I do not know.

Mr. SONNETT. At any time prior to December 7, 1941, did there come to your attention, Captain, any messages of the Japanese Consul relating to ship movements in Pearl Harbor or preparations for defense in Pearl Harbor?

Captain EARLE. There did not.

Mr. SONNETT. Captain, with respect to the dealings of the Fourteenth Naval District with the Army, do you recall what information, if any, was supplied to the Army, particularly relating to movements of Japanese naval forces?

Captain EARLE. I do not know of any information of that character being furnished the Army.

Mr. SONNETT. Prior to December 7, 1941, immediately prior to and between the 1st and the 7th there were various dispatches received at CincPac Headquarters relating to the destruction of ships by the Japanese. Did you have any knowledge of those dispatches?

Captain EARLE. I believe that I saw such a dispatch over at the Commander-in-Chief's office.

Mr. SONNETT. Do you know whether that information was communicated to the Army?

Captain EARLE. I couldn't say. The Fourteenth Naval District didn't communicate it to the Army.

Mr. SONNETT. I think that is all, Admiral.

[464] Admiral HEWITT. I have nothing further. Thank you very much.

(The witness was excused.)

(The investigation was then, at 3:20 p. m., adjourned until 10 a. m., Wednesday, 20 June 1945.)

PROCEEDINGS OF THE HEWITT INQUIRY

TWENTY-FIRST DAY

ursuant to notice, the investigation met at the offices of the General Board, Navy Department, Washington, D. C. at 10:10 a. m., Wednesday, 20 June 1945.

Present: Admiral H. Kent Hewitt, USN; Mr. John F. Sonnett; Lieutenant Commander Benjamin H. Griswold, USNR; Lieutenant John Ford Baecher, USNR; and Ship's Clerk Ben Harold, USNR.

Witness entered, read the precept, and was duly sworn.

Mr. SONNETT. Will you state your name and rank, please?

Lieutenant UNDERKOFER. Oliver H. Underkofler, Lieutenant, USNR.

Mr. SONNETT. Where were you assigned on December 7, 1941, Lieutenant?

Lieutenant UNDERKOFER. Communication Office, ComFOURTEEN.

Mr. SONNETT. What duties were you performing on the night of December 6th or morning of December 7, 1941?

Lieutenant UNDERKOFER. I was the communication watch officer on that watch.

Mr. SONNETT. That is, of ComFOURTEEN?

Lieutenant UNDERKOFER. Yes, sir.

Mr. SONNETT. At what time did that watch commence, Lieutenant?

Lieutenant UNDERKOFER. The communication watch officer's watch started at 0800 on the 6th and was supposed to conclude at 0800 on the 7th.

Mr. SONNETT. In addition to yourself, who else was present at that time, during that watch?

Lieutenant UNDERKOFER. Ensign Kennedy, now lieutenant.

Mr. SONNETT. And his first name?

Lieutenant UNDERKOFER. I believe it was Gordon F., but I am not sure.

666] Mr. SONNETT. On the morning of the 7th until approximately 0630 was Kennedy present with you, listening to the reports that came in, and in a position to hear them?

Lieutenant UNDERKOFER. No, sir, he was in the coding vault, which was at the far end of the Communication Office and was separated from the Communication Office by a bulkhead, with a port in the bulkhead about twelve inches square; so he was in no position to hear the radio.

Mr. SONNETT. You were standing what you termed a loudspeaker position, were you not, Lieutenant?

Lieutenant UNDERKOFER. That is correct.

Mr. SONNETT. Will you describe what that consisted of?

Lieutenant UNDERKOFER. It was a watch on the inshore patrol frequency, was established each evening at the time the minesweepers went out and commenced sweeping the channel, and we stood watch on that circuit until we received a report from the minesweepers that the channel had been swept and was clear, at which time we secured the watch.

Mr. SONNETT. I show you exhibit 18 of this investigation, which consists of an extract of the radio log of the Bishop's Point Radio Station for December 7, 1941, and call your attention to the conversation between the WARD and the CONDOR, having call sign DZ5Y and DN3L, at about 1450 Greenwich time, and ask whether or not that conversation came to your attention.

Lieutenant UNDERKOFER. It did not.

Mr. SONNETT. Can you explain why it did not come to your attention, Lieutenant?

Lieutenant UNDERKOFER. On this loudspeaker watch that was set up there was no one assigned to sit by the radio and listen to it. Any one who has stood loudspeaker watches is aware that you listen to it subconsciously, [467] the same as you would any other noise in the vicinity. If your call is given, you hear it just like if an alarm clock had been rung and you immediately answer the call. If we hadn't been called that morning, we would have paid no attention to the conversation that was carried on.

Mr. SONNETT. Do you remember what your call was?

Lieutenant UNDERKOFER. No, sir, I don't.

Mr. SONNETT. By looking at exhibit 18, can you refresh your recollection, particularly the second page?

Lieutenant UNDERKOFER. From the appearance of the log, it would seem that DW2X was a call for ComFOURTEEN. Those calls were assigned by the District and changed about once every two months, and we made no attempt to memorize them.

Mr. SONNETT. Referring again to the conversation between the WARD and CONDOR at about 1450 Greenwich time, what time would that be, Pearl Harbor time?

Lieutenant UNDERKOFER. Pearl Harbor time before the war was plus ten and a half hours, which would make that 4:20.

Mr. SONNETT. Is it the fact that you were not called by either the WARD or the CONDOR and given a report of the sighting of the submarine referred to in that conversation?

Lieutenant UNDERKOFER. That is correct.

Mr. SONNETT. Referring to page 2 of exhibit 18, there appears to be a record of the report by the WARD of an attack on a submarine at 1723 Greenwich time, which, I take it, is about 0653 Pearl Harbor time, a record of the report by the WARD of an attack on a submarine. Did that report come to your attention?

Lieutenant UNDERKOFER. It did.

[468] Mr. SONNETT. Will you state the circumstances and what action was taken by you?

Lieutenant UNDERKOFER. There were two dispatches that came through to ComFOURTEEN and I was broken out of the bunk as the first one came in and by the time the second one had come in, which came in immediately following, I was alert and received the message and delivered it to the duty officer at ComFOURTEEN.

Mr. SONNETT. At what time on the morning of December 7th had you turned in, Lieutenant?

Lieutenant UNDERKOFER. At approximately 0230.

Mr. SONNETT. And from that time until you were awakened at about 0630 or thereabouts, I take it, you were asleep?

Lieutenant UNDERKOFER. That is correct.

Mr. SONNETT. Who was the supervisor, if you recall, who was awake during that period of time?

Lieutenant UNDERKOFER. I do not recall who was on watch. I don't recall a single man that was on watch that morning.

Mr. SONNETT. Do you know whether the conversation between the WARD and the CONDOR at about 0420 Pearl Harbor time came to the attention of any one who was standing that watch with you?

Lieutenant UNDERKOFER. To my knowledge, it did not.

Mr. SONNETT. Would the fact of such a conversation have been reported to you had it come to the attention of some one standing that watch?

Lieutenant UNDERKOFER. Yes, I am sure it would.

Mr. SONNETT. It has been testified previously, Lieutenant, that efforts were made to verify the WARD's report. Have you any knowledge of that?

Lieutenant UNDERKOFER. Yes, sir.

[469] Mr. SONNETT. Will you state what you know about that?

Lieutenant UNDERKOFER. On receipt of the dispatch from the WARD at approximately 0653 Hawaiian time, the dispatch was delivered to the duty officer of ComFOURTEEN, who relayed it to the Chief of Staff of the Fourteenth Naval District. I was directed to get a verification from the WARD by the duty officer and presumed that this order emanated from the Chief of Staff. I asked if it should be encoded and was instructed that it should be. The message requesting verification was enciphered in a strip code and was delivered over the voice circuit, voice radio circuit, to the WARD. A reply to the request for verification was delivered to ComFOURTEEN by radio and was deciphered at approximately the same time as the first attack by air.

Mr. SONNETT. You stated that you were instructed by the duty officer to have the report of the WARD verified. Did you receive that instruction upon delivery to him of the report by the WARD or subsequent to the delivery?

Lieutenant UNDERKOFER. It was subsequent to the delivery.

Mr. SONNETT. Do you recall approximately how long afterwards?

Lieutenant UNDERKOFER. That has been some time ago and the best of my remembrance, it was between ten and fifteen minutes.

Mr. SONNETT. You kept no log at the Communication Office on the morning of the 7th, did you?

Lieutenant UNDERKOFER. There are several different types of logs. We did not keep a log of the inshore patrol frequency over which these messages to the WARD were handled.

Mr. SONNETT. You testified, Lieutenant, that you were instructed to request the WARD for verification and to encode your request and that you did so in a strip code. Will you state what that means and the amount of time required to transmit such a message in that code?

[470] Lieutenant UNDERKOFER. Use of the strip code is a substitution method, a substitution of letters method, so that when that message has been encoded, it consists of five-letter groups that are

not in any particular arrangement; in other words, indiscriminate letters in the five-letter groups. It is a slow system to use, that is, to encipher or decode in, and was used because it was the only thing that the WARD had. The transmission of such a message over a voice circuit requires that each letter be given in its phonetic equivalent, which is a slow process. The reply, of course, was also enciphered and was delivered the same way, which was a lengthy process and took considerable time. I can't tell you how many minutes.

Admiral HEWITT. The original report from the WARD was delivered in clear, was it not?

Lieutenant UNDERKOFER. Yes, sir.

Mr. SONNETT. That is all.

Admiral HEWITT. Thank you very much.

(The witness was excused.)

Admiral HEWITT. We will recess at this time until 11 o'clock.

(The investigation then, at 10:30 a. m., recessed until 11 a. m., which time it reconvened.)

(Present: The same parties.)

[471] A witness entered, read the precept, and was duly sworn.

Mr. SONNETT. Will you state your name and rank, sir?

Vice Admiral BELLINGER. Patrick N. L. Bellinger, Vice Admiral, USN.

Mr. SONNETT. Admiral, you have a statement, do you not, setting forth your duties during December, 1941?

Vice Admiral BELLINGER. I have.

Mr. SONNETT. May we have it copied into the record?

Vice Admiral BELLINGER. Yes.

(The statement referred to follows as pages 471a to 471h, inclusive.)

[471a] On December 8, 1941, and, for several months prior thereto, my duties were as follows:

(1) Commander, Hawaiian Based Patrol Wings and Commander, Patrol Wings One and Two. Included in the larger command were the patrol squadrons and aircraft tenders attached to Patrol Wings One and Two.

(2) Commander, Task Force Nine. This comprised Patrol Wings One and Two plus other units as assigned by Commander in Chief, Pacific Fleet for the conduct of specific operations.

(3) Commander, Fleet Air Detachment, Pearl Harbor. The responsibilities for this function included administrative authority in local matters over all aircraft actually based on the Naval Air Station, Pearl Harbor.

(4) Liaison with Commandant Fourteenth Naval District for aviation development within the District, including Midway, Wake, Palmyra, and Johnston Islands.

(5) Commander Naval Base Defense Air Force.

In connection with the above duties, I functioned under the following seniors:

(a) Commander, Aircraft Scouting Force, who as type commander for patrol wings, was based at San Diego.

(b) Commander Scouting Force, the Force Command of which Patrol Wings One and Two were a part.

(c) Directly under Commander in Chief, Pacific Fleet in my capacity as Commander, Task Force Nine.

[471b] (d) Under Commandant Fourteenth Naval District in his capacity as Commander, Naval Base Defense Air Force when performing my duties as Commander Naval Base Defense Air Force.

(e) Commanders of Task Forces One, Two, and Three for Operation of patrol planes assigned those forces for specific operations.

A change in my status was contemplated in the then current Navy Orange War Plan. Under its provisions, the units of my command were expected to make an early move to bases on the outlying islands Midway, Wake, Johnston and Palmyra.

My own headquarters were to be shifted to Midway. That my responsibilities in this connection were by no means considered light is evidenced by the fact that, just prior to the attack on Pearl Harbor, this War Plan was being played as a chart maneuver. Further, the squadron, VP-22, designated for maintenance in the highest practicable degree of readiness to expedite the initiation of the war plan move to advance bases was, in fact, transferred to Midway in October 1941.

Reverting to my status on Oahu, the most complicated of my duties consisted of those in connection with the air defense of Pearl Harbor. About 1 March, 1941, the Commander in Chief, Pacific Fleet directed me to report to the Commandant 14th Naval District to prepare an air defense plan in conjunction with the Commanding General, Hawaiian Air Force. I so reported and proceeded with the assigned task, working directly with Major General F. L. Martin, U. S. Army, Commanding General Hawaiian Air Force who, incidentally, was senior to me.

The operation plan for the Naval Base Defense Force included several subsidiary plans. The most important of these was the operation plan of [471c] the Naval Base Defense Air Force. In it was outlined the proposed employment of all units made available to the Naval Base Defense Air Force. In so far as Naval and Marine Corps air units were concerned, it was an order requiring definite action when applicable. Orders from Army sources covering the functioning of their units in the Naval Base Defense Air Force were the guides for these aircraft. Both Army and Navy orders on this subject were based upon the estimate of the situation dated March 31, 1941, and signed by General Martin and myself.

That estimate was based on the conditions as they existed at the time it was drafted. Changes in the naval air situation between that date and December 7, 1941, were not of sufficient significance to warrant a reestimate and my information of the Army Air Force indicated an analogous condition.

The estimate, I believed,—and still believe—to be sound. But the orders based on that estimate, like a precept of international law, lacked sanction. And the missing sanction in this case was the absence of unity of command.

Specifically, the organization was designed to function through "mutual cooperation" between the Army and Navy for the defense of Pearl Harbor against air attack. As such, the Naval Base Defense Air Force could function only in the event of an actual emergency or when proper authority so directed.

The composition of the Naval Base Defense Air Force varied from day to day with the number of aircraft made "available" to it by the various Air Commands of both Army and Navy. The determining factor in this technical availability was the daily employment schedule of aircraft belonging to the various air units. Aircraft reported as [471d] available were subject to the operational control of the Commander Naval Base Defense Air Force or the Army Pursuit Commander in the prevailing category of readiness, only when the Naval Base Defense Air Force was in a functioning status.

The normal procedure used for vitalizing this organization for drills was for the Commandant Fourteenth Naval District, in his capacity as Commander Naval Base Defense Force, to send dispatch reading, "Drill, Danger of an air raid on Pearl Harbor exists, Drill". This placed the Search and Attack groups in a functioning status. On receipt of this message, I, in turn, as Commander Naval Base Defense Air Force, sent a dispatch to all air units, which made planes available to that organization, except Army pursuit units, ordering them to place all available aircraft in the highest degree of readiness. At this point, during such drills, searches were immediately started by planes initially in a high degree of readiness, and their efforts were supplemented by orders to other aircraft as they were reported ready for flight.

The term, Command Naval Base Defense Air Force, was actually a misnomer due to the limited composition of that portion of the Air Forces under my operational control, which included only aircraft for scouting to locate enemy surface units and to attack them when located. It did not include fighter aircraft, radar detection devices, or anti-aircraft guns.

The term, Commander, Naval Base Defense Air Force, was even more of a misnomer as it implied authority over operating units to a degree which did not exist. This authority was non-existent until an emergency was apparent, or until appropriate authority placed the Naval Base Defense [471e] Air Force in a functioning status, and, when so called into existence, was limited in scope, in that it consisted only of operational control over Army units based upon mutual cooperation. In addition, my authority, limited as it was, extended only over the Search and Attack Groups of the Naval Base Defense Air Force and was non-existent so far as Army Pursuit aviation and Navy Fighter aviation

were concerned which were to function under Brigadier General H. C. Davis, U. S. Army.

To illustrate the lack of numerical strength of aircraft available to the Naval Base Defense Air Force, attention is invited to the report of a Joint Army-Navy Board dated 31 October, 1941, convened to prepare recommendations covering the allocation of aircraft operating areas in the Hawaiian Area. Paragraph 4 (a) of this report, which was signed by Major General Martin as senior Army member and myself as senior Navy member read as follows:

"4. The problem confronting the board as pertains to Army Aviation is summed up by the Army representatives as follows:

(a) The mission of the Army on Oahu is to defend the Pearl Harbor Naval Base against all attacks by an enemy. The contribution to be made by the Hawaiian Air Force in carrying out his mission is:

- (1) To search for and destroy enemy surface craft within radius of action by bombardment aviation.
- (2) To detect, intercept, and destroy enemy aircraft in the vicinity of Oahu by pursuit aviation."

It was pointed out that, under the Army 54th Group program, 170 B-17's and two groups of 163 pursuit planes each would be assigned to fulfill [471f] the above missions.

Naval plans called for 84 patrol planes and 48 VSO planes to be directly under the Commandant Fourteenth Naval District to supplement or function in place of the 98 patrol planes of Patrol Wings ONE and TWO, which might be ordered to advance bases on the outlying islands of Wake, Midway, Johnston and Palmyra.

Further, the planes actually present on Oahu were not free until ordered to concentrate on the Naval Base Air Defense. Both Army and Navy were in the process of receiving replacements of obsolescent planes. Army B-18's were being replaced by the more modern B-17's and in Patrol Wings ONE and TWO PBV-1, 2 and 3's were being replaced by PBV-5's. The new types were subject to the usual shake-down difficulties and maintenance problems.

In the case of the Naval PBV-5 planes, there was an almost complete absence of spare parts and, in addition, a program of the installation of armor and fireproof gasoline tanks was in progress. Considerable difficulty had also been experienced with the cracking of engine nose sections in the first planes of this type received and the installation of modified engine nose sections was in progress.

The major effort of Patrol Wings ONE and TWO during 1941 prior to December 7th was expansion training, operational training, security operations development and equipping of air facilities—all in preparation for war. Aviation training facilities and output in the Navy at that time were considerably behind the contemplated increase in the number of squadrons. There was particular stress was placed by higher authority on the need for expansion training. This necessitated a planning [471g] of operations whereby a squadron could be required to conduct training for the qualification of additional combat crews not only for their own aircraft, but to form nuclei for new squadrons being commissioned back on the mainland as well. The highest priority was placed upon this feature.

Despite this continuing emphasis on training, every effort was being made to increase the readiness for war. Squadron and patrol plane commanders were indoctrinated with the necessity of keeping their planes so equipped and their crews so trained that at any time during a flight they could be diverted from their peacetime objectives to combat missions.

The placing of the Naval Base Defense Air Force organization into a functioning status would have necessitated the substantial cessation of training activities in order to concentrate on defense. With the patrol planes constantly scouting to maximum range, and the bomber aircraft standing by for attack missions, a situation would have been soon reached wherein the Naval Base would have been greatly reduced in material readiness and their combat capability approaching an operational fatigue point while the Army pilots would have been in need of refresher training. Hence, as pointed out in the Martin-Bell estimate, the problem resolved itself into one of timing with respect to the current status of our relations with Japan, and necessity for specific information as to the probability of an air attack within rather narrow time limits.

The Commander Naval Base Defense Air Force did not have the authority to place that organization in a functioning status, except [471h] in the

of an actual emergency. The Naval Base Defense Air Force assumed a functioning status immediately after the start of the attack on December 7, 1941, without orders from higher authority. Orders to planes in the air were sent and received by 0805, and a message, "Air raid Pearl Harbor X This is no drill" was ordered broadcasted at 0758 that morning.

[472] Mr. SONNETT. Admiral, I show you exhibit 34 of this investigation, which consists of Staff Instructions, Staff of the Commander-in-Chief, Pacific Fleet, 1941, and call your attention to paragraph 224, dealing with the Fleet Aviation Officer. That sets forth, does it not, the duties of the Fleet Aviation Officer?

Vice Admiral BELLINGER. That sets forth the duties of the Fleet Aviation Officer on the Staff of the Commander-in-Chief, Pacific Fleet. It has no bearing on my responsibilities and duties as Commander Patrol Wing Two or Commander Task Force Nine or any other duties I had in connection with my job in the forces of the Pacific Fleet.

Mr. SONNETT. I show you, Admiral, exhibit 9 of the Naval Court of Inquiry record, which is a certified copy of a letter from the Secretary of the Navy to the Secretary of War, dated January 24, 1941, and ask whether that letter had ever come to your attention prior to December 7, 1941.

Vice Admiral BELLINGER. I don't want to take your time up reading it, but I have never seen it before.

Mr. SONNETT. Admiral, I show you exhibit 47 of this investigation, which contains Annex number VII, Section VI, to the Joint Coastal Frontier Defense Plan, dated March 28, 1941, and ask you whether you were familiar with that.

Vice Admiral BELLINGER. Yes.

Mr. SONNETT. Will you state the circumstances under which you had connection with that document, Admiral?

Vice Admiral BELLINGER. In connection with the preparing of this document, it came about as a result of a directive from the Commander-in-Chief, Pacific Fleet, and my relation to the Commander Naval Base Defense Force, who was the Commandant of the Fourteenth Naval District. I functioned under him and in connection with the working out of a plan to bring an organization into [473] existence, this document was one of the preliminary features. It was not prepared by me, but some portions of it I did have a chance to criticize and advise in connection with its preparation.

Mr. SONNETT. Did you have any discussions of that document with Admiral Kimmel that you recall, Admiral?

Vice Admiral BELLINGER. No, not with Admiral Kimmel but with Captain Gill, who was the Plans Officer of the Commandant, Fourteenth Naval District, and I am sure I discussed some of the points with Admiral Bloch, who was the Commander Naval Base Defense Force under that setup.

Mr. SONNETT. Do you recall any discussion of that document with any other members of the Commander-in-Chief's Staff?

Vice Admiral BELLINGER. From time to time during the setup of this organization and even after it was in effect, I discussed general aspects of it with Admiral Kimmel, not particularly with reference to this paper, but with reference to subjects which had a bearing on it such as unity of command.

Mr. SONNETT. Referring, Admiral, to exhibit 47 and to page 4, is stated, in part:

The Army will expedite the installation and placing in operation of an aircraft warning service. During the period prior to the completion of the AW installation, the Navy, through use of radar and other appropriate means, will endeavor to give such warning of hostile attacks as may be practicable.

Do you recall any discussion with Admiral Kimmel as to that feature of the Navy's obligation under this agreement?

Vice Admiral BELLINGER. Not prior to December 7th.

Mr. SONNETT. Admiral, I show you some certified copies of documents and ask you whether you can identify those.

Vice Admiral BELLINGER. Yes, I identify those as having been prepared by my organization.

Mr. SONNETT. And the next, too, Admiral, is Addendum I. Can you similarly identify that?

Vice Admiral BELLINGER. Yes, I identify that as an estimate of the situation which was prepared primarily by my organization with the concurrence of the Commander, Army Air Force, in the Hawaiian area.

Mr. SONNETT. Did you personally participate, Admiral, in the preparation of that estimate?

Vice Admiral BELLINGER. I did.

Mr. SONNETT. May we mark that as an exhibit, Admiral?

Admiral HEWITT. Yes.

(The document referred to was received and marked "Exhibit 49.")

Mr. SONNETT. Admiral, for the sake of the record and in order to refresh your recollection of the document, would you read paragraph the Summary of the Situation, and paragraph 3, Possible Enemy Action, into the record?

Vice Admiral BELLINGER (reading):

1. *Summary of the Situation.*

(a) Relations between the United States and Orange are strained, uncertain and varying.

(b) In the past Orange has never preceded hostile actions by a declaration of war.

(c) A successful, sudden raid, against our ships and Naval Installations on OAHU might prevent effective offensive action by our forces in the Western Pacific for a long period.

(d) A strong part of our fleet is now constantly at sea in the operating area organized to take prompt offensive action against any surface or submarine force which initiates hostile action.

[475] (e) It appears possible that Orange submarines and/or an Orange fast raiding force might arrive in Hawaiian waters with no prior warning from our intelligence service.

III. *Possible Enemy Action.*

(a) A declaration of war might be preceded by:

1. A surprise submarine attack on ships in the operating area.

2. A surprise attack on OAHU including ships and installations in Pearl Harbor.

3. A combination of these two.

(b) It appears that the most likely and dangerous form of attack on OAHU would be an air attack. It is believed that at present such an attack would most likely be launched from one or more carriers which would probably approach inside of three hundred miles.

(c) A single attack might or might not indicate the presence of more submarines or more planes awaiting to attack after defending aircraft have been drawn away by the original thrust.

(d) Any single submarine attack might indicate the presence of considerable undiscovered surface force probably composed of fast ships accompanied by a carrier.

(e) In a dawn air attack there is a high probability that it could be delivered as a complete surprise in spite of any patrols we might be using and that it might find us in a condition of readiness under which pursuit would be slow to start, also it might be successful as a diversion to draw attention away from a second attacking force. The major disadvantage would be that we could have all day to find and attack the carrier. A dusk attack would have the advantage that the carrier could use the night for escape and might not be located the next day near enough for us to make a successful air attack. The disadvantage would be that it would spend the day of the attack approaching the islands and might be observed. Under the existing conditions this might not be a serious disadvantage for until an overt act has been committed we probably will take no offensive action and the only thing that would be lost would be complete surprise. Midday attacks have all the disadvantages and none of the advantages of the above. After hostilities have commenced, a night attack would offer certain advantages but as an initial crippling blow a dawn or dusk attack would probably be no more hazardous and would have a better chance for accomplishing a large success. Submarine attacks could be coordinated with any air attack.

Mr. SONNETT. Substantially, Admiral, a basic premise of that estimate [476] was that a Japanese attack on Pearl Harbor without declaration of war was a possibility, was it not?

Vice Admiral BELLINGER. It was.

Mr. SONNETT. And the second basic premise was that in the event of such an attack, it was probable that the attack would be by air?

Vice Admiral BELLINGER. Correct.

Mr. SONNETT. Now, Admiral, referring to the section of that joint estimate entitled Action Open To Us, would you read sub-paragraph (a)?

Vice Admiral BELLINGER (reading):

*IV. Action open to us:*

(a) Run daily patrols as far as possible to seaward through 360 degrees to reduce the probabilities of surface or air surprise. This would be desirable but can only be effectively maintained with present personnel and material for a very short period and as a practicable measure cannot, therefore, be undertaken unless other intelligence indicates that a surface raid is probable within rather narrow time limits.

Mr. SONNETT. Is there any provision, Admiral, under the section dealing with action open to use for reconnaissance of a sector of less than 360 degrees?

Vice Admiral BELLINGER. In this estimate it is not stated that less than 360 degrees might be used effectively, but, of course, it was taken into consideration in all thought and ideas.

Mr. SONNETT. Well, partial reconnaissance, Admiral, was, of course, one type of action open to the fleet, was it not, in order to meet the situation estimated in that joint estimate?

Vice Admiral BELLINGER. Yes, in a degree.

Mr. SONNETT. And that was true, Admiral, both at the date of that estimate—which was about March or April of 1941, was it not?

Vice Admiral BELLINGER. March 31, 1941.

[477] Mr. SONNETT. And similarly remained true throughout the rest of the year up to the time of the attack?

Vice Admiral BELLINGER. Yes, because at no time were we able to cover 360 degrees to the range that we thought was necessary—at any time up to July, 1942, and even later.

Mr. SONNETT. The point I wanted to get clear, Admiral, is although it is not listed in your joint estimate as a possible course of action, nevertheless was a possible and feasible and a practical operation open to the fleet to conduct partial reconnaissance from Oahu, covering certain selected sectors?

Vice Admiral BELLINGER. Yes. This estimate was not to restrict any effort to accomplish the main idea of the estimate.

Mr. SONNETT. Now, did you have any discussion of that estimate with Admiral Kimmel at any time?

Vice Admiral BELLINGER. I don't remember discussing it with him prior to issuing it, but I am certain that he saw it because he talked to me about it, not in detail but in general, and I talked to him in general and sometimes in detail concerning the features of it.

Mr. SONNETT. That is, of course, prior to December 7, 1941?

Vice Admiral BELLINGER. Prior to December 7, 1941, yes.

Mr. SONNETT. Do you recall any discussion of that estimate with other members of Admiral Kimmel's staff?

Vice Admiral BELLINGER. I feel practically sure that I discussed many times with his aviation aide. I don't remember any details of any of the discussions.

Mr. SONNETT. Was there at any time, Admiral, any request on the part of Admiral Kimmel or any member of his staff for clarification or any disagreement [478] as to your joint estimate?

Vice Admiral BELLINGER. Not to my recollection. As a matter of fact, he more or less complimented me on it and particularly so, I remember, when he had returned to Honolulu after a trip to Washington, where some mention apparently had been made of the general plan; not of the estimate in particular, but the general plan to attempt coordination.

Mr. SONNETT. That is, the Naval Base Defense Air Force plan?

Vice Admiral BELLINGER. Yes.

Mr. SONNETT. And this estimate, of course, was the basis upon which that plan was written?

Vice Admiral BELLINGER. Yes.

Mr. SONNETT. Admiral, I show you exhibit 35 of this investigation which is the Pacific Fleet Operating Plan distributed to the fleet in July of 1941, and ask whether you recall having seen that prior to December 7, 1941?

Vice Admiral BELLINGER. Yes, I am familiar with this Rainbow Five plan and we were in the midst of a chart maneuver of this plan by direction of the Commander-in-Chief, Pacific Fleet, prior to December 7th and it hadn't been completed up to December 7th.

Mr. SONNETT. Admiral, will you refer to page 24 of that exhibit and I think you will find there set forth the tasks assigned by the Navy Basic Plan to the Pacific Fleet. I call your attention particularly to subparagraph h and ask if you would read that into the record.

Vice Admiral BELLINGER (reading):

h. Protect the territory of the associated powers in the Pacific area and prevent the extension of enemy military power into the Western Hemisphere by destroying hostile expeditions and by supporting land and air forces in denying the enemy the use of land positions in that hemisphere.

[479] Mr. SONNETT. And will you refer now, Admiral, to pages 25 and 26 and you will there find that the initial tasks of the Pacific

are divided into two phases, do you not, phase IA and phase I?  
 ce Admiral BELLINGER. Yes.

r. SONNETT. Admiral, will you read into the record phase I-b,  
 and I-m of the initial tasks of the Pacific Fleet?

ce Admiral BELLINGER (reading):

Maintain Fleet security at bases and anchorages and at sea.  
 Protect the communications and territory of the associated powers and pre-  
 vent the extension of enemy military power into the Western Hemisphere by  
 working with light forces and patrol planes, and by the action of striking  
 forces as necessary. In so doing support the British naval forces south of the  
 equator as far west as longitude 155° east.  
 Guard against surprise attack by Japan.

r. SONNETT. Admiral, it was, therefore, an assigned initial task  
 of the Pacific Fleet to guard against a surprise attack at Pearl Harbor,  
 is it not?

ce Admiral BELLINGER. Evidently, yes, from the point of view  
 of the Commander-in-Chief, Pacific Fleet, took upon himself to try  
 to bring about a coordinated organization to take care of such an attack.  
 However, I would like to refer you to a statement by the Commander  
 of the Hawaiian Air Force. I was on an Army-Navy board to en-  
 deavor to adjust the control of certain airfields that were in the island  
 of Oahu and in connection with this board's report there is a state-  
 ment as follows in paragraph 4: "The problem confronting the Board  
 pertains to Army aviation was summed up by the Army representa-  
 tives as follows: The mission of the Army on Oahu is to defend the  
 Pearl Harbor naval base against all attacks by an enemy. The con-  
 dition to be [480] made by the Hawaiian Air Force in  
 carrying out this mission is to search for and destroy enemy surface  
 vessels within radius of action by bombardment aviation; to detect, in-  
 spect, and destroy enemy aircraft in the vicinity of Oahu by pursuit  
 aviation." It is therefore indicated to me that the Army also assumed  
 responsibility for the air defense of the Pearl Harbor naval base.  
 r. SONNETT. For the sake of the record, Admiral, what is the date  
 of that report?

ce Admiral BELLINGER. The date of that report is 31 October 1941.  
 The board members are listed as Major General F. L. Martin, USA,  
 Rear Admiral P. N. L. Bellinger, USN, Brigadier General H. C.  
 Hodson, USA, and Lieutenant Commander S. E. Burroughs, USN.  
 The report was signed by General F. L. Martin, Major General, USA,  
 Rear Army Member, and P. N. L. Bellinger, Rear Admiral, USN,  
 Rear Naval Member.

r. SONNETT. Admiral, it was true, was it not, that under the Joint  
 Initial Frontier Defense Plan, the Navy had the obligation to conduct  
 long range reconnaissance?

ce Admiral BELLINGER. Yes.

r. SONNETT. And that obligation, of course, remained right up to  
 the time of the attack?

ce Admiral BELLINGER. It did in the setup, although I would like  
 to draw attention to the fact that, How was the Navy going to do  
 and carry out the war plan, Rainbow Five?—because the available  
 forces couldn't be in two places at one time.

r. SONNETT. Referring, Admiral, to page 12 of the war plan, I  
 have you will find set forth the composition of Task Force Nine.  
 Would you read that into the record?

[481] Vice Admiral BELLINGER (reading):

*TASK FORCE NINE (Patrol Plane Force) Commander Aircraft Scouting Force*

|                                       |        |
|---------------------------------------|--------|
| All units of Aircraft-----            | 107 VP |
| Scouting Force-----                   | 2 AV   |
|                                       | 2 AVP  |
|                                       | 4 AVD  |
| Utility Squadron from Base Force----- | 10 VJR |

Mr. SONNETT. Could you state just in general, Admiral, what 107 VP's were?

Vice Admiral BELLINGER. The 107 VP's were supposed to be fly boats, twin-engine. As a matter of fact, we did not have that many planes on December 6th and our total number, as I recall, was eight one, in varying degrees of readiness.

Mr. SONNETT. Admiral, I show you a carbon copy of a letter dated 20 December 1941, from Commander Task Force Nine to Command in-Chief and ask you whether you can identify that as a copy of a letter sent by you.

Vice Admiral BELLINGER. I do identify it as such.

Mr. SONNETT. May we mark it as an exhibit, Admiral?

Admiral HEWITT. Yes.

(The document referred to was received and marked "Exhibit 50A.")

Mr. SONNETT. Incidentally, Admiral Bellinger, to this letter have annexed copies of various dispatches referred to in the fifth paragraph of the letter. Would you take a look at those and see if you can identify those, too, so we can make them part of the record?

Vice Admiral BELLINGER. Yes.

Mr. SONNETT. May we mark the dispatches, Admiral, as exhibit 50A?

Admiral HEWITT. Yes.

[482] (The documents referred to were received and marked "Exhibit 50A.")

Mr. SONNETT. Referring to exhibit 50, Admiral, which is the letter you have just identified, at page 2 you give a total of seventy-two patrol planes in the air or ready for flight in four hours or less and subsequently you show that there were nine planes undergoing repairs making a total of eighty-one planes. Now, is that the correct figure of the number of patrol planes which you had in Task Force Nine?

Vice Admiral BELLINGER. That is the correct number, to the best of my information.

Mr. SONNETT. Admiral, with respect to the number of planes which you had in Task Force Nine, which you have stated to be eighty-one patrol planes, what efforts had been made to obtain additional planes?

Vice Admiral BELLINGER. There is a letter on record, the first letter wherein I tried to paint the picture out there. That letter was dated January 16, 1941, and was the start. There was a lot of effort made on my part to improve the situation out there, covering the over-all situation. Planes are no good unless you have places to operate from and facilities to operate on and spare parts. I will give you a copy if I have it here, but it is all in the files somewhere. It wasn't so many numbers of planes in this case—the numbers were more or less controlled by the Navy Department—as it was of getting those that were assigned to us in a condition of readiness and operating ability to the maximum extent. If you really want to know what I have done

on this subject, I will have to go through the records, because there was an awful lot of letters written.

For instance, I would like to invite your attention to one letter dated 22 October 1941, and I am asking in that letter for "180 long-range, [483] high speed, landplane bombers, equal or superior to the B-17-E, and 180 interceptor fighters of the best performance available." That was in addition to any that we had, and that was in this letter, which is file 0026 of 22 October 1941.

Mr. SONNETT. Admiral, I show you a photostatic copy of a letter with several endorsements thereon and ask you whether it is a copy of the letter to which you have just referred.

Vice Admiral BELLINGER. It is.

Mr. SONNETT. And you, I take it, can also identify the endorsements, Admiral?

Vice Admiral BELLINGER. I do.

Mr. SONNETT. May we mark that, Admiral, as an exhibit?

Admiral HEWITT. Yes.

(The document referred to was received and marked "Exhibit 51.")

Mr. SONNETT. Admiral, referring to exhibit 51, which is the letter you have just identified, that letter was concerned, was it not, with the aircraft requirements for offensive action?

Vice Admiral BELLINGER. Both offensive and defensive.

Mr. SONNETT. I call your attention particularly, Admiral—

Vice Admiral BELLINGER. Suppose I say this: Both offensive and defensive, primarily offensive, because the flying boat was known to have very little offensive power unless used under special conditions.

Mr. SONNETT. That appears particularly from the sentence in paragraph 1 reading, Admiral: "It is respectfully submitted that the Fleet is not adequately prepared for a campaign in the Pacific until, in addition to present types of aircraft, it is provided with an air striking force of high speed, long range [484] landplane bombers at least equal in performance to the B-17-E"; so that that letter was not concerned with increasing the present types of aircraft primarily used for reconnaissance, but rather was primarily concerned with getting additional planes to be used primarily offensively, is that correct?

Vice Admiral BELLINGER. Correct. It was designed primarily to bring about a more acceptable situation for the United States Navy in the Pacific.

Mr. SONNETT. Do you know what, if any, action was taken upon the recommendations made by you in exhibit 51?

Vice Admiral BELLINGER. There were no actual results obtained from it.

Mr. SONNETT. Admiral, I show you a letter dated January 16, 1941, and ask you whether it is a copy of a letter sent by you.

Vice Admiral BELLINGER. It is.

Mr. SONNETT. May we mark that, Admiral, as an exhibit and we will return the exhibit to Admiral Bellinger after we have had it copied?

Admiral HEWITT. Yes.

(The document referred to was received and marked "Exhibit 52.")

Mr. SONNETT. Admiral, this exhibit 52, your letter of January 16, 1941, summarizes the situation as to the aircraft as of that time, does it not?

Vice Admiral BELLINGER. It did.

Mr. SONNETT. And points out various deficiencies and requirements for the patrol wings?

Vice Admiral BELLINGER. It does.

Mr. SONNETT. Was it the fact, sir, that during the year 1941 prior to the attack, there were additional planes sent out to the Pacific Fleet?

Vice Admiral BELLINGER. Yes, there were additional planes sent [485] and also a newer type of plane, but I would like to draw attention in this letter, which is dated January 16, 1941, in paragraph 2 (b) the following quotation, which is referring to an OpNav confidential letter: "In about one year practically all Fleet aircraft except Patrol Wing Two will have armor and fuel protection," and the planes which were discussed in this letter actually arrived on the following dates: VP 11, with twelve planes, arrived in the Hawaiian area on 28 October 1941; VP 24, with six planes, arrived on 28 October 1941; VP 12, with twelve planes, arrived on 8 November 1941; VP 23, with twelve planes, arrived on 23 November 1941; VP 14, with twelve planes, arrived on 23 November 1941. Most of these planes and squadrons were replacements, and, I believe, some additions, to the old planes which we had prior thereto. But note that they arrived about a year after the above-quoted statement was made, as predicted.

Mr. SONNETT. As I figure it, Admiral, that makes a total of fifteen new planes delivered in October and November, 1941?

Vice Admiral BELLINGER. Correct.

Mr. SONNETT. And those, added to the planes you had and kept, made a total of eighty-one—

Vice Admiral BELLINGER. That is correct.

Mr. SONNETT. From November to December 7, 1941?

Vice Admiral BELLINGER. But remember that practically all of the planes weren't additional groups or squadrons of planes; they were replacement planes with the newer type of PBY-5 type.

Mr. SONNETT. Admiral, after the attack on December 7, 1941, understand that additional planes were sent out to Pearl Harbor?

Vice Admiral BELLINGER. Yes, there were.

Mr. SONNETT. Can you recall in round numbers how many additional patrol planes and where they came from, if you know?

Vice Admiral BELLINGER. They came from the Pacific Coast and the Atlantic Fleet and I think there were about forty-odd planes.

[468] Mr. SONNETT. Do you know why those forty-odd planes could not have been sent prior to the attack?

Vice Admiral BELLINGER. I sent a squadron commander, who departed from Pearl Harbor with his squadron for replacement planes to Washington to find out what was the situation with reference to the Pacific and why were we the last ones to be re-equipped, and the answer he gave me upon his return to Pearl Harbor was that the Atlantic Fleet had priority.

Mr. SONNETT. Admiral, referring again to this period from the 1st of November up to the time of the attack on December 7th, you had a total of eighty-one patrol planes in Task Force Nine, as I understand it?

Vice Admiral BELLINGER. Correct.

Mr. SONNETT. Now, do you recall the number of Army planes which were suitable for long-range reconnaissance and which could have been made available during that period of time?

Vice Admiral BELLINGER. No, I do not know the exact number or even an accurate approximate number because it was very difficult to get that information from the Army. It appears that their situation was changing quite rapidly and continually as their planes of the long-range bomber type were being sent to the Philippines.

Mr. SONNETT. Did they report some six or eight available during that period of time, B-17's?

Vice Admiral BELLINGER. In accordance with the operational directives prepared by the Commanding General, Hawaiian Air Force, and myself, a report of planes that were available—that could be made available to the other command, was sent to the appropriate command every day. I have here a copy of a dispatch from the Headquarters, Hawaiian Air Force, to Commander, Naval Base Defense Air Force, as of 5 December 1941, which indicates [487] that there were eight B-17's, twenty-one B-18's, and six A-20's which were to be considered available when made available.

Mr. SONNETT. Admiral, the range of the B-17's was sufficient for long-range reconnaissance from Oahu, was it not?

Vice Admiral BELLINGER. It was, in the conception of long-range at that time.

Mr. SONNETT. About what was the range of the B-17?

Vice Admiral BELLINGER. Without bomb load they were supposed to be able to cover a sector of radius about 800 miles.

Mr. SONNETT. And of the B-18's, Admiral?

Vice Admiral BELLINGER. In this B-17 situation I just spoke about, the range applied without bomb load or not more than one-half bomb load. That meant they had to put an extra gas tank in the vacant bomb bay.

The B-18's were supposed to have a reconnaissance radius of approximately 300 miles.

Mr. SONNETT. And the A-20's?

Vice Admiral BELLINGER. About 150 miles radius.

Mr. SONNETT. Also for the sake of the record we might also get the range of the PBY-4 and 5, Admiral, if you will state that.

Vice Admiral BELLINGER. PBY-5's and 4's had a radius of approximately 700 miles.

Mr. SONNETT. Admiral, it was the fact, was it not, that after the attack on December 7th, long-range reconnaissance was conducted, using the PBY's, the B-17's, the B-18's as well?

Vice Admiral BELLINGER. That is correct, except the B-18's did not have long-range. I made a mistake some time back. I said PBY-4's and 5's. I should have said PBY-3's and 5's. The PBY-3's had a practical operating radius of [488] approximately 600 miles.

Admiral HEWITT. We will adjourn for lunch at this time.

(The investigation then, at 1 p. m., adjourned until 2 p. m., at which time it reconvened.)

(Present: The same parties as during the morning session.)

Vice Admiral Patrick N. L. Bellinger, USN, after having been warned that his previous oath was still binding, resumed his seat as witness.

Mr. SONNETT. Admiral, you have produced a letter of December 1940, from Commander Patrol Wing Two to Chief of Naval Operations, together with various endorsements. Are those copies of documents which were sent to the Chief of Naval Operations?

Vice Admiral BELLINGER. They are.

Mr. SONNETT. May we mark that, Admiral, as exhibit 53?

Admiral HEWITT. Yes.

(The document referred to was received and marked "Exhibit 53.")

Vice Admiral BELLINGER. I would like to add that there are many other letters relating to deficiencies that were sent in with the idea of trying to increase the effectiveness of the patrol wings in the Pacific.

Mr. SONNETT. Admiral, referring back to the Pacific Fleet war plan, paragraphs 3141 and 3143, at page 32, sir, set forth the initial tasks assigned to the patrol planes. Would you read those into the record, please, Admiral?

Vice Admiral BELLINGER (reading):

3141. *Task Force Nine* will perform the tasks assigned in the following paragraphs of this section.

[489] 3142. On W-day transfer twelve patrol planes and two tenders each of the Pacific Southern and Pacific Northern Naval Coastal Frontiers. Continue administration of these forces and rotate detail at discretion.

3143. Perform tasks assigned in the patrol and sweeping plan (Annex I).

Mr. SONNETT. Would you refer, Admiral, to Annex I, the Patrol and Sweeping Plan, and read paragraph 2 into the record?

Vice Admiral BELLINGER (reading):

2.

*Phase I*

This Fleet will, in the Pacific Area, protect the territory and sea communications of the Associated Powers by:

(a) Patrolling against enemy forces, particularly in the vicinity of the Hawaiian Islands; and on shipping lanes (1) West Coast-Hawaii, (2) Trans-Pacific westward of Midway and (3) in South Seas in vicinity of Samoa.

(b) Escorting as conditions require and forces available permit.

(c) Covering.

(d) Employing striking forces against enemy raids and expeditions.

(e) Routine shipping.

Mr. SONNETT. Admiral, will you also examine paragraph 3 (d) and read that into the record?

Vice Admiral BELLINGER (reading):

3. (d) *Task Force Nine* (Patrol Plane Force).

(1) Having due regard for time required to overhaul and upkeep planes and for conservation of personnel, maintain maximum patrol plane search against enemy forces in the approaches to the Hawaiian area.

[490] (2) Initially base and operate one patrol plane squadron from Midway. At discretion increase the number of planes operating from bases to westward of Pearl Harbor to two squadrons, utilizing Johnston and Wake as facilities thereat and the situation at the time makes practicable.

(3) Be prepared, on request of Commander *Task Force Three*, to transfer patrol squadron and tenders to that force for prompt operations in the South Pacific.

(4) Be particularly alert to detect disguised raiders.

(5) In transferring planes between bases, conduct wide sweep enroute.

(6) Planes engaged in training operations furnish such assistance to Navy Coastal Frontiers in which based as may be practicable.

(7) Effect closest cooperation practicable with surface forces engaged in sweeping during initial sweep of Phase IA.

(8) Modify patrols as necessary in order to carry out tasks assigned in Marshall Raiding and Reconnaissance Plan (Annex II to Navy Plan O-1.)

(9) Units operating from outlying bases cooperate, to the extent compatible with assigned tasks, with other forces thereat. Be guided by principles of command relationship set forth in Annex IV to Navy Plan O-1.

Mr. SONNETT. Admiral, the Phase I initial tasks assigned to the patrol planes were tasks to be performed when Japan was not in the war, were they not?

Vice Admiral BELLINGER. That is correct.

Mr. SONNETT. Admiral, referring to page 15 of the War Plan, will you read into the record the general assumption on which the war plan is based?

[491] Vice Admiral BELLINGER. "That the Associated Powers, comprising initially the United States, the British Commonwealth, (less Eire), the Netherlands East Indies, the Governments in Exile, China, and the "Free French" are at war against the Axis powers, comprising either:

1. Germany, Italy, Roumania, Hungary, Bulgaria, or
2. Germany, Italy, Japan, Roumania, Hungary, Bulgaria, and Thailand."

Mr. SONNETT. As to the second general assumption, Admiral, namely, that the United States was at war with the Axis powers, including Japan, was it in your mind, as set forth in your estimate, that war with Japan was apt to commence by surprise attack without declaration of war?

Vice Admiral BELLINGER. Yes, that was the estimate, the basis of the estimate.

Mr. SONNETT. So that the plan, then, might have become effective as to Japan in the event of a surprise attack by Japan without declaration of war?

Vice Admiral BELLINGER. Yes.

Mr. SONNETT. Admiral, I show you exhibit 8 of the Naval Court of Inquiry record, Pacific Fleet Confidential Letter number 2CL-41 (Revised), dated October 14, 1941, and ask you whether you saw that at or about the time of its issuance.

Vice Admiral BELLINGER. Yes.

Mr. SONNETT. Admiral, would you read assumption (b) of that letter into the record?

Vice Admiral BELLINGER (reading):

That a declaration of war may be preceded by;

- (1) a surprise attack on ships in Pearl Harbor.
- (2) a surprise submarine attack on ships in operating area,
- (3) a combination of these two.

[492] Mr. SONNETT. You will note subsequently in the letter, Admiral, that there are provisions for air patrol. Would you refer to provision (B) concerning air patrol and read that into the record?

Vice Admiral BELLINGER (reading):

(2) Air Patrols:

- (a) Daily search of operating areas as directed, by Aircraft, Scouting Force.
- (b) An air patrol to cover entry or sortie of a Fleet or Task Force. It will search that part of a circle of a radius of thirty miles from the entrance channel buoys which is south of latitude 21°-20' No. The Fleet or Task Force Commander concerned shall furnish this patrol, establishing it at least two hours prior to the sortie or entrance, and arranging for its discontinuance. When a sortie and entry occur in succession, the Commander entering shall supply this patrol.
- (c) Air patrol during entry or departure of a heavy ship at times other than

described in foregoing subparagraph. The ship concerned shall furnish the mentioned therein.

Mr. SONNETT. Admiral, were those provisions for air patrol carried out between October 14, 1941, and December 7, 1941.

Vice Admiral BELLINGER. Prior to December 7, 1941?

Mr. SONNETT. Yes.

Vice Admiral BELLINGER. Yes, I am practically sure they were.

Mr. SONNETT. And in addition to the air patrol provided for in security letter, patrols were run from Midway and Wake, were they not?

Vice Admiral BELLINGER. The patrols run from Midway and Wake were for a certain period of time, as specifically directed by the Commander-in-Chief, Pacific.

[493] Mr. SONNETT. Was there any discussion, Admiral, during the months of October, November, and up to December 7, 1941, of the necessity or advisability of a partial patrol or reconnaissance of Oahu as a fleet security measure?

Vice Admiral BELLINGER. Patrols had been ordered to be run during various periods of time during 1941 and they were carried out as directed.

Mr. SONNETT. Do you recall any discussion of the question of partial reconnaissance during the months of October, November, and up to December 7, 1941?

Vice Admiral BELLINGER. No, not other than the ones that had been directed by this letter.

Mr. SONNETT. That is, the fleet security letter?

Vice Admiral BELLINGER. The fleet security letter.

Admiral HEWITT. Which were merely of the operating area.

Mr. SONNETT. Merely of the operating area.

Vice Admiral BELLINGER. Wait a minute. October, November, and December?

Mr. SONNETT. Yes.

Vice Admiral BELLINGER. I don't remember the exact date that the last patrol, other than was directed in this letter, was ordered carried out. It may have been in October. Actually there had been operations, training operations, simulating air attack, where carriers entered the training phase to simulate an attacking force and patrols had been carried out in connection with that effort, but from pure security considerations, I am in doubt as to when the last one had been ordered ordered.

Mr. SONNETT. Was there any reconnaissance from Oahu, other than of the fleet operating areas, during the period November 27 to December 7, 1941?

Vice Admiral BELLINGER. No, not other than the movement that took place [494] between Wake, Midway and the Hawaiian Islands. The planes making those trips were directed to observe. However, as a part of planned internal Patrol Wing Tactical Exercises covering the period 1 to 4 Dec. 1941 and not as a part of any directed fleet reconnaissance, to the best of my remembrance, scouting flights were conducted daily covering a sector of approximately 90 degrees to a distance of 300 miles by probably one squadron for the sector per day. Each day there was a different sector. These scouting flights were solely for training in connection with the Wing Tactical Exercises. Usual

lane Tender was employed as the objective of search and a sled  
d by the Tender served as a bombing target. I cannot recall the  
rs utilized in the above exercises.

. SONNETT. There has been previous testimony, Admiral, to the  
that some time around July or August, 1941, Admiral Bloch  
sted Admiral Kimmel to direct a reconnaissance on a sector to-  
s Jaluit and that this was done for several days. What do you  
of that?

Admiral BELLINGER. On what? Jaluit?

. SONNETT. Yes, on a sector towards Jaluit.

Admiral BELLINGER. It may have been done. I do not remem-  
but I did not know the originator of the idea, nor any reason con-  
ng such idea. I am not sure that it was done towards Jaluit.

. SONNETT. Admiral, I refer you to page 6 of the fleet security  
as revised on August 14, 1941, to sub-paragraph 3, and ask if  
ould read that into the record.

[4a] Vice Admiral BELLINGER. "It must be remembered too,  
a single submarine attack may indicate the presence of a con-  
ble surface force probably composed of fast ships accompanied  
carrier. The Task Force Commander must therefore assemble  
ask Groups as quickly as the situation and daylight conditions  
nt in order to be prepared to pursue or meet enemy ships that  
e located by air search or other means."

. SONNETT. There were various submarine contacts reported  
to December 7, 1941, were there not, Admiral?

Admiral BELLINGER. No, not to my knowledge.

. SONNETT. Admiral, do you recall whether there was any air  
directed prior to the attack for the purpose of attempting to  
any alleged reports of the presence of submarines?

Admiral BELLINGER. There were sound contacts, as I remem-  
nd [495] the question was raised, Were they submarine  
cts? and, as I remember it, there was considerable local effort,  
with reference to patrol planes and to surface craft, to verify  
sound contacts, but to my knowledge, no submarine was ever seen.

. SONNETT. Who directed the patrols in those cases?

Admiral BELLINGER. When the Commander, Scouting Force,  
e Senior Officer Present, he directed it until the Commander-in-  
Pacific Fleet, was present; then he directed it.

. SONNETT. Do you recall any discussion with Admiral Kimmel  
th Admiral Bloch concerning the submarine contacts prior to  
ber 7, 1941?

Admiral BELLINGER. I remember discussing it with many  
e, but I don't know that I remember discussing it with Admiral  
personally or Admiral Kimmel personally. It was a question,  
t a submarine or was it not?—and that appeared to be a moot  
on among those who had actually made the sound contact.

. SONNETT. Admiral, I show you exhibit 37 of this investigation,  
consists of a photostatic copy of a letter dated November 19,  
from the Commander Task Force Nine to the Commander-in-  
U. S. Pacific Fleet, and which annexes a schedule, and which  
t also contains a photostatic copy of a mailgram dated 22 No-  
r 1941 from CincPac to Compatwing Two, and ask you whether  
cognize those documents.

Vice Admiral BELLINGER. I do.

Mr. SONNETT. Admiral, would you state what the schedules annexed to your letter of November 19, 1941, show as to aircraft patrol from Oahu?

Vice Admiral BELLINGER. They do not directly show any patrol search operations. However, in advance base operations my policy was, and as written down for the guidance of the patrol wings, that when any squadron was based at [496] an advance base, that they would carry on patrols for security reasons; and also, in connection with this schedule, although it does not show the morning patrol that was required in this security letter of the Commander-in-Chief Pacific, it was an understood fact that those patrols would continue and did continue.

Mr. SONNETT. Those were patrols of the operating areas, Admiral?

Vice Admiral BELLINGER. Those were patrols of the daily assigned operating areas.

Mr. SONNETT. That mailgram, Admiral, from CincPac to you, was the approval by the Commander-in-Chief of those schedules submitted by you, is it not?

Vice Admiral BELLINGER. It is.

Mr. SONNETT. Admiral, I show you a series of photostatic documents and ask you whether you can identify them.

Vice Admiral BELLINGER. Yes, they represent the watch and duty schedules and the general employment of Patrol Wings One and Two and those planes considered part of the Fleet Air Detachment.

Mr. SONNETT. May we mark those, Admiral, as an exhibit?

Admiral HEWITT. Yes.

58 (The documents referred to were received and marked "Exhibit 54.")

Mr. SONNETT. Referring to exhibit 54, which you have just identified, Admiral, and to the schedules for the period November 27th to December 7, 1941, will you discuss any provision of the schedules relating to aircraft patrol from Oahu?

Vice Admiral BELLINGER. Where you note the nomenclature "DP" it refers to the dawn patrol, and each day a squadron was assigned to that duty.

[497] Mr. SONNETT. And again, Admiral, for the sake of the record, the dawn patrol was the patrol of the operating areas?

Vice Admiral BELLINGER. Correct.

Mr. SONNETT. As illustrative, Admiral, of the schedules in question, would you, referring to December 7, 1941, schedule, read into the record the assignments of the patrol squadrons?

Vice Admiral BELLINGER. On December 7th, Patrol Squadron 2, first division, was secured; Patrol Squadron 22, second division, secured; Patrol Squadron 23, first division, secured; Patrol Squadron 2, second division, secured; Patrol Squadron 24, tactics with submarines and the Pearl Harbor ready duty division; Patrol Squadron 11, tactics with submarines and Kaneohe ready duty division; Patrol Squadron 12, secured; Patrol Squadron 14, dawn patrol; division making dawn patrol secured upon completion, other division normal duty, 7 to 13, except Saturdays and Sundays. Not listed in the above squadrons was Patrol Squadron 21, which was on advance base duty at Midway. Patrol Squadron 22 had returned from Midway on 5 December after

a tour of duty at Midway and Wake since 17 October. This squadron had had strenuous duty at those bases and was in a state of rehabilitation and maintenance.

Mr. SONNETT. Referring back, Admiral, to your letter of November 19, 1941, forwarding the schedule for the planes to the Commander-in-Chief for approval, which letter is part of exhibit 37, the letter reads in paragraph 1, "Changed conditions have necessitated a revision of the schedule for units of Task Force Nine for the remainder of the second quarter." Do you recall, Admiral, what the changed conditions were that you referred to in that letter?

Vice Admiral BELLINGER. I can't remember positively. It may have been because of the assignment of Patrol Squadron 22 to the Midway-Wake area or it may have been due to a change in directive from the Commander-in-Chief, [498] Pacific, wherein the task force organizations were changed. At one time patrol squadrons were assigned to the various task force commanders, One, Two, and Three, and their schedule of employment was more or less controlled by those task force commanders.

Mr. SONNETT. Admiral, I show you exhibit 15 of the Naval Court of Inquiry, which is a dispatch from the Chief of Naval Operations to CincAF, CincPac, and others, dated November 24, 1941, and ask you whether you saw that prior to December 7, 1941.

Vice Admiral BELLINGER. I did not.

Mr. SONNETT. Did you know that such a dispatch or some such dispatch had been received about that time?

Vice Admiral BELLINGER. Not till subsequent to December 7th.

Mr. SONNETT. I refer you, Admiral, to exhibit 17 of the Naval Court of Inquiry, a dispatch from the Chief of Naval Operations to CincAF, CincPac, and others, dated November 27, 1941, which is the so-called war warning, and ask whether you saw that prior to December 7, 1941.

Vice Admiral BELLINGER. I did not.

Mr. SONNETT. Did you know that such a dispatch had been received?

Vice Admiral BELLINGER. Not until subsequent to December 7, 1941.

Mr. SONNETT. I refer you to exhibit 19 of the Naval Court of Inquiry a dispatch from the Chief of Naval Operations, dated November 28, 1941, sent for information to CincPac, among others, and ask whether you saw that dispatch or knew of it prior to the attack on December 7, 1941.

Vice Admiral BELLINGER. I did not.

Mr. SONNETT. Admiral, I show you exhibit 22 of this investigation, which consists of daily communication intelligence summaries, and ask whether you saw those prior to December 7, 1941.

[499] Vice Admiral BELLINGER. No, I don't remember seeing any of these.

Mr. SONNETT. I show you exhibit 26 of this investigation, which consists of photostatic copies of intelligence reports by Lieutenant Commander Layton between October 6, 1941, and December 2, 1941, and ask whether you saw any of those prior to the attack.

Vice Admiral BELLINGER. No.

Mr. SONNETT. I show you exhibit 23 of this investigation, a memorandum, dated December 1, 1941, from the Fleet Intelligence Officer to the Admiral on the subject of the location of the Orange fleet, and ask whether you saw that prior to the attack.

Vice Admiral BELLINGER. No, I don't remember ever seeing it.

Mr. SONNETT. Admiral, do you recall anything concerning a proposed Army reconnaissance flight over the Mandated Islands which was discussed toward the end of November, 1941?

Vice Admiral BELLINGER. Towards the end of November, 1941.

Mr. SONNETT. Yes.

Vice Admiral BELLINGER. No. I do not recall such proposition.

Mr. SONNETT. I show you exhibit 28 of this investigation, a memorandum by Lieutenant Commander Layton on that subject, and whether that refreshes your recollection concerning the matter.

Vice Admiral BELLINGER. I don't remember any specific plan or even a proposal.

Mr. SONNETT. Admiral, during the last half of November and to December 7, 1941, what was your estimate of the location and movements of Japanese ships, particularly Japanese carriers?

Vice Admiral BELLINGER. I didn't know where they were.

Mr. SONNETT. Did you receive any intelligence on that subject—

[500] Vice Admiral BELLINGER. No.

Mr. SONNETT. During that period of time?

Vice Admiral BELLINGER. No.

Mr. SONNETT. Or have any discussion with Admiral Kimmel or Admiral Bloch on that subject during that period of time?

Vice Admiral BELLINGER. No. I recall no such discussion.

Mr. SONNETT. Did you know before the attack that a direction had been issued to CincPac on or about November 27, 1941, in substance to the following language: "Execute an appropriate defensive deployment preparatory to carrying out the tasks assigned in WPL 46"?

Vice Admiral BELLINGER. No.

Mr. SONNETT. Do you recall any discussion between November 27 and December 7, 1941, concerning deployment of fleet or aircraft?

Vice Admiral BELLINGER. I am trying to remember the date on which a conference took place in the Commander-in-Chief, Pacific Fleet office wherein several of the fleet commands, myself included, and the Army and also the District Commandant were present, and that was in connection with the movement of Marine planes to Wake and Midway. Now, the reason for that—a specific dispatch or even a discussion of the reasons for it, other than general bolstering up defenses, was discussed, as I remember.

Mr. SONNETT. Admiral, I show you exhibit 18 of the Naval Court of Inquiry, a dispatch of November 26, 1941, from the Chief of Naval Operations to CincPac, and ask you whether you saw that dispatch.

Vice Admiral BELLINGER. I don't remember seeing this dispatch, I think I attended a conference which evidently was in connection with this dispatch, that is, in carrying out some of the details of the dispatch.

[501] Mr. SONNETT. There is one other dispatch I would like to call to your attention, Admiral, and that is exhibit 13 of the Naval Court of Inquiry, a dispatch from the Chief of Naval Operations, dated October 16, 1941, to CincPac, among others, and ask whether you remember having seen that.

Vice Admiral BELLINGER. No, I don't remember ever seeing that dispatch prior to December 7th.

Mr. SONNETT. I call your attention, Admiral, to the following portion of that dispatch: "In view of these possibilities, you will take

due precautions including such preparatory deployments as will not disclose strategic intention nor constitute provocative actions against Japan." Do you recall being consulted as to any preparatory deployments after October 16, 1941, and prior to the attack?

Vice Admiral BELLINGER. No. If I was called in in connection with any deployment, the reasons for it weren't connected with this dispatch, that is, they weren't explained to me as having any relation to a particular dispatch as I hadn't seen the dispatch.

Mr. SONNETT. Referring to exhibit 19, which was the November 28th dispatch from the Chief of Naval Operations, which you previously testified, Admiral, you hadn't seen, that provided in part that CincPac was directed to "Be prepared to carry out tasks assigned in WPL 46 in so far as they apply to Japan in case hostilities occur." Do you recall any conference or discussion as to the steps to be taken in order to be prepared to carry out the tasks assigned in WPL 46?

Vice Admiral BELLINGER. No.

Mr. SONNETT. Admiral, a hypothetical question. Had you known of these dispatches which have just been shown to you prior to the attack and bearing in mind that the initial tasks of the Pacific Fleet and specifically [502] of Task Force Nine included reconnaissance from Oahu, would you have recommended that such reconnaissance or partial reconnaissance be instituted?

Vice Admiral BELLINGER. That question was asked me once before and I will have to give you almost the same answer, which is that God only knows what I would have done, but I hope I would have recognized the situation.

Mr. SONNETT. Admiral, will you state for the record what reconnaissance could have been run from Oahu with the Navy planes available during the period November 27th to December 7, 1941?

Admiral HEWITT. Do you mean what patrol could have been maintained on a continuous basis?

Mr. SONNETT. Well, I think he will develop that in his answer, Admiral. As I recall his previous testimony, he said they could have maintained a 360 degree reconnaissance for a limited time; they could have maintained 144 degrees by dividing the crews in three indefinitely. That is my recollection.

Admiral HEWITT. Of course, on 27 November they had no idea that the attack was coming on the 7th. They had no way to time it. They had to make plans for patrol indefinitely.

Vice Admiral BELLINGER. That is a very difficult question to answer. You must remember that between 28 October and 23 November, of the eighty-one planes available later, fifty-four of these had arrived and they were the PBY-5 type and the spare parts for those planes weren't available. Also, the number of plane crews available scarcely exceeded—if I remember correctly, did not quite equal the number of planes we had available. A lot of things can be done in an emergency and when pressure is on. That was demonstrated in the Battle of Midway; the flying time carried on by plane crews under stress exceeded by far what was thought the human equation could stand.

[503] Normally speaking, considering eighty-one planes available and considering the fact that we hoped the planes wouldn't break down and be put out of commission from lack of spare parts, it was practical, of course, to utilize one-third for daily patrol, covering sectors that were estimated to be the most vital. However, you must

remember that the time of starting these operations and the duration of them would have a tremendous effect on the force that would be available at any subsequent time for further projected operations. But, normally speaking, I would say that a plane and a plane could have been used one day in three.

Mr. SONNETT. And how large a sector could be covered in that fashion, Admiral?

Vice Admiral BELLINGER. Normally speaking, we considered eight degrees for 800 mile radii of operations to be what one plane would cover, and multiply that by the number of planes and you have the number of degrees of the sector.

Admiral HEWITT. You did testify before to 144, based on eight planes, which is one-third of 144.

Vice Admiral BELLINGER. Did I say 800 miles? Make that 700 miles and the eight degrees.

Mr. SONNETT. Admiral, referring to your memorandum or letter of December 20, 1941, which is exhibit 50, it appears that nine planes were undergoing repairs on December 7, 1941, and that eleven planes were at Midway, which, I take it, would leave approximately sixteen planes available at Oahu.

Vice Admiral BELLINGER. Sixty-one, and that is including the squadron that had just returned from Midway, having also served there at Wake. They were in commission. They had just returned. They weren't listed, as I remember, [504] as being in a state of overhaul, but they were due for considerable checking.

Mr. SONNETT. With those sixty-one planes, Admiral, and dividing the sixty-one planes into three, I take it that reconnaissance could have been run from Oahu, therefore, covering a sector of approximately 160 degrees?

Vice Admiral BELLINGER. That is possible, yes.

Mr. SONNETT. Now, eliminating the squadron which had just returned, Admiral, would you have given you about fifty Navy planes available, I take it?

Vice Admiral BELLINGER. Forty-nine.

Mr. SONNETT. Forty-nine. And with the forty-nine planes available, you could have had a daily reconnaissance covering about 160 degrees?

Vice Admiral BELLINGER. Yes, that is possible.

Mr. SONNETT. Would that have been not only possible, Admiral, but practical or the practicable measure and for how long could it have been continued on that basis?

Vice Admiral BELLINGER. That is a very difficult question to answer. Even after December 7th when everything else was subjugated and carrying on patrol for the security of Oahu, I received letters from the Bureau of Aeronautics indicating that they couldn't support the continuous and tremendous operations of this kind, with reference to engine changes and spare parts, and were endeavoring to inveigle me into reducing the search operations. This was not an official letter. This was a personal letter from the Chief of the Bureau of Aeronautics and it was the result of an official dispatch which I had sent, demanding spare parts.

Mr. SONNETT. Well, Admiral, assuming that on December 1, 1941, you had received a directive from Admiral Kimmel to conduct

reconnaissance with the available Navy planes, could you have it and if so, for how [505] long could you have conducted it?

Admiral BELLINGER. In conducting the 360 degree search, it would have meant that planes proceeding out on search would have to depend on a visibility greater than would have existed. It would have been possible to do it perhaps four or five days.

Mr. SONNETT. Assuming that on December 1, 1941, you had received directive from Admiral Kimmel to conduct the fullest possible reconnaissance over an indefinite period of time, could you have covered 128 degrees approximately on a daily basis and for how long?

Admiral BELLINGER. It could have been done until the failure of planes and lack of spare parts reduced the planes to an extent that would have made it impossible. Perhaps it could have been carried on for two weeks, perhaps, but this estimate is, of course, very rough and it is all based on maintaining planes in readiness for flight.

Mr. SONNETT. If in addition to the forty-nine available Navy planes at time at Oahu, you had the eight available Army B-17's and twenty-one available Army B-18's, could you have covered 360 degrees from December 1 on and if so, for how long?

Admiral BELLINGER. In the first place, the Army weren't equipped or able to carry on these searches in the way we would have expected them to carry them on, and that statement is made as a result of experience which showed up that situation subsequent to December 7th. Later, after more experience and training of the Army personnel had been obtained, the Army did enter this search plan with a few planes each day. The B-18's, as you remember, would only have been capable of proceeding out 300 miles, which would have yielded very little in timely information. Certainly any assistance that the Army in the B-17's would have enabled more patrol and search of greater areas.

Mr. SONNETT. Would it have been feasible, Admiral, to have used the forty-nine available Navy planes at Oahu on December 7, 1941, and thereafter entirely for search and to have relied on the Army B-17's and the twenty-one Army B-18's for an attacking force?

Admiral BELLINGER. Would it have been possible?

Mr. SONNETT. Feasible.

Admiral BELLINGER. The attack force was always made up of either the Army's B-17's or whatever other types they had that might have been utilized for that purpose, such as B-18's or even A-20's if the ships came in that close. Even carrier planes were held as striking forces. No patrol planes were ever held for striking, except in special instances for night torpedo attack. They were used to the fullest extent for searching.

Mr. SONNETT. So that the forty-nine available Navy patrol planes which were available around the beginning of December 1941, could have been devoted entirely to searching?

Admiral BELLINGER. They could have been as far as they were able to be used, but the question would always have been: Is this the way to start?

Mr. SONNETT. It has been previously testified, Admiral, that certain types of aircraft were regarded as more dangerous than others. What sectors would they have been assigned to?

Vice Admiral BELLINGER. The northern sectors were considered to be the most vital, primarily on account of the prevailing winds. For instance, when the carrier launches her planes, later she has to recover them and it is a rather good thing to be going away from trouble when you are recovering planes.

Mr. SONNETT. It was, in fact, from the north that the Japanese task force attacked Pearl Harbor, was it not, Admiral?

Vice Admiral BELLINGER. It was.

[507] Mr. SONNETT. Had you been directed on or about December 1, 1941, to institute a partial reconnaissance with the available planes, would you have covered the northern sector?

Vice Admiral BELLINGER. As a matter of fact, without any information, the normal plan on December 7th was to utilize planes that we had for the northern sector. We did later send planes to the southward because of information from the Commander-in-Chief's office which indicated a radio bearing in that direction.

Mr. SONNETT. Would you define, Admiral, what you mean by the northern sector?

Vice Admiral BELLINGER. More towards the northwest than the northeast.

Mr. SONNETT. Admiral, I believe you previously testified that from December 2nd, approximately, to December 7, 1941, you were ill?

Vice Admiral BELLINGER. Yes, I had the flu.

Mr. SONNETT. And, I take it, you weren't at your office during that period of time?

Vice Admiral BELLINGER. I was not at my office, but I was in touch with the office and with things going on.

Mr. SONNETT. Did you have any conferences with Admiral Kimmel while you were ill or with any member of his staff that you recall?

Vice Admiral BELLINGER. No. I had conferences with my Chief of Staff.

Mr. SONNETT. Captain Ramsey?

Vice Admiral BELLINGER. Yes.

Mr. SONNETT. Did you, as best you recall it, have any conferences with Admiral Kimmel in November and up to December 7, 1941, concerning the question of possible reconnaissance or the desirability of reconnaissance or any related subject?

[508] Vice Admiral BELLINGER. No, not with respect to Oahu. The conference I attended, and I think it was the last conference I attended, was in connection with the reenforcement of Wake and Midway.

Mr. SONNETT. Do you recall any other conference with Admiral Kimmel or members of his staff after that conference and prior to the attack?

Vice Admiral BELLINGER. No, although I am not positive that I did not see him between those dates.

Mr. SONNETT. Admiral, I believe you previously testified that had a complete reconnaissance been undertaken in November or December 1941, prior to the attack, it would have meant a cessation of the training activities being carried on by patrol wings. Would it have been feasible to conduct reconnaissance and to have the reconnaissance as part of the training?

Vice Admiral BELLINGER. In the first place, I might say that the for expansion training had been stressed a great deal, expansion meaning the development of air combat crews to augment to replace those crews that were then in the squadrons. When the December 7th attack was made, all training ceased for the time being. All effort was put on search operations by all the patrol planes. The question came up how could we continue this expansion training when every one realized was such a necessity? If we endeavored to have combat air crews in planes that were on patrol, it meant an expenditure of personnel and extra weight. It meant also that except for maintenance and the general operation of radio and engineering, very little else could be done. It was not actually qualifying personnel to take over the job in the patrol plane, nor to give them the qualification of an air crewman in a specific job. Finally we had to devote certain days to this training and take them out of their operating status on the other off days in order to accomplish some of this expansion training. I would say if all effort had been placed [509] on searching, the expansion training would have suffered considerably, as it did after December 7th.

Mr. SONNETT. Admiral, if you had been told on or about November 1941, that war with Japan was expected to break out momentarily, did you have considered that a valid reason for discontinuance of training?

Vice Admiral BELLINGER. You will have to look at it from this angle, when you once start, then you freeze the situation and you aren't moving it. We didn't have in the Navy a training establishment that could carry on this training, which up to that time had been done in the squadrons, and the question should be viewed from the angle: are you willing to freeze as is, with no question of expansion, and the consequences or proceed with your efforts to expand? Because aviation was known to have to expand tremendously and the training of personnel was one of the very serious problems connected with it. The discussion of this subject had gone to considerable lengths concerning where this training was to be accomplished, whether it should be done by the fleet, as an operational training program by the fleet on the Pacific Coast, or whether it was to be set up at a shore establishment.

Mr. SONNETT. Admiral, referring to the four or five days prior to the attack when you were ill and you were getting reports from Captain Ramsey, did he at any time report to you that he had had any conferences on the subject of reconnaissance with Admiral Kimmel or any member of his staff?

Vice Admiral BELLINGER. No.

Mr. SONNETT. I have nothing further, sir.

Admiral HEWITT. Is there any other statement that you care to make in connection with the matter under investigation?

[10] Vice Admiral BELLINGER. Yes. I would like to state that in preparation for meeting an air attack such as occurred on December 7, 1941, at Pearl Harbor, unity of command must exist; the organization must be in effect, manned, functioning, and operating twenty-four hours every day. There must be reconnaissance, radar nets, and complete information in regard to shipping and control of aircraft.

entering and leaving the zone. All that must be in effect and functioning properly prior to the attack. No mutual cooperative organization set up on paper and developed through intermittent drill worth much.

Admiral HEWITT. Thank you very much.

(The witness was excused.)

(The investigation was then, at 3:48 p. m., adjourned until 9 a. Friday, 22 June 1945.)

[511] PROCEEDINGS OF THE HEWITT INQUIRY

TWENTY-SECOND DAY

Pursuant to notice, the investigation met at the offices of the General Board, Navy Department, at 9 a. m., Friday, 22 June 1945.

Present: Admiral H. Kent Hewitt, USN; Mr. John F. Sonnett; Lieutenant Commander Benjamin H. Griswold, USNR; Lieutenant John Ford Baecher, USNR; and Ship's Clerk Ben Harold, USNR.

A witness entered, read the precept, and was duly sworn.

Mr. SONNETT. State your name, please.

Mrs. EDGERS. Mrs. Dorothy Edgers.

Mr. SONNETT. What is your occupation, Mrs. Edgers?

Mrs. EDGERS. Research Analyst, Navy Department.

Mr. SONNETT. And in what section do you work?

Mrs. EDGERS. In the Office of Communications right now.

Mr. SONNETT. What was your occupation in December of 1941?

Mrs. EDGERS. Research Analyst in the ONI. That is Naval Intelligence.

Mr. SONNETT. And that office was engaged in the decryption and translation of intercepted Japanese communications at that time?

Mrs. EDGERS. The particular branch I was working with was.

Mr. SONNETT. What are your qualifications in the Japanese language, Mrs. Edgers?

Mrs. EDGERS. My knowledge of the Japanese language is about as good as it can be. I have a diploma from a Japanese school to teach Japanese to Japanese people up to high school.

Mr. SONNETT. You lived in Japan for some time?

Mrs. EDGERS. Over thirty years.

[512] Mr. SONNETT. And when did you leave Japan?

Mrs. EDGERS. In the year before Pearl Harbor, which would make it '40.

Mr. SONNETT. I show you, Mrs. Edgers, document 22 of exhibit 13 of this investigation, which is a message from Honolulu to Tokyo, dated December 3, 1941, which bears a notation that it was translated by the Navy on December 11, 1941, and ask you whether prior to December 7, 1941, you had any connection with that message.

Mrs. EDGERS. Yes, I did.

Mr. SONNETT. Will you state, please, fully what your connection with that message was?

Mrs. EDGERS. Well, at the time it was my work to roughly translate any message which was put on my desk and this was among the messages that were put on my desk on December 6th, Saturday morning, and at the time I had only been working in this section for about a little over two weeks; so, at first glance, this seemed to be more interesting than some of the other messages I had in my basket, and so I

selected it and asked one of the other men, who were also translating working on other messages, whether or not this shouldn't be done immediately and was told that I should and then I started to translate.

Mr. SONNETT. About what time on that day did you complete your translation, Mrs. Edgers.

Mrs. EDGERS. Well, it so happened that there was some mistake in the message that had to be corrected and so that took some time. That was at 12:30 or perhaps it was a little before or after 12:30; whatever time it was, we were to go home. It being Saturday, we worked until noon. I hadn't completed it, so I worked overtime and finished it at 1. I would say that between 1:30 and 2 was when I finished my rough draft translation.

[513] Mr. SONNETT. That is, on the afternoon of December 6?

Mrs. EDGERS. Of the 6th, yes.

Mr. SONNETT. For the sake of the record, Mrs. Edgers, would you describe briefly what that message is?

Mrs. EDGERS. Well, without reading it over again now, just because of the fact that the message did keep in mind, I would say that it was a message saying how they were going to communicate from Honolulu to the parties interested the information on our fleet movements from Honolulu, and apparently it was something which they had had previous arrangements, but they had changed some of the minor details of how to go about it. I think there was something to do with lighting a window of a certain house, and there was also something about newspaper advertising.

Mr. SONNETT. Do you know whether that translation which you completed in the early afternoon of December 6, 1941, was brought to the attention of now Captain Kramer?

Mrs. EDGERS. It was brought to his attention naturally because it was—well, in any case, he knew that I was working on it and I knew it, as a matter of fact, in the hands of the chief whose job it was to edit messages and write them up, or ones that were more complicated and more important like this, the officer-in-charge looked it over and edited it.

Mr. SONNETT. Captain Kramer was your superior officer in that section, was he not?

Mrs. EDGERS. My supervisor, yes.

Mr. SONNETT. What was the name of the chief to whom you referred?

Mrs. EDGERS. Chief Bryant.

Mr. SONNETT. B-r-y-a-n-t?

Mrs. EDGERS. I don't remember how he spelled his name, but he had been [514] in the section for some time. He left immediately after the war for sea duty. He put in a request.

Mr. SONNETT. Did you before you left on the afternoon of December 6, 1941, show all or any part of your translation of this message to Captain Kramer?

Mrs. EDGERS. I am sorry. I will have to say I don't remember whether I did or didn't show any or all of it, although I am sure I did have occasion to see part of it, but he knew I was working on the message and I believe that is probably the reason he came back again, no doubt later, as I understand it, to work on it.

Mr. SONNETT. I have nothing further, Admiral.

Admiral HEWITT. Thank you very much, Mrs. Edgers.

(The witness was excused.)

[515] A witness entered, read the precept, and was duly sworn.

Mr. SONNETT. State your name, please, sir.

Mr. FRIEDMAN. William F. Friedman.

Mr. SONNETT. What is your occupation, Mr. Friedman?

Mr. FRIEDMAN. I am Cryptanalyst and Director of Communications Research, Signal Security Agency.

Mr. SONNETT. War Department?

Mr. FRIEDMAN. Yes.

Mr. SONNETT. And during 1941 what was your occupation?

Mr. FRIEDMAN. I was Principal Cryptanalyst in the Signal Intelligence Service.

Mr. SONNETT. How long have you been in that work, Mr. Friedman?

Mr. FRIEDMAN. Since 1915.

Mr. SONNETT. I show you document 4 of exhibit 13 of this investigation and ask you whether you can identify that dispatch, and also show you document 15 of exhibit 63 of the Naval Court of Inquiry and ask whether you can identify that.

Mr. FRIEDMAN. Yes. These are translations of messages which were processed jointly by the Army and Navy Signal Intelligence Services.

Mr. SONNETT. Those were Japanese messages which set up the so-called "winds" code, were they not?

Mr. FRIEDMAN. They are.

Mr. SONNETT. Did you have any knowledge or do you have any knowledge of the efforts that were made to monitor for any Japanese message employing the "winds" code?

Mr. FRIEDMAN. I know that when these code messages were translated, that steps were taken to monitor all the circuits over which an execute message [516] might appear, both in the Army and the Navy and also by the Federal Communications Commission.

Mr. SONNETT. Prior to December 7, 1941, did you learn whether or not any such execute message was intercepted by any one?

Mr. FRIEDMAN. No, sir.

Mr. SONNETT. After December 7, 1941, did you have any information as to whether or not any such message was intercepted?

Mr. FRIEDMAN. Indirect information in the way of statements by Captain Safford of the Navy and Colonel Sadler of the Army to the effect that there had been such an execute message.

Mr. SONNETT. Will you state, Mr. Friedman, as best you recall it, when and where you had the conversation with Captain Safford to which you refer and what was said by him on that subject during the conversation?

Mr. FRIEDMAN. I have had several conversations with him. I am unable at the moment to indicate the dates. The first one was certainly a year and a half ago and I haven't had any conversations with him now for some six months, I dare say. In the course of the earlier conversations, Captain Safford indicated that there was—there had been a "winds" execute message; that no copies of it were to be found in the Navy files, and that nevertheless there had been testimony to the effect that it had been intercepted. His story was that it was iner-

cepted by one of their East Coast stations, he believed, and promptly forwarded into Washington, and I don't recall now who got it. Colonel Sadler indicated also—

Mr. SONNETT. Before you come to your conversation with Colonel Sadler, Mr. Friedman, in his conversations with you, did Captain Safford state the substance of the "winds" code execute which he thought had been received prior to December 7, 1941?

[517] Mr. FRIEDMAN. Yes, he indicated that it not only had an affirmative for break in relations between Japan and the United States but it also had a negative for a break in relations between Japan and Russia.

Mr. SONNETT. Now turning to your conversation with Colonel Sadler, will you state when you had that, approximately, and what he said at that time?

Mr. FRIEDMAN. Approximately a year and a half ago I had a conversation with Colonel Sadler, who came to duty in Washington at that time, then, and we talked about Pearl Harbor because of the fact that he had been the head of our communications service at the time, and he indicated that he had tried his best to urge that some specific warning message be sent out to the Department commander. He indicated that the "winds" code execute message had come in on the—some time on the 4th or 5th of December. I don't think that he was clear himself as to which of those two days it was. If I remember correctly, he was either notified himself by somebody in the Navy, possibly Admiral Noyes, that the message was in—"it's in," as I recall it, the expression used—or it may be that the Navy source called AG-2 and indicated that they had had word that the message was in, and that Colonel Sadler was then called to AG-2 to corroborate the interception of the message.

At any rate, there was a question as to the exact word, the Japanese word, that was used and when Colonel Sadler couldn't indicate the word, because he hadn't seen the message himself, I think they tried to get a verification from him. I think he said that they tried to get a verification from whom it was—Admiral Noyes—but they weren't successful, whereupon the AG-2 authorities simply passed the matter over. There was apparently nothing to substantiate the existence of the message.

Then, if I remember correctly, I asked Colonel Sadler whether he had a copy, had ever gotten or seen a copy of this message, and his answer was, if I remember correctly, that he hadn't himself seen a copy, but that he had been [518] told by somebody that copies had been ordered or directed to be destroyed by General Marshall. Of course, I regarded this as merely hearsay evidence—nothing more than that; highly inconceivable that such a thing would happen. And when I talked over the Pearl Harbor story with Captain Safford, I probably just passed that out as one of those crazy things that get started. I shouldn't have done it. I certainly had no idea that he would repeat it.

Mr. SONNETT. Other than what you have already testified to, Friedman, did you have any information from any source as to the existence of a "winds" code message relating to the United States?

Mr. FRIEDMAN. You mean a "winds" code execute?

Mr. SONNETT. Yes.

Mr. FRIEDMAN. Not of my own direct knowledge at the time.

Mr. SONNETT. Well, has anybody else in the Navy, other than Captain Safford, ever stated to you or indicated to you that such a message existed?

Mr. FRIEDMAN. I have not talked with anybody else in the Navy.

Mr. SONNETT. So that either directly or indirectly, I take it, you have no information from naval sources as to the existence of a "winds" code execute relating to the United States, aside from your conversations with Captain Safford and Colonel Sadler?

Mr. FRIEDMAN. That is correct.

Mr. SONNETT. I show you exhibit 65 of the Naval Court of Inquiry record, which consists of a statement by the Federal Communications Commission and has annexed to it various documents. Will you examine those and state which of those messages, in your opinion, was a genuine execute of the "winds" code?

Mr. FRIEDMAN. I have examined these messages anterior to this questioning and came to the conclusion that only the last, which is labelled document number 4, gives evidence of being an authentic "winds" code executive message. [519] It conforms to the form established in the "winds" code, except that there is no repetition of the *nishi no kaze hare* at the end of the message as there should have been.

Mr. SONNETT. What was the date of the "winds" execute message to which you have just referred, Mr. Friedman?

Mr. FRIEDMAN. According to the statement, the date is December 8, 1941, between 0002 and 0035, GMT, which would be December 7, 1941, Washington time.

Mr. SONNETT. And that message uses the code words, Mr. Friedman, relating to what country?

Mr. FRIEDMAN. A Japanese-British break.

Mr. SONNETT. Mr. Friedman, I show you documents 6 and 11 of exhibit 13 of this investigation and ask whether you can identify those documents.

Mr. FRIEDMAN. I can. The one dated 27 November 1941 from Tokyo to Washington established a hidden word code system whereby the Japanese hoped to be able to pass secret information to case of a closure of communications between Tokyo and places in the Western Hemisphere.

The other document, Tokyo circular telegram of December 7, 1941, I identify as being a message in the hidden word code.

Mr. SONNETT. Would you just read the text of that message into the record?

Mr. FRIEDMAN. The English text is:

Relations between Japan and England are not in accordance with expectations.

Mr. SONNETT. Does it appear from the document who translated that version of the message?

Mr. FRIEDMAN. It does. It says on the bottom "Navy translation."

Mr. SONNETT. And the date?

[520] Mr. FRIEDMAN. December 7, 1941.

Mr. SONNETT. Was that message translated by the Army also, to your knowledge?

Mr. FRIEDMAN. I do not know whether it was translated at that time by the Army also, but I have had it translated since then.

Mr. SONNETT. And what translation was made by the Army of the message?

Mr. FRIEDMAN. The one to which you refer now?

Mr. SONNETT. Yes.

Mr. FRIEDMAN. Well, there is quite a story about that.

Mr. SONNETT. Would you tell us that story, Mr. Friedman?

Mr. FRIEDMAN. A few days after Pearl Harbor I saw this message in the form, "Relations between Japan and England are not in accordance with expectations," and although I was ill, I saw clearly enough that the message on its face was absurd. Any fool would realize that on December 7th Tokyo was not going to send a message out saying "Relations between Japan and England are not in accordance with expectations" when the die had already been cast, and I came to a tentative conclusion that there was something wrong with that message and I asked Colonel Svennsson about the message and told him that I felt that there was something wrong with it and suggested that it be re-translated. Colonel Svennsson looked it up and told me that it was not a good translation. When I went into the details, I discovered a very surprising situation. The translation of the message conforms to the translation set up in the 27 November 1941 code, but the translation in that code was not good.

This is the situation. The word that was set up, *hattori*, meant, according to this translation, "relations between Japan and blank" not in accordance with expectations," whereas it should have read "Relations between Japan and blank are on the brink of catastrophe" or some strong expression [521] of that sort. Moreover, I found that the message of 7 December 1941, which mentions only relations between Japan and England, had another defect in that the original intercept included the word *minami*, meaning the USA, as well as the word *koyanagi*, meaning England.

That double error produced a concatenation of circumstances that I thought later was just an additional one in the series of accidents that contrived together to prevent due warning, because had the message originally been translated accurately "on the brink of catastrophe" "on the verge of disaster," and so on, had that come in, it would have got immediate attention. That was a few hours before. Also if it had mentioned the United States, it should have.

Mr. SONNETT. And, I take it, the error in translation in the original hidden word code, Mr. Friedman?

Mr. FRIEDMAN. December 2, 1941.

Mr. SONNETT. And by whom was it translated?

Mr. FRIEDMAN. Navy.

Mr. SONNETT. Was that translation distributed to the Army prior to the attack?

Mr. FRIEDMAN. Yes.

Mr. SONNETT. And, I take it, the error in translation in the original code was not detected until you detected it, as you have just testified?

Mr. FRIEDMAN. That is correct, yes.

Mr. SONNETT. When did you detect the errors of the code and in the translation of the December 7th message?

Mr. FRIEDMAN. I can't place it accurately. It was a few days after Pearl Harbor.

Mr. SONNETT. Did you communicate your discoveries to the Navy as to the errors?

Mr. FRIEDMAN. No.

[522] Mr. SONNETT. Do you know whether or not the discoveries which you had made as to these messages were communicated to the Navy at any time?

Mr. FRIEDMAN. No.

Mr. SONNETT. Mr. Friedman, referring to documents 14 and 15 of exhibit 13 of this investigation, will you examine those and state whether or not they came to your attention at any time?

Mr. FRIEDMAN. They were not brought to my attention at the time of their translation, but I have seen them since.

Mr. SONNETT. Both of those are Japanese messages from Honolulu, relating to the status of defenses at Pearl Harbor and vicinity, are they not?

Mr. FRIEDMAN. They are.

Mr. SONNETT. Would you read, Mr. Friedman, into the record the last sentence of the first paragraph of document 14?

Mr. FRIEDMAN. The last sentence of the first paragraph reads: "I imagine that in all probability there is considerable opportunity left to take advantage for a surprise attack against these places."

Mr. SONNETT. And that message was dated what date, sir?

Mr. FRIEDMAN. December 6, 1941.

Mr. SONNETT. What was the date of translation of that, Mr. Friedman?

Mr. FRIEDMAN. It is stated December 8th.

Mr. SONNETT. And by whom translated?

Mr. FRIEDMAN. It doesn't state, but on the basis of the division of labor that had been established between the Army and Navy, whereby Army processed messages bearing in their pre-handle even dates, I presume that this message was processed by the Army.

Mr. SONNETT. Is there an indication on the message as to where and by whom it was intercepted, Mr. Friedman?

[523] Mr. FRIEDMAN. There is. Exhibit 14 bears on it an indication that it was intercepted by Station Two, which is the Army monitor station at San Francisco.

Mr. SONNETT. And does it also indicate how it was forwarded to Washington?

Mr. FRIEDMAN. It is indicated as having been forwarded by teletype.

Mr. SONNETT. For the sake of the record, Mr. Friedman, you referred to exhibit 14, but what you meant to say was page 14 of the exhibit before you, which is exhibit 13?

Mr. FRIEDMAN. Yes.

Mr. SONNETT. Will you turn to page 15 of that exhibit and state whether or not you can identify that message?

Mr. FRIEDMAN. I identify it as being a message presumably processed by the Army since it bears the date December 6, 1941, an even date.

Mr. SONNETT. A message from—

Mr. FRIEDMAN. A message from Honolulu to Tokyo.

Mr. SONNETT. Would you read the second paragraph of that message into the record?

Mr. FRIEDMAN. The second paragraph reads: "It appears that air reconnaissance is being conducted by the Fleet Air Arm."

Mr. SONNETT. And what is the date of translation of that indication?

Mr. FRIEDMAN. December 8, 1941.

Mr. SONNETT. Does it appear where and by whom the message was intercepted?

Mr. FRIEDMAN. It was intercepted by Army Station Two at San Francisco and was forwarded by teletype.

Mr. SONNETT. Now, both of those messages of December 6th, Friedman, were in the PA-K2 code, were they not?

Mr. FRIEDMAN. They were.

[524] Mr. SONNETT. Will you state briefly and generally what that code was and its relative difficulty?

Mr. FRIEDMAN. That code was a high grade code involving key columnar transportation of code text, distributed in a form established by the Japanese when they set up the cryptographic system. It represents what we call a rather good form of enciphered code.

Mr. SONNETT. As of the first week of December or, more specifically, as of December 6, 1941, do you know how rapidly that code could have been read by the Army?

Mr. FRIEDMAN. We were in position usually to process this traffic fairly readily in view of the fact that we had reconstructed the entire code or practically the entire code and were able to reconstruct from time to time as was necessary the transportation keys for the super-encipherment.

Mr. SONNETT. Will you refer to page 24 of that exhibit, Mr. Friedman, and state whether you can identify that message?

Mr. FRIEDMAN. Yes, I have seen this message before.

Mr. SONNETT. Will you state the date and—

Mr. FRIEDMAN. The date is December 7, 1941. The message is from Tokyo to Honolulu.

Mr. SONNETT. What is the subject matter, briefly, of the message, Mr. Friedman?

Mr. FRIEDMAN. The matter directs the Japanese in Honolulu to keep Tokyo informed day by day of the presence in port of warships and airplane carriers and cruisers and indicates that it is of the utmost importance to let them know.

Mr. SONNETT. Is there any reference also to barrage balloons?

Mr. FRIEDMAN. Yes. They were to wire in each case whether or not [525] there are any observation balloons above Pearl Harbor and if there are any indications that they will be sent up, and also whether or not the warships are provided with anti-mine nets.

Mr. SONNETT. When was that translated and by whom, Mr. Friedman?

Mr. FRIEDMAN. This message was translated by the Army on December 30, 1941.

Mr. SONNETT. It bears a notation that the message was received December 23rd, does it not?

Mr. FRIEDMAN. It does.

Mr. SONNETT. Does it appear where and by whom the message was intercepted?

Mr. FRIEDMAN. The message was intercepted by Station Five, which is an Army station at Honolulu.

r. SONNETT. Can you explain, Mr. Friedman, the delay between date of interception, which presumably was December 2, 1941, and date of translation, December 30, 1941?

r. FRIEDMAN. There were insufficient facilities and personnel to process all of the traffic which might be processed. Naturally, that is a situation which is beyond control of the Army because it depends on the funds that are provided by Congress, and so on, for this sort of work. And in any case, to be able to process all the traffic that may have been intercepted would have required a very large organization, which we didn't have at the time. We set up priorities for the handling and processing of traffic according to the best standards that we could establish at the time. We naturally would process messages in the Purple system first because we had found from experience that that contained the most important information, and then we would process cryptographic systems of next importance, and so on.

Now, in the case of this particular message of December 2nd, I have no doubt that Honolulu intercept station had accumulated a large amount of traffic which had to be forwarded and we didn't have the radio circuits and facilities adequate to be able to forward the intercepted material by radio. In any case, a good deal of, of minor importance, there is no use in forwarding by radio, which is a relatively expensive method as compared with forwarding by air mail, for example.

r. SONNETT. The note on that message would indicate that it was received here on the 23rd of December, would it not?

r. FRIEDMAN. It does.

r. SONNETT. So that it took approximately seven days between the receipt of the message by the War Department in Washington and the time of its decryption and translation?

r. FRIEDMAN. That is correct.

r. SONNETT. Now, would the interval between December 2nd and December 23rd indicate that the message had been forwarded from Shafter by mail?

r. FRIEDMAN. It would indicate that that was the case.

r. SONNETT. What was the order of priority, Mr. Friedman, after Purple code, insofar as dispatching those messages to Washington?

r. FRIEDMAN. I am unable to state from memory. That is a matter of record. I could find it.

r. SONNETT. Where did the J-19 code come from? Do you recall?

r. FRIEDMAN. It was below Purple, definitely, below Purple, and presumably, according to my recollection now, it would be either on the same level with the PA-K2 or slightly below it.

r. SONNETT. Now, this message of December 2nd was in the J-19, was it not?

Mr. FRIEDMAN. It was.

r. SONNETT. Referring to the months prior to December 7, 1941, Friedman, did you have any personal connection with the decryption of Japanese communications?

r. FRIEDMAN. Yes, I had been asked by the Chief Signal Officer to take a hand in our attempts to solve the Japanese Purple system.

r. SONNETT. Will you state approximately when that occurred, Mr. Friedman?

Mr. FRIEDMAN. The first time we were able to hand in a completely deciphered text was some time in August of 1940; it might have been late in August of 1940. We had been on the problem for eight or twenty months, something like that.

Mr. SONNETT. Now, the purple code of the Japanese was, I take it, from your testimony, solved by the unit under your direction?

Mr. FRIEDMAN. That is correct. As Chief Cryptanalyst, it was usually my responsibility to solve the things that superiors asked me to solve.

Mr. SONNETT. After you worked on the purple code of the Japanese, did you continue your close connection, personal connection, the decryption of Japanese communications and, if so, up to what time?

Mr. FRIEDMAN. No. I regret to say that the solution of the Japanese purple machine had apparently taken such a toll of my nervous energy that I was suffering from nervous exhaustion and was not understood quite well that things weren't well with me, nevertheless I felt under extreme necessity of keeping going and did so until some time in December of 1940, when I had a complete collapse. I returned to duty some time in April of 1941, but in view of the fact that it was going to take considerable time to recover my health, the Chief Signal Officer indicated that I was to take it easy, and [528] one of the things of doing that was to keep me more or less out of the high pressure cryptanalytical processing and let me devote my attention to some of the signal security matters where it was a slower pace. I wasn't happy about that.

Mr. SONNETT. So that, prior to the attack on Pearl Harbor, you weren't actually working directly on the Japanese material?

Mr. FRIEDMAN. That is right.

Mr. SONNETT. I think that is all, Admiral.

Admiral HEWITT. That is all. Thank you very much.

(The witness was excused.)

[529] Captain Laurance F. Safford, USN, was recalled as a witness and was warned that the oath previously taken by him was still binding.

Mr. SONNETT. Captain Safford, I show you exhibit 13 of this investigation, which consists of a collection of intercepted Japanese messages in translated form, and call your attention to the fact that on each page of the document indicates that it was translated by the Navy or the Army and that after the date there appear symbols in parentheses, letters such as the letter "S" or "X" and in other cases there appear numbers. Will you explain what they signify?

Captain SAFFORD. The letter "S" was the Navy intercept station at Bainbridge Island, Washington.

Mr. SONNETT. And the letter "X"?

Captain SAFFORD. The letter "X" was a photograph taken by the Navy, in this particular case at Washington, D. C.

Mr. SONNETT. And the letters "NR"?

Captain SAFFORD. "NR" merely meant Navy radio.

Mr. SONNETT. The number 7?

Captain SAFFORD. Number 7 was an Army intercept station at I-1 Hunt, Virginia, just outside of Washington.

Mr. SONNETT. Number 2?

Captain SAFFORD. Number 2 was an Army intercept station at the Presidio in San Francisco, California.

Mr. SONNETT. And the letters "STT"?

Captain SAFFORD. "S" was Station S and "TT" stood for teletype. Any message forwarded by teletype was marked "TT" at the bottom.

Mr. SONNETT. Did the Army follow the same practice?

[530] Captain SAFFORD. The Army followed the same practice at least in one case, because it is marked.

Mr. SONNETT. The letters "AR"?

Captain SAFFORD. Army radio, and you also have one more, number 5, which is the Army intercept station at Fort Shafter, T. H.

Mr. SONNETT. Referring to the document bearing number 14 and the document bearing the number 15 of that exhibit, will you state where they were intercepted, when and by whom translated?

Captain SAFFORD. They were both intercepted at the Army intercept station in San Francisco and forwarded by teletype. They were presumably intercepted on the 6th of December, 1941, which is their filing date. They were both processed and translated by the Army, and they were translated on December 8, 1941. About sixteen or seventeen months ago we sighted the original work sheets for these two messages, including the intercepted message, and found or learned that number 14 went on the air about eighteen hours before the attack on Pearl Harbor and number 15 went on the air about twelve hours before the attack on Pearl Harbor, that is, to the nearest hour. The Army have all these papers in their custody.

Mr. SONNETT. Both of those messages were in the PA-K2 Japanese code, were they not?

Captain SAFFORD. Both were in PA-K2; that is correct.

Mr. SONNETT. Will you state the difficulty of that code in terms of the time which would have been required for the Navy to have deciphered those messages after they were available to the Navy for such purposes?

Captain SAFFORD. The actual time of decryption for number 14, including typing in smooth, would have been about an hour or an hour and a half, and number 15 about half that time. However, in the Navy PA-K2 was given precedence [531] in processing after all the purples and after all the J-19's and it would not have been touched as long as there were any J-19's on hand being worked on by the two girls, who only performed day's duties and did not work on Sundays and handled only the PA-K2's and only the routine decoding of J-19 after J-19 had been solved by the men who were standing continuous watch.

Mr. SONNETT. Will you refer to page 24 of that exhibit and state when and by whom the message was intercepted and forwarded?

Captain SAFFORD. The message was intercepted at Fort Shafter. It was processed and translated by the Army on December 30, 1941.

Mr. SONNETT. What is the date of the message, Captain?

Captain SAFFORD. The message was dated December 2, 1941, and was in J-19. The message bears a note: "This message was received here on December 23."

Mr. SONNETT. Does it appear when that message was received in Washington?

Captain SAFFORD. Yes, December 23rd. That is from this notation

Mr. SONNETT. In what code was that message?

Captain SAFFORD. That was in J-19.

Mr. SONNETT. Will you state how long it would have required the Navy to have decrypted and translated that message?

Captain SAFFORD. That would have required from twelve hours to five days, depending upon luck and upon the volume of traffic we had available to work on. At this particular time most of the J-19 system had been destroyed and the volume of J-19 traffic dropped off to a limited extent.

Mr. SONNETT. That is, when you say "this particular time," do you mean early in December, '41, before the attack?

Captain SAFFORD. Early in December, 1941, before the attack, I would like to add that there were very few purple keys which we had to solve, maybe two or three per cent, and there was an appreciable percentage of J-19's, maybe [532] ten or fifteen, which we completely failed to solve due to insufficient traffic or extremely bad luck.

Mr. SONNETT. Referring to the afternoon of December 6, 1941, the morning of December 7, 1941, Captain, will you state whether the Navy decryption unit was working and, if so, on what?

Captain SAFFORD. A continuous watch was being maintained and that watch gave priority to purple and did nothing else so long as there were any purple messages to be solved. However, during the night of 6-7 December 1941, they did get caught up and they took out something in other systems, which is a matter of record in the GY log, according to my memory. I don't know how many messages we entered into the log because it showed they got caught up to date and were keeping up with the stuff regardless of the extra flow of work.

Mr. SONNETT. Now, the so-called fourteen-part message was intercepted beginning on December 6, 1941, was it not?

Captain SAFFORD. That is correct.

Mr. SONNETT. That was all in English?

Captain SAFFORD. That was all in English.

Mr. SONNETT. And required, therefore, neither decryption nor translation?

Captain SAFFORD. Oh, it required decryption. It was in purple.

Mr. SONNETT. But in English?

Captain SAFFORD. But in English, so didn't require translation.

Mr. SONNETT. Was that decrypted promptly on the afternoon of December 6th and the evening?

Captain SAFFORD. They began to work on that immediately after the message came in and they had found out by telephone conversation with the War Department that the Army weren't going to work over that weekend. As a matter of fact, some of the parts of it were logged out in the GY log to the Army and then recalled [533] when they found out they were going home at 12 o'clock. It was the Army's responsibility whereby the Navy took odd days and the Army took even days.

Mr. SONNETT. Now, the fourteen-part message, which is document 39 of exhibit 63 of the Naval Court of Inquiry record, was dated December 6, 1941, was it not?

Captain SAFFORD. That is correct.

Mr. SONNETT. So that under the agreement between the Army and the Navy, the Army was responsible for the decryption of that message?

Captain SAFFORD. That is correct.

Mr. SONNETT. Was there also received on that day a message from Tokyo to Washington, dated December 6th. in the purple code, being message 901, advising that the reply would be in fourteen parts and that time of delivery would be fixed in a separate message?

Captain SAFFORD. That is correct.

Mr. SONNETT. Was that message decrypted by the Army?

Captain SAFFORD. I believe that was decrypted by the Army. It will bear their notation on the bottom if it was.

Mr. SONNETT. I show you document 38 of exhibit 63 of the Naval Court of Inquiry record and ask you if you can determine from that who decrypted and translated the message.

Captain SAFFORD. Yes, that was processed and translated by the Army during the late afternoon and early evening of 6 December 1941.

Mr. SONNETT. Now, will you explain, Captain, how it was that the Army came to work upon those messages when it appears from your earlier testimony that they had planned not to work that afternoon and evening?

Captain SAFFORD. About 3 o'clock, about 3 p. m., the afternoon of [534] December 6, 1941, Commander Kramer returned to the Navy Department and saw on hand roughly twenty intercepts in the purple machine. These turned out to be one long message and several short ones, and realizing that he had more than we could handle, he called up SIS in the War Department and asked for assistance. He found an officer down there making up some back work and this officer called Major Doud and Mr. Rowlett and they also called two young ladies who were Civil Service employees. All four came from their homes and got back to the War Department about 4 p. m. One of the girls, a Miss Ray Cave, a typist, came over to the Navy Department and assisted in the smooth type-ups. The others worked over in the Munitions Building. One other Army officer who was present in the Munitions Building also assisted, but he was under instruction, I believe, and not very much help. I don't recall his name. He is of no importance.

Mr. SONNETT. Which parts of the first thirteen parts of the fourteen-part message were worked on by the Army on the afternoon and evening of December 6th?

Captain SAFFORD. I will have to see that GY log to verify this. As I recall it, it was parts 9 and 10 they actually worked on, but the smooth typing was done over in the Navy Department and it was marked as a Navy translation. There was no actual translation, of course, because it was in English.

Mr. SONNETT. And the balance, I take it, of the thirteen parts were actually worked on by the Navy?

Captain SAFFORD. The balance were actually worked on by the Navy.

Mr. SONNETT. Referring to part 14 of the message—

Captain SAFFORD. May I add there were also three or four purple messages of relative unimportance which the Army handled at the same time.

[535] Mr. SONNETT. Will you state generally what those messages were, if you recall them, Captain?

Captain SAFFORD. One message said that this long one was most secret and not to let an ordinary typist type it; it would have to be

done by the coding officer, and take great pains not to let it leak. Then there were two congratulatory messages and one ordering somebody to be recalled to his post of duty if they knew where he was, and another one ordering one of their intelligence agents to ski in Latin America.

Mr. SONNETT. Referring to part 14 of the fourteen part message which was from Tokyo to Washington, dated 7 December, in purple code and bearing number 902, that was decrypted, I take it on the morning of December 7, 1941?

Captain SAFFORD. That is part 14?

Mr. SONNETT. Yes.

Captain SAFFORD. That was decrypted on the morning of the same time prior to 7 a. m. It was received in the Navy Department around 5 a. m., as well as we can determine.

Mr. SONNETT. Referring to a message of December 7, 1941, from Tokyo to Washington, bearing number 907, which directed the ambassador to submit the reply to the United States at 1 p. m. on the 7th, that, I take it, was decrypted on the 7th. Do you know at what time that was decrypted?

Captain SAFFORD. That was decrypted on the 7th before 7 a. m. It was sent over to the Army for translation. Brotherhood, who was on watch, translated it himself and knew what it said, but he was not sufficiently skilled in the Japanese language at that time that he could trust his translations, and he sent it over to the War Department for translation as per orders.

Mr. SONNETT. This bears the note at the bottom: "Transmitted 12/7/41 (S)." What does that signify?

[536] Captain SAFFORD. That means that was translated on December 7, 1941, and the "S" means it was intercepted at Bainbridge Island, Washington, by the Navy radio station there, and that it bears the notation that it was translated by the Army. It was decrypted by the Navy in this case, but the actual translation was done by the Army, and it was typed smooth by the Army.

Mr. SONNETT. That message was decrypted at about what time on December 7, 1941?

Captain SAFFORD. Before 7 a. m.

Mr. SONNETT. And the message consisted of one sentence, did it or not?

Captain SAFFORD. It consisted of one sentence.

Mr. SONNETT. Were there any qualified Japanese translators on duty in the Navy Department at that time?

Captain SAFFORD. There were not.

Mr. SONNETT. But Lieutenant Commander Brotherhood, who was on duty, attempted a translation?

Captain SAFFORD. Attempted a translation and realized it was important and stayed on himself after his watch had expired until Commander Kramer came down to the Navy Department.

Mr. SONNETT. Now, at what time was the translation received from the Army of this message?

Captain SAFFORD. I do not know for certain, except it was received back at least by 10:15 a. m. and possibly shortly after 9 a. m. What the various people say doesn't agree and we have no written record.

Mr. SONNETT. At what time did Commander Kramer arrive at the office on the morning of December 7, 1941?

Captain SAFFORD. He arrived some time prior to 9 o'clock; about 8:30 as well as I can judge.

[537] Mr. SONNETT. Was he shown the decrypted message in Japanese, that is, of message 907, directing the delivery of the reply at 1 p. m.?

Captain SAFFORD. I do not know. Kramer said he never knew about the existence of that message until after he had made his first trip to the State Department.

Mr. SONNETT. December 7, 1941, being an odd day, was the day on which the Navy had the responsibility for the decryption and translation of Japanese messages?

Captain SAFFORD. That is correct.

Mr. SONNETT. If that was so, why was there no Japanese translator on duty in your section at that time?

Captain SAFFORD. Because Kramer had worked overtime from 4 p. m. until about 1 a. m. after putting in a normal day's work and he was ordered to report to Admiral Stark with translations the next morning at 9 a. m. and realized that he wouldn't be available. Kramer normally took the Sunday duties himself. Kramer made special arrangements with the Army whereby they would provide a translator for Sunday in view of the fact we had handled their work the day before. At that particular time one of our civilian Japanese translators was in the hospital, where he died about two months later, and another one was not available for some reason which I can't recall at the moment.

Mr. SONNETT. The other one being Mrs. Edgers?

Captain SAFFORD. Mrs. Edgers was not good enough to be permitted to handle purple translations. I counted her out.

Mr. SONNETT. You mean her ability to translate Japanese was not adequate?

Captain SAFFORD. Was not adequate at that time.

Mr. SONNETT. Did you know Mrs. Edgers' history?

[538] Captain SAFFORD. She was the sister of Mr. Woodruff, one of our best translators here. Mr. Cate was the one who was in the hospital and died. I don't know what the status of Woodruff was except there was some reason he wasn't immediately available. And Doctor Hoffman had been taking Sunday duties for a long period and by some local arrangement Kramer had taken them over himself, partially because he was a little mistrustful of the doctor's evaluations of the importance of things, not his translations, but his ability to evaluate, and since Kramer would be making the distribution, it was better for him to come down himself.

Mr. SONNETT. Did you know Mrs. Edgers' qualifications as a Japanese translator and her previous study of the language?

Captain SAFFORD. As I recall, she had been with us about three months, three to six months. She was employed by ONI and ONI was entirely responsible for translation.

Mr. SONNETT. But did you know, Captain, that she had been licensed to teach Japanese in Japan up to the grade of high school?

Captain SAFFORD. I did not know what her personal qualifications were, but on translating this technical stuff, regardless of their education, it took long experience in working with this particular type of stuff before we dared trust their translations.

Mr. SONNETT. In other words, then, your statement concerning Edgers' qualifications was not so much, I take it, her qualification as a translator but rather her experience with the work?

Captain SAFFORD. And her technical vocabulary. Every one we had to go through a probationary period of about a year before we dared turn them loose on really important stuff.

Mr. SONNETT. Now, referring, Captain, to the question which have [539] previously gone into, namely, the "winds" execute message relating to the United States, did you ever have a conversation with Colonel Sadler of the War Department concerning the existence of such a message?

Captain SAFFORD. I never talked to Colonel Sadler about that.

Mr. SONNETT. Do you recall whether on or about December 4, 1941, you received a call from Lieutenant Commander Brotherhood which he advised you of the receipt of a message apparently related to the "winds" code?

Captain SAFFORD. I cannot recall anything distinctly about it. I would want to say in testimony. I have had a vague idea that there was another "winds" code message and the FCC intercept seemed to fill the bill.

Mr. SONNETT. Referring to exhibit 65 of the Naval Court of Inquiry record, which contains documents supplied by the FCC, and to specially document 2 of that exhibit, do you recall whether or not Lieutenant Commander Brotherhood advised you of that message on or about December 4, 1941?

Captain SAFFORD. I do not recall ever having seen this message knowing of it in this form until I saw the FCC transcript.

Mr. SONNETT. When did you first see that, Captain?

Captain SAFFORD. Some time after August 19, 1944, the day before I went on the stand.

Mr. SONNETT. Up to that time, namely, August of 1944, had you known that the Federal Communications Commission had intercepted any messages which apparently employed the "winds" code?

Captain SAFFORD. Yes, I had known of it for several months.

Mr. SONNETT. Well, prior to 1944 had you known?

Captain SAFFORD. Oh, no, no, not prior to 1944, no.

Mr. SONNETT. I have nothing further, Admiral, at this time.

Admiral HEWITT. All right. I don't think of anything further.  
[540] Captain SAFFORD. I would like to add the following information: In May, 1945, or late in May, 1945, I had a conversation with Mr. Walter Foote, formerly American Consul General at Batavia, Java. Mr. Foote is the man who sent in a Dutch version of the "winds" setup message. Mr. Foote said that he sent this message at the urgent request of Mr. Lovink, who was technical adviser to the Dutch government on Asiatic affairs. Mr. Foote is certain that the Dutch did not hear the "winds" execute message and that he would have been informed if they had heard it.

Admiral HEWITT. All right. Thank you.

(The witness was excused.)

(The investigation was then, at 11:41 a. m., adjourned until 1 p. m., Tuesday, 26 June 1945.)

[547] PROCEEDINGS OF THE HEWITT INQUIRY

TWENTY-THIRD DAY

Pursuant to notice, the investigation met at the offices of the General Board, Navy Department, Washington, D. C., at 1:30 p. m., Tuesday, 26 June 1945.

Present: Admiral H. Kent Hewitt, USN; Mr. John F. Sonnett; Lieutenant Commander Benjamin H. Griswold, USNR; and Ship's Clerk Ben Harold, USNR.

Captain Joseph H. Rochefort, USN, was recalled as a witness and was warned that the oath previously taken by him was still binding. Two witnesses entered, read the precept, and each was duly sworn.

Mr. SONNETT. Will each of you gentlemen state his name and rank, please?

Colonel LASSWELL. Alva B. Laswell, Colonel, USMC.

Lieutenant (jg) WOODWARD. Farnsley C. Woodward, Lieutenant (jg), USN.

Mr. SONNETT. Colonel, will you state what your assignment was in December of 1941?

Colonel LASSWELL. I was a translator with the communication intelligence unit—I believe we called it combat intelligence unit at that time—Fourteenth Naval District.

Mr. SONNETT. And Lieutenant Woodward, would you state your assignment in 1941?

Lieutenant (jg) WOODWARD. My assignment in 1941, I was attached to the same organization and I had several duties among which was cryptanalysis.

Mr. SONNETT. During the first week of December, 1941, certain messages were received by that unit for decryption and translation, which were messages of the Japanese Consul, were they not?

[542] Lieutenant (jg) WOODWARD. They were.

Mr. SONNETT. And the three of you were on duty at that time?

Captain ROCHEFORT. Yes.

Colonel LASSWELL. Yes.

Lieutenant (jg) WOODWARD. Yes.

Mr. SONNETT. There has been previous testimony that those messages were received on or about December 5, 1941. Is that in accordance with your general and several recollections?

Captain ROCHEFORT. Yes.

Colonel LASSWELL. I can state that certain messages were received on the 5th, yes.

Mr. SONNETT. To the knowledge of any one of you, were such messages received by your unit prior to December 5, 1941?

Captain ROCHEFORT. No, there were not.

Lieutenant (jg) WOODWARD. No.

Colonel LASSWELL. I know of none.

Mr. SONNETT. Lieutenant Woodward, I show you a statement the letterhead of RCA Communications, Inc., listing various messages, and ask whether you have examined that document and checked the messages listed thereon.

Lieutenant (jg) WOODWARD. I have.

Mr. SONNETT. May we mark that, Admiral, as an exhibit?

Admiral HEWITT. Yes.

(The document referred to was received and marked "Exhibit 56.")

Mr. SONNETT. Mr. Woodward, this document, which is exhibit 56, sets forth messages sent by the Japanese Consul General in December and November, [543] 1941, from Honolulu, does it not?

Lieutenant (jg) WOODWARD. It does.

Mr. SONNETT. Referring to the file which I show you, Lieutenant, can you identify the documents contained therein?

Lieutenant (jg) WOODWARD. I can.

Mr. SONNETT. Will you state what they are?

Lieutenant (jg) WOODWARD. Well, they are deciphered messages of which there is a translation that were taken out by me and translated by some one else.

Mr. SONNETT. And those are coded messages of the Japanese Consul General at Honolulu?

Lieutenant (jg) WOODWARD. That is right, sir.

Mr. SONNETT. Is that correct?

Lieutenant (jg) WOODWARD. That is correct.

Mr. SONNETT. Those messages are among those listed on exhibit 55, which is the RCA statement?

Lieutenant (jg) WOODWARD. They are.

Mr. SONNETT. Will you state when copies of the coded messages contained in that document first came to your attention?

Lieutenant (jg) WOODWARD. Around possibly 1:30, 2 o'clock Friday afternoon, December 5, 1941.

Mr. SONNETT. And each of the messages in the folder, according to the best of your recollection, was received by you on that day?

Lieutenant (jg) WOODWARD. That is right.

Mr. SONNETT. At about that time?

Lieutenant (jg) WOODWARD. Yes.

Mr. SONNETT. Subsequent to the receipt of those messages, Lieutenant, did you endeavor to decrypt the messages?

[544] Lieutenant (jg) WOODWARD. I did, as soon as it was determined that the other messages that we had received along with these, what they were, plain language and so forth, we immediately went to work and worked pretty far into the night on that Friday evening.

Mr. SONNETT. May we mark those as an exhibit, Admiral?

Admiral HEWITT. Yes.

(The documents referred to were received and marked "Exhibit 56.")

Mr. SONNETT. Lieutenant, exhibit 56, which is a folder containing photostatic copies of coded messages, also contains some plain language and some translations. Are the translations contained in exhibit correct translations of the Japanese messages, to the best of your knowledge?

Lieutenant (jg) WOODWARD. To the best of my knowledge, but I am not a linguist.

Mr. SONNETT. Colonel Lasswell, have you verified the translations in this exhibit 56 and can you state whether or not they are correct?

Colonel LASSWELL. I can state only that those which I made are correct, to the best of my knowledge and ability.

Mr. SONNETT. I show you, Colonel, exhibit 56 and ask if you will identify the translations contained therein which were made by you.

Colonel LASSWELL. None of these.

Mr. SONNETT. Do you know who made the translations of the messages which are set forth in exhibit 56?

Lieutenant (jg) WOODWARD. I couldn't be positive about that, no.

Mr. SONNETT. Were the translations taken from the files of the Navy Department?

Lieutenant (jg) WOODWARD. The translations that are in that book were taken from the files here, a copy of which was put in with this.

[545] Mr. SONNETT. When you say "here," you are referring to—

Lieutenant (jg) WOODWARD. Washington.

Mr. SONNETT. Washington?

Lieutenant (jg) WOODWARD. That is correct.

Mr. SONNETT. In addition to the messages contained in exhibit 56, which you testified were received on December 5, 1941, there were certain other messages received, were there not, at that time?

Lieutenant (jg) WOODWARD. There were.

Mr. SONNETT. Will you describe what those messages were?

Lieutenant (jg) WOODWARD. Well, they were plain language and they were in some less secret systems, none of which are in this book.

Mr. SONNETT. What did the plain language messages relate to?

Lieutenant (jg) WOODWARD. I do not know. I didn't translate them.

Mr. SONNETT. Colonel, did you have any connection with the plain language messages received on or about December 5, 1941?

Colonel LASSWELL. Yes, I hastily read a number of them, many of which dealt with the exchange of certain amounts of money as transportation expenses, etcetera, of personnel connected with the consular department, passing through Honolulu. Many of them were concerning the transfers and movements of certain consular personnel.

Mr. SONNETT. Were there any of the plain language messages which were so received prior to the attack of December 7th which dealt with defense preparations or movements of ships at Pearl Harbor?

Colonel LASSWELL. There was no such information, to the best of my knowledge, contained in any message there.
